The outline of the arrangement, as it is called, made by the envoys of the Tycoon has just been made known. The document was signed on the eve of their departure from Paris by the Ambassadors and by M. Drouyn de Lhuys, the Minister of Foreign Affairs. It includes, in the first place, a satisfactory settlement of the difficulties which had arisen out of the hostile act perpetrated against a French Government vessel; secondly, it guarantees during the entire existence of the Treaty of 1858 the continuance of the reduced scale of import duties agreed to as compensation for the temporary adjournment of the opening of certain of the treaty ports. By this the duties on French wine and spirits, which before amounted to 35 per cent., and those on the other principal articles of French industry and commerce, which were twenty per cent., are all reduced to about 5 or 6 per cent. only. The envoys handed to the Emperor on the 3rd of May last a written expression of regret on the part of the Tycoon for the assassination of Lieutenant Camus. They have since paid the sum of 192,500 francs (£7,700) to the family of the murdered officer, by way of compensation, and they undertake that the Tycoon's Government shall take all necessary measures for the discovery and punishment of the assassins.

AMERICAN DESPATCHES ON JAPAN.

MR. SEWARD TO MR. PRUYN.

WASHINGTON, JUNE 6, 1863.

SIR,—Your despatch of 16th of February (No. 10) has been received. The President cheerfully leaves you to exercise your own discretion as to the waiver of any points that may arise between yourself and the Government of the Tycoon in regard to the change of the location in Yedo for the residence of our legation. You are, however, to confer, and if possible, agree upon the subject with the representatives of the other treaty Powers.

The letter of the Mikado to the Tycoon is ominous of serious disturbance of the relations which have recently been inaugurated with so much effect through the concert of the principal maritime Powers, and which has promised such great advantages to the general cause of progress and civilisation. You will represent to the Ministers of Foreign Affairs that it is not at all to be expected that any one of those Powers will consent to the suspension of their treaties, and that the United States will co-operate with them in all necessary efforts, and by the use of all necessary means, to maintain and secure the fulfilment of the treaties on the part of the Japanese Government. In communicating this determination, you will take care to avoid, as far as possible, any expressions which might be regarded as disrespectful or minatory, while you will, on the other hand, leave no room for the supposition that this Government can separate itself, in any way, from the interests of the other treaty Powers. The occasion is one of such great importance that I have thought it expedient to communicate to those Powers a copy of this paper, together with such portions of your despatch, as are necessary to its elucidation. I am, Sir, your obedient servant,

WILLIAM H. SEWARD.

Robert H. Pruyn, Esq., &c., &c., Yedo.

WASHINGTON, June 29, 1863.

SIR,—Your despatch of April 10 (No. 15) has been submitted to the President. It is an occasion of sincere regret that the Government of Japan has not been able to guarantee the safety of foreigners sojourning in the country, and that it has thus been brought to the necessity of yielding to demands of indemnity under coercion. I am bound to believe that that crisis which you have informed me was approaching has now actually passed. I can give you, therefore, only instructions with reference to what may be expected to be the condition of affairs existing at the time when this communication shall have reached you. It is manifestly the interest and the duty of all the Western Powers to maintain harmony and good accord in Japan. We have not only a right, but also good reason for supposing that Her Majesty's Government will not seek any conquest or exclusive advantage in that empire as a result of any conflict which may have taken place. So long as the operations of the British Government shall be confined to the attainment of the objects announced in preliminary communications it will be your duty to lend to them all the moral support in your power. And the naval forces of the United States which may be present, while protecting the American lega-

Digitized by Google

tion and American citizens sojourning there, will take care not to hinder, oppose, or embarrass the British authorities in the prosecution of those objects. The United States, having no grievances of their own to complain of against Japan, will not unite in hostilities against that Government, but they will, at the same time, take care not to disapprove of or censure, without just cause, the measures which great Britain adopts to obtain guarantees which, while they are necessary for her, must also result in the greater security of all the Western nations.

I am, Sir, your obedient servant,

WILLIAM H. SEWARD.

Robert H. Pruyn, Esq., &c., &c., Yedo.

WASHINGTON, July 7, 1863.

SIR,—I have the honour to acknowledge the reception of your several despatches bearing the dates and numbers following, namely—April 30, No. 16; May 1, No. 17; May 1, No. 18; May 1, No. 19; May 2, No. 20; May 3, No. 21; May 3, No. 22; May 4, No. 23. I have also received from George S. Fisher, the United States Consul at Kanagawa, two despatches, one of which, numbered 15, bears the date of May 7, and the other, written under the date of May 8, is marked 17.

Speaking in a practical sense, I may observe that all these papers advert to the critical condition of the relations between the Western treaty Powers and Japan, which has arisen subsequently to the demand upon the Tycoon for indemnities which has been made by the British Government, or, at least, that the various questions which the despatches present are to be considered in view of that extraordinary condition of affairs.

The leave of absence for six months, within the next year, which you have solicited, will be granted, if the political crisis that now exists in Japan shall, in the meantime, pass off without producing any change inconsistent with, or adverse to, the relations created by the treaty now existing between this country and that empire. * * * *

I have carefully read your two notes addressed to Mr. Neale, her Britannic Majesty's Chargé d'Affaires, in relation to the demand he has made upon the Tycoon's Government, and it gives me pleasure to say that I find nothing in them to disapprove. The counsel that you gave Mr. Neale was not obtrusive, and it seems to me to have been quite discreet as well as humane. On the other hand, this Government, if it were disposed to be querulous, might well complain of some injurious statements and reflections which have found place in Mr. Neale's portion of the correspondence. Nevertheless, the President permits me to pass them by, for two reasons: First. The goodwill of the United States towards Great Britain and all the other treaty Powers in regard to Japan, is impressed upon the records of our diplomatic intercourse with them. As yet it has not even been questioned; and it is not likely to be questioned by any one of those Governments, or by an agent authorised to speak in their behalf. Secondly. The common interests of civilisation and humanity require that there shall be concert and unity among the treaty Powers, in the present crisis, unobstructed by jealousy, or suspicion, or unkind debate of any sort. From all the papers before me I learn that this was the situation of affairs at Yedo on the 8th of May—namely, that the British legation had demanded indemnities, which must be conceded on or before the 21st, or else that the British fleet would proceed to hostilities against Japan. Secondly. That the French naval forces were prepared to act in concert and co operation with the British. Thirdly. That it was doubtful whether the indemnities would be seasonably conceded by the Tycoon Government. Fourthly. That if that Government should conclude to yield the indemnities, yet that, under the auspices of the Mikado and a combination of Daimios hostile to the foreign policy of the Tycoon, a civil war was very likely to break out. Fifthly. That a popular excitement was prevailing which rendered the continuance of peace uncertain in every event, and that foreigners were assaulted and put in jeopardy of their lives by armed bodies of Japanese, and among such foreigners were several Americans. Sixthly. It may be inferred from this circumstance that whatever claims the citizens of the United States might have to friendship, protection, or even freedom from danger, such citizens are likely to be confounded with all other foreigners in any uprising or disturbance of the public peace. Seventhly. The *Wyoming*, at the date of these despatches, had gone to Hong Kong for repairs. I learn here, however, that her repairs were completed on the 27th of April, and that she was then about to proceed to Kanagawa, so that she probably was there as early as the 21st of May, the day finally appointed for the decision of the Tycoon's Government to be communicated.

I shall now give you the President's opinion of your duty, and that of the commander of the *Wyoming*, in view of the situation which may be expected to be existing when this despatch shall have reached Japan. Your whole moral influence must be exerted to procure or preserve peace between the other treaty Powers and Japan, based, if necessary, on a compliance, by the latter Power, with the terms prescribed by them, inasmuch as it is not doubted that those terms will be demanded simply with a view to the necessary security of foreigners of all nations remaining in Japan.

Second. If the authorities of Japan shall be able to excuse themselves for the injuries which Americans may have suffered at the hands of Japanese subjects, and shall in good faith have granted adequate indemnities, or be proceeding to afford them, and also shall be able to guarantee the safety of American residents, the subject may rest; and while there the *Wyoming* will not commit any hostile act against the Japanese Government or Power. But, on the contrary, if in your judgment it shall be necessary for the *Wyoming* to use her guns, for the safety of the Legation or of Americans residing in Japan, then her commander will employ all necessary force for that purpose. If the members of the Legation, or of the consulates, find it at any time unsafe to remain in Japan, they will, of course, seek a safe retreat as convenient as possible, and will report to this Department. While executing these instructions you will, so far as may be in your power, continue to cultivate friendly sentiments on the part of the Japanese Government, declaring, however, to them and to the representatives of the other Powers, that in doing so you are seeking no exclusive or distinct advantage for this Government, but only the common interests of all nations in that extraordinary country.

The Secretary of the Navy will give all necessary instructions to the commander of the *Wyoming* in harmony with the views of the President expressed in this despatch. I am, Sir, your obedient servant,

WILLIAM H. SEWARD.

Robert H. Pruyn, Esq., &c., &c., Yokohama.

WASHINGTON, July 10, 1863.

SIR,—I have just received your despatches of May 8 (No. 24), May 8 (No. 25), May 11 (No. 26), May 12 (No. 27). By these papers I learn the definitive propositions which had been submitted by the British and French legations at Yedo to the Tycoon previously to the 11th of May, and their purpose to adopt coercive measures in concert, after the 21st of that month, if these propositions should be rejected. I learn also from the same despatches the divisions and distractions there existed in the Japanese councils, and that the people were in an excited condition, which foreboded either the outbreak of civil war, or, more probably, the acceptation of a foreign war; and, most painful of all, the papers confirm the accounts which had before been received from the Consul at Kanagawa of unprovoked violence committed at that place upon American citizens by subjects of the Tycoon.

It is a source of much satisfaction that the *Wyoming* had returned to that port in the midst of these occurrences, as had already been anticipated by the Government here. On a careful review of all these facts it is believed that there is no necessity to modify the instructions which were given you in my despatch of the 7th inst. (No. 43).

In regard to the acts of violence committed upon the persons of American citizens, it is presumed that you have required that the offenders shall be brought to punishment by the Tycoon's Government without delay. It is left in your discretion whether, under the circumstances which shall be existing when this despatch shall reach you, it is expedient to insist upon pecuniary forfeitures, or compensation to be paid by the Government in addition to the punishment of the offenders. If you think it expedient, you are at liberty to say to the Ministers of Foreign Affairs that the President has reserved this question for consideration after the difficulties now existing between the Government of the Tycoon and the British Government shall have been adjusted, and the peaceful condition of affairs which prevailed before the disturbance occurred shall have been renewed.

The President is profoundly sensible of the inefficiency of the instructions you have heretofore received for your safe guidance in an emergency that was not foreseen, and could not be anticipated. When the instructions now given you shall have arrived, the condition of affairs in Japan may be such as to render them inapplicable. Under these circumstances, you must exercise a large discretion, governed by two primary considerations, namely: First, to deserve and win the confidence of the Japanese Government and people if possible, with a view to the common interest of all the treaty Powers; secondly, to sustain and co-operate with the legations of those Powers in good faith, so as to render their efforts to the same end effective. It may be not altogether easy to apply these two principles in the conduct of details. You will, however, make the best effort to do so, and will be permitted to judge which of them must give way in any case of irreconcilable conflict.

I am, Sir, your obedient servant,

WILLIAM H. SEWARD.

Robert H. Pruyn, Esq., &c., &c., Yokohama.

Department of State, Washington, September 1, 1863.

SIR,—Your several despatches have been received, which bear dates and numbers as follows: —

May 26, No. 29; May 26, No. 30; June 12, No. 31; June 15, No. 32; June 15, No. 33; June 16, No. 34; June 17, No. 35; June 18, No. 36; June 20, No. 37; June 22, No. 38; June 23, No. 39; June 24, No. 40; June 24, No. 41; and June 24, No. 42.

Due acknowledgments will be made to the French and British Governments for the hospitalities and sympathies which were extended to you by their respective Ministers on the occasion of your being driven from your residence in Yedo.

Your proceedings in relation to the claims of Switzerland, Belgium Austria, Denmark, Sweden, and Brazil, to enter into treaty relations with Japan, are approved.

Several very important subjects are presented for consideration in your despatches. First, the destruction by fire of the residence of the legation at Yedo. Secondly, your removal of the legation to Yokohama. Thirdly, the differences between the British Government and that of Japan. Fourthly, the order of the Tycoon, requiring foreigners to withdraw from the empire. Fifthly, the questions between Japan and the United States which have resulted from the occurrences thus brought under review. It will be proper to draw into connection with this last topic the violences which have been committed against some of our citizens, as reported to this department in your previous communication of the 12th of May last, No. 28, and which were commented upon in my instructions of the 10th of July last.

Having taken the President's directions I proceed to consider these interesting and important questions.

1st. The facts submitted by you raise a strong presumption that the act of firing the residence of the legation was committed by incendiaries, with a purpose at once political and hostile to the United States, and that the Government of Japan could probably have foreseen and prevented it, and that they have, at least, given to it tacit assent and acquiescence.

2nd. The President is satisfied that your removal of the legation from Yedo to Yokohama was prudent and wise, in view of the circumstances then existing in Japan, and the proceeding is approved. But it is equally clear that the Government of Japan ought to have so controlled those circumstances as to have rendered the removal unnecessary; and that it is bound to provide for your safe return to Yedo, and for the secure and permanent re-establishment of the legation in that capital.

3rd. Your proceedings in regard to the controversy which has arisen between the British Government and that of Japan appear to have been conciliatory, and to have been equally just and fair towards both parties, without at all compromising any rights of the United States, and they are approved.

Digitized by Google

4th. It is with much regret that the President has arrived at the conclusion that the Government of Japan has failed to keep its faith, solemnly pledged by treaty, with the United States. This regret is rendered the more painful by the reflection that this Government has, from its first acquaintance with Japan, conducted all its intercourse with the Tycoon with the utmost sincerity, frankness, and friendship. The United States have constantly conceded, on their own part, and sought to conciliate other Powers in their intercourse with Japan. If our advice had been followed the dangers which now threaten the empire would have been averted, and Japan would have been able to profit by a peaceful yet free and equal intercourse with all nations. Even now, although the Government of Japan has done so much and suffered so much to be done to alienate and injure the United States, the President is still disposed to persevere in the same liberal and friendly course of proceedings which he has hitherto pursued in regard to Japan. But the friendship of this country cannot be secured by the Government and people of Japan, nor would it be of any avail, if the United States should fail to maintain their own dignity and self-respect in their intercourse with Japan with the same firmness which they practise in regard to all other nations.

1. You will, therefore, demand of the Government of the Tycoon prompt payment of a sum sufficient to indemnify all the losses which were sustained by yourself and other members of the legation on the occasion of the firing of your official residence.

2. You will demand that diligent efforts be made to discover the incendiaries and bring them to condign punishment.

3. You will demand proper and adequate guarantees for your safe return to Yedo, and the permanent re-establishment of the legation there without delay.

4. You will insist on the full observance of the treaties between the United States and Japan in all the particulars which have not been heretofore waived or postponed by this Government.

5. You will demand a reasonable indemnity, to be fixed by yourself, for the injuries which have been sustained by any American citizens from any acts of violence committed against them by Japanese subjects. And you will further demand that diligent efforts be made by the Tycoon's Government to bring the aggressors to justice, and to inflict upon them such punishment as will be calculated to prevent further outrages of the same kind.

You will employ the naval force at your command to protect yourself, the legation, and others of our countrymen, under any circumstances which may occur; and you will inform the Government of the Tycoon that the United States will, as they shall find occasion, send additional forces to maintain the foregoing demands.

So far as you may have occasion to counsel or act in relation to the controversy which is pending between Great Britain and Japan, you will be guided by the letter and spirit of previous instructions from this department.

You will send to me authenticated and verified accounts of the losses which have been sustained by yourself and other members of the legation by the burning of your residence in Yedo, to the end that an application may be made to Congress for an adequate appropriation for the proper indemnity.

It is hardly necessary to say that you will, so far as is possible, execute these instructions in no spirit of resentment, or even of anger; but, on the contrary, while exhibiting the necessary firmness, you will make it manifest to the Tycoon's Government that the novel and perilous circumstances which attend its situation are fully understood and appreciated by the President; and that he desires, with the utmost sincerity and friendship, to favour the interests of internal peace in Japan, and of peace between that country and the several Powers of Europe and America.

I am, &c., WILLIAM H. SEWARD.

Robert H. Pruyn, Esq., &c., &c., Yokohama.

BRITISH POLICY IN JAPAN.

Lord Grey has given notice of the following resolutions for Friday, July 1:—

"1. That the relations between this country and Japan appear to this House to be at present in a highly unsatisfactory state.

"2. That it is shown by the papers laid before Parliament by command of Her Majesty that the treaty concluded between Her Majesty and the Tycoon of Japan on the 26th August, 1858, gives to British subjects in Japan rights and privileges which the Government of that country was avowedly reluctant to grant, and was only induced to confer upon them through dread of British naval and military power.

"3. That the Government of Japan has also been induced, by this same fear, to make with other European nations and with the United States treaties generally similar to that which it has concluded with Her Majesty.

"4. That under the above-named treaty British subjects are entitled to claim admission into certain portions of the territory of Japan without being subject to the jurisdiction of its Government, Her Majesty having taken upon herself the obligation of enforcing on their part good conduct and obedience to the law.

"5. That the reports of Her Majesty's diplomatic servants show that Her Majesty has not been able to fulfil this obligation; the provisions of the statutes authorising Her Majesty's Consuls to try and punish British subjects for offences committed in Japan, and the means available for carrying these laws into effect, have proved altogether insufficient to prevent gross outrages and insults from being inflicted on the people of Japan by British subjects and persons assuming that character.

"6. That the animosity against foreigners excited in the minds of the Japanese by these outrages and insults has increased the repugnance long felt by the most powerful classes among them to increased intercourse with European nations, and has led to the perpetration of some murders and several daring and desperate attacks upon foreigners, diplomatic servants, and other subjects of Her Majesty having been among the sufferers from these acts of violence.

"7. That the Government of the Tycoon has professed the strongest desire to prevent the commission of these crimes and to punish their perpetrators, but has declared itself unable to do so; nor does there appear to be any reason to doubt the truth of these declarations, since two Tycoons and a Regent of Japan have themselves been murdered; and one of the principal Ministers narrowly escaped the same fate, owing to the hostility they had incurred from being supposed to favour an increased intercourse with foreigners.

"8. That in order to enforce a demand made by Her Majesty's Government of redress for the murder of a British subject, it was found necessary to undertake hostile operations against one of the Daimios, in the course of which considerable loss was experienced by Her Majesty's ships, and a large and flourishing Japanese town was burnt to the ground.

"9. That this experience of what has already taken place leaves little hope for the future of its being possible to avert fresh collisions between Her Majesty's subjects and the Japanese if the existing arrangements for regulating the intercourse between them are maintained unaltered; and if such collisions should occur they must, sooner or later, lead to a war which would necessarily cost many lives and much money both to this country and to Japan, and would probably bring upon the latter the heavy calamities of general anarchy and confusion, from the destruction of its existing Government, while there would be no means of creating any other authority to replace it.

"10. That, apart from all higher considerations, the true interests of this country, and especially its permanent commercial interests, require that such calamitous results should not be risked by maintaining the existing treaty with Japan unaltered, and that it is desirable that the provisions of this treaty should be so modified as to place the future intercourse of the two nations on a better footing for the future.

"11. That it would therefore be advisable that Her Majesty's servants should without delay enter into friendly communication with the Government of Japan and with the Governments of other nations having treaties with Japan similar to our own, for the purpose of determining what changes it would be expedient to make in the provisions of these treaties.

"12. That an humble address be presented to Her Majesty to lay before Her Majesty the substance of the foregoing resolutions, and humbly to pray that Her Majesty will be graciously pleased to take the same into her serious consideration, with the view of adopting such measures as may be found best calculated to avert war between this country and Japan, and to promote an increase of trade and friendly intercourse between the two nations to their mutual advantage."

THE CIVIL WAR IN CHINA.

(To the Editor of *The Times*.)

SIR,—In behalf of an absent officer, whose conduct on a recent occasion has been severely animadverted upon in terms of censure, I beg to enclose the copy of a despatch from our Minister in China to Lieutenant-Colonel Gordon, in reply to my brother's statement, explaining his reasons for reassuming active operations; and I trust, with that ready sense of justice always afforded by you, you will give this enclosure (only received by me this morning) an early insertion in your journal.—I am, Sir, your obedient servant, H. W. GORDON.

June 13.

"Peking, March 12, 1864.

"Sir,—I have received your letter of the 6th of February, stating the reasons that have led to your continuing operations in concert with the Governor of Kiangsoo. I informed the Chinese Government that I did not feel called upon to interfere with the course you have taken, but that my acquiescence was founded on the passage in their despatch to me, which states that in any future operations in which a foreign officer is concerned the rules of warfare as practised among foreign nations are to be observed, and that I should enclose you the extract of that despatch for your guidance, and as containing the arrangements agreed upon for the future.

"I have received the strongest assurance that it will be strictly adhered to, and that the Governor Le is to be instructed to that effect. I need not impress upon you how essential it is that there should be no repetition of the occurrence at Soochow.

"I fully appreciate the motives that led you, after the correspondence that has taken place, to resume operations at once, and to expose yourself thereby to hostile criticism. You might have limited yourself to a statement of the reasons which rendered the step expedient, and have thrown upon others the onus of decision before committing yourself to any action.

"But you appear to have felt as commander of a Chinese force and as the only person thoroughly acquainted with its composition and with the dangers to which this force, if indiscreetly handled, might give rise, that the decision must be based on your representations, and you therefore assumed its responsibility.

"This honourable and manly conduct on your part entitles you to a frank expression of my opinion on the subject.

"I think it due to you to state that my concurrence in the step you have taken is founded in no small measure on my knowledge of the high motives that have guided you while in command of the Chinese force, of the disinterested conduct you have observed in pecuniary questions, and of the influence in favour of humanity you exercised in rescuing Burgevine and his misguided associates from Soochow.

"I am aware of the perseverance with which, in the face of serious obstacles and much discouragement, you have steadily pursued the pacification of the province of Kiangsoo. In relieving it from being the battlefield of the insurrection, and in restoring to its suffering inhabitants the enjoyment of their homes and the uninterrupted exercise of their industry, you may console yourself with the assurance that you are rendering a service to true humanity as well as to great material interest.

"It would be a serious calamity and addition to our embarrassments in China were you compelled to leave your work incomplete, and were a sudden dissolution or dispersion of the Chinese force to lead to the recurrence of that state of danger and anxiety from which, during the last two years, Shanghai has suffered.

"Her Majesty's Government cannot be expected to garrison Shanghai indefinitely, and tranquillity cannot be relied on until a civil administration suited to Chinese ideas and habits is firmly established in the province, and until the disorderly and brigand elements which forms the force of the

Digitized by Google

Taiping insurrection is either put down or so thoroughly repelled from its frontiers as to leave that unfortunate province in peace.

"To the force under your command we must look for that result, and to its efficiency and discipline your presence is indispensable. In a body so composed a state of inactivity is full of danger, and I approve your not awaiting the result of the inquiry into the Footai's proceedings at Soochow, provided you take care that your efforts in favour of humanity are not in future defeated by the Chinese authorities.—I am, Sir, your obedient servant, "FREDERICK. W. A. BRUCE.

"Major Gordon, R.E., &c."

THE CIVIL WAR IN CHINA.

(To the Editor of *The Times*.)

SIR,—Permit me to draw attention to the letter of Sir F. Bruce to Major Gordon, published yesterday.

Sir F. Bruce approves the conduct of Major Gordon in passing over the treachery of the Chinese provincial authority, who succeeded in making Europeans a party to a cruel massacre at the capture of Soochow.

Our Minister sets forth at some length the grounds for his acquiescence in a return to action upon Major Gordon's part. They are in substance these:—That the force which has been organised at Shanghai under the authority of Sir F. Bruce is composed of elements so dangerous that a state of inactivity is fraught with peril, not only to the Chinese generally, but, be it observed, to the foreign settlement of Shanghai; that Major Gordon had actually been compelled to find the force immediate employment, its disbandment being considered too unsafe to be thought of. Upon these grounds Sir F. Bruce conceives he is justified in still supporting the Chinese governor, very many miles beyond the radius. Can there be any stronger condemnation of such a policy, if, indeed, as Mr. Cobden asks, Sir F. Bruce's course deserves the name, than the reasons which he himself furnishes in support of it? He seems to be swayed to and fro as circumstances appear to him to render expedient, but the result will be a condition of confusion, from which it may require direct intervention to extricate ourselves.

I have through my refusal to adopt the course pursued by Sir F. Bruce, endured no little misrepresentation and censure, but I adhere unflinchingly to my conviction that, as in the present instance, evidence will from time to time be forthcoming to prove how egregiously wrong is our present line of action in China, which I have no hesitation in declaring is dictated rather by considerations of personal comfort and convenience than by a regard to the great interests of England and China.

I am, Sir, your obedient servant,

Reform Club, June 17. H. N. LAY.

THE CEYLON COMPANY.

The second annual meeting of the shareholders of this company was held on the 14th inst., at their offices, East India House Chambers, Leadenhall-street. Mr. LAWFORD ACLAND in the chair. The following is the substance of the report of the directors:—

"The net profit of £30 498. 9s. 4d. has been realised during the year. As the capital paid up, including the debenture capital, is considerably under the amount the company contemplate making use of, this result must be considered satisfactory. The directors propose a dividend at the rate of 10 cent. per annum, and a bonus of 2½ per cent. on the paid-up capital, amounting together to 10s. 6d. per share, be declared payable, free from income-tax, on the 17th instant; this, with the interim dividend paid in December, will absorb £14,358. 15s., and they propose to transfer £10,000 to the credit of a reserve fund, and to carry forward the balance of £6,303. 2s. 2d. less the directors' remuneration for the two years. The accounts received from the managers in Ceylon and Mauritius convince the directors they may safely recommend an increase of the paid up capital. The endeavours of the directors to raise capital on debentures have been eminently successful; and as the security they offer is undoubtedly good, they hope it will be unnecessary to make any further calls on the shares already placed, but they are of opinion that it is desirable now to increase the basis of their operations by issuing the 6,200 shares which have not yet been allotted, and they propose, in the first instance, offering them to those who may be shareholders on the 30th day of the present month of June, in the proportion of one to three of their respective holdings, at a premium of £2 per share. This premium will be carried to the reserve, and will raise that fund to £22,400.

The report having been taken as read,

The CHAIRMAN said he was anxious, before moving its adoption, to address a few observations to the meeting. The figures laid before the shareholders spoke, he thought, for themselves, and he hoped they would be deemed satisfactory by all parties. The accounts showed that the investments of the company, which last year had amounted to £87,000, were this year £319,000. The profits last year amounted to 9 per cent. upon the capital, but they were now 22 per cent., and the dividend which they proposed to pay out of them, if calculated from the dates of the payments of the calls, was equal to 14½ per cent. They had, too, set aside a considerable sum for the reserve fund, and although the amount so appriated might appear to some to be too large in comparison to their profits, yet considering, first the recent formation of the company, and, secondly, the way in which the credit of public companies was increased by the notoriety of their having a good reserved fund, he thought the shareholders would agree with him that the directors had acted wisely in setting apart such a large sum. The accounts which they continued to receive from the Mauritius and Ceylon showed them that there was still ample field for the labours of the company, and the directors on this side saw their way to investing the whole of their capital in a safe and profitable manner On former occasions they had spoken of the desirability of calling up £3 more on each share, but the question of increasing the working capital of the company had been since then under the consideration of the directors, and they thought it better to do so by issuing the shares as yet unallotted rather than by making any further calls upon those already issued. The number of shares at present on hand was 6,200, or one-third the number already issued, so that the new allotment could be made on the ratio of one to three. They would thus receive one new share for every three they at present held. As the directors could not raise on debenture a sum larger than that which remained unpaid on their shares, it must be clear to the shareholders that by means of the new issue they would extend the limits of their borrowing powers. The amount itself would be the same as that which they could obtain by a new call, that as the shares were to be allotted at £2 premium, that would give them £12,400 to be carried to the reserve fund. If this proposal met the approval of the shareholders the new issue would be made after the present month of June, and the payments on the new shares would be called up in three instalments. By means of this arrangement they would participate in the dividend to be declared on the 31st of March next.

Mr. ROBERTSON seconded the motion.

In reply to Mr. Borrodaile, Mr. Arbuthnot, and other shareholders,

The CHAIRMAN stated that several shareholders had paid on their shares in anticipation of calls, and thus the paid-up capital as given in the accounts appeared larger than would have been the case had the calls made been only those which had been paid up. That the sum of £86,000 represented the amount paid for estates purchased in Ceylon. That the mortgages held by the company were generally for a period of three years. That the advances against produce were generally made to the owners of the mortgaged estates. That the rates of interest varied from 8 to 10 per cent. That the outstanding balances did not represent bad debts, but were the amounts due for produce which had been sold in London and was not yet paid for. The company's debentures had been placed at rates varying from 5 to 6 per cent. The establishment of other companies in communication with the Mauritius, instead of operating prejudicially to the interests of the company, had tended to increase its prosperity.

The motion was then agreed to, and the dividend, as recommended, declared.

Mr. Ball was re-elected auditor, and voted £80 per annum for his services. The retiring directors were then re-elected, and a sum of £3,000 voted as their remuneration during the last two years, and £2,000 per annum as their remuneration for the future. The proceedings then terminated in the usual manner.

THE FRENCH MESSAGERIES IMPERIALES COMPANY.

The annual meeting of the shareholders of the *Services Maritimes des Messageries Imperiales* has been held in Paris.

After paying a well-merited compliment to M. Behic, for many years chairman of the company, but who has had to sever his connection with it in consequence of being appointed Minister of Commerce, the report glances at the extraordinary progress steam navigation has made in France. In 1851 steam navigation for commercial purposes was still in its infancy. The Messageries Company was then seeking a field of operation, and was in want of ships, officers, men—all that was necessary for such a complicated, delicate, and costly service It had only 16 steamers, which in that year traversed 105,000 maritime leagues, and carried only 33,000 passengers and 10,000 tons of goods. But now the Messageries Company has afloat or on the stocks 60 steamers (most of them built by French engineers), with a collective force of more than 18,000-horse power, and a measurement of 103,000 tons. It extends its operations to La Plata in the West, and to the Seas of Japan in the East. Its vessels traversed last year 450,000 maritime leagues, carried nearly 200,000 passengers and 150,000 tons of merchandise, made besides important transports for the Government in the wars of the Crimea and Italy, and have never refused it any co-operation it demanded. And the greater part of the merit of these grand results belongs, the report declares, to M. Behic.

The report then gives details respecting the situation of the company, from which it appears that the estimated value of the steamships afloat, and of the furniture in the same, and that of the ships on the stocks or being fitted out, was, on the 31st of December, 1863, 74.020,575f. 82c., which was 8,200,441f. 97c. more than at the corresponding date of 1862. The ships afloat on the 31st December last were 52 in number, of 15,870-horse power, and 87,808 tons measurement—an increase over the preceding year of four ships, 1,650-horse power, 11,816 tons. The number of steamers launched in the course of 1863 was six—*Tigre*, of 500-horse power; *Peluse* and *Mœris*, 400 each; *Dupleix*, *Labourdonnais*, and *Meinam*, each 280; but the real increase was only four, as stated, because two, the *Cephise* and *Jourdain*, were lost. The number of vessels in course of construction, at the end of last year, at La Ciotat, La Seyne, Bordeaux, and in England, was eight, of 2,450-horse power, and about 15,716 tons. The eight were—*Godavery*, *Emirne*, and *Mozambique*, each of 280-horse power; *Said*, of 400; *Nil*, *Menzaleh*, *Volga*, 320; and *Arethuse*, 250. Of the vessels launched, only two, the *Peluse* and *Mœris*, are destined for the Mediterranean, the others for the Indo-China lines; and of those in construction, the first three mentioned are specially intended for the Indo-China lines, the others either for those lines or the Mediterranean, as may be found desirable.

It appears that in the course of 1863 great progress was made with the extensive buildings for the construction and repairing of steam-engines and ships which are being raised for the company at Suez, and which, at the end of the year, covered a superficies of 13,250 metres; also with those at Saigon, in Cochin China. The company, moreover, acquired definite possession of a large piece of ground at Shanghai, in China, and constructed coal-sheds or other buildings at Aden, Pont de Galle, Calcutta, and Hong Kong.

Of the 450,000 maritime leagues which the steamships of the company ran in 1863 314 989 were in the Mediterranean and the Black Sea, 53,100 in the Atlantic, and the rest in the Indo-Chinese Seas. The average speed attained was 9.54 knots per hour, and in 1862 it was only 9.35.

Taking the Mediterranean, Black Sea, and Atlantic lines, it appears that the expenses of working in 1863 were 19,831,270f. 53c., and adding thereto those of management, assurance, sinking fund, and interest on bonds, 24,503,863f. 24c. The expenses were 5.14 per cent. more than in 1862, and the increase was exclusively in the Mediterranean and Black Sea lines; in the Transatlantic Brazil and La Plata) there was a diminution. The increase was owing, says the report, to the augumented dearness of all things on the coasts served by the company's steamers, to the oscil-

Digitized by Google

lations in the exchanges at Constantinople, the murrain in Egypt, &c. On the Mediterranean and Black Sea lines there was a decline in the number of passengers; it was chiefly in those between the different ports of Italy, and was owing to the extension of railways in that country. On the Transatlantic line the passengers increased, and on both it and the other lines there was an augmentation in the quantity of goods carried.

The receipts from the working of the Mediterranean, Black Sea, and Transatlantic lines were 19,717,833f. 3c., and were 893,141f. 67c. more than in 1862. But it will be seen that they were less than the expenses, and that, consequently, the company really needs the subvention the Government allows. On the whole, the situation of the said lines stood thus:—

	F.	C.
Recepts above-mentioned, subvention, and balance from preceding year	28,910,056	89
Deduct working expenses, assurances, &c., as above stated	23,503,863	24
Leaving	4,406,193	65
To be added as contribution from Indo-China capital	500,000	00
Balance to divide	4,906,193	65

Out of this sum were deducted 220,309f. 63c. for the reserve fund, and the directors recommended that 4,400,000f. should be distributed in dividend, the balance to be carried over to 1864.

With respect to the Indo-China lines, of which only those from Suez to Hong Kong, Point de Galle to Calcutta, and Hong Kong to Shanghai, are yet in operation, the receipts of 1863, including the subvention, amounted to 11,020,845f. 44c., and the expenses, including sinking fund and assurances, to 9,853,253f. 15c. There was consequently a balance of 1,167,592f. 29c., and 1,129,870f. 53c. of it were employed in paying interest on the capital raised for the lines.

The report says that, as is always the case with lines of navigation in a distant part of the world, various difficulties had to be encountered in 1863, and that the company had not had time to form a passenger connection. Nevertheless it carried not fewer than 3,445 passengers. Its vessels, it states, were favoured by the French, Dutch, Spanish, and even by the English, a considerable number of the passengers belonging to the higher classes of English society. This latter circumstance, remarks the report, "constitutes a success which is the more encouraging from the fact of its having been obtained in spite of the Peninsular and Oriental Company having for 24 years maintained lines of navigation beyond Suez, and being apparently likely, from the development of its lines and the number of its voyages, to leave only to the French company a small part of the traffic of British India, which it had previously carried on without any competitor." Notwithstanding this, the relations between the Peninsular and Oriental and the Messageries Companies are stated to be very friendly, and the same is said to be the case between the latter and the Royal Mail Company.

The Messageries Company, in its contract with the Government, undertook to establish a line of steamers between Saigon and Manila; but it found that it could not do so with advantage, unless the Spanish Government would alter the customs' system in the Philippine Islands, which is so contrived as to favour Spanish ships to the grievous injury of foreign. At its request, the French Government made representations to the Spanish Cabinet on the subject; but the latter refused any modification, and, in consequence, the company applied to and obtained from the French Government permission to abandon the projected Manila line, and instead to form one to Japan. An English company, which ran steamers from Hong Kong to Manila, had for the same reason to give them up. At Japan it is believed that the silk which is required for the manufactures of Lyons can be obtained on more favourable terms than at Shanghai.

Another line, which the company is under engagement to form, is from Singapore to Batavia, and it will be opened before long. The report expresses the hope that the Dutch Government will remove certain customs' restrictions which will impede its operations in the latter port. The line to Mauritius and Reunion, which was only to be a branch one from Aden, is to be formed into a main line, and so there will be no necessity for transshipments at Aden, which would have occasioned much loss of time and expense. These changes have necesitated new arrangements between the French Government and the company relative to the subventions, and they have been made on the basis that the latter shall be slightly increased, and that some accorded to the Mediterranean lines shall be transferred to those of Indo-China.

In definitive, the Messageries Company is to have:—

	Maritime leagues.
A main line from Suez to Saigon of	44,640
A branch line from Point de Galle to Calcutta	10,800
,, Singapore to Batavia	4,400
,, Saigon to Shanghai	13,720
,, Shanghai to Yokohama ..	8,280
Main line to Mauritius and Reunion	30,464
Total	112,304

The Mauritius line is to be immediately established; the Japan one on the 1st January, 1866.

The report concludes by saying that the sum set apart for dividend for 1863 will allow 55f. to be given to each share (of which 20f. have been already paid), and that the shares of the Indo-China lines, which have hitherto been kept distinct from those of the other lines, will, from the 1st January, 1864, be identified with them. On both points the meeting of shareholders expressed approbation.

Monetary and Commercial.

The directors of the Chattered Mercantile Bank of India, London, and China have declared a dividend of 10 per cent. (free of income-tax) for the current half-year, payable to the shareholders on the London register on the 1st July, and to those on the Bombay register 15 days after receipt of the outward mail of the 18th June. A call of £7. 10s. per share is to be paid on the new capital of this bank by the 1st July.

The second annual meeting of the Ceylon Company (Limited) took place on the 14th inst., when a dividend at the rate of 10 per cent. per annum and a bonus of 2½ per cent. were declared, free of income-tax, making, with the interim dividend paid in December, a total of £14,358. The chairman described the operations of the company as very successful. Their investments in the first year amounted to £87,000, but this year reached £319,000, while their profit has increased from 9 to 22 per cent. The report of the meeting will be found in another column.

The directors of the Imperial Bank of China, India, and Japan have notified that business has commenced at the premises formerly occupied by the Oriental Bank Corporation, No. 8, Walbrook.

HONG KONG AND CHINA GAS COMPANY.

The second annual meeting of this company was held on the 30th June, when it was resolved to increase the capital. The balance-sheet from the formation of the company to the 31st March, 1864, shows the expenditure to have been £45,247. The following is an extract from the report:—

"The directors are glad to intimate that the price to be paid for gas, for public lights, has been finally and satisfactorily arranged, and that the lamps, posts, brackets, &c., ordered by the Government on the terms proposed by the company, are in course of shipment. A circular has been issued intimating the rates to be charged to the inhabitants for gas, meters, &c.; and the price is such as, it is presumed, will meet with general acceptance. This being the first introduction of gas into China, it is not anticipated that the whole of the producing powers of the works can at once be brought into requisition; and as the establishment expenses will be nearly the same whether a large or small quantity is used, the measure of profit to be realised will necessarily depend upon the quantity of gas consumed. The promotion and extension of this consumption, the directors will always endeavour to encourage by fixing prices at the lowest possible rates. The whole of the shares of the company are allotted and have been called up in full. Those reserved for Hong Kong were taken up immediately when offered, but by last advices the last two instalments had not been called in. The calls have been most satisfactorily responded to both at home and in the colony, and the desire evinced by the latter to obtain the company's stock, tends to show that in the opinion of the inhabitants the undertaking will prove of a very remunerative character.

According to the monthly Circular of F. M. Page, bullion broker, the export of specie during May was:—

	Gold.	Dollars.	Bar Silver.
China	£400 ..	£167,217 ..	£11,909
Straits and Java ..	— ..	73,280 ..	1,280

The totals from 1st January being, to China, £832,139, and Straits and Java, £294,116.

The amount of bullion by the P. and O. Company's steamer *Poonah* from Southampton on the 20th inst. was, in gold: to Madras, £618; to Calcutta, £330; to Hong Kong, £5,000. In Silver: to Calcutta, £2,400; to Hong Kong, £3,680; to Shanghai, £9,140; to Hobson's Bay, £125; to Sydney, £500. Total in gold, £5,948; in silver, £15,845. Messrs. Pixley, Abell, and Langley, state, under date June 23rd, that the *Poonah* took £9,640 in Mexican dollars, and that the market is now entirely cleared of that description of coin.

ARTICLES OF IMPORT.

TEA.—There has been no speculative inquiry since our last report, and scarcely any demand for export, but prices are fully supported, except for common to fair blackish-leaf kinds of Congou, which may be quoted a shade easier. The public sales still show a marked reduction in the quantity offered without reserve. Low and dusty kinds of congou have been fully supported. There has been some inquiry for those with leaf of fair to good common quality, from 11d. to 1s. ½d. per lb. The late recovery in the fair to good flavoury kinds has been maintained, and they have been more saleable than for some time past. Fair to good Kaisow kinds remain as before. Common to fair blackish-leaf kinds have been difficult of sale, and prices may be called ½d. per lb. lower. Good blackish-leaf, as also second-class Monings and Wopaks, fully maintain the late advance. Fine to finest Monings, Wopaks, and Kaisows show no material alteration. Tayshans also show no change; some boxes of the new-make, from Canton, arrived overland, are reported sold at 3s. to 3s. 4d. per lb. Good to fine Oolongs have been in limited request; in the common sorts no transactions are reported. Souchongs have been sold at former prices. Flowery Pekoes have again sold at public sale, without reserve, at low prices. The business in Scented Orange Pekoes has been large at a further advance of fully ½d. per lb. Some purchases of common Scented Capers have been made on speculation. Good to fine of Canton make are wanted; the Foo Chow kinds remain very difficult of sale. Uncoloured Japans have been freely offered, and in the absence of export orders must be quoted 1d. per lb. lower. The public sales of Indian Tea went irregularly, fine qualities at extreme prices, but the commoner sorts at a further decline. Green Teas have been firmly maintained, owing to the moderate quantity on offer; Gunpowders especially commanding very full prices, other kinds showing no material alteration; good to fine Canton-made Gunpowders are wanted, but the fair qualities remain difficult to move; Young Hysons remain as before. The public sales of Indian Tea comprised 2,564 packages, of which about 1,800 packages were sold at irregular prices. The sales of China Tea, comprising 25,879 packages, of which 8,229 packages were sold, including 7,861 packages offered without reserve.

SILK.—The periodical public sales commenced on the 22nd, and are concluded. The quantity offered was about 2,300 bales Bengal silk, 3,700 bales China, and 1,600 bales Japan silk. The whole was allowed to pass rapidly without any biddings, the activity of the market having ceased the previous week. The accounts as to the European crop continue in the same strain, even the most sanguine not venturing to look for more than the quantity of last year, while the stock remaining of old silk is generally believed to be less. Our deliveries continue upon a very moderate scale.

COTTON.—Influenced by the unsatisfactory state of politics, the market was dull and depressed throughout the past week, and only a moderate business has been transacted at an occasional decline of ¼d. to ½d. per lb. We note sales of 600 bales China, 13d. for low, 18¼d. for fair, 18¾d. for fully fair, and 20d. for fine; with 50 bales Japan, 19¾d. for fully fair. From Liverpool the report is—China has further declined ¼d. to ½d. per lb. The transactions "to arrive," and for future delivery, are moderate, and at lower rates, particularly for China, the latest quotations being—for Egyptian, September delivery, 28½d.; China, ex quay, 18d., and June delivery, 18½d.

SUGAR.—Increasing heaviness prevailed in the market last week, partly owing to the unfavorable state of political affairs, but also in great measure attributable to the numerous cargoes now on the coast waiting orders, so that only limited sales have been effected at drooping prices, mostly 6d. to 1s. per cwt. lower than our last quotations. 4,259 bags Mauritius, offered by auction, met languid biddings, and only half was disposed of, common brown 35s. 6d. middling and good 36s. 6d. to 38s., the rest crystalized, being bought in at 44s. 6d. to 46s. By private contract 6,500 bags yellow grainy have been realised at 42s. 6d. to 44s. 3d. 959 bags Natal, in public sale, went off moderately, ordinary to fine brown 36s. 6d. to 43s., low and middling yellow 40s. 6d. to 42s. There are no sales of sugar from beyond India.

COFFEE.—The rather extensive public sales of Plantation Ceylon on Friday, amounting to 990 casks, 380 barrels and bags, went off at prices establishing a reduction of about 1s. 6d. per cwt. for the week; 160 bags good ordinary native realised 67s. 6d. to 68s.; 130 bales Mocha were withdrawn.

RICE.—The market was more active on Friday, and stiffer prices have again been paid. About 10,000 bags have been sold on the spot, white Bengal 10s. 9d. to 12s., Rangoon 9s. 3d. to 10s. 3d., and three floating cargoes, one of 750 tons Moulmein, for Liverpool, one 900 tons Nakrenzie, for London, both at 10s. 3d., and 1,600 tons, price not reported.

CAMPHOR.—At auction 140 cases China were retired, but subsequently sold at 95s. per cwt., at which figure some 500 chests have been placed during the past fortnight. Some inquiry for Japan in tubs.

CASSIA LIGNEA.—Auctions confined to 170 chests, retired; and privately very moderate business only doing at the previous currency. Buds: Nothing doing.

DRUGS.—Cubebs: Some inquiry, but nothing of great interest doing. Dragon's Blood: Steady; 11 cases at auction mostly sold at £8. 7s. 6d. to £9. 17s. 6d. per cwt. for good lump, and £6. 5s. fair. Galangal Root: Flat; 301 bags at auction, all retired. Rhubarb: Held firmly, but demand quite retail; and of 56 chests at auction, very few sold at 4s. 3d. per lb. for middling flat.

GUMS.—Benjamin: Quiet; 56 cases Sumatra at auction all retired. Damer: Steady; and of 275 cases at auction half sold at 32s. 6d. to 33s. per cwt. for fair sorts. Gamboge: Scarce and firm; only 5 cases at auction retired at very high prices.

GUTTA PERCHA.—At auction 18 tons all retired; business to a fair extent done privately, but at lower prices. India-rubber: Of 50 baskets Singapore and 50 baskets Penang at auction, the whole were retired; and of 400 baskets Assam, a few sold at 10¼d. per lb. for good ball. Private trade as restricted as possible.

HEMP.—Manila: This market has been flat; good roping offering at £35. 10s. with little or no inquiry: Lupez selling privately at £47 per ton. 331 bales at auction retired; since mostly placed at nearly that figure.

OILS.—Anniseed: Flat, with moderate trade at the lower quotation of 6s. 8d. No auctions. Cassia: Very firm at present at the higher figure of 9s. 3d., but without any known transactions. Mace and Nutmegs: Six cases at auction retired at 3d per oz.

JAPAN WAX.—Firm; and of 1,285 boxes at auction, two-thirds sold at 56s. to 65s. per cwt. for ordinary greasy to fine sauciers, and 64s. good block.

SAGO.—Small grain is 6d. per cwt. cheaper; 705 boxes at auction mostly sold at 21s. 6d. to 22s. per cwt. for fair small. Flour: 1s. 1d. per cwt. dearer; and 2,000 bags at auction chiefly sold at 16s. 6d. for fine.

TAPIOCA.—Of 914 bags Penang, about one half found buyers; good white, 3¼d.; middling to fair, 2¼d. to 2¾d.

SPICES.—Cloves: Nothing doing in Penang or Amboyna; Zanzibar firm, but 1,120 bags at auction only a few sold, at 3¾d. per lb. for middling dark. Mace: Steady, only three cases Penang at auction sold at 10d. to 1s. 7d. per lb. for inferior mouldy to middling palish. Nutmegs: Quiet, only 12 cases Singapore at auction, one-third sold at 11d. to 1s. 2d. per lb. for ordinary to fair small. Pepper: Black remains very flat, with most limited business privately at previous prices; of 1,377 bags Singapore, and 894 bags Penang at auction, about half sold, the former at 3⅝d., the latter at 3½d. per lb. White: Very quiet, and 175 bags Singapore at auction all retired.

TERRA JAPONICA.—Cutch, Pegue: This market is steady; 1,657 bags at auction, sold at 25s. 6d. to 26s. per cwt. for fair Penang. Gambier has gone back fully 6d. per cwt.; and of 1,666 bales at auction, one third sold at 26s. to 26s. 6d.; the latest quotation for good, 26s., with very limited demand.

MISCELLANEOUS.—Blacklead: Firm; 255 barrels at auction mostly sold at 15s. to 20s. per cwt. for fair to very good lump, and 6s. to 9s. 6d. ordinary to good dust. Galls: We quote Japan and China 80s. to 100s. per cwt. 33 cases China at auction retired. Musk: Only 2 caddies Tonquin at auction, sold at 17s. 9d. per oz. for pickings. Rattans have brought about former prices, and 10,328 bundles Singapore at auction sold at 4s. 3d. to 6s per 100. Sapanwood: Steady; and of 17 tons Manilla at auction half sold at £7 per ton for damaged. Mother o'Pearl shells: Nothing of consequence doing: 100 cases Manilla at auction retired. Star Anniseeds: Supplies not yet on the market: 10 cases at auction retired. Sticklac, Siam: Of 760 chests at auction two-thirds sold at 56s. 6d. to 57s. 6d. per cwt. for good, 38s. 6d. to 40s. middling small, 34s. block, and 26s. dust. The market very quiet at the close. Tortoise-shell: Only 2 cases Singapore at auction, sold at 13s. 6d. and 18s. per lb.; and 2 cases Sydney sold at 18s. with hoof at 15s. 6d. Turmeric: No China here. Moderate transactions in Java, up to 19s. 6d. per cwt.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8 to £8. 10s.; nail rod, £9. 10s.; hoops, £11; sheets, single £12; Staffordshire bars, £10; rails, £7. 10s.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £100 per ton; yellow metal, 8¼d. to 8½d. per lb.

TIN.—108s. for block; 109s. for bar. Tin plates, best charcoal, I.C. 30s. per box.

LEAD, &c.—English pig, £21. 10s. to £22; W.B, £23; shot, patent, £24; sheet, £22; spelter, £23. 17s. 6d. to £24; zinc, English sheet, £28; quicksilver, £8. 12s. 6d.

The following is from the Circular of Messrs. French and Smith:—Since our last report we have had some fluctuations in Metals, and notwithstanding the easier money market the tendency has generally been towards lower prices. Iron: Scotch Pig has declined, the present quotation being 56s. 6d. g. m. b. for cash. In Staffordshire iron the full rates are barely maintained. Welsh iron is firm at quotations. Copper: Since the reduction declared on the 10th instant, the copper market has been more firm, although in some instances secondhand parcels have been offered a little below official rates. For yellow metal the market is now very firm, most of the manufacturers are full of orders. Tin: We have had no transactions of any importance to report in this metal. All parties waiting the result of the sale, fixed for the 29th inst., in Holland, when 146,921 slabs will be offered. In Tin plates we have no improvement. Lead: This market continues very quiet. Spelter has been very firm in price, and the present quotations are £23. 17s. 6d to £24. Quicksilver: A little business has been done at £8. 12s. 6d.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

The shipping business remains very quiet, the amount of tonnage available being more than sufficient for the present requirements of the export trade. Coal freights from the outports to China are difficult to procure, except at very low rates, but ships are wanted for Singapore. Homeward charters are offering from the rice ports at 80s. to 85s. to the United Kingdom or Continent, according to the size of the vessels. Ships are also in request for teak, and tonnage is wanted from Java and Maulmain.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £37, and £1. 18s. For Shanghai: £47 and £2. 9s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £26 and £1. 5s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have ordered the Oithona to be surveyed for the conveyance of Government stores to Hong Kong.

CASUALTIES.

Accounts from New York, dated June 9, state that the Pyramid (Br. ship), from that port and Bermuda, for Shanghai, had put into St. Catherine's, and was sold there by the master.

At ST. HELENA.—May 3, Mary, from Japan; 4, Tyburnia, Coote, from Manila, and sailed, 5, for London; 5, Thos. Royden, Smith, from Shanghai, and sailed, 7, for Liverpool; April 30, Padang Packet, Huidekoper, from Padang, and sailed for Amsterdam; May 4, Antelope, Hall, from Shanghai, and sailed for Liverpool; 5, Lettice Catherine, Evans, from Shanghai, and sailed, 6, for New York; 6, H. Vincentius Van Paulo, Bolck, from Samarang, and sailed, 7, for Amsterdam; 7, J. A. U. Soltura, from Manila, Celebes, Gille, from Java, and sailed for Amsterdam; 8, Prime, from Java, Isabella Hercus, Bremner, from Hong Kong.

VESSELS LAUNCHED AND INTENDED FOR THE CHINA TRADE.—Mr. Seath, of Rutherglen, has launched a screw steamer named the Kinlin, intended for a line trading between China and Japan. Messrs. A. Stephen and Sons launched from their building-yard at Kelvinhaugh a sailing ship of 810 tons, named the *Gossamer*. This ship is to be employed in the China trade, and is the property of the extensive shipowning firm of Messrs. Potter Brothers, Liverpool. A barque, of 460 tons, was recently launched by Messrs. Taylor and Scouler, South Docks, Sunderland. She is registered for ten years, is intended for the China trade, and is the property of Mr. Avery, of North Shields.

ECONOMICAL PRODUCTION OF ICE
BY THE
French Societe des Appareis Refrigerants.

CARRE AND COMPANY'S PATENT ECONOMICAL FREEZING APPARATUS, for which the PRIZE MEDAL was awarded in the EXHIBITION of 1862, as well as a GOLD MEDAL by the FRENCH SOCIETE D'ENCOURAGEMENT, has been found to answer admirably in warm climates, as the daily increasing demand testifies.

An apparatus to produce 1lb. of ice, at an expense of a Farthing per lb., costs, including packing and accessories, delivered in Paris, £6; one to produce 2 lbs. £8. 10s; ditto, 4 lbs., £12. 6s., nett cash on delivery, without discount.

The time required varies from one hour and a-half to two hours and a-half. Large machines for Public Companies are also manufactured and cost, delivered at the Company's Works, 149, RUE MENILMOTANT, PARIS, as under:—

To produce 50 lb. per hour	£300
„ 100 lb. „	505
„ 200 lb. „	810
„ 400 lb. „	1,350

These prices include all the requisite chemicals for working the machines, as well as the indispensable duplicate pieces of the apparatus for exchanging in case of need.

These machines can be seen at work at the Company's Works, 149, Rue Ménilmontant, Paris, every Tuesday and Friday, from One to Six P.M.

Any further information, and a detailed prospectus, can be had on application to the Agent of the Company,

COOPER AND AVES

SURVEYORS TO THE ROYAL NAVY, ORIGINAL PRESERVERS OF FRESH PROVISION TO H.M.'S GOVERNMENT, EXPORT OIL AND ITALIAN WAREHOUSEMEN, PICKLE AND SAUCE MANUFACTURERS, AND WINE MERCHANTS, AND SHIPPERS OF GROCERIES IN BOND.

134, LEADENHALL-STREET, LONDON.

THE OFFICERS of the ROYAL NAVY and MILITARY MESSES ABROAD, are respectfully reminded that COOPER and AVES continue to purvey for both services, and that any commands they may be favoured with will meet with the attention which has now for half a century distinguished them in the above business.

C. & A. guarantee every one of their Preserves, Condiments, &c., to retain their good qualities in any climate.

H. AND H. LEDGER,

TRADE MARK

EXPORT OILMEN & PROVISION MERCHANTS

14, MINORIES, ALDGATE, LONDON,

CONTINUE to Manufacture their Pickles, Bottled Fruits, Jams, Jellies, Sauces, &c., with the greatest of care, for exportation, and at the same time paying strict attention to purity of quality, as will be seen by annexed extract from the "GROCER'S JOURNAL," June 12, 1863 :—

"CHEMICAL LABORATORY,

"7, BURY COURT, ST. MARY AXE, LONDON, E.C., June 4, 1863.

"SIR,—I have analysed the two samples handed me on Tuesday, the 2nd inst., and found the 'Mixed Pickles' of H. and H. LEDGER, of 14, Mineries, Aldgate, to be quite free from adulteration and made with Pure Malt Vinegar.

"I also found H. and H. LEDGER'S 'Britannia Sauce' to be free from any injurious substances.

"I have the honour to be, Sir, your obedient Servant,

"For F. VERSMANN, F.C.S., Analytical Chemist.—ED. SCHREINER."

DR DE JONGH'S LIGHT-BROWN COD LIVER OIL

(KNIGHT OF THE ORDER OF LEOPOLD OF BELGIUM)

Universally recognised to be Incomparably Superior to every other kind.

Prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, GENERAL DEBILITY, RHEUMATISM, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, and ALL SCROFULOUS AFFECTIONS.

In cases of **EXHAUSTION** and **PROSTRATION** produced by the debilitating diseases of unhealthy climates or resulting from Tropical Disorders, DR. DE JONGH'S COD LIVER OIL is much more safe and useful than the ordinary stimulating tonics, and it has been resorted to with the most beneficial effects after the whole range of these had been tried in vain. By its administration the natural appetite is revived, and the functions of digestion and humilation are improved, reanimated, and regulated; the muscular power and activity are sensibly and rapidly increased; and when its use is steadily persevered in, its peculiar nutritive and reparative properties entirely restore health and strength to the most feeble and deteriorated constitutions.

SELECT MEDICAL OPINIONS.

SIR HENRY MARSH, BART., M.D.,
Physician in Ordinary to the Queen in Ireland.

"I consider Dr. DE JONGH'S Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

SIR JOSEPH OLLIFFE, M.D.,
Physician to the British Embassy at Paris.

"I have frequently prescribed Dr. DE JONGH'S Light-Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

DR. LAWRANCE,
Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.

"I invariably prescribe Dr. DE JONGH'S Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, *and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed.*"

DR. LETHEBY,
Medical Officer of Health and Chief Analyst to the City of London.

"It is, I believe, universally acknowledged that Dr. DE JONGH'S Light-Brown Cod Liver Oil has great therapeutic power; and, from my investigations, I have no doubt of its being a pure and unadulterated article."

DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.

"I consider the Cod Liver Oil sold under Dr. DE JONGH'S guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."

"Dr. Granville has found that Dr. DE JONGH'S Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, *and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil.*"

*** DR DE JONGH'S LIGHT-BROWN COD LIVER OIL *is sold* **ONLY** *in bottles, each bottle being sealed with a stamped metallic capsule, and bearing beneath the pink outside wrapper a label with* DR. DE JONGH'S *stamp and signature; to these capsules and marks purchasers are earnestly requested to pay particular attention.*

WITHOUT THESE NONE CAN POSSIBLY BE GENUINE.

FULL DIRECTIONS FOR USE ACCOMPANY EACH BOTTLE.

VICHY.

THE PROPERTY OF THE FRENCH GOVERNMENT.

Natural digestive Pastilles.—These lozenges made with the Vichy Salts are a sovereign remedy against the maladies contracted in hot countries, and aid materially the action of the mineral water taken internally. A very agreeable sweetmeat.

Superintendence and CONTROL OF THE GOVERNMENT.

Sold in boxes containing one pound each.

PARIS, 22, BOULEVARD MONTMARTRE.

MARSEILLES, 9, RUE PARADIS.

London, 27, Margaret-street, Regent-street.

DINNEFORD'S PURE FLUID MAGNESIA has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. When combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all, in hot climates, the "regular" use of this simple and elegant remedy has been found highly beneficial. It is prepared (in a state of perfect purity and of uniform strength) by DINNEFORD and Co., 172, New Bond-street, London, and sold by all respectable Chemists throughout the World.

To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES" are engraven on the Government Stamp of each Box, without which none are genuine.

KEATING'S COUGH LOZENGES.

JUDGED BY THE IMMENSE DEMAND, this UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in Boxes, Tins, and Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all Druggists and Patent Medicine Vendors in the World.

CHILDREN'S WORM TABLETS (KEATING'S).—The great remedy for these disorders in Children can now be administered IN THE FORM OF A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective.

Prepared and sold in Tins and Bottles of various sizes by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London, E.C., and retail by all Druggists and Patent Medicine Vendors in the World.

OBSERVE the words "KEATING'S WORM TABLETS" are engraven on the Government Stamp of each Tin without which none are genuine.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour: being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty, five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

N.B.—Agents in India—Von Lintzgy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hunnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon; Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. Patients in India and the Colonies can be successfully treated by letter, by enclosing the consultation fee of £1, and medicines forwarded with secrecy and despatch. Consultations daily from 10 to 3 and 6 to 8.

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S PILLS.—DESIRABLE POSSESSION.—Without health, no amount of wealth, no means of pleasure, are of the slightest value. It is inconceivable how small a disturbance of the animal functions begets wretchedness, and how readily it may be rectified by a few doses of some purifying and regulating medicine, such as these world-renowned Pills. These have proved the best friend to mankind in every grade, in every land, and under almost every circumstance. Holloway's Pills purify the blood, rectify digestion, stimulate the liver and kidneys, and regulate the bowels. When fevers, influenza, and other ailments are epidemic, these Pills should be taken occasionally by everyone to keep the blood and system free from the seeds of the prevailing pestilence.

Summary of News from the Far East.

JAPAN.

HAKODADI.

Our Hakodadi correspondent sends us the following:—

My last was dated the 13th April, per *Phillipine*, and the *Voltigeur* leaves for Shanghai. Vessels now in port:—*Voltigeur*, *Woodville*, and *G. C. Love*, two whalers, and the Dutch man-of-war *Djambi*, which will leave for Nagasaki with the Consul-General on board. We are now enjoying fine spring weather. There is really no news to report.

NAGASAKI.

Our *North China Herald* Nagasaki correspondent informs us that the Japanese have, as yet, done nothing to detect the man who assaulted Mr. Sutton about three months ago at that port. No doubt is felt that, if they chose, they could at once lay their hands on him; but now they have allowed so long a time to elapse, it is feared the Consul will not succeed in inducing them to bring him to punishment. H.M. *Osprey* had arrived in port on the 22nd April, bringing Mr. Gower, who succeeds Mr. Myburgh as Consul at Nagasaki. H.N.M. *Djambi* also arrived on the 29th, having on board H.N.M. Consul-General for Japan, and M. Polsbroek, who will shortly leave again for Yokohama.

The Japanese Government is widening the bund in front of the settlement (this does not look like expulsion), the owners of front lots each paying $500 to aid them, in return for which he gets eleven feet greater depth of frontage. Some few individuals have refused to pay, arguing that the Government ought to do it itself, without expecting any contribution from foreigners, as the latter pay quite enough already for ground-rent. They are also filling up a swamp situated between the foreign settlement and the Custom-house, and thus making eight new lots of ground, which are to be ready within twelve months.

A fair amount of business has been done in cotton during the past month, at $26 and $27. Most of it was shipped to Hong Kong. Freights have risen to $8 per ton to Hong Kong, and $3. 50 to $4 to Shanghai, and there are no unengaged vessels in port. The steamer *Lotus* is in port awaiting sale, and there seems a good chance for her. Our correspondent complains of the want of an agent for the local post-office, as at present the residents are dependent on the agents of ships for the delivery of their letters and papers. But often vessels arrive in port seeking, and the parcels remain on board unopened, as it is no one's business to look after them.

Vessels in port: The *Canton*, loading for Liverpool; the *Glendover* and *Water Lily*, for Hong Kong; the *Delaware*, for Shanghai; the *Trave*, for Hakodadi; and the steamers *Monitor* and *Lotus* for sale. Men-of-war in port: H.M.S. *Perseus*, H.N.M. *Medusa* and *Djambi*.

CHINA.

PEKING.

Dates are to the 5th May. The Shanghai papers record the barbarous murder of an English soldier, named Line. It appears that deceased was formerly Legation gatekeeper, and on the morning of the 19th April he was found barbarously murdered in a street in the Tartar city. Investigations have been jointly undertaken by the English and Chinese authorities, but up to the date of our advices little or no light had been cast on the affair.

From the earnestness with which the Chinese officials co-operate in the action of the English Minister, it is abundantly evident that the event, however sad, possesses no political significance; and the circumstances attending the discovery of the body lead us to the same conclusion. The most probable supposition is that the man had become intoxicated, and, while in that state, had endeavoured to obtain entrance into a native house. While thus employed, he may have been set on by a band of Mingho, or night robbers, who for some time past have invested the streets of Peking. In endeavouring to escape, it would appear that he lost his cap and one of his shoes, and that he had run for some distance before his pursuers came up with him. He had put on a pair of ordinary Chinese shoes, in order, probably, that no trace of his boots might appear on the ground outside his quarters, from the window of which he had made his exit. The stocking on the shoeless foot was excessively muddy, as though there had been a long run before the actual struggle took place. This is the more likely as the locality in which he was found (a suburb of the Eastern gate of the Palace) was not likely to afford the class of house into which he probably would have endeavoured to effect an entrance.

That the poor fellow fought hard for his life was evident by the pools of blood which covered a courtyard in which it

Digitized by Google

would seem he had taken refuge. His assailants were, at least, three in number, as the wounds on his body had been inflicted by three different weapons. His head had been laid open by a sword, his left hand almost severed, apparently by a cleaver or small axe, and he had received several spear wounds in the back. A heavy club was also found, with which he may have attempted to defend himself, but which, it is more probable, had been used by his assailants. On the 21st an inquest was held by the Chinese authorities, and all the evidence attainable collected, but, up to the present, the affair has not been unravelled. We must look on it either as a case of unprovoked outrage, or of an unusual display of resentment at an injury either attempted or actually inflicted.

The Prussian Minister, Baron de Rehfues, has arrived at Peking, and has taken up his quarters at the French Legation.

TIEN-TSIN.

The report by telegram of the capture of the Danish vessels *Dannebrog* and *Frederick VII.* received at Lloyd's is not confirmed; but the following captures are announced:—On the 26th April, by the Prussian frigate *Gazelle*:—At Taku, Danish schooners *Falk*, *Caroline*, and *Catherine*. The Danish vessels *Bessie Searight*, *Therese Auguste*, and *Dannebrog* waited in port.

CHEFOO.

A lettter from this place, of 9th May, gives an account of the races, which went off very pleasantly. We extract the following:—

"The Tien-tsin ponies, represented by Magenta and Starter, were defeated by those purchased in our own neighbourhood, though the results might have been different, had not Magenta bolted in the second race of the first day's programme, not reappearing till late the same night.

"It will perhaps be gratifying to those who subscribed towards the Shanghai Cup, as well as those who are anxious to do so for our Autumn Meeting, to know that greater excitement was displayed amongst the spectators at the termination of that race than any other on the programme, with the exception, perhaps, of the Tien-tsin Cup.

"The Fates favoured us with fine weather, a good canon with 'spill' to follow, and three live visitors from Shanghai. We are, some of us, under the impression that these were the fastest pony races ever run in China. But as no one took the time and everyone took champagne, it may be but a pleasing illusion."

[By a printer's error in our last issue, the journey into the Shan-tung province was printed 120,000 miles, instead of 1,200.]

SHANGHAI.

The French Mail of March 17 arrived on May 7, and the P. and O. mail of 26th on May 12.

The following is from the *Daily Shipping News*:—

News has been received at the Taotai's yaman to the effect that Tanyang was taken by the Imperialists on the 13th of May. No particulars as to whether the conflict was or was not severe, or as to the mode of attack, have as yet reached us.

A large number of foreigners, and an immense crowd of Chinese, which we have heard estimated by persons well capable of judging, at nearly two thousand, assembled on the 18th May outside the South gate to witness the execution of the murderer of Mr. Dore. The execution had been fixed for ten A.M., and with a punctuality which surprised the foreign spectators, the judicial procession reached the ground at only ten minutes past the appointed hour. A small awning had been erected at one end of the execution ground, under which the Che-hien and Messrs. Alabaster and Johnston took their seats as soon as they arrived on the ground. The prisoner walked, with his hands tied behind his back, between two rows of spearmen and swordsmen, who drove back the crowd of Chinese, and formed a ring round the spot, in front of the awning, selected for the execution. They were not, however, equally successful in keeping away the foreigners, who pressed closely in. A short formula being read, the signal for execution was given, and the neck severed at a single blow, amid loud cries from the crowd. The whole was over within five minutes after the arrival of the procession on the ground. Considerable curiosity was manifested to obtain a sight of the head, the eyes and month of which worked in the singular manner which has often been remarked as usual under these circumstances. Directly after the execution, the authorities left the spot, and the attendants began to disperse the crowd of natives in a very unceremonious manner. A small body of Municipal police were present, including those who had been concerned in the capture of A-king; and we may mention for the satisfaction of those who may have shared in the apprehension we have heard expressed, lest another culprit should be substituted for the rear murderer, that there was not the slightest doubt as to his identity.

TAKING OF CHANG-CHOW BY GORDON.

We have received the following particulars relative to the capture of Chang-chow. It appears that the attack was directed against the south wall, in which two breaches were made, that at the eastern end being stormed by Ching's force under the leadership of Lew (Ching's successor), while Gordon, with the "Disciplined," and Ko-sung-ling at the head of the Imperialist soldiery, attacked the breach on the west. Wednesday, the 11th May (4th moon, 6th day), had been appointed for the assault. Works had been thrown up within eighty yards of the wall, and, accordingly, so soon as the signal was given, viz., at two o'clock P.M., a dense mass of Imperialists hurled themselves upon both breaches. There was some severe fighting at the eastern point of attack, but the western breach was carried in a rush, and five minutes sufficed to put the Imperialists in possession of the south wall. In half an hour the city was wholly in their hands, men having poured in from the stockades on the north, east, and west sides. The rebel loss was about 2,000, most of whom were Cantonese. Four Wangs, viz., the Gan Wang, Fu Wang, and two Yu Wangs were captured, and beheaded on the night subsequent to the attack. The above are the names of the beheaded Wangs, as reported by the Chinese since the capture, but before that event it had been understood that there were resident in the city the Hoo Wang (Chin), Tso Wang (Hwang), Teih Wang, and Tsoo-le Wang. The loss on the part of the Imperialists was comparatively trifling. During the week previous to the assault they had some two or three hundred men killed while throwing up the breastworks, but this constituted almost the total loss during the last attempt to secure possession of the city.

For some days a heavy fire had been opened at irregular intervals by the Imperialists. This, although harassing in the extreme to the garrison, was in all cases briskly returned, and with such accuracy as to show plainly that some excellent marksmen had ranged themselves on the insurgent side. Several long haired men came out of the city during the week previous to the assault. These were, for the most part, Kiang-pih men, who reported that the population numbered about 20,000, of whom 2,000 were Cantonese soldiery under the Hoo Wang (popularly known as "Cockeye"). It was arranged that in the event of an assault the Kiang-pih men were to wear white turbans, so as to save them from the indiscriminate slaughter to which the Cantonese had been doomed. The latter showed no desire to treat, and as they were, generally speaking, "old rebels," the Imperialist authorities were not sorry to have an opportunity of crushing them at a blow.

After the capture the soldiery were permitted to loot, but very little property of value was found. It is worthy of notice that Chang-chow was originally taken by the rebels under the Chung Wang Li, at 2 p.m. on the sixth day of the fourth month, while it was on the same day of the same month, and even at the same hour, that it was re-taken by the Futai Li.

The Garrison sports on the 18th and 19th of May were attended with most favourable weather, the ladies of Shanghai being present in considerable numbers. The course was in capital order, and the games went off satisfactorily. A Chinese athlete gave great amusement between one or two of the races, by a variety of extraordinary tricks, which must have convinced lookers-on of the extraordinary strength of his cranium and of the singularity of his internal organisation. His great feat was in throwing up thin pieces of stone and allowing them to fall and smash on his forehead. The races on the first day were chiefly foot-running and jumping matches; there were not many races on the second day, but the games comprised wrestling, putting the thirty-two pound shot, throwing a cricket ball, steeple chase, and a blindfold wheelbarrow race.

At a meeting of the shareholders of the Shanghai Club, held at the Club House on 14th May, G. B. Dixwell, Esq., in the chair, the rules as proposed were read to the meeting. Amendment proposed by W. Leman, Esq., seconded by P. H. Underwood, Esq.:—

Digitized by Google

"That the committee under the rules be composed of nine shareholders, in place of seven." Having been put to the vote, this amendment was carried. The rules, as amended, was then put to the meeting, and adopted. It having been put to the vote who should be elected to form the committee, the following gentlemen were duly elected :—Messrs. R. C. Antrobus, H. W. Dent, W. Keswick, R. Jarvie, P. H. Underwood, G. B. Dixwell, L. Dunlop, J. Thorne, and R. Tyson.

A second explosion has been effected in the junk at Pootung Point, by which a further portion has been removed.

The steamer *Faust* was sold for 7,000 taels, by Messrs. Wainwright and Co.

The following has been published in the Shanghai papers :—

"We the undersigned passengers by the steamer *Kiukiang*, from New York to Shanghai, wish thus publicly to express our high estimation of the seamanlike and gentlemanly qualities of her captain, S. W. Taylor, whose conduct in the discharge of his duties, so far as it has come under our observation, has met with our entire approbation. We also hereby testify to the esteem in which we hold the other officers of the ship, without exception, and that so far as we are concerned, we have no fault to find with any of them, but the contrary, and while we take leave of him and them with regret, we cordially wish them every success in life.

"B. R. ABBE, ELIZA J. BRIDGMAN,
L. WALSH, F. R. TALBOT,
M. A. WALSH, FRANK REID.

"Shanghai, May 13th, 1864."

IMPORTS AND EXPORTS.

The return of the import and export trade of Shanghai, for the year 1863, which has just been published, exhibits a large increase in the former, but a decrease in the latter, principally caused by the serious falling off in the silk trade. The result will be most clearly exhibited in the following form :—

	Imports.	Exports.
1863 ..	£29,709,575 ..	£12,227,153
1862 ..	22,863,953 ..	14,667,406
Increase ..	£6,845,622 Decrease	£2,440,253

But while an increase is thus shown of nearly four millions and a-half sterling, in the total trade of the port, the amount of duties paid fell from 4,172,019 to 2,526,621 taels, showing a decrease of 1,645,398 taels.

The tonnage of shipping shows a large increase, necessarily in consequence of the increasing imports. Thus we find the total outward tonnage for 1863 amounts to—

Tons	996,890
Against tons	723,279
Showing an increase of	273,111

Of these 554,716 were British, against 389,280 ; and 287,000 American, against 226,000 during the previous year.

The inward tonnage amounts to—

Tons	964,309
Against	724,138
Increase	240,171

Of this 530,921 was British, against 390,000 ; and 272,488 American, against 226,000 during 1862. The value of re-exports rose from £9,000,000 to £13,000,000, exclusive of treasure, which also increased from £2,000,000 to £5,000,000, the greater portion having been sent to Japan. Silk, we find, fell from 63,300 piculs in 1862 to 33,436—a decrease of 30,000 piculs, or nearly one half. Tea, on the other hand, has largely increased ; 69,026,952 lbs. left Shanghai in 1863, against 59,744,408 in 1862—an increase of nearly 10,000,000 lbs. We have only time to give the above brief summary of the report in to-day's issue, but will comment on it more fully on a future occasion.

HANKOW.

A Hankow correspondent informs us *(Daily Shipping News)* that the Governor-General of the provinces of Hoopih and Hoonan crossed over from Wu-chang to Hankow on the 8th May, in consequence of an order from Peking directing him to take the field against the rebels and banditti who are committing serious depredations in the latter province. This is the first time that His Excellency has crossed the river since he returned to Wu-chang after its recapture from the rebels, nearly eight years ago. He landed at a jetty which had been specially prepared for him, in front of the Rice Exchange, and proceeded thence to the Custom House, which is adjoining, between two rows of the high officials of Hankow. After remaining there about half an hour, he went on to the residence of the Commissioner, where he also remained a short time, and subsequently inspected the fortifications which are being constructed round the city. The next day he left for the scene of the disturbances, where his presence will, no doubt, conduce as much to the restoration of order as that of the Keang-soo Futai did to the capture of Chang-chow.

COCHIN-CHINA.

Messrs. Segassie and Co. not having observed the conditions on which they held the Opium Farm, their contract has been rescinded and the farm will, in the meantime, be carried on by Mr. Salnave, merchant at Saigon, under the control of a Government officer. The farm will be put up for sale on the 4th June, for a term of six months from 1st July.

On the subject of the proposed modifications of the treaty with the King of Annam, the *Courier de Saigon* makes the following observations :—"If it is desired to introduce modifications into the Treaty of 1863, it is only perhaps for the advantage of all parties. Saigon is the only port of the Cambodian peninsular which is accessible to European vessels ; the rich products of Lower Cochin-China and Cambodia will therefore be concentrated at this point, and be availed of by European enterprise. The native producers will find in this traffic remunerative prices, which will stimulate production and spread prosperity, riches, and civilisation over all the country ; on its part, European commerce will find at Saigon lucrative freights and valuable cargoes. Such is the object proposed by the French Government, and whatever be the impediments it may encounter in the prejudices of the routine of the natives and, above all, the bad faith of the Annamite mandarins, it is certain that nothing will cause it to deviate from the end proposed—the grandeur of France in Eastern Asia. Let us then have confidence, and patiently await the result of the negotiations which are about to commence. Let us trust that the Court of Hué will understand the reasons which have determined the French Government to apply those wise modifications to the last treaty, which ought to open to the people of Annam and to the commerce of Lower Cochin-China an era of prosperity and profound peace so ardently desired by all the world."

The specimens of tobacco sent to France from Cochin-China have been very favourably reported upon, and orders have been given to the colonial authorities to encourage as much as possible its cultivation.

JAVA.

The Governor-General has been pleased to appoint Mr. de Kock van Leeuwen Resident of Batavia in the place of Mr. D. F. Schaap, resigned on a pension. Mr. v. L. has held this post before ; the situation will therefore not be new to him.

BANDA (March).—The spice parks were in an unsatisfactory condition. During the first three months of the present year, the nutmeg crops were smaller than they had for years been known to be. During the month of February 2,247,050 nuts were gathered which produced 5,722 lbs. Mace, and about 17,976 lbs. Nutmegs. On the 6th and 9th March 5,722 lbs. Mace and 45,102 lbs. Nutmegs were delivered in the Government stores; and on the 4th March 41 barrels of Mace, 172 barrels of Nutmegs, and 7 cases Nutmegsoap were shipped to Java, leaving a balance on the 31st of that month of 24 barrels Mace, 328 barrels Nutmegs, and 8 cases Nutmegsoap ready for shipment.

The *Samarang Courant* has letters from Banjermassing which state that peace is not quite restored in that quarter. An under-adjutant and six men were lately murdered on the Barito river, and although petty chiefs are constantly coming in and making submission, they as constantly break out again. The authorities have prohibited the communication of intelligence regarding the state of affairs at Banjermassing.

A letter from Ternate communicates the following :—On the 13th March a Sangir prahu arrived in the roads here, laden with oil, and having six wounded men on board. This prahu was attacked by pirates close to the islands of Tyfore and Map, when three of the crew were killed. One of the six men wounded had since died from his wounds, which were inflicted by iron harpoons. Some days after the attack, some pirates were seen near Nakian. The steamer *Retch* had gone to search for these pirates.

The superintendent of the kina culture in Java, Dr. Franz Junghuhn, died at Lembang (Preanger Regencies) on the night of the 24th April. Dr. Junghuhn was a native of Prussia, and arrived in Netherlands India in October, 1835, as an assistant

Digitized by Google

surgeon in the Indian army. In 1838, at his own request, he was transferred to the Government Physical Commission. In 1839 he was promoted to surgeon of the second class. In this capacity he was appointed to the West Coast of Sumatra, and executed a topographical and physical survey of the Batta country, the results of which he afterwards published in a work called "Die Batta-lander auf Sumatra." He was employed in similar researches until 1848, when he visited Europe for the purpose of publishing the results of his labours. In 1855 he returned to Java, and in 1856 the direction of the kina culture in Java was confided to him. Dr. Junghuhn's health had lately failed, and he had obtained a two years' leave of absence to Europe when death overtook him.

The *Java Times* says that another large firm has failed at Sourabaya. The liabilities are estimated at nearly three and a half millions, which, however, it is expected will be paid in full.

HYDROGRAPHICAL NOTICES.—H.M. steamship *de Berkel* left Macassar on the 28th March for the Malambeang Bank off the island of Tannankeke, with the intention of placing a beacon on the same. On arrival at the place, it was found that where the shoal was thought to be, there were twelve to thirteen fathoms of water, the heavy current having apparently washed it away. H.M. steamship *Linge* has discovered a rock on the west coast of Borneo, in about 10 feet water. It lies in lat. 0. 59 south, and long. 109, 10.20 East. H. M. steamship *Sindoro* gives the following bearing of a reef on the coast of Borneo, lately discovered, and having 1¼ fathom of water on it:—Raboe Island, N.W. by W. Pandjang Island, North. Darawan Island, E. ½ S.

MALACCA STRAITS.

SINGAPORE.

Dates are down to the 3rd June. H.M.S. *Ringdove* arrived from China *via* Labuan *en route* to England on the 2nd June. The London mail of 26th April arrived out on the 30th May. The mail of 11th April, transferred from the P. and O. steamer *Candia* after the cyclone at Aden, arrived with the French mail of 17th April on 18th May. The file of the *Singapore Daily Times* is filled with extracts of English news. In the *Straits Times* of 28th May is a notice of the opening of the gas works and lighting of the town on the Queen's birthday, 24th May. The Chinese residents were amazed and delighted. There was on the same day a review, and many other amusements, the day being kept as a general holiday.

We find the following in the *Government Gazette Extraordinary*:—

"With reference to Notification No. 23, dated 12th February, 1864, his Honour the Governor has been pleased to declare that applications for export of arms to ports in China are, in future, to be accompanied by a declaration to the effect that they are not intended for the use of Chinese Insurgents.

"2. The order contained in Section 2 of the above-named notification, is cancelled."

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From London: May 19, Fychow; 11, Coulnakyle. From Cardiff: 6, Pudsey Dawson. From New York: 5, Vulcan.

The following vessel are reported by telegram:—

At SHANGHAI.—Taiping (steamer), Mackinnon, from the Clyde, Jan. 29; White Adder, Bell, from London, Downs, Jan. 12; Wild Deer, from Liverpool, Jan. 17, Lisbon, April 6.

At FOO-CHOW-FOO.—Previous to May 21, Flying Spur, Dora, Ziba, Yang-tsze, Serica, Childers (Freight for clippers £5).

At HONG KONG.—Yuen-tze-fee (str.). from the Clyde and Cape, Margaret Mitchell, from Newport, Nov. 17, Racehorse, Matthews, from Sunderland Feb. 2, (105 days).

At BATAVIA.—May, Salatiga from London, Guurtje and Maria, from Shields.

At ANJER.—May 9, Isabella, Newport to Hong Kong; Philomela, London to Hong Kong; 10, Ukko, Grimsby to Shanghai; Assyrian, London to Shanghai; Egean, Shanghai to New York; 13, Caroline Chisholm, Singapore to Liverpool; 14, Lauderdale, Shanghai to Liverpool; 22, Far East, steamer, from London for Hong Kong (85 days from the Downs).

At SINGAPORE.—From Liverpool, May 29, Bolden Lawn; from Bordeaux, 30, Prophete.

DEPARTURES.

From SHANGHAI.—For London: May 7, Keepsake. For Liverpool: 10, Unrivalled; 13, Helvellyn; 18, Eliza Nicholson; 19, Australia. For New York, 5, Luzon, and 12, Anita.

CASUALTIES.

SHANGHAI.

We have received news of the total loss of the British three-masted schooner Idas on the North Saddle Island on Saturday night (14th May) during a dense fog, and the sea running very high after the gale. The captain, his wife, and crew succeeded in making a landing, with the exception of one man who lost his life in the attempt. The sea at times breaking over the rock on which they landed, they were with difficulty rescued by a Ningpo boat, which brought them on to Shanghai, after having suffered considerable privations. They had barely sufficient time to save their lives before the vessel broke up, which occurred fifteen minutes after she struck, and of course left them completely destitute of clothing and common necessaries.

Steamer Sir Harry Parkes, Captain Cull, left Taku on the 8th May, and had fine weather across the gulf to Chefoo, where she arrived on the

Digitized by Google

following day. She started for Shanghai on the 12th, and after a very favourable run, anchored in the Wongpoo on the evening of the 15th. She brings a large cargo of cotton principally for Hong Kong. The following gentlemen arrived by her:—Lieut. Col. Moody, R.E., Messrs. G. F. Seward, J. J. McKenzie, E. Wadman, Cross, and R. A. Jamieson, together with one hundred and sixty native passengers. On the evening of her arrival in Shanghai, the first class passengers unanimously tendered a vote of thanks to Captain Cull and the officers of the Sir Harry Parkes, in token of the high value set upon the kindness and consideration experienced during the trip at the hands of these gentlemen.

The British barque Lucknow, left Singapore, March 11, had squally weather and calm in China Sea. In lat. 29.30 N., and long. 123.44 E., on May 4th, had a heavy gale of wind from N. Eastward which lasted till the 7th, split nearly a whole suit of sails, decks filled with water. On May 11, arrived at Chinhai, and on 12th, left for Shanghai, had very bad weather during the passage from Chinhai to Gutzlaff, on 13th, strong gale from eastward and heavy sea, split jib.

In our Tien-tsin news will be found reports of captures by the Prussian frigate *Gazelle*.

FREIGHTS AT SHANGHAI.

TO LONDON.—Tea £4. 5s. to £4. 10s; silk £4. 15s.

LONDON AND LIVERPOOL.—Cotton £3. 15s. to £4 per ton of 50 cubit feet.

TELEGRAMS OF THE INCOMING MAIL.

THE CALCUTTA, CHINA, AND AUSTRALIAN MAILS.

ALEXANDRIA, JULY 6.—The *Euxine* and *Poonah*, with the above mails, left here at 10 a.m to-day. The former may be expected at Marseilles on the 12th, and the latter at Southampton about the 18th inst.

JAPAN.—The expedition to re-open the Straits of Shimonoseki has sailed.

CANTON, MAY 30.—The markets are unchanged. The total export of tea to this date amounts to 111,000,000 lbs. Exchange on London, 4s. 9½d.

SHANGHAI, MAY 23.—Tea and silk unchanged. Total export of silk, 39,125 bales. Exchange on London, 6s. 6d.

PAPER ON CHINA, BY SIR JOHN F. DAVIS.

At a meeting of the Royal Asiatic Society, Sir John Davis read a paper "On the Rise and Progress of Chinese Literature in England during the first half of the present Century." Taking as his starting-point Earl Macartney's embassy to Peking at the close of the last century, when not an Englishman could be found who knew anything of Chinese, and two native missionaries had to be engaged as interpreters, he gave an account of the successful labours and career of Sir G. Staunton, who, when yet a boy of twelve years of age, had been attached to that mission as page to the ambassador. Another labourer soon appeared in the person of Morrison, who proceeded to China as missionary about the year 1807, and remained there as interpreter to the East India Company until his death in 1834. His dictionary, in six large quarto volumes (on the printing of which, between its commencement in 1817 and its completion in 1823, the East India Company expended some £10,000,) still remains as the greatest monument of literary labour in the cause of the Chinese language. It formed a wonderful improvement upon the meagre helps that existed for learning Chinese when Sir J. Davis went out in 1813 to join the same station with Sir. G. Staunton. After briefly adverting to the labours of Marshman and Milne, and to the new and practical turn that was given to Chinese studies in consequence of Lord Amherst's embassy to Peking in 1816, the lecturer proceeded to review the further philological aids to the acquisition of the Chinese language, such as Dr. Medhurst's dictionary, in four volumes octavo, completed in 1848, the Chinese and Portuguese dictionary of Padre Gonçalves, Dr. Morrison's dialogues, the "Two Hundred Chinese Moral Maxims," translated and edited by himself in 1823, Mr. R. Thom's translation of Æsop's and other Fables into Chinese, &c. Before doing so, however, he entered more fully into the question of the *roots*, their composition and their influence on the meaning of every word in the language, showing how they serve the three distinct purposes—1. of supplying, in their simple and uncompounded state, the place of an alphabet for lexicographic arrangement and reference; 2. of indicating, when combined, the derivation and meaning of compound words; and, 3, of constituting the heads of different *genera*, under which compound words are ranged like *species*. As the purport of Sir John's lecture did not extend beyond the first half of the present century, he merely mentioned the later Sinologues whose works have greatly contributed to the facilitation of the study of the Chinese language amongst us, *e.g.*, R. Morrison, Medhurst, Meadows, Wade, Parkes, Lay and Summers. Passing over to the earlier translations from Chinese literature, which he classed under the two heads—1, classical and historical, including their sacred books; and, 2, *belles lettres*, or drama, poetry, novels and romances; he noticed among the former the so-called four books and the five King, or canonical works of Confucius, the Sacred Edict, and other classical, educational and historical works, which constitute the basis of Chinese morals and politics, and then went on to the more attractive lighter literature of China. He gave an account, occasionally interspersed with extracts, of several works of the latter class, both plays and novels, *e.g.*, "The Orphan of Chaou," "The Heir in Old Age," "The Chalk Circle," "The Story of the Two Cousins," "The Fortunate Union," "White and Blue," &c.; and after discoursing on the style and character of Chinese poetry, which possesses the qualities of accent, measured numbers, and terminal rhymes in common with other languages quite differently constituted, and on the refined amusement somewhat resembling what the French call "bouts-rimés," he adverted in conclusion to the many useful services rendered in the cause of Chinese literature by the *Chinese Repository*, a monthly periodical published at Canton during the twenty years from 1831-1850, which had become the common receptacle for contributions from China scholars of all countries. Copies of the different works under consideration, as well as various curiosities mentioned in the course of the lecture, such as letters, coins, &c., had been laid on the table and were circulated among the audience.

THE "TIMES'," CORRESPONDENT ON REBELLION.

SHANGHAI, May 5.

The Taiping rebellion is now almost at its last gasp, and the rebels are fighting with the courage of despair. They only retain four or five cities, and are evidently determined to sell them as dearly as possible to their assailants. The most important among these, next to Nanking is Chang-chow, which Gordon is now besieging, and before which he has just experienced a severe reserve. Following up the success at Wa-soo, which I recorded last week, he ordered up the whole of his force from Le-yang, and advanced against Chang-chow, driving the rebels before him. They, as I anticipated, contrived to penetrate the *cordon* which had been drawn round them by the Imperialists, but only after suffering severe loss. In the several engagements which have taken place more than 10,000 of the 40,000 who issued from Chang-chow two months ago have fallen, without accomplishing any of the objects of their expedition. It was, nevertheless, well conceived, and, with a less active opponent than Gordon, might have succeeded—partially at least. Chung-wang hoped, by a sudden dash, to secure Kiang-yin and Chiang-zu, and possibly also Quinsan, while Gordon's whole force was employed the other side of Soochow, at a distance of several days' march from the cities named. Had he succeeded it would have become necessary to raise the siege of Chang-chow, and concentrate all the Imperialist troops for the purpose of driving the rebels from their new position. The same movement was tried during the siege of Soochow, but with equally ill success. Had either of the attacks which were made on Wo-kong or Chiang-zu during that period succeeded, a large portion of the Imperialist troops must have been withdrawn from the siege to watch the rebels in these cities, otherwise the road would have laid open to them all the lately-recovered portion of the province. However, it seems likely that the rebels have now made their last effort, and that at Wa-soo Gordon has gained the last battle he is likely to have to fight in the open country. He has still, however, a serious task before him at Chang-chow, notwithstanding the large force by which the city is invested, and has already incurred a crushing defeat in an attempt to carry it by storm. He arrived before the city on the 14th, and found the Imperialists, about 30,000 strong, intrenched on the north, east, and south; they had destroyed a considerable portion of the parapet, and breached the wall itself in several places, but had not ventured on an assault. They were every day receiving reinforcements, and it is estimated that, at present, they have nearly 70,000 men at or near the city. Gordon at once directed his attention to the earthworks still held by the rebels outside the west gates, and with the aid of these mandarin troops captured each in succession until, on the 26th, the garrison was completely beleaguered On the same evening he commenced to plant his batteries with a view of widening the breaches, and while so engaged had a very narrow escape from death at the hands of his own men, who mistook him and his escort for rebels, and fired into them at point-blank range. As it happened, Gordon was able to shelter himself behind some ruins, but four of his escort were killed and five wounded by this unhappy mistake. The night was dark, and they were within 100 yards of the walls, so the error was not extraordinary. European troops would, of course, have challenged, but that is a refinement of discipline to which the Chinese have not yet attained. All preparations having been completed, an assault was made on the morning of the 28th, but the storming party encountered a desperate resistance. For nearly half-an hour the fight continued in the breach with the utmost fury, and at the end of that time the disciplined troops were repulsed with a loss of 27 officers and 360 men killed and wounded. This is a serious blow to Gordon, who has been deprived at one stroke of the services of more than half his available officers, including his commandant of artillery, Col. Tapp. The defendants were principally Kwang-si men, all old rebels. They exposed themselves recklessly in the breach, and were mowed down by hundreds by the artillery and musketry of the Imperialists. The few of Gordon's men who gained the summit of the breach state that the dead lay piled in heaps around it. A simultaneous attack was made on another portion of the wall by the Imperialists; but they could not make up their minds to the desperate hand-to-hand conflict which, it was evident, awaited them. They stood at the foot of the breach and exchanged volleys of musketry with their opponents, who were sheltered behind the parapet, and thus enabled the greater part of the garrison to concentrate at the point where Gordon's men were attacking. The latter is now advancing by regular engineering approaches, and intends, I believe, to sap the wall.

A terrible picture is drawn of the desolation of the country and the misery of the inhabitants around Chang-chow. Hundreds of gaunt, starving wretches, with hardly any other means of sustenance than human flesh and the few scraps of refuse they can pick up from the Imperialist troops, wander hopelessly about, more dead then alive, amid the ruins of their villages and of the suburbs. The living are too weak to bury the dead, and the latter lie about on the ground in every stage of decomposition, tainting the air and horrifying the beholder. A correspondent, writing from the camp to one of the daily papers, says,—"It is horrible to relate; it is horrible to witness. To read that people are eating human flesh is one thing; to see the bodies from which that flesh has been cut is another. No one can eat a meal here without a certain degree of loathing. The poor wretches have a wolfish look that is indescribable, and they haunt one's boat in shoals in the hope of getting some scraps of food. Their lamentations and moans completely take away appetite which the horrors one has witnessed may have left one. I ought to be tolerably callous by this time, but no one could witness unmoved such scenes as these." The rebels have evidently swept up everything edible, and left the unfortunate inhabitants to

Digitized by Google

choe, but it is completely isolated, and may be recovered at any moment. Kiang-soo is the only district where they retain a semblance of power, and here four cities only—Nanking, Chang-chow, Kin-yong, and Ta-yang—remain in their possession. The three former are all besieged, and their fall may be looked for shortly. Thus it appears that at last our Government may look forward to being relieved from the much vexed question of interference or neutrality. It would be well if those who have advocated the latter course so persistently, though fortunately with so little effect, will at length cease from their useless remonstrances, and allow, without cavil, the final stroke to be given to a rebellion which has probably caused more misery and deserved less sympathy than any similar movement that has ever taken place.

die. It is to be hoped, however, that these scenes of horror are now drawing to a close. The rebellion is on its last legs, and within the next two months it may fairly be anticipated that Nanking will be the only city still owning allegiance to the Tien-wang. If a report which is current among the Chinese be true, that Hoochow has fallen into the hands of the Imperialists, the province of Che-keang is now completely clear of rebels. In the adjacent one of Ngan-hwey they still hold Kwan-ta-

Now that the Che-keang province has been cleared of rebels the Taotai is beginning to reduce the foreign contingents, probably as a preliminary to abolishing them altogether. The Anglo-Chinese force has already been ordered to be reduced one-half, and the Franco-Chinese are shortly to undergo the same fate. This is a very precipitate and very foolish measure. In the first place the rebels, although driven out of the province and reduced to extremity, are not so completely crushed that the mandarins can afford to dispense with the only effectual protection they possess against a fresh inroad; and in the second, directly the Anglo-Chinese contingent is disbanded, the rowdy foreigners will resume the piracy which its commandant has now nearly suppressed. The mandarins are utterly unable to do their own police, where foreigners are concerned, and until Colonel Cooke took the matter in hand, a number of scamps used to gain a livelihood by "squeezing" all the boat loads of produce which passed up and down the principal creeks in the neighbourhood. Lately he has kept detatchments scouring the country, and has arrested many and frightened off other of the marauders. When the contingent is reduced, it will all be required to do garrison duty at Ningpo. Again, by reducing the foreign contingent the mandarins throw away the only force they possess capable of dealing with the pirates who infest every creek and islet in Hangchow Bay, and at the same time that they deprive themselves of the means of repression, they are actually adding to the piratical fleet by discarding at a stroke all the Cantonese war junks which they have hitherto been employing at the siege of Hangchow. These, deprived of regular employment, will at once turn pirates.

Parliamentary Intelligence.

HOUSE OF LORDS.

JAPAN.

(July 1st.) Earl GREY, in rising to move the resolutions of which he had given notice on the subject of Japan, said that the question to which he was about to draw their lordships' attention was one which had on more than one occasion been under the consideration of the House. Up to the present moment, however, no decided opinion had been pronounced by their lordships as to the policy which had been pursued in Japan by Her Majesty's Government, and the time was, he thought, come when they ought to be asked to deal more seriously with the matter. Before he proceeded further, he might be allowed to observe that his resolutions were not intended to imply any censure on the Government, not because he approved their policy—far otherwise,—but because that which had been done could not be undone, and because to ask their lordships to pronounce a vote of censure might interfere with that expression of opinion which it was desirable to have with regard to the future. The resolutions began by setting forth what were the effects of our intercourse with Japan, and proceeded to state the inferences which he thought ought to be drawn from the facts narrated in the papers which had been laid before the House. He might quote from those papers, as well as from Sir R. Alcock's well-known work on Japan, numberless passages distinctly showing that the treaty had been entered into by compulsion. He was, however, unwilling to trespass on their lordships' attention unduly, and should therefore forbear from making those quotations. It was clearly the interference of England which led to the conclusion of the treaties between Japan and the other Powers. Our operations in China, for instance, enabled the Government of the United States to conclude a treaty with that of the Tycoon. That was the substance of his third resolution; and his next proceeded to say:—

"That under the above-named treaty British subjects are entitled to claim admission into certain portions of the territory of Japan without being subject to the jurisdiction of its Government, Her Majesty having taken upon herself the obligation of enforcing on their part good conduct and obedience to the law."

That provision of the treaty was distinctly a step of reciprocity between the two countries; but, unfortunately, on neither side had the obligation been fulfilled, as neither party was practically able to carry it into effect. The next resolution which he was about to submit to their lordships stated "that the reports of Her Majesty's diplomatic servants show that Her Majesty had not been able to fulfil this obligation," and if their lordships had read attentively the papers which had been laid on the table they would, he thought, arrive at that conclusion. In a despatch of Sir R. Alcock, dated the 23rd of November, 1859, he described the drunken sailors who went on shore at Japan day after day, offering violence to the Japanese. In the same despatch he described the conduct of others as almost equally bad. In his work on Japan Sir R. Alcock stated in much stronger language than in his official despatches his sense of those evils. Such was the testimony of our own Minister, and he feared that the feeling naturally produced in Japan by such a state of things as he described was not likely to be allayed by the conduct of the higher classes of Englishmen in showing a contempt for the prejudices of the natives. Our diplomatic agents themselves, he was afraid, were not exempt from that charge, inasmuch as he had seen it stated that notwithstanding a prohibition against firing off arms within a certain distance of the Tycoon's residence, some members of the body had gone to shoot within the prescribed limit. Their lordships would find that Sir Rutherford Alcock recorded in his own book an act of the greatest violence committed by himself. Sir R. Alcock found a private road, leading to the residence of one of the Daimios, stopped by a barrier; it was guarded by two sentinels, and he stated that if he had not used force he should have been unable to pass. *Why, under such circumstances, the sentries might have shot Sir R. Alcock on the spot; and if he had been shot on the spot he would have got what he deserved.* (A laugh.) It was acts like that which raised such a feeling in Japan against Englishmen and other foreigners. Such acts had a stronger effect in a country like Japan than they would in countries where a different system of social life prevailed. Their lordships were aware that for many centuries Japan had been ruled by a feudal system. In Japan an insult to an individual could only be washed out with blood. It was illegal to draw a sword there except in self-defence; but the person who did draw it in self-defence was punished with death if he put it in the scabbard again without having despatched his adversary. (A laugh.) The only alternative left him was that of suicide in whatever form it might be prescribed. It was scarcely to be expected that a people so sensitive of their honour would submit to outrages at the hands of Europeans. Accordingly, as every one knew, very dreadful crimes had been committed by Japanese in revenge for what they had suffered in that way. The English Embassy had been attacked, and a number of British subjects had lost their lives. He thought that would justify his next resolution, which was:—

"That the animosity against foreigners excited in the minds of the Japanese by these outrages and insults has increased the repugnance long felt by the most powerful classes among them to increased intercourse with European nations, and has led to the perpetration of some murders and several daring and desperate attacks upon foreigners, diplomatic servants and other subjects of Her Majesty having been among the sufferers from these acts of violence."

In proof of what that resolution asserted, he might refer to despatches of Sir R. Alcock and to an admirable report on the State of Japan by Admiral Hope, dated in 1862. The gallant admiral said that a gross attack made by Japanese could be distinctly traced to outrages which had been committed on the people of Japan by foreigners resident in that country. The murder of the secretary of one of the Embassies was traced to the fact that the servant of one of the Daimios had been struck by a person connected with the Embassy, and the person who received the blow had been reproached for not having instantly avenged the insult. The next resolution which he had to submit to their lordships stated:—

"That the Government of the Tycoon has professed the strongest desire to prevent the commission of these crimes and to punish their perpetrators, but has declared itself unable to do so; nor does there appear to be any reason to doubt the truth of these declarations, since two Tycoons and a Regent of Japan have themselves been murdered, and one of the principal Ministers narrowly escaped the same fate, owing to the hostility they had incurred from being supposed to favour an increased intercourse with foreigners."

He could refer to the whole correspondence in order to show that the Japanese Government were not anxious to protect persons who had been guilty of outrages on Europeans and other foreigners. He maintained that the correspondence showed the very contrary. It showed there was the strongest possible desire on the part of the Japanese Government to afford protection to Europeans, to prevent the commission of outrages upon them, and to punish those who had been guilty of such outrages. Colonel Neale testified to that fact. It was quite true that the Government of Japan was not able to effect those objects in all instances; but that this was an inability for which we should not be too ready to blame them was evident from the facts referred to in the resolution which he had just read to their lordships, facts which were shown by official documents. The abandonment of forty miles of highway by the Japanese to foreigners was a strong proof of the friendly disposition of the Government. Suppose we had been asked to give up forty miles of the Great Western road to foreigners and go to the expense of making a new road for our own people in order that they might not be exposed to meet these foreigners? The old law and practice of Japan was express that no person should remain on horseback in the presence of the Daimios. Our countrymen, however, claimed the right, not only of not getting off their horses, but of riding along the road when they were coming. He did not pretend that the notions entertained by the Japanese were consistent with civilised ideas; but if Englishmen for their own purposes chose to go to Japan and found among the people certain opinions and certain prejudices which had existed for centuries, he thought we were bound to consider those feelings and prejudices in our treatment of that people. (Hear.) What made our proceedings more offensive was, that the Japanese had by long tradition the lowest opinion of persons in trade. In Japanese society the lowest workman and handicraftsman ranked far higher than the richest merchant; and, therefore, when our merchants met these Daimios in the way he had described, great offence was taken by the Japanese. That our countrymen did so ride along the roads, without regard to the feelings of the people, was established upon the highest authority; and the Japanese might very fairly have said that in order to prevent collisions it was our duty to execute our treaty obligations, and compel British subjects to respect the law. It was in riding along a road and meeting one of the greatest princes of the land that Mr. Richardson was murdered. He was far from denying that this was a violent outrage; but, in his opinion, the demands made by the Government for redress, and the measures taken to enforce redress, were contrary alike to the law of nations, to the plainest principles of amity and justice, and to good policy. But he was willing to accept the past, and in this spirit called upon the House to affirm his resolution:—

"That in order to enforce a demand made by Her Majesty's Government of redress for the murder of a British subject it was found necessary to undertake hostile operations against one of the Daimios, in the course of which considerable loss was experienced by Her Majesty's ships and a large and flourishing Japanese town was burnt to the ground."

Digitized by Google

About these facts there could be no dispute whatever; and if the facts were correct, he asked whether they did not necessarily lead to the conclusions which he proposed to draw from them in the resolution which followed:—

"That this experience of what has already taken place leaves little hope for the future of its being possible to avert fresh collisions between Her Majesty's subjects and the Japanese if the existing arrangements for regulating the intercourse between them are maintained unaltered; and if such collisions should occur they must sooner or later lead to a war which would necessarily cost many lives and much money both to this country and to Japan, and would probably bring upon the latter the heavy calamities of general anarchy and confusion from the destruction of its existing Government, while there would be no means of creating any other authority to replace it."

Of course, if demands where made upon the Japanese Government they must be enforced, and, accordingly, in November, 1863, the Foreign Secretary informed the Admiralty that, in any case of injury sustained by British subjects, the British representative in Japan would call upon the admiral commanding our fleet there to resent such outrage, and in such cases the Admiralty were to authorise the naval officer in command to act in compliance with this requisition as far as the means at his disposal enabled him to do so. When a similar question was discussed under a former Government, a very strong opinion, and, he might add, he believed a very just one, was expressed by the late Duke of Wellington as to the principle of intrusting in the hands of Her Majesty's servants abroad the power of making war without communication with the Government at home. That power was in reality one of far too dangerous a character to permit of its being intrusted to the discretion of any subordinate officer. He need hardly remind their lordships of the danger attaching to such a power, for it was only necessary to remember the influence which local circumstances must have, and the feelings with which Englishmen were too often apt to regard semi-civilized nations with whom they were brought into contract to perceive how little advisable it would be to lodge this Power in the hands of resident officers. Her Majesty's Government had already seen the effects of granting such power to subordinate officers, for only lately they had had a specimen of its working on the coast of Africa. It was but right that Her Majesty's Government should consider the consequences of a war with Japan. He was afraid that it would entail more serious consequences than were generally imagined. At all events, he felt certain that the services not of 500 nor even 5,000 men would suffice to carry on the operations which would be deemed necessary. The House, too, should remember that the Japanese race was of an entirely different character to the Chinese, and that a war with them could not be judged of by any experience that we had had of the latter. The Japanese were a high-spirited people, always accustomed to carry arms, and those of the most dangerous description, and they had shown that a slight provocation was sufficient to induce them to risk their own lives in gratification of their revenge. In our operations, too, with the Japanese, it would be impossible to afford protection to the English subjects in the country, or to defend them from the midnight assassinations to which they would be liable. The war, therefore, must in any case prove a very serious affair. It should also be borne in mind that the disasters of the war, in consequence of the practice of building the forts and the towns in the neighbourhood of each other, would chiefly fall upon the unarmed population, whose dwellings would most certainly be destroyed. It was difficult to see either what advantage would result from the war. After having destroyed the garrison and burnt the towns on the coast, was it our intention to advance into the interior in pursuit of the enemy, who would undoubtedly retire to the mountain fastnesses of the country, and lose no opportunity of carrying on a harassing and disastrous warfare? The war could not but be attended with great expense, especially when they remembered that the Chancellor of the Exchequer had stated that the cost of two months' operations in China was £8,000,000. We had no right to regard a war with Japan as one in which every superiority was certain to be on our side. The Japanese had learnt to construct steam engines; they had purchased European arms, and they had, he believed, at that moment agents in America who were employed in obtaining rifled artillery, in order to enable their nation to be prepared for any emergency which might arise. We knew already from the defence of Kagosima that a battle with the Japanese would prove no child's play, and that we must expect to meet with serious loss in the course of our operations. We ought, therefore, to pause before incurring the hazard of a costly and ruinous war with that country. It might, moreover, be asked if the war would not be one in which success would be even more calamitous than defeat. It was not merely the direct consequences of the war which we ought to regard; we ought also to take into consideration results which, though indirect, would still be found to be important. If we succeeded in overcoming the resistance of the Japanese, the result would in all probability be the exaction of a new treaty imposing more onerous conditions upon the people of that country than they had hitherto laboured under. It was well in considering the question to glance for a moment at the effect of such treaties. What had been their operation in China? When our first relations were opened with that country 25 years ago we found the empire peaceful and prosperous, its provinces in a high state of cultivation, and supporting a numerous and a happy population. But by the indirect effects of our wars the authority of the Government in China had been completely broken down, and a state of anarchy had been brought about which had caused the deepest misery throughout that vast empire. Provinces which, on our first entrance into China, were rich and flourishing, were now utterly ruined, hundreds of thousands of human lives had been sacrificed, and in the newspapers of that day he found the last accounts from China stated that some provinces were so completely ruined that the inhabitants had been driven to support life to that last and most dreadful resource, cannibalism. The same process was now in its first stage in Japan. If our present policy were persisted in, it would not be many years before all the authority of the Japanese Government was entirely destroyed, and we should not be in a position to substitute an authority in its stead to maintain order throughout that extensive empire. Such were the grounds upon which he submitted to the House that it was our duty to avert these evils, and therefore he proposed a resolution,—

"That, apart from all higher considerations, the true interests of this country, and especially its permanent commercial interests, require that such calamitous results should not be risked by maintaining the existing treaty with Japan unaltered, and that it is desirable that the provisions of this treaty should be so modified as to place the future intercourse of the two nations on a better footing for the future."

No one could deny that that was true, and if so, he thought there could be no objection to the next resolution which he proposed:—

"That it would therefore be advisable that Her Majesty's servants should without delay enter into friendly communication with the Government of Japan and with the Governments of other nations having treaties with Japan similar to our own, for the purpose of determining what changes it would be expedient to make in the provisions of these treaties."

In that resolution he had not ventured to prescribe what modifications should be introduced into the treaty, as he did not consider that it fell within the province of Parliament to do so, it being rather a subject for the decision of the Government. In making any alteration in the treaties with Japan, it would be well to have an understanding with other civilized Powers, and especially with France; and after the experience of our power which the Japanese had recently had, there would be little difficulty in obtaining their concurrence to any modifications of the treaty which might be suggested. But, although he had not thought it right to describe in his resolution what modifications should be introduced into the treaty, because upon constitutional grounds he thought it was beyond the province of Parliament to prescribe them, yet he did not think there was any impropriety in his stating what were his own views upon that point. The first modification, he thought, should be made in what was called the 30-mile clause, which exempted British subjects in the ports of Japan, and for a considerable distance beyond them, from the control of the native authorities. He would venture to say that such a system could not possibly be worked in Europe. If English sailors at Havre or New York, or American and French sailors in Liverpool, were exempt from the interference of the police, and if they could only be dealt with by their own consuls, it would be impossible for a single day to maintain order and peace in these towns. It was exactly the same in China and Japan, where we had no machinery to control our own subjects. Indeed, without taking the government of those countries into our own hands, it would be impossible to have an efficient police or proper tribunals for the maintenance of order or the administration of justice. If it should be thought necessary to retain the exemption at the ports, surely there was no reason why it should not be confined within the narrowest limits possible. He did not mean to say that British subjects should be prevented from going beyond the ports. It was well known that Mr. Fortune and other gentlemen who had gone into the interior of Japan for scientific purposes had met with perfectly good treatment, and that would, no doubt, be the case generally if parties were more circumspect and careful to avoid collision with the native population. With respect to those engaged in trade, they ought to be most cautious in their intercourse lest they not only incurred great hazard to themselves, but provoked an outbreak which might involve the country in war. The evils which must necessarily spring from the absence of police had not yet been developed in Japan. To judge of their extent they should look to China. He referred to a trade report from Shanghai, which described the population as in a state of utter lawlessness; and the evils of such a state of things were greatly increased by the mutual jealousies of the consuls. There were other points on which he should have wished to touch, but he was ashamed of having so long occupied their lordships' attention. He would, therefore, only state generally what appeared to him a wise policy to pursue. In the first place we ought to restrict as much as possible the number of treaties we imposed upon Japan. Then it was most desirable that we should reduce and simplify as much as we could the stipulations of our treaties in order that the Government of that country might not be tempted to break them, and thus impose on us the necessity of applying coercion. Then he contended that it was on every account in the highest degree desirable that we should be able to reduce the very large force we had in China and Japan. It appeared from the papers produced that it had been found necessary to order 1,000 additional men to China, and in addition to the land forces he found on reference to the naval papers that we had at this moment in Japan or China no fewer than 35 vessels of war—all steamers, including gunboats. This was a very large force, kept up at great expense to the country, and on the principle of his noble friend we ought to reduce these demands on our resources as much as possible. This was advisable also for another reason; the maintenance of so large a force kept up the feeling of suspicion in the minds of the Japanese. The Bishop of Victoria stated that the people were quite aware of the origin and history of our connection with India. They knew we had gone there as traders, and ended by subduing all the native princes and powers of India. They were very much afraid of the same fate themselves, and most anxious to maintain their independence. It appeared to him that a really profitable trade between the two nations could never be carried on unless goodwill and friendship were established. It was in vain to go on as we were now doing. So long as their object was to thwart or cripple our trade, they would always find out some new means of accomplishing it, apparently within the letter of the treaty. But if we went on the opposite principle—if we made them feel the value of that trade; if we endeavoured to remove their just suspicions and just fears as to the consequences of what was now going on;—if we did that, the commerce was so mutually advantageous that we might rely on it the people and Government of Japan would learn to see its benefits, and gradually relax their restrictions upon it. He had it upon the authority of his noble friend himself that it was the misconduct of British subjects, their overbearing and lawless behaviour, which had been the source of all these evils. It was the knowledge that they were backed by the force of this country which led them to adopt such a line of conduct, and nothing would have so good an effect in inducing them to alter their behaviour as the withdrawal or diminution of the force at their command. He might remind his noble friend how well this policy succeeded in China during his administration. Almost immediately after his noble friend and himself acceded to office in July, 1846, the Government received intelligence of an expedition which had been directed against the Chinese to punish

LONDON, THURSDAY, JULY 7, 1864.

PROGRESS OF GORDON'S CAMPAIGN AGAINST THE TAIPINGS.

ACCORDING to the last accounts from Shanghai, it is evident that the Taipings are in their death-struggle with the Imperialists and the disciplined Chinese under GORDON. The oldest Changmaous are engaged in battling against the progress of the campaign for their very existence. Hitherto the wily leaders of this desolating rebellion kept themselves well back from the brunt of battle during any desperate engagement, forcing to the front the new levies whom they had pressed into their service unwillingly at the edge of the sword, often cutting them down in attempting to retreat. The consequences were that comparatively few of the original band of Taipings from the South provinces met with the fate they richly deserved. In all the engagements within the thirty-mile radius around Shanghai, when the British troops and blue jackets drove them from every stronghold, it was rarely that they encountered the Quang-si and Quan-tung men who originated the movement, although it was well known that they were the chief directors of the hordes marched into the fertile provinces of Kiang-soo and Che-kiang. It was the wretched impressed inhabitants of the latter provinces who chiefly fell on their own soil, as they were goaded on by their inhuman taskmasters. Of course it was impossible, during the many conflicts that occurred in 1862, to distinguish between the rabid Taiping and the pressed man, but after each engagement Admiral HOPE and General STAVELEY carefully separated them among the prisoners. Now it would appear that the forced levies who remain in the Taiping ranks are held back, and the long-haired fighting men of twelve to fourteen years' service are brought by their brave leader the CHUNG-WANG to the last struggle in the cause of "The Heavenly Kingdom of Great Peace." We unhesitatingly designate this leader *brave*, as every account of his actions in the field point to him as possessed of great prowess as a soldier and skill in generalship. But for his strategic movements, the TIEN WANG'S hordes might have been conquered long ago. Should he fall into the hands of GORDON, we have no doubt but that gallant officer will extend to him the ægis of British protection, notwithstanding the recent repulse before the conquest of the city of Chang chow. From the details of that affair, it would appear that the besieged were a match for the besiegers; and it may be said with justice that the Chinese on both sides displayed the elements of soldierly courage that would astonish the troops of Western nations. Nor must we omit to notice the gallantry of GORDON'S European and American officers, who led their men up to the deadly breach and renewed the assault from time to time until one-half of them were killed or wounded. After this sanguinary repulse, Chang-chow was completely invested by an Imperial force of 70,000 men, and GORDON had to sap the walls of the city. As he is an officer of the Royal Engineers, he brought into the field with his other military attainments as a general, a practical knowledge of that important branch of the service in reducing fortifications. Under these circumstances it will be seen from the detailed accounts given in another part of our columns, that the capture of this stronghold was accomplished. Now that this important victory in the campaign is effected, we may look for Major GORDON'S retirement from the Chinese service of his own accord, just about the time that the despatch of the Secretary of State for Foreign Affairs would arrive requiring him and all British officers to return to their former posts in Her MAJESTY'S army.

DEBATE ON JAPAN IN THE HOUSE OF LORDS.

WHILE the session has been remarkable for the numerous and lengthened debates in the House of Commons on topics concerning British policy and relations in the Far East, the House of Lords has been comparatively silent. This reticence was broken on the first of the present month when their lordships spent a night among the Japanese under the political ciceroneship of Earl GREY. That noble lord opened the debate with quite a formidable list of resolutions, having reference to almost everything and everybody in Japan, to discuss which would have taken several nights; and to notice, more space than we can afford. But the peers do their Parliamentary "pidgin" comfortably and concisely; so, after an admirable reply from Earl RUSSELL, and a short sederunt, the twelve resolutions were rejected, and existing relations with Japan left undisturbed. Nothing new of interest was imported into the debate, for the mover made political capital out of what had transpired during previous discussions in the Lower House. Amongst his salient points he echoed the senseless cry of snubbing the merchants engaged in the commerce with that country and China. It has become the fashion of late amongst certain noble and hon. members of Parliament—some of them aspirants for office, to detract from the position of British merchants in the extreme East, and rejoice over the circumstance of native traders being held in a degraded position by the officials of their country. These shallow-minded legislators would apparently have a pleasure in seeing our merchant princes completely under the thumb of our officials in Japan. But they have a different class to deal with; and one, as far as education and mental calibre goes, will compare favourably with that of the aristocracy. This cry against our enterprising sons of commerce in the "Isles of the Rising Sun" was originated by Sir RUTHERFORD ALCOCK, who in a measure truckled to the prejudices of the Daimios, by drawing a line of social *status* between the merchant and the diplomatic *employé*, to show that in England there were privileged and unprivileged classes. This injudicious step was the chief cause of all the acrimony amongst the British residents that scandalized the community for several years, and in a great measure led to the assassinations which have cost both sides so much blood and treasure. We trust that in resuming his duties Sir RUTHERFORD will eschew this offensive line of conduct, and endeavour to raise the merchant in the esteem of the Japanese, as the laws of his country have done in avenging the murder of her enterprising sons. But this contempt for merchants and mercantile pursuits by those who are called the privileged classes, recoils upon themselves both here and in Japan. There is scarcely a legislator in the Palace of Westminster but takes fees and derives profit from some commercial enterprise; while it is notorious in Yokohama and Nagasaki that the members of legations and consulates make a trade in selling their privilege of exchanging dollars for itziboos, and resorting to means for extending their gains that legitimate merchants would scorn to imitate. Earl RUSSELL showed also that these Daimios themselves were greedy after foreign trade, and it was not its introduction they found fault with, but that the TYCOON had monopolised it, and secured the lion's share of profit. Therefore, instead of commerce and commercial men being the subjects of disparagement for debates in Parliament, they ought to receive the highest credit for being the direct means whereby England has attained the unexampled degree of prosperity she now enjoys.

THE ANGLO-AUSTRALIAN AND CHINA TELEGRAPH.

SINCE the notice of this undertaking, which appeared in our issue of May 28, the directors have decided on raising first the capital necessary to lay down the line from Rangoon to Singapore. The distance is 1,200 miles, and the estimated capital required £450,000, a portion of which has been already privately subscribed. The annual receipts have been computed on the same scale as that adopted on the Malta-Alexandria line, and show that a dividend of 12 per cent. can be relied on after putting aside 10 per cent. for a reserve fund. According to the returns lately presented to Parliament of the working of the

Digitized by Google

Malta and Alexandria line, it appears that in the first quarter of 1862 the gross receipts were £6,853 ; in the last quarter of that year they were £11,958, or nearly double ; again in first quarter of 1863 the gross receipts were £12,047, and in the last quarter £21,560, being at the rate of nearly 20 per cent. upon the cost of the line. The net receipts are not given, but they may be taken to have been at the rate of 16 per cent. in the most favourable quarter. In consequence of Egypt being in hourly and direct telegraphic communication with London and Liverpool, and India being only in weekly communication, messages being conveyed partly by post and partly only by telegraph—Egypt supplied two-thirds of the total number of messages, India and the East only supplying one-third ; the proportions would, of course, have been more than reversed had India enjoyed the same advantage in this respect as Egypt.

The trade between Europe, Singapore, Java and China will be greatly facilitated if efficient telegraphic communication is established between Europe and India before the proposed line is completed, although even without relying on the lines through Asia Minor and Persia, the India and Singapore telegraph will enable Java and China news to be telegraphed to Galle and Bombay in connection with the mail steamers. Notice of a question to Sir C. Wood has been given by Sir Stafford Northcote asking whether the Anglo-Australian and China Telegraph Company have not informed H.M. Government that they are prepared to establish telegraphic communication between Rangoon and Singapore without any financial assistance from H.M. Government, and whether H.M. Government view the undertaking with favour and will facilitate the carrying out of the work. The answer to this question has not yet been given.

STEAMERS FOR CHINA.

A screw steamship of 605 tons, named the *Luzon*, has been launched by Messrs. Alexander Stephen and Sons from their building-yard at Kelvinhaugh. This vessel has been constructed on the principle of iron frames and wooden planking, is fastened with yellow metal throughout, and sheathed with copper on bottom. She is intended to run between Manila and China. She has been built for Messrs. Ker, Bolton, and Co., of Glasgow, and is classed fourteen years A 1.

THE FRENCH MAIL SERVICE.

Messrs. Horne, of Moorgate-street, the London agents of the Messageries Imperiales, have issued the following circular :—

We beg leave to inform you that on the 9th of September, and thenceforth on the 9th of every month, a mail steamer of the Messageries Imperiales will be despatched from Marseilles to Alexandria, corresponding with another steamer from Suez to Aden, Seychelles, Reunion, and Mauritius.

PARLIAMENT—*Continued from page* 387.

them for certain offences which they were said to have committed. With the full assent of his noble friend and the Cabinet he addressed to the Governor of Hong Kong a despatch containing a severe reproof for this unauthorised exercise of power, and followed it up by greatly reducing the strength of the garrison of Hong Kong. That had the very best effect in producing a conciliatory disposition on the part of the British authorities, and for six years there was no quarrel between them and the Chinese. No sooner, however, was the Crimean war at an end than an additional force was sent to Hong Kong, and in a very short time the governor picked a quarrel with the Chinese, which led to a war, all the ill consequences of which had not yet been fully experienced. The last resolution proposed that a humble address should be presented to Her Majesty setting forth the substance of the preceding ones. He must express his earnest hope that his noble friend would not regard this as a censure upon the policy of the Government. Although he recommended a change of policy, he did not think that the responsibility of that which had been pursued rested entirely with Her Majesty's Government. It rested in part at least with Parliament, which had tacitly approved that policy. He asked the House to pronounce no censure ; he only asked it to express an opinion that our experience of the working of the treaty concluded six years ago with Japan had shown that it was desirable that that treaty should be revised and its terms amended. If Her Majesty's Government were inclined to take that course, it was most desirable that they should have the declared support of Parliament, because it could not be done without provoking some clamour out of doors. He trusted that their lordships would agree to the resolutions which he was about to move. He had asked for their support only upon the ground that our commercial interests rendered desirable the course which he was recommending, but he was persuaded that their lordships would agree with him that this question involved far higher considerations than that, and that we were bound to consider not only what was for our interest, but what was consistent with our notions of right and wrong. Even if it could be proved—which it could not—that it was necessary to adhere in Japan to a system by which we should inevitably become involved in a war with the Japanese, we should be bound to abstain from taking a course so contrary to the plainest rules of justice and right. The noble lord concluded by moving the resolutions which stood in his name, and the substance of which he quoted in the course of his speech.

Earl RUSSELL said : After the long and able speech which my noble friend has made, I am, I confess, somewhat disappointed to find that he should have sat down without pointing out how our relations with Japan might be amended. He thinks it desirable that there should be an increase of trade with Japan, but he did not show by what means that desirable object was in his opinion to be effected, although he was profuse in his censure with respect to the existing state of things. He began his speech by finding fault with the manner in which our intercourse with Japan was begun, and here I must remark that, both on this subject and on the subject of what our policy should be, he aimed at subverting our policy not only in that country, but in China, and with regard to all Eastern nations. In the case of China the treaty of Tien-tsin was brought about by our entering the Peiho with a considerable force ; but my noble friend is hardly correct in the assertion which he made in reference to Japan. Lord Elgin went to Japan with one steam frigate and two gunboats, which is hardly such a force as could be fairly said to have so intimidated the Japanese as to have compelled them enter into a treaty. There were, I may add, other treaties made before that time. There was one entered into between Japan and America on the occasion when Commodore Perry went to that country with a considerable force, and I cannot see that Sir R. Alcock was so much to blame because he went with a frigate and two gunboats to make a similar treaty. Other nations have followed the same policy, and one of those Powers which have intimidated Japan is Switzerland, which my noble friend will, I think, hardly contend is a Power calculated to inspire the Japanese with such fear as to force them to conclude a treaty of commerce. That being so, the foundation of my noble friend's argument falls to the ground, for it appears that it was not by intimidation that we obtained the treaty, and that, even if it was obtained by force on our part greater force had been employed on the part of other countries. But what, let me ask, have been the fruits of these treaties? They have been that, in the course of a few years, there is a commercial intercourse of foreign nations with Japan to the value of £7,000,000. What, let me ask, is that but the intercourse of friendship—an intercourse whereby the Japanese obtain what they want from foreigners, and foreigners what they want from them, to the mutual benefit of both. Is that the friendly intercourse which my noble friend wishes to stop ? Why, he declares himself that he wishes to increase the trade with Japan. But, then, he says that the Japanese having been induced to make the treaty, we entered into a stipulation that British subjects should be entitled to obtain admission to certain portions of the territory of Japan without being under the jurisdiction of the Japanese authorities. He complains of the law called the "extra-territorial law." But what I would ask, has been the whole course of our intercourse with Eastern nations? What is the history of our intercourse with China and with Turkey? Have we not entered into arrangements with China of this very character? Would we be justified, then, in adopting an entirely new plan in regard to Japan, saying that the Japanese laws should be allowed to prevail in the case of any British subject who might be accused of having committed an offence against them? Your lordships must bear in mind that the Japanese laws are most sanguinary. What can we say if a young English merchant, being brought before the Japanese tribunals, subjected to torture, put to death, being disembowelled, and, in short, suffering all the horrid tortures which the code of the country inflicts? What can we say, further, if all his relations living at Yokahama are put to death? Is it desirable, under those circumstances, that we should abandon a plan which has now been acted upon for three centuries, in accordance with which, when we enter Oriental nations, we carry with us our own tribunals? When Japanese subjects commit an offence against the English we ask them to punish their own criminals, but when an Englishman commits an offence we do not surrender him up to be dealt with by the Japanese laws. In that respect we can, I think, make no alteration without incurring great danger. If we were to make a change, the probability is that disputes with the Japanese authorities would be promoted, and I cannot therefore admit that so far as that point is concerned my noble friend has pointed out any course which it would be advantageous to adopt. Great benefits are derived from our trade with Japan, but that trade is undoubtedly accompanied by great abuses on the part of Englishmen themselves. (Hear, hear.) Their manner and demeanour, when living in those Eastern countries, is not always what it ought to be. (Hear, hear.) I this very morning received a letter from Sir F. Bruce, written in the same admirable tone and temper as so many others, in which he laments the insolence and disregard of Chinese customs, the want of courtesy, and the improper behaviour in many respects towards an inferior race which characterises some of our countrymen, and which, he says, is a disgrace to several who go apparently for the purposes of trade to China. The same thing, I am sorry to think, may be said in the case of Japan ; nor is it confined to these two among Eastern nations. All that we can under the circumstances do is that which men like Sir R. Alcock are disposed to do—that is, to refuse to take up the cause of any of those men who have brought trouble on themselves by their own misconduct, and thus to show them that it is not because they belong to a powerful nation that they are to be countenanced in the course which they pursue. (Hear, hear.) I know of no particular regulations which could be introduced which could remedy the present state of things, and we can only hope that while the commercial intercourse itself with Japan is productive of great benefit the abuses which attend upon it will be in time removed by the exhibition of better conduct on the part of our own countrymen, who have the remedy entirely in their own hands. (Hear, hear.) I would add that the Government of the Tycoon has shown every disposition—being fairly treated on our part—to do all that is necessary on their side to improve the trade between the two countries. But in spite of our policy there are great dissentions in Japan. There are the Prince of Satsuma, the Prince of Nagato, and many of the others of the high feudal aristocracy—one of them said to have 200 000 men under his command, and immense revenues—whose privileges and feudal powers were secured to them some two or three centuries ago. There is, besides, the Mikado, a sort of spiritual chief, and there is the Tycoon,

Digitized by Google

who is said by the best authorities have the treaty-making power. How can we prevent these different authorities from quarrelling among themselves and from being jealous of one another? The Daimios say, and perhaps with truth, that the Tycoon has managed, in providing that certain ports shall be the ports at which English ships shall enter, to take the greater part of the profits to himself, and to prevent the ports which belong to the Daimios from being the places of commerce for foreign merchants. If that be so, as it is well-known that the profits of this trade are enormous, it is no wonder that these Daimios wish to have some share in it, and that many of them wish, in conjunction with the Mikado, to overpower the authority of the Tycoon. But that is not a matter with which the English are concerned; that is not a result for which British power is responsible. (Hear, hear.) It is a matter that may at any time produce civil war—civil war not brought about by England, but by the dissentions and jealousies of the Japanese themselves. (Hear.) A noble earl opposite, who brought forward the question of Japan last year, concluded—as, sitting in opposition, it was, perhaps, natural for him to conclude—that we were about to do everything that was foolish upon this subject—that the Government were going to punish the Tycoon, as the Tycoon was our friend, and that the Daimio, who was our enemy, we intended to leave alone. Now, the fact is that we were quite as wise as the noble earl opposite. (A laugh.) We did say, no doubt, that the Tycoon ought to pay a considerable fine because he had allowed a public road to be the scene of a disgraceful murder on the part of one of the Daimios; but we called upon the Daimio himself to bring the murderers to justice, and pay his share of the fine. We did not, therefore, commit the folly that the noble earl supposed we should commit. My noble friend who brought forward this question to-night meant, it seems, to be particularly civil (a laugh), but he told us that our conduct with respect to the murder of Mr. Richardson was against all principles of international law, against all principles of justice, and against good policy. For a particularly civil person, this, I think, was rather hard upon the Government. (Laughter.) But I do not see the matter in that light. Here were three or four English people, one of them a lady, riding upon a road which was assigned by treaty as a road upon which British subjects were able to pass on foot or on horseback when they pleased. Being there when one of these great Daimios passed, they stood on one side of the road, where one of them was murdered, the lady and the others being attacked, and escaping with many bruises and wounds to Yokohama. We thought that was an injury which required some reparation, and we did not think it was contrary to the law of nations to ask for reparation. We said that the murderers ought to be tried, and as the Prince of Satsuma refused any redréss, we sent ships to his harbour and took by way of reprisals two of his vessels. The Prince of Satsuma, I must say, behaved in one respect with great humanity, for he sent a notice to his own people that there would probably be some action, and advised them to leave the town. The batteries of this town fired upon our men-of-war. What were our men-of-war to do? Were they not to return the fire? Were they to go off immediately as fast as they could without returning the fire, and with all the appearance, and, indeed, the reality, of running away from the forces of the Daimio? What would have been the consequence of such conduct? Why, my lords, how unsafe would have been the life of every Englishman in Japan! (Cheers.) The admiral who was in command of the British squadron ordered fire to be opened. It was opened against those batteries, the batteries were in a great degree silenced, but as a high wind was blowing at the time, and the houses were entirely built of wood and paper, the town caught fire and great part of it was burnt. Well, I think, though this was a lamentable occurrence, that a great deal too much horror was expressed at it. In consequence of the notice that had been given hardly any persons were killed except the soldiers in the batteries; there really was not that great mortality which has been so much lamented; the town has been since rebuilt, and people say that it is a handsomer town than it ever was before. I cannot believe, then, that that proceeding was of the character which my noble friend states, and certainly with regard to the followers of Prince Satsuma, it was a good lesson for them, for they owned that they did not know that the English were so strong; that they should beware how they offended them again; and the Prince of Satsuma himself has shown since that time the most friendly disposition towards us. (Cheers.) My noble friend says that these collisions must lead to war. But is it more likely that war will result by inflicting some punishment upon the murderers of our people, or by allowing those murderers to go unpunished? My belief is that the taking notice in this way of such an injury as a horrible murder is the way not to lead to future collisions and war, but rather to prevent them. (Hear, hear.) We know very well what has happened with regard to the French. One of the Japanese Princes, the Prince Nagato, as a French ship was passing through a narrow strait, fired upon it and inflicted considerable injury. The French Admiral thereupon attacked the battery, the Japanese soldiers ran away, the battery was destroyed, and every gun was made useless for the future. Here, then, according to my noble friend, would have been the origin of a great war between France and Japan. But Japan thought better of it, and sent an Embassy to beg pardon for the outrage, and a new treaty has been made between the French and the Japanese Government. (Hear, hear.) Such was the effect of an order very similar to that for which I am so much blamed in the case of the Prince of Satsuma. I quite agree with my noble friend that these Japanese are most ingenious people. This Prince of Satsuma himself has more than once bought steam vessels; and I am told that the Japanese would buy a foreign steam vessel in a port, and that, the European crew being out of it, they would put their own crew on board and steam out of the port at once, with complete command of the machinery, as if they had been taught the use of it from their earliest youth. Nay, more, in another case one of our officers was receiving two Japanese officers of rank, and immediately they came on board they began discussing the merits of the Armstrong and Whitworth guns, showing great knowledge of all the mechanism of those guns. (Hear, hear.) I am in hopes that, so far from leading to the stoppage of further intercourse between us, so far from leading to hostilities, the policy of Her Majesty's Government will lead to the maintenance of friendly relations with the Japanese; that their display of the more than ordinary anxiety found among Eastern nations to profit by European intercourse will establish that intercourse on a footing of mutual advantage; and that, though there may be on the part of some of the Japanese a good deal of murmuring, like the rumbling of distant thunder, the advantage of commercial relations between the two countries will gradually be seen in Japan, and will gradually insure a friendly and a peaceful intercommunication. (Hear, hear.) Coming to the last resolution of my noble friend, I must say I had expected from him information and instruction as to the way in which we should improve our relations with Japan. Had he pointed out any mode by which we could effect that object, Her Majesty's Government would have gladly availed themselves of my noble friend's suggestions; but when he came to that part of his speech, after he had thought fit to blame every part of the policy of the Government of this country—not only of the present, but of former Governments—he said he should be much obliged to us to point out the way in which an improvement could be effected. (Hear, hear.) Now, my lords, I think if we were to say to the Japanese that we should modify our treaty—that we were prepared to make new arrangements,—I think the effect would be that which such a course would have upon other Eastern nations. We should only inspire the Japanese with the idea that we were afraid of their hostilities, and that we were ready to conciliate them by needless and unworthy concessions. (Hear, hear.) I don't see, therefore, that we should gain by any measures of that sort. I am not at all reluctant to enter into some friendly relations with the Japanese, though I must remind your lordships that friendly relations have been going on between the Government in this country and the Government in Japan, and also between our Minister in Japan and the Ministers of the Tycoon. Mr. Rutherford Alcock was prepared to do everything that was courteous towards the Tycoon, and he showed himself ready to do anything which our laws enabled him to do in order to punish any young Englishman who went beyond the rights to which British subjects were entitled according to the terms of our treaty. (Hear, hear.) I am quite aware that this country can do great hurt to other countries; but I do not let out of sight that other countries may do some hurt to us. I own that I contemplate not only with repugnance, but disgust, such a state of things as boasting of nothing but the injury which we could do to other countries, while they, on the other hand, should be boasting of the injury which they could do to us. Certainly, that is not a pleasant subject of contemplation; but we know we have power—all foreign nations know we have by our naval and military forces power to inflict great hurt on any nation attacking us. My noble friend says that as regards this country and Japan we are not behaving according to the laws of nations. I am afraid that for a very long time to come it will be necessary to keep a considerable naval force in those seas of Japan. There are, as I have said, various parties in Japan, and one of them is very likely to say they will not permit foreigners to come there any longer, and that they will drive them from Japan. That, no doubt, might lead to scenes of bloodshed, but I cannot see that we ought to retire from Japan for that reason, or forego those rights which are of great benefit to us and at the same time of great benefit to Japan. (Hear.) My belief is that we should endeavour to behave justly, and on every occasion repair any wrong of which the Japanese may have reason to complain, but at the same time seek redress for any wrong which may be done by them to British subjects. Under existing circumstances, that is all I can say, while, of course, I should be glad that our relations with Japan could be closer and more secure. (Hear, hear.) But we must recollect that this is a new commerce. The treaty only dates from, I think, 1858, and there is much to be smoothed away in regard to our relations with a people who for a long time would not admit foreigners. At the same time, the commerce between the two nations has been in many respects rapid. During the first four years after the treaty of Nanking our imports of silk from China amounted to 20,000 bales; in the first four years after our treaty with Japan our imports of silk from that country have been 25,000 bales. (Hear, hear.) That shows a considerable willingness on the part of the Japanese to enter into commerce, and to establish those relations with us which may tend to the promotion of trade. (Hear.) It is impossible for us who have such commerce in every part of the world not to see that in Japan, as elsewhere, some misunderstanding may arise; and all the British Government can do is not to modify or alter those treaties which we have with the Japanese—not to say we will give further concessions in addition to those which we have already made. Last year we engaged to put off the opening of two ports, which were to have been opened this year, for seven years more, and we have shown every disposition to agree to any concession which the Japanese could reasonably ask for; but it appears to me that it would be more advantageous for all parties to go on steadily and quietly, but maintaining our rights, rather than to inaugurate a new system and policy, more especially if that new system and policy were in contradiction of all we have ever done in our dealings with Eastern nations from the time when we first had intercourse with them. (Cheers.)

The Bishop of OXFORD expressed his thanks to the noble earl (Grey) for having brought this subject before their lordships and the country. He had attended to the tone of the noble earl's speech and resolutions, and it appeared to him that the noble earl's object was rather to turn their lordships' attention to the future with its dangers, and the mode in which those dangers might be averted, than to advert with anything like unnecessary recrimination to events which had already taken place. (Hear, hear.) He had also watched with anxiety to hear what might be said by the noble earl the Secretary for Foreign Affairs, feeling confident that everything which he might say would be said with that terse and telling eloquence which the noble earl always used. But he confessed he had heard with great disappointment the answer of his noble friend. So far from removing from his mind those apprehensions which the views of the noble earl opposite (Grey) had given rise to, he thought the answers given to the noble earl were not conclusive. As he understood the Foreign Secretary he maintained that the noble earl opposite objected to the system by which we undertook on our part to exercise our own laws against our own people in a distant country, leaving it to the Japanese to put their laws in force against their own people. His noble friend said that had always been our custom when dealing with Eastern nations, but that the noble earl would sweep it away, and then he (Earl Russell) went on to ask how we should feel if we heard of the lives of

Digitized by Google

our countrymen being sacrificed in consequence of our trusting to the Japanese Government. But he had distinctly understood his noble friend opposite to guard against any such supposition. (Hear.) He understood him to say that at the principal ports—at the factories where we had our goods—at places where we should be able to enforce on our people reasonable obedience to the Japanese laws, there we should maintain that principle. (Hear, hear.) But his noble friend said that we should not undertake what we could not perform—that we should not throw the ægis of security against Japanese justice over British subjects in places where we could not exercise control over them, and thereby lead them to break the laws of the Japanese, where we had no power to prevent a breach of those laws, and no means of punishing British subjects who did break them. The noble earl argued that the two obligations were correlative; that where we undertook to protect our own people and try them by our own laws we were bound at the same time to show we had sufficient power to make them obey those laws which, by going into that country, they made themselves subject to. (Hear.) Therefore, he said, the answer of his noble friend the Foreign Secretary to his noble friend opposite was not satisfactory. Then the noble earl at the head of the foreign department denied that our treaties with Japan had been brought about by intimidation. Why there was no other point on which Sir R. Alcock was so explicit and emphatic as he was in his declaration that those treaties had been brought about by intimidation. He said that the American Ambassadors went to Japan and told the Japanese what we were doing in China, and so alarmed their minds that the statements made to them of our intentions and the news of our success in China made them look upon the presence of a small flotilla in the Japanese waters as the *avant courier* of the power of this country; so that, against the will of the whole population, the treaties were made entirely through fear. He said, "I know that it is alleged that there is a party in the country who are in favour of progress, who desire to see the foreigner admitted and foreign trade encouraged;" but he went on to say that he had never been able to find them nor even to ascertain their existence. He said that there were, as everywhere else, two powers—one more extravagantly attached to what they considered to be their natural habits, and the other less so, and he had described them as existing in Japan under the name of the toad-in-the-well party and the non-toad-in-the-well party. He also said that the most liberal party he had been able to find were strongly averse to the abolition of the restraints which prevented foreigners from coming among them. He stated that whereas foreigners were at first received into the houses of the poor, if not with welcome, at all events, with hospitality, he could not say that that treatment was any longer extended to them. (Hear, hear.) Therefore, what was originally begun with intimidation was, according to his statement, continued with increasing disgust on the part of the Japanese only through the terror of external violence. Again, they were told by the noble earl that the burning of Kagosima had led to the better behaviour of the Daimio. When they, however, knew that the Japanese were so eager for the expulsion of the foreigners, and that they were purchasing rifled cannon for the blow which they hoped to strike, they could not consider that this change was so much extorted by violence as it was the quiet preparation dictated by that desire for vengeance which was so distinguishing a characteristic of the Japanese nation. (Hear, hear.) That he believed to be the strength of the statement made. The perpetual complaint of the more thoughtful Japanese had been, "You are hurrying things too fast. We grant you it may be well, as you tell us, that the country should become a trading community, that our wealth may become increased if we deal with the nations of the West, but there must be time for the trade to grow up. At present it is but injury to us at every turn. You take our vegetable wax and do not even leave enough for our own people. You have tricked us as to our gold, which you have exported in masses in spite of the treaty to the contrary. You have suffered your people to set up a shadowy reason in order to evade the stipulations of the treaty, and all this you have done because you will hasten to a degree which we, as a people, cannot bear, the time to introduce your merchandise and your commerce." The burden of these representations must, he believed, reach the heart of everyone. What they in reality said was, "If you are to be enriched by this sudden traffic, have you no regard for us? Can you not feel for our sufferings? Is it just to force this upon us that you may a little sooner acquire so much more wealth?" His noble friend did not attempt to answer the allegation of the noble earl, because he evidently felt the statement to be unanswerable, that we were running great danger of absolutely destroying the internal Government of Japan by the course we were pursuing. (Hear, hear.) Could it be the intention of the Government to reduce that country to the miserable state of an ungoverned anarchy? And yet that must be the result if we shook the existing power without furnishing any efficient substitute. They had heard that night that there was a great deal of jealousy existing between the Daimios and the Tycoons. There was a continual tendency among the Daimios to resist the power of the Tycoons when that power appeared to them to be used in a manner which would commit the country to steps fatal to its welfare; and so every step in the treaty had been written in the blood of successive Tycoons. Would that fact show that it was a treaty gladly entered into by the Japanese? Did it not rather tend to prove that it was forced upon them by intimidation? The result of our continuing our present policy would be the breaking down of the central controlling authority by which alone the feudal chieftains could in any measure be kept in awe. Was it our object to occupy the country in order to administer its revenue, its justice, to reform it laws, or to make it a dependency of this country? What would become of our trade if we left the country in anarchy? How were we to maintain a sufficient force among a hostile people, aided in their opposition to us by the nature of the country? How were we to overcome those obstacles except at an expense which he did not believe the people of Great Britain were willing to incur? It was upon those points that it seemed to him that the speech of his noble friend opposite had really exhausted the subject, and he felt with him that having passed through those considerations, which he might term considerations of expediency, they came to the still higher ground based upon the principles of right, and he maintained that we had no authority in the sight of Him who governed the universe, by force of arms to thrust upon an independent people a commerce which they refused. (Hear, hear.) He maintained that, having established that commerce, we had no right whatever to undertake engagements as to our own subjects which we could not fulfil—(hear, hear)—and that the treaty as it was now constructed did engage that this country should undertake to make its subjects do what it was not in our power to make them perform. When he read what was stated by Sir Rutherford Alcock, he found that a request which was made by the authorities, that the road by which the Daimios were passing should not be made use of for three days, in accordance with the law of the country, was violated in the very face of the authorities, although the use of the road was not necessary for the purpose of either business or pleasure. (Hear, hear.) And he, for one, believed that the introduction into the commerce of this country of such doubtful, he would venture to say unjust, principles would not lead so much to its extension as to its final ruin. There was a result connected with the extension of national prosperity founded upon injustice which, by a law more certain than the return of any mercantile adventure, would avenge the cause of right and justice upon the people by whom those principles had been violated. It was written, and it would be fulfilled, "Woe unto him that buildeth his house by unrighteousness and his chambers by wrong." (Hear, hear.)

The Duke of SOMERSET did not think it was necessary to go back to the origin of the treaty with Japan, but he would remind the House that the treaty was made in the first instance with the American Government, and all that we and other nations asked was to be placed in the same position as the Americans. He quite agreed with the noble earl opposite as to the importance of our showing forbearance and moderation in our dealings with the people of Japan, and he concurred in his expression of regret for the misconduct of many Europeans in that country. It was a subject of deep regret that acts of gross tyranny had been perpetrated towards the natives of Japan, not only by Englishmen but by other Europeans. But that was a question quite separate from that of the treaty. The noble earl advised the Government to make a new treaty, but as he said that the Tycoon had no power to enforce the treaty already made it was difficult to understand where would be the advantage of a new treaty. He objected to the resolutions, and their effect, if carried out, would be to render war almost certain. The noble earl complained that the English and French Admirals had objected to the erection of battteries at Yokohama; but there were good grounds for their objections. The House would remember that when Admiral Hope went to the Peiho, batteries were insidiously raised, and his ships, being allowed to come in close were suddenly fired into. If we had allowed batteries to be raised at Yokohama the lives and property of all the British subjects and of other Europeans in the place would have been at the mercy of the Japanese, and the English and French Admirals feeling that, thought it their duty to resist the construction of such batteries. The right rev. prelate thought English subjects were protected wherever they went in Japan. That was not the case. What was done was to protect British subjects at Yokohama and along a road which by the treaty they had a right to use? (Earl Grey.—"25 miles.") He was told by persons who came from Japan that they were kept, as it were, in a prison, and could only go by that road for exercise. The noble earl said that persons seeking exercise or pursuing the study of botany were allowed by the Japanese to pass through the country, but that was not the fact. He had himself sent a gentleman who had a taste for botany to Yokohama, but, although he was willing to obey in all things the directions of the Japanese authorities, he was not allowed to pursue his researches, but was sent back. The noble earl said that the Daimios entertained great objections to trade. That was quite wrong (hear); in fact, the noble earl's speech was full of errors from beginning to end. (Laughter.) Prince Satsuma said that the Tycoon was appropriating all the trade to himself, and that he ought to share it with others. (Hear.) The noble earl's resolution proposed "that the provisions of the treaty should be so modified as to place the future intercourse of the two nations on a better footing for the future." But why should that be done if the Japanese Government possessed no power to enforce the treaty? It would be much better to keep to the treaty already made, and by firmness on the one hand, and forbearance on the other, its provisions might be fairly carried out. We had certain rights under that treaty, and these rights were admitted by the Japanese. Prince Satsuma's people themselves admitted that we were right to punish them for the murder, and, so far from the burning of their town having had an ill effect, it had had really an excellent effect, as they were afterwards quite ready to enter into a treaty with us. They did not care about the burning of their town, which they could rebuild in a few days. A gentleman recently arrived from Yokohama told him that he saw a great fire in that town, which burnt down a great establishment for the education of Japanese young ladies. The fire happened on the Monday, and to his surprise it was rebuilt on the following Friday. He very much regretted that Admiral Kuper should have been attacked for his conduct. (Hear, hear.) When that gallant officer heard of the motion in Parliament upon the subject of Kagosima he wrote a letter, in which he expressed his regret that the subject should be discussed in his absence. The Admiral also expressed his regret that in firing at the batteries his guns should have destroyed the town, but in writing his despatch he had omitted to express that regret as distinctly as he ought to have done, but that he wrote that despatch in haste and at a time when his feelings were much excited by the death of two friends who were killed by his side. The Admiral further said that he had since frequently declared his regret that the town should have been injured, and had also avowed his admiration for the Japanese people. With respect to the people themselves, they were quite willing and desirous of trading with Europeans. The last letters received from Japan informed him that people had been put to death by the Daimios because they had traded with Europeans. At Nagasaki and other places many persons had been murdered for trading with us; but, notwithstanding, they continued to send their goods to the ports. He had acquainted their lordships with the effect of Admiral Kuper's letter to him, and he could assure them that that gallant officer had been actuated by no other feeling than a desire strictly to perform his duty. The noble earl opposite seemed to think that when the batteries fired upon our ships of war we ought to have run away. (Earl Grey: "No.") Then if the batteries did fire, were our ships to fire again? (Hear.) It was, however, difficult to understand exactly how to deal

Digitized by Google

with a people whose habits and prejudices were so strange, and it was next to impossible to avoid occasional outbreaks. Unless we came away altogether from Japan, he could not see how we could avoid enforcing our rights. The French, Russians, Dutch, and other nations took right under the same treaty, and if we gave up our rights, were we to ask those nations to give up theirs? One great use of the large force we had there was to keep a check on our own population. He believed the best course we could adopt was to adhere faithfully to the treaty, practice all forbearance and moderation towards the people; but while exercising a spirit of kindness towards the people, to hold the Government strictly to the fulfilment of their obligations. (Hear, hear.)

The Earl of CARNARVON observed that a great part of the speeches of the noble earl and the noble duke had been directed to the disinterring of the old question of Kagosima, into which his noble friend had not entered. He quite admitted the very great difficulties of the treaty with Japan. The class of traders that had grown up there of late years were very different from those that formerly existed on those coasts. In former years the traders there were for the most part large firms—houses of immense wealth and responsibility—but now the traders on those coasts were in many cases of small calibre, sometimes reckless in character, and lived there solely by the prospect of enormous profits. These were the men who went inland in defiance of treaty obligations, and established houses for the purpose of contraband and illicit trade. The noble earl said he lamented these outrages; but what were we to do? how were we to prevent them? The papers on China showed that the consuls themselves, those who were placed there for the purpose of exercising judicial authority and maintaining fair dealing between man and man, often acted far more like partisans than judges. His noble friend would place greater authority in the hands of the consuls or some local authority. The system which had prevailed in China was extending itself to Japan, and to a great extent it had its origin in what he might call ex-territoriality. He must express his complete concurrence in everything that fell from his noble friend on that subject. The system was mischievous to all concerned. It sapped and undermined the native authority, and did not establish a complete or satisfactory jurisdiction in its stead. Its direct result was the extension of political still more of territorial right, and every morsel of ground annexed involved a fresh body of troops. They were drawing on their resources as regards men; and when they calculated their army in India, in the colonies, and in England, he must say he would be a bold man that would say those resources were unlimited and inexhaustible. While acknowledging all the difficulties and abuses that existed in China, and which, indeed, could not be denied, they seemed deliberately involving themselves in precisely the same difficulties in Japan. The state of things was almost identical in the two countries, with this exception that while in China they had to deal with a nerveless, weak, tame-spirited people, they had in Japan to deal with a military, warlike, and vigorous race, second probably to none in the East except the Sikhs. There was also the same condition of things, the same lawlessness, the same powerlessness of the consuls to restrain outrage, the same difficulty with regard to export and import duties, the same aversion on the part of the natives to receive us, the same determination on our part to force ourselves upon them, by means of treaties extorted from them which they accepted for the moment, but with the distinct determination to violate their engagements when the first opportunity offered. He remembered reading in one of Sir F. Bruce's despatches a statement to this effect, that "the conclusion of a treaty with an Oriental nation was not the termination, but really the beginning of the difficulties with which they had to deal," and that was the precise truth. They had found this in China, and would find it in Japan; and Sir F. Bruce went on to say that "even measures of a beneficial and progressive character, extorted by force against the will of the population in such countries, were of little avail." Well, the noble lord said matters after all were improved. Kagosima had been burned down, and the noble lord seemed to make rather merry over it. (A laugh.) It was true that Kagosima had been burnt down, and that for the moment there was peace, but he defied any one who had read the papers upon this subject to say that it was more than a temporary breathing space. All through the correspondence matters went from bad to worse, fresh murders and fresh acts of incendiarism were committed, the very legation was in a state of siege with stockades, guards, and camp fires lighted at night; in fact, the state of things was something between peace and war. The noble earl did him the honour to allude to some observations which he made last year, and said that he spoke as might have been expected from a member of the Opposition. Now, much as he valued party Government, he regarded this question of Japan as much too grave a one to be treated as a party matter. It was one of the most serious questions that could engage the attention of Parliament, and he thought it unfortunate that the country was not thoroughly alive to its importance. The noble lord complained of his having said that the Government were putting a pressure upon the Tycoon, who was their friend. It was true that he did say that, and he maintained that that was the real state of the case. The only person whom the Government were touching was the only one in the State who was favourable, and who they acknowledged had, so far as he could, dealt fairly with them. He was at variance with a great many of the Daimios who were continually attempting to subvert his authority, and thus the Government, by the course which they were taking, were playing the game of their enemies. It was perfectly clear that a great constitutional revolution was going on in Japan. About two centuries and a half ago the consitution was altered. Since that time the power of the Mikado had been in abeyance, the power of the great Diamios had been neutralized by their factions, and consequently the power of the Tycoon had been supreme. Now, for the first time, there was a change. The Mikado, who was a young and ambitious man, was recovering some of his former power; of the Daimios some were making common cause with him, and others were bitterly and vehemently opposing the Tycoon, who, on account of the favour which he had shown to foreigners, had become probably the most unpopular man in Japan. From all these causes we were, by interfering, as we had done, in danger of pulling down about our ears the whole fabric of the existing Government in Japan, which, bad or good, was at least a Government, and of having to undertake the responsibility of governing the country ourselves. That was a danger from which the Government had escaped in China owing to circumstances which they could not have anticipated, and for which they have not themselves to thank. (Hear, hear.) He agreed substantially with everything which had fallen from the noble earl and with all his resolutions. The only one about which he entertained any doubt was the last but one, which proposed that our Government should enter into friendly communication with the Government of Japan and other Powers for the purpose of revising the treaty. If he thought that that resolution was intended to compel the Government to take instantaneous action he could not support it, but as he believed that that was not its meaning he had no hesitation in accepting it according to the spirit rather than the letter, and agreeing to it as well as to the others. (Hear, hear.)

Earl GREY, in replying, was understood to say that his noble friend had rightly interpreted the meaning of his 11th resolution. Throughout the discussion the members of the Government had not contested these two facts—that the treaty being reciprocal, we were bound to enforce good conduct on the part of our own subjects in Japan, and that we had utterly failed to do so. (Earl Russell made a gesture of dissent.) That was established both by the statement of Sir R. Alcock and by the despatches of the noble earl himself. The noble duke charged him with inconsistency because he asked that as the treaty could not be enforced it should be revised. There was nothing inconsistent in his proposal. There were parts of the treaty which neither the Japanese nor ourselves could enforce, and therefore, he proposed that they should be modified. (Hear, hear.) The noble earl had complained that he had suggested nothing for the future, but in another part of his speech he said that he had suggested too much

The House then divided. The numbers were,—

The report of the County Constabulary Superannuation Bill was agreed to.

The Public and Refreshment House (Metropolis, &c.) Bill was read a second time.

The House adjourned at 5 minutes to 9 o'clock.

THE DEBATE ON JAPAN.

(*The Times.*)

Lord Grey proposed in the House of Lords yesterday a series of Resolutions on Japan which rather expressed a sentiment than indicated any definite policy. Nothing can invite sympathy more than the zeal with which feeling and conscientious men attempt the defence of those half-civilized races with which the adventurous spirit of commerce brings the Englishman into contact. The tale is always the same. On the one side are pride of race, the insolence of power, the contempt which strong and active natures feel for the more inert Asiatic, the recklessness of giving offence, which is due partly to an insular inability to comprehend the manners and the habits of thought of a strange race. On the other hand, there is a cherished antipathy ill concealed by the fair words which fear or self-interest dictates, there are the ever-recurring acts of revenge, the whispering and plotting which are always being directed against the intruders from beyond the seas, with the occasional outbreak of massacre or insurrection. We fear that the tendency to this mutual antagonism has not decreased. In these days more than ever the Englishman, when brought in contact with the feeble stationary races of the world, is likely to wrong and be wronged. In India and in China, however just the official class may be in their dealings with the native, there is reason to believe that the bodies of fortune-seekers whom trade attracts to the Far East are not likely to raise our character for courtesy and moderation. In Japan we see the beginning of what has attained a large development elsewhere. An island empire, which but a few years ago was able to avoid almost all communication with the world, has been surprised into mercantile intercourse. In an interval of the Chinese War a British Plenipotentiary appeared off the Japanese coasts, and demanded to negotiate with the inhospitable Government. The walls of Japanese exclusiveness fell at his summons. All that he asked—far more than he could have expected—was granted with a readiness which appeared in strong contrast with the world-renowned jealousy of the people. The trade, which had been hitherto confined to one port and one nation, was now thrown open with a liberality so complete as to be almost suspicious. Let us assume that the Tycoon and his grandees were suddenly converted to a belief in the benefits of foreign trade, and that the warlike deeds of the British fleet in the China seas had nothing to do with the concessions which were made to Lord Elgin. But even in this case there were not wanting reasons for the watchfulness of our philanthropists at home. Every account described the Japanese as an amiable and simple people, far advanced in certain arts, and possessed of a kind of civilisation which it was quite natural for them to desire to preserve. They were courteous to their visitors, full of curiosity, but inoffensive in their demeanour, though their Government and their feudal institutions might be expected to create in certain classes of them a disinclination to submit to any such slights as too often fall to the lot of Asiatics in their intercourse with Europeans. In short, there was a not unnatural feeling among sober people at home that our officers and traders had to deal with a very strange but, on the whole, an estimable nation, and that there was great danger lest they might abuse their position.

One unhappy event has come to strengthen these suspicions, and was, no doubt, the principal motive of the speech and Resolutions of yesterday. Our Consular system was established in Japan, our conventions were made, commerce began, and prospered fairly; any fears that the Japanese might have had at first were passing away; they had begun to recognise, as their Chinese relatives had long recognised, the value of European customers; our countrymen were, on the whole, behaving well, and all was going on smoothly, when the unfortunate affair occurred which led to the murder of Mr. Richardson. In this matter we cannot, with all our wish to respect the prejudices of the natives and to restrain Englishmen from outraging them, believe that there was any serious blame due to Mr. Richardson and his party. "A party of English, one of them a lady, were riding upon a road upon which British subjects were able to pass on foot or on horseback when they pleased. Being there when one of the grea

Digitized by Google

Daimios passed, they stood on one side of the road, where one of them was murdered, the lady and the others being attacked, and escaping, with many bruises and wounds, to Yokohama." This is Lord Russell's account of the affair, and this unhappy incident, the cause of the attack on Kagosima, and of whatever ill-will may have arisen between English and Japanese of late, was entirely the fault of a proud noble and his lawless retainers. Of the affair of Kagosima itself we need not speak here. The burning of the town was a misfortune, and nothing but the actual necessity of securing the persons of our countrymen from violence in a strange land could justify a proceeding which necessarily confounded the innocent with the guilty. We are happy, however to believe that this has been but an unfortunate episode in the relations of the two nations, and that, whatever may be the tendency to quarrel, arising from English recklessness on the one hand and Japanese prejudice on the other, there is no reason for saying that the work of Lord Elgin has proved a failure.

Lord Grey complains—perhaps with justice—of the noisy behaviour o certain Englishmen in the seaports. He goes back to a despatch of Sir Rutherford Alcock, dated nearly five years ago, in which that gentleman describes the drunken sailors who went on shore day after day offering violence to the Japanese. Now, though this is an outrage which is perpetrated probably every day at Wapping, we have no desire to deny its heinousness. Nor can we justify that "showing contempt for the predudices of the natives" with which Lord Grey charges "our diplomatic agents," their offence being that notwithstanding a prohibition against firing off arms within a certain distance of the Tycoon's palace, some members of the body had gone to shoot within the prescribed limit." But it is rather too much to make these things the ground for demanding that the very necessary stipulation of the treary which places Englishmen in Japan under the jurisdiction of their own authorities should be given up. To rescind this part of the treaty and to give the Japanese the right of dealing as they please with drunken sailors and sporting Attachés, or with English travellers who, belonging to the base order of "merchants,"—a class of people, it seems, looked down upon in Japan—venture to pass a Daimio on the road, would, according to Lord Grey, be a judicious policy. We think there will be few found to agree with him that the lives of Englishmen can be safely trusted in the hands of a people who, whatever their good qualities, are as yet only half civilised, and are ruled by an aristocracy full of the fiercest prejudices. Lord Grey speaks as if such agreements as to jurisdiction were unheard of; but he must know that the practice of considering the native of one country as subject to the jurisdiction of another, so long as he is upon its soil, is confined to Christendom, and that even the great Empire of Turkey has for centuries maintained "capitulations" with the chief European Powers. We have our own courts in the dominions of the Sultan and of his vassals, and it was certainly no invasion of another nation's rights that we asked the same privilege in the newly-entered monarchy of Japan. It is not by reserving the right to try our own offenders, but by omitting to fulfil the correlative duty, and failing to punish them when they are guilty of an outrage, that the true injury will be done to the people of Japan. If Her Majesty's Government make it known to the Consular authorities that all breaches of good faith with the natives, all insolent violations of their usages, must be severely visited, we have no doubt that any misconduct of which the Tycoon or his subjects have to complain will before long cease.

There is, however, one part of Lord Grey's speech which deserves serious attention—that in which he condemns the alleged tendency of officials on the spot to resort to hostile operations against the people among whom they live without the previous assent of the home Government. Though, no doubt, it is necessary that the authorities in these distant regions should have a discretion, and not be forced to wait for leave to act until the time for action is over, yet it cannot be denied that the country is always in danger of finding itself involved in war by some hot-tempered General or Admiral, Governor or Consul, and that to inculcate habits of forbearance on this important class should be a duty never forgotten by the Government at home. If we exercise so much forbearance and labour so anxiously to keep the peace of Europe merely to find ourselves provided with ready-made wars by officials on the other side of the globe, surely our self-dènial has been in vain. But this is an object which must be attained more by the good sense of the authorities both here and abroad than by any legal limitation of their power. No one will fail to agree with Lord Grey's views as to the great calamity of a war with Japan, but it will be better avoided by informing those on the spot that they must reform their habits and restrain their passions than by absolutely forbidding an Admiral to give them protection. With good sense and good manners, the treaty as it stands will, we believe, work very well; with an insolent behaviour to the natives, no mere formal agreement, however favourable to Japan, could long keep the peace between the two nations.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ALLAN—On the 7th May, at Penang, the wife of John Allan, Esq., of twins—a son and daughter.
JARVIE—On the 1st July, at 13, Park Circus, Glasgow, the wife of John Jarvie, Esq., of a son.
MONTEIRO—On the 19th May, at Shanghai, the wife of J. X. Monteiro, of a daughter.

DEATHS.

ALLAN—On the 21st May, at Claremont House, Penang, Harriett Scott, wife of John Allan, Esq.
BRADFORD—On the 23rd March, at Hakodadi, Japan, Emma Louise, daughter of Mr. Loren J. and Mrs. H. A. Bradford, aged three months and one week.

CUBBINS—At Shanghai, Wm. Cubbins, pilot.
DO ROZARIO—On the 10th May, at Shanghai, Cypriano, the infant son of C. Do Rozario.
FAYLOR—On the 12th May, at Shanghai, Mrs Faylor.
ROBINSON—On the 8th May, at Honque, Elisha Wood Robinson, pilot, aged 46.

BAR SILVER.—The *Daily News* has the following:—"There is still an almost entire absence of demand for silver for the East, and the market is vere flat, at 5s. 1½d. per oz. for bars. Some of the mercantile letters from India state that the enormous supplies of silver which have been despatched from Europe for some years past are believed to have been to a large extent hoarded by the natives all over the country, partly from a want of confidence in the stability of the Government. This distrustful feeling, however, seems to be gradually disappearing, and their material position has been greatly improved by the European demand for cotton."

From PENANG.—At LONDON: Devonvale. At FALMOUTH: Schlosser.

FREIGHTS AND CHARTERS.

But little has been done in chartering for coals to the East, as ships do not offer readily at existing quotations. In berth freights there is little or nothing stirring. According to advices received from the East by last mail, homeward freights were rather duller, except from Java and Manila, where tonnage is scarce and rates well maintained. On this side, however, there are charters in the market from the rice ports, Maulmain and Java, at good figures.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £37, and £1. 18s. For Shanghai: £47 and £2. 9s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £28 and £1. 5s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have ordered the Oithona to be surveyed for the conveyance of 444 hhds. porter and a few combustibles, from the River Thames to Hong Kong.

CASUALTIES.

PERNAMBUCO, June 15.—The Rocket (American barque), Freeman, from Boston to Batavia, came to anchor in the roadstead June 11; master sick.

According to advices received at Amsterdam July 2, the Pauline Constance Eleonore, v. Haften, from thence to Japan, which had put into Manila with damage, had been condemned at that port and sold.

THE CAPE INDIA, AND CHINA AGENCY.

ORDERS for GOODS of all descriptions executed, and Shipped by the Overland Route or by Clipper Sailing Vessels. Consignments of Produce realised. The Goods are selected by parties who have had personal experience of the requirements of the markets at the

CAPE COLONIES, INDIA, CHINA, AND JAPAN.

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S PILLS.—ENJOYMENT OF LIFE.—When the blood is pure, its circulation perfect, and the nerves in good order, we are well. These Pills possess a marvellous power in securing these great secrets of health, by purifying regulating, and strengthening fluids and solids. Holloway's Pills can be confidently recommended to all persons suffering from disordered digestion or worried by nervous fancies or neuralgic pains. They correct acidity and heartburn, dispel sick headache, quicken the action of the liver, and act as alteratives and gentle aperients. The weak and delicate may take them without fear. Holloway's Pills are eminently serviceable to invalids of irritable constitution, as they raise the action of every organ to its natural standard, and universally exercise a calming and sedative influence.

The last issue of the *London and China Telegraph* was published, on the arrival of the French mail, on the 7th inst.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our dates hence are to the 15th May. We find nothing in them to confirm the statement received, through Mr. Reuter, which appeared in the London morning papers of the 7th inst., under date "Shanghai, May 23," that "the expedition to re-open the Straits of Shimonoseki has sailed." The operation in question would appear to be in contemplation, but cannot, we conceive, have taken place at the date named. The *Commercial News* of the 11th May states:—"It is generally reported that, on the arrival of the *Conqueror* from Hong Kong with troops, Admiral Kuper will proceed to open the Suwo-n-ada or Inland Sea to foreign commerce, and that Sir Rutherford Alcock, Minister Plenipotentiary, will accompany the gallant admiral for diplomatic purposes."

It will be recollected that the Dutch have a score to settle with the Daimio who insists on keeping that passage closed, for firing into one of their ships of war. The journal just quoted says also:—"We learn that H.N. Majesty's steamers *Medusa* and *Djambi* are to leave Nagasaki for Yokohama on this date, and may be expected towards the close of this or the commencement of next week. Several other of H.N.M.'s vessels of war may be looked for from Batavia some time next month."

The *Japan Herald* of the 14th May, however, repeats a paragraph, from one of its former numbers, to the following effect:—

We are informed that it has been stated in the *Japan Commercial News* that Sir Rutherford Alcock, K.C.B., H.B.M.'s Minister Plenipotentiary, is about to proceed with the British fleet into the Inland Sea. We are by no means prepared to state that this is not true, but we have no hesitation in asserting our conviction that there is no authority for the statement. Sir R. Alcock is certainly not the man likely to let any important plans of such a character ooze out through a local print. Even if we had any information tending to such an idea, we should have thought it highly injudicious to place it in print without distinct authority to do so.

The same warlike rumour, accompanied by the assertion that Sir Rutherford "had determined to hoist his flag at the Legation in Yedo on the 16th May," comes to us from Hong Kong, but our Yokohama advices are of an entirely different spirit. It has been long known that the Dutch were resolved to punish the offending Daimio for the outrage referred to above, and it will be seen that they are assembling a powerful force in Japanese waters, which it may be supposed can be intended only for that purpose. There is every reason to discredit the idea that England is about to undertake any operation of an hostile tendency. Everything is at present quiet. The latest Market Report speaks of "a general revival of business, in both the import and export branches of trade." Indeed, to avert any encounter with the foreigner, the Tycoon and some of the most powerful Daimios are determined, if we may believe the *Japan Herald*, to punish the guilty party themselves. That authority says:—"We hear from our own Japanese correspondent that the affairs of Thioshiu, related to have been happily adjusted last month, seem not yet settled. There are reports of the Emperor's calling him to justice. Consequently the Government have sent Ongasawara Ukio-no-Taya with a message to him to that effect. The princes of the several provinces are daily calling out forces for this purpose. I-i-kamon-no-kami is to command the first detachment. Satsuma is to be the great commander, and will follow after him. The Kiushiu Daimios are to protect their own provinces. Kanga-Chiunga-ngou is to protect the eight provinces belonging to Yedo. The Government is to protect Miako, with the additional help of Owari and Kiuchiu."

Mons. de Bellecourt, the Minister from France, left Yokohama on the 6th May per H.I.M. steamer *Tancrede*. He arrived in Japan in September, 1859, as Consul-General, and was promoted in June, 1860, to the dignity of Consul-General and

Digitized by Google

Chargé d'Affaires. In September, 1861, he assumed the post of Minister Plenipotentaire, Chargé du Consulat-General. His successor is H. E. Mons. Leon Roches, who arrived on the 27th April, per *Tancrede*.

One of Nelson's heroes has been undergoing hard treatment from the Japanese, but as he had forsworn allegiance to Britain, Her Majesty's representative cannot interfere. The American Minister, we are told, has had no less than three long interviews with Governors from Yedo, in the case of George Horton, a man of 84 years of age, whom the Japanese brought here last June, under the pretext that he boarded a Japanese whaler at the islands with a piratical intent. He was brought before the American Consul for trial, with another man from the islands. This old man, who fought under Nelson at the battle of the Nile, and in other engagements, and who had been left at the islands by Commodore Perry in 1854 or 1855, on account of ill-health, was brought into court with his hands tied behind him with ropes, and there being not a shadow of evidence against him, with the consent of the captain of the Japanese vessel, and other officers who accompanied him, he was at once set at liberty. The American Minister very properly demanded that the Government should restore him to his property and home at the Bonin Islands. This they utterly refused to do, and subsequently among other claims presented by the Minister against the Japanese Government, he demanded that they should pay Mr. Horton $2,000 for his houses and lands at the islands. Three times the governors, or members of the Gorojio, have been here to meet the American Minister on this subject, after at first having refused to entertain the question of indemnifying the decrepid man, who is thrown upon the United States' Government after being robbed of his property when more than fourscore years old. The old man was brought before the members of the Gorojio on one occasion, that they might have ocular demonstration of the falsity of the charge under which he was brought away from the islands, without so much as being allowed to get his clothes, or anything else that belonged to him. His manifest infirmity would demonstrate this, were there not an entire absence of all testimony in proof of the charge. But after all these interviews and discussions the Government has, up to the present time, persisted in refusing to do this simple act of justice. The United States Government insists upon the demand being paid, and we are glad to know that not a jot of it will be abated, and, if need be, the requisite means to enforce it, with all other demands, will be forthcoming.

By the arrival on the 3rd May of the American barque *Abigail*, Capt. Nye, from the Bonin Islands, intelligence was received that the *Lady Leigh*, Capt. Shields, which left Shanghai on the 1st of August last, bound to Bonin Islands on a fishing expedition, encountered a typhoon which compelled her to run into Nagasaki for repairs. On her way thence to the islands she was found to be leaking badly, and it was necessary on her arrival at the islands, October 22nd, to heave her down in Ten Fathom Bay in order to stop the leak. While lying there it was discovered that her bilge planks had started and she was otherwise unseaworthy, and she was accordingly condemned. The islanders showed much kindness to the ship's company, freely sharing with them the limited variety of subsistence which the islands produce. Since the withdrawal of the Japanese colony last July, two English, three Portuguese, two French, and three Americans, with about forty Kanakas constitute the population.

On the 24th of December Captain Shields, against the advice of his friends, embarked in a boat left there by the Japanese, with the chief mate, the cook, two seamen, and a Chinese boy, intending to go either to China or the coast of Japan, as might be most practicable. From the severity of the weather after their departure the islanders have had much apprehension they were lost at sea, but advices have been received of their arrival at Hong Kong. The super cargo of the *Lady Leigh*, and the remainder of the crew were kindly brought to Yokohama by Capt. Nye, at the risk of loss on his cruise by the diversion of his ship from her intended course. The Japanese profess to have abandoned the islands, on account of the rumours of threatened war between Japan and the Western nations last summer. Doubtless they found this experiment at colonisation an unprofitable speculation.

The harbour and climate are well spoken of; but the soil appears to be very barren, producing little save potatoes and onions, and only a very small portion being cultivable. Turtle and venison appear to be the principal food of the residents, but though very seducing occasionally, the shipwrecked crew seem to have become heartily tired of them after a long experience. It is to be regretted that no attempt is made to describe the occupation of the islanders; but it appears clear from the above account that they can only be making a living by hunting and fishing, and cannot contemplate establishing a trade with the mainland. The life of the ten Europeans must be sadly monotonous, and resembles more nearly that led by the mutineers of the *Bounty* and their descendants, than anything which has been recorded of more recent colonial experiences. The total available area of soil for cultivation, on the island on which the *Lady Leigh* was abandoned, is estimated at fifty acres, so it is evidently totally unfitted to support a people who, like the Japanese or Chinese, live principally on rice.

JAPANESE AMUSEMENTS.

The feats appear to have been those of strength rather than of agility, and to have consisted in wielding some warlike weapon. Thus we find Kanai-yujiro, aged 21, one of Mito's retainers, handled an iron bar 6 feet long, and weighing 112½ catties, or 150 lbs. What he did with the bar the reporter does not say, but if he flourished it to any considerable extent, he may be counted as having performed no trifling feat of strength.

Yamada Gehi, of Chikungo Yanagawa, aged 39, performed the same exploit.

But hurrah for the ladies! Here comes Miss F'kui, 20 years old, beating the air with a bar of the same material and length, but weighing only 100 lbs. Next appears a servant of Hosokawa, 28 years of age, distancing his predecessors while he brandishes an iron shillelagh (shall we call it?) of the moderate weight of 266 lbs. Hosokawa seems to have a goodly number of such worthies among his retainers, for we are told that two others on the same day, aged respectively 18 and 17, handled iron bars of 150 lbs. weight, with a dexterity that elicited the Tycoon's commendation. One of Okubo Kangaino Kami's retainers, wielded a similar weapon on horseback, that weighed 175 pounds.

Kondoo Goruba, a servant of Aidzu, won applause by the manner in which he wielded a broad axe, of the same weight as the preceding.

Doctor Yamada, a retainer of Matzdaira Yamato no Kami, handled a long sword or spear, that would have served Goliath of Gath, weighing 175 pounds.

But the woman that next entered the list deserves more eclat, for she, Seki by name, aged 33 years, a servant of Satsuma, used the same weapon, weighing with its iron handle or staff, 146 pounds.

Nari Kawa Hayato, aged 58 years, a servant of Ikamon no Kami, took up a gun weighing 390 pounds, and held it in position for firing across his knee.

Cho-kai no Kami, a Minister of the Prince of Kanga, picked up a cannon ball weighing 300 pounds, as if to load a gun, and again, his daughter, 18 years of age, flourished a long spear weighing 150 pounds.

Natai Yuzo, aged 17 years, a servant of Kanga, did the same with a sword of 150 pounds weight.

Another of Kanga's servants carried off the palm for bending a bow one inch and eight tenths in thickness.

A retainer of Satsuma's, Niino-Genzaimon by name, at the goodly age of 111 years, used a war-fan weighing 50lb.

Tsrumi Kiukichi, a man of 78 years, proved that he could hit a man with a chain and ball at the distance of 108 feet.

A youth of 18, one of Hosokawa's servants, showed how he used a hoe weighing 66 pounds at his daily labour.

Mention is made of a man who blew a conch shell whose capacity was 1,665 cubic inches. While another man, one of Satsuma's retainers, displayed the powers of a voice that can be heard at the distance 2 ri or 5 miles nearly. Could Homer's Stentor beat that?

SHANGHAI.

The dates are down to the 22nd of May, only two days later than received per French mail. We find nothing to add to the details of the capture of Chang-chow, given in our last issue of the 7th inst. The latest London mail to hand was of the 26th of March.

We are glad to learn that the case of the Oriental Bank Corporation *versus* Yung-cheong, which was heard at Hankow on the 14th and 16th May, has been decided in favour of the former. It will be remembered that the action was brought by the bank to recover the sum lost through the defalcation of A-keen, the compradore at the Shanghai Bank, for whom the defendant was surety. The case was tried before J. A. Webster, Esq., H.M.'s Acting Consul, and J. Ashton and H. R. Mackenzie, Esqrs., Assessors. Judgment was delivered to the following effect:—"That the guarantee is binding on the defendants, and that they pay to plaintiffs the sum of S. taels 68,323; each party to pay their own costs." We understand that the decision has been appealed against to Sir Frederick Bruce.

The French police have again been brought into notoriety by the act of one of their body. A few days since an unoffending Chinaman was thrown from his pony in consequence of a blow administered by one of the guardians of the peace, who, to punish what was in reality his own offence, confiscated the pony, and led it away in triumph. This was an act arbitrary enough, it is true; but it was cast into the shade by the further

Digitized by Google

confiscation of a pony whose rider alighted to render aid to a prostrate fellow-countryman. The policeman marched off with the captured ponies, but what he eventually did with them we have not discovered. The act seems to us one which might indeed be explained, were it proved to be a freak committed by a man in a state of intoxication. But policemen should not, as a rule, be either given to intoxication or to practical joking, at least while on duty; yet how we are to account for the eccentricities of the French police, unless we admit one of the above impeachments, we are at a loss to discover. We have on former occasions drawn attention to the peculiar action taken by the French policemen in cases where subjects of other Powers are concerned. The difficulties which have hitherto occurred have probably arisen from the mixed character of the force, and from the small number of competent men who Present themselves for enrolment. We may expect an altered state of things when a body of "agents de la sureté publique," whose approaching arrival is announced by the Municipal Council, shall have put in an appearance, and introduced a new and healthy element into the present system. The following letter contains a statement of the outrage to which we have referred above:—

(To the Editor of the *Daily Shipping and Commercial News.*)

Shanghai, May 18, 1864.

Sir,—While yesterday riding quietly over the bridge leading from the old north gate of the city, a French policeman came up, and struck my pony a violent blow with his baton or whip. The animal, frightened, at once took head, and bolted, throwing me to the ground and hurting me severely, so that I could not rise. The policeman seized the pony, and held it until another Chinaman on horseback came up and alighted to raise me, when the policeman seized the latter's pony also, and carried both away with him.

I beg to ask whether Chinamen are forbidden to ride, or whether there is any law which excuses an outrage because the perpetrator is vested with an undue share of power?—With respect, FENG-TZU-LAN.

(Translation.)

The following notifications have been published:—

The interest and responsibility of Mr. Frederick William Laurence in our firm ceased on 30th ultimo. Mr. Samuel Hubbard Clarke is this day admitted as partner. Mr. George Richards Laurence is authorised to sign our firm.—Bull, Purdon, and Co.

The interest and responsibility of the late William Henry Green in our firm ceased on 4th August, 1863. Mr. Edmund Henry Lavers is this day admitted a partner in our firm.—Gilman and Co.

The interest and responsibility of Mr. Robert Reid in our firm ceased on the 30th ultimo, and Mr. Ludovic Grant Dunlop was admitted a partner on the 1st instant. The partnership now consists of:—James Worthington, William Seton Brown, Ludovic Grant Dunlop.—Birley, Worthington, and Co.

The following items are from the *Friend of China*:—"The *Recorder* records the changed appearance of the British Consular Court since the return of Sir Harry Parkes to his post. Sir Harry (the Editor tells us) does all the judicial work; that is to say, he takes down all the notes, evidence, &c., arising in each suit, himself, the principal duties of the Clerk of the Court being the swearing of witnesses, numbering and docketing of cases, &c. And there is a reporters' table now, and there are lawyers' tables, the order of the day being hard work. In short (says our contemporary), the neck is broken of cleansing the Augean stables—a simile the poetry of which we have a difficulty in appreciating. No doubt there is a change in the way consular duties are performed just now, and we rejoice at seeing Sir Harry in the seat of justice in every case, his experience of bench duties being pretty extensive; but we are bound to say, in justice to Messrs. Markham and Lay, that our contemporary is not justified in using such words as "cleansing the Augean stable' in any such connection; while, from the constable to the chief, the work, far from being heavier or better performed, must now be a little lighter than it was before."

"When reporting the fall of Chang-chow-foo, we forgot to say that Tan-yang was evacuated at the same time; news of the events reaching Shanghai at the same moment. Those at Tan-yang who had reason to hope for consideration at the hands of the Imperialists, were busily engaged for many hours before they approached in shaving their heads and plaiting new tails, one great lack being black or any kind of silk for what Chinese call the *tscen*, or fag end."

"QUINSAN.—Gordon was busy at arranging a settlement of claims, and would be off on a reconnoitering expedition about Nanking at the earliest moment. The *Friend of China* earnestly hopes the Taipings may catch him on their ground out of this province—they would be fully warranted in executing him with short shrift. If they shave his head, however, and brand him "the King of the China Barbers" it will be quite enough for the London clubs."

HANKOW.

The steamer *Sea King* arrived at Hankow on 15th May ready to load with the new teas at £12.

The *Challenger* had left Shanghai for Hankow in tow of a steamer.

FOO-CHOW.

Several clippers were in port for the new teas, and we hear that, owing to competition, not more than £4 to £5 will be obtained.

HONG KONG.

The dates are down to the 30th of May. The London mail of the 11th of April, which broke down in the *Candia*, in the Red Sea, arrived on the 29th of May, with the French mail of the 17th of April.

One of the most daring and long-planned robberies which has taken place for some time past was discovered on the 16th May. At three o'clock, A.M., a light was observed in the jewellery department of the house of Douglas Lapraik, Esq., by the Chinese watchman, who at once gave the alarm. The inmates were quickly roused, when a hole in the floor was found almost wide enough for the entrance of an ordinary sized man, and through which a boy could pass with ease. On examination it was ascertained that the burglars had dug a large hole about ten feet underground, starting from the side-drain, and going under the foundation of the building. In this excavation housebreaking implements of various descriptions, with small Chinese lanterns, Chinese clothing, and ropes were discovered. A document was also found which proves the careful and professional premeditation of the burglars; it was no less than a division of the spoil which was to have been carried off between the gang of fifteen whose names were appended to the paper. There is no doubt but that this is the work of a gang thoroughly organised; and the digging—we might almost say quarrying—must have been the work of at least a fortnight. One remarkable fact connected with it is, that the police made a special inspection of the drains about three weeks before, when this one was found to be quite secure. The value of the property carried off amounts to between seven and eight hundred dollars; but when we consider the large amount of moveable valuables on the premises, it is certainly very fortunate they did not succeed in taking away a quantity of much greater value. None of the thieves have as yet been discovered; but the police are on the look-out for them, and we hope will prove successful.

THE CITY HALL PUBLIC MEETING.

The public meeting called to consider the site and other matters connected with the proposed City Hall was held in the Club House. Instead of the usual seven or eight which generally constitute a public meeting in Hong Kong, about four times that number of gentlemen were present on the occasion.

The Hon. C. W. Murray, having been called to the chair, expressed his satisfaction on behalf of the committee at the unusual number of gentlemen present, thus showing the warm interest felt in the movement. Having spoken of the great advisability and growing necessity for a City Hall in this colony, he proceeded to give a sketch of what had taken place from the first meeting in October, 1861, up to the present time. The first site, by side the cliff on which stands the house of Augustine Heard and Co., was found to be much too small, and a second application was made to Government for that on which the Harbour Master's office now stands. Both the Home and local Governments had certainly shown a commendable readiness to assist in the undertaking, and granted every facility to forward the wishes of the committee, for which they deserved the thanks of the community. At first, the committee, fearing that sufficient funds could not be raised to build a hall worthy of the colony, had thought of restricting their views in some measure; and they had agreed to be content with the necessary condition of providing accommodation for the Harbour Master's office in the building. This was objected to by many at the time, on the ground that it would both encroach upon the accommodation at the committee's disposal and destroy its entirely municipal character, which it was generally felt ought to be retained; but the committee were shut up to the conclusion, had not a great accession of funds come in just at that time, and enabled them to enlarge their borders. They now proposed, with the aid of the Government, to reconstruct that portion of the Praya between the Military and Lindsay and Co.'s wharves, which would give them space on which to build a new Har-

Digitized by Google

bour-Master's office, apart altogether from the City Hall, and still leave space for a compound at the back of the Hall. The front would thus also be greatly improved by space being afforded for a carriage approach and a compound in front, which, having the fountain presented by Mr. Dent in the centre, would be a great improvement. The committee also proposed to provide free accommodation for the libraries of the Morrison and Royal Asiatic Societies and of the London Mission; and he (Mr. Murray) expressed a hope that this step might lead to the formation of a public library, which was a want much felt in the colony.

As to funds, they had in hand $15,500, the eight banks would make up other $4,000, which, with $500 from Mr. Campbell, made a total of $20,000 of donations. He was sorry to say that the appeal which was made was most unsuccessful, $284.50 being the whole amount received, scarcely as much as would pay the printing, had it not been done for almost nothing. The usual liberality of Mr. Robert Jardine, however, had fully made up this. On communicating with Mr. Jardine on the subject, that gentleman offered to support the undertaking to the amount of $50,000, either as a loan or as shares; and it was thought that the most simple way would be to take it in the form of shares. It was proposed to raise the remaining $30,000 in shares of $100; and it would be a standing reproach to the people of Hong Kong if, after the munificence of Mr. Jardine, they failed to do so. With regard to the shares of Mr. Jardine, the committee would also submit a resolution to the meeting that they ought to be held as preferential shares at 5 per cent. interest, or more if the receipts could afford it. The progress of the colony during the two years which the Hall would occupy in building almost insured a dividend of seven or eight per cent.; and it was but right, the committee thought, that Mr. Jardine should get the advantage in preference to all other claims. He (Mr. Murray) had been informed that the Chamber of Commerce intended to give a donation of $2,500; and there was no doubt, after the favourable aspect the project was now assuming, that more donations from home, as well as from the colony, would soon be forthcoming. As is often the case in the building of churches, our friends at home could send donations in the form of pieces of the building and fittings, and such like, which would be quite as acceptable as money. The rough estimate of the cost of building amounted to fully $80,000, so that not less than $100,000 would require to be raised.

Mr. Murray concluded by stating that as the committee, of which he was chairman had discharged their functions, they would now resign their office; but, if it was the desire of the meeting they had no objection to continue their duties in the undertaking they had so much at heart.

The following resolutions were then proposed, seconded, and unanimously agreed to.

I.—Proposed by Mr. Whittall, seconded by Mr. Gibb,

"That the retiring committee be re-elected, with power to add to their number and to supply vacancies; and that they be and hereby are authorised to take all necessary measures for the completion of the undertaking."

II.—Proposed by Mr. Walker, seconded by Mr. Ruttunjee,

"That the committee be and hereby are authorised to use their own discretion in regard to accepting the proposal of Government for the reconstruction of a portion of the Praya, and the erection of a new Harbour Master's office apart from the City Hall, and, if satisfied of the expediency of the measure, to execute the necessary works.

III.—Proposed by Mr. Brand, seconded by Mr. How,

"That whatever funds are required in addition to the donations that have been and may further be obtained in aid of the undertaking, shall be raised by the issue of shares of one hundred dollars each, under the management and direction of the committee. The liability of shareholders to be limited to the amount of their shares."

IV.—Proposed by Mr. Maclean, seconded by Mr. Schmidt,

"That, in consideration of the important aid rendered to the undertaking by Mr. Robert Jardine, in offering to take shares to the amount of $50,000, such shares shall have a preferential claim on the receipts of the City Hall to the extent of $2,500, or five per cent. per annum; and that no dividend shall be made to the other shareholders until Mr. Jardine's claim for five per cent. on the amount of his shares be satisfied; but that, should the receipts of the institution permit of a larger dividend than five per cent. being paid on the entire amount raised in shares, Mr. Jardine shall be entitled to participate in such larger dividend."

V.—Proposed by Mr. Wieser, seconded by Mr. Booth,

"That the committee be and are hereby authorised to arrange for the plans and estimates of the intended building, and for the execution of the works on such terms as to them shall appear expedient."

VI.—Proposed by Mr. Maclellan, seconded by Dr. Kane,

"That the committee be and hereby are authorised to arrange terms with the Chamber of Commerce for the permanent accommodation of that institution in the building, and to reserve free accommodation for the libraries of the Morrison and of the Royal Asiatic Societies and of the London Mission."

A vote of thanks to the chairman concluded the proceedings.

On Her Majesty's birthday the Volunteer Artillery Company turned out to honour the occasion with a royal salute. The weather was most dismal, torrents of rain descending the whole day. Each of the six guns fired three rounds to begin with, while one round from half of the battery completed the royal salute of twenty-one. The band immediately played the National Anthem in excellent style; the commandant ordered three cheers to be given for Her Majesty, which order was duly responded to. The corps then quickly limbered up, and marched back to quarters at double-quick time.

The Dutch brig *Candati* was attacked in the Ly-e-moon by pirates, but succeeded in beating them off.

A fire broke out in Taipingshan, when six or seven thousand dollars' worth of property was destroyed; but had it not been for the promptness of Captain Quin and his officers, with the admirable working of the fire-plug, the loss might have been much heavier.

The Judge awarded the master, crew, and owners of the steamer *Chanticleer* $55,000 as salvage on the cargo of the *Cornelia*, lately stranded on the Prata Shoal; while £1,000 was given for the salvage of the vessel.

The *Government Gazette* contains the census of the colony for the year 1863. The entire population of the colony is 124,850; 1,644 of which are Europeans; 1,336 Portuguese, Indians, and mixed blood; 100 aliens, or temporary residents; leaving 121,770 Chinese. The total number of public and private buildings is 6,350, 588 of which are untenanted or unfinished. The number of every description of boats plying in the harbour and bays shows a total of 4,019, with a population on board of 16,233 men, 6,529 women, 4,901 male children, and 2,884 female children, or a total of boat population amounting to 30,537.

The Order of Council revoking the two former orders connected with the Lay-Osborn affair is also published.

A report is given of the Registrar-General's relative to the working of the new ordinance for compulsory licensing of chairs and chair-coolies. The report states that the ordinance has worked very satisfactorily, 430 chairs, and 858 chair-coolies having been registered; and the tin badge difficulty seems to have been overcome. The Registrar-General suggests a new stand might be appointed between Old Bailey-street and Union Chapel.

The Hon. Mr. H. J. Ball, and Mr. W. H. Alexander, are appointed Commissioners for compiling a new edition of the ordinances of the colony; and Mr. Walter Meredith Deane, and Mr. Henry John Heard Tripp, both of the Hong Kong Volunteers, are appointed to be extra aides-de-camp.

From the criminal returns, we learn that no less than 178 cases were tried during the year 1863. 23 persons were convicted for burglary during the year; 7 more burglary with wounding; and for robbery from the person, 33. For theft from dwelling houses 14 were convicted, while 23 were convicted for piracy. These figures, along with 24 convicted for escaping from gaol, are the principal items in the long list of 211 persons found guilty of criminal offences during the past year. It is so far satisfactory to state that the entire number of the pirates, and the greater proportion of those engaged in the robberies, appear in the column headed "penal servitude." The total number of cases brought before the Police Magistrates' Court during the year was 5,015, the chief items of which are—Assaults, 758; at large without passes, 274; breach of registration ordinance, 215; thefts, 879; vagrancy, 196; burglary, robbery, &c., 67; with 2,034 for unlawful possession of property, breach of the peace, &c.

We (*China Mail*) feel bound to draw attention to the approaching publication of Dr. Legge's third volume of the Chinese Classics. How the two first volumes have gone off we do not know, but if we might judge by their own merits they ought to have sold well. The works both of Confucius and Mencius are evidently the result of careful deliberation on the part of those two sages, and we should not consider any persons to be fully educated who had not perused both volumes. With regard to their merits, it may be questioned whether or not the learned translator is himself aware how much benefit he is conferring on the world by his arduous labours. Be that as it may, the translation of these Chinese Classics is a benefit conferred upon every man who understands the English language. If we had merely desired to puff Dr. Legge's books we might have done so long ago, but this is not our intention; the

Digitized by Google

Chinese Classics will, we dare say, get on without any help of ours. It is impossible to peruse these works without feeling that wisdom did not die with Solomon, for every page of them contains maxims and aphorisms worthy of being written in letters of gold. It is not always that such writing can be gleaned from Asiatic sources. The Indian sages are somewhat tame in their writings, besides being altogether too superstitious; but the same cannot be asserted of the Chinese philosophers. In their works we find rules, by no means valueless, for the guidance of statesmen in every country of the globe. We also find directions for the social affairs of every position in life, whether it be the relation between father and son, husband and wife, or citizen and magistrate. To take up one of these volumes which have been translated by the learned and talented Dr. Legge, and to read it carefully through is half an education, and we cannot do better than advise everybody to obtain a copy of the works referred to.

The steamer *Annette* had returned from Nagasaki without meeting a sale.

The *Lotus*, noticed in our last as up for sale, we hear was fixed at $120,000.

The double-screw *Far East* had not arrived up to the latest date.

BORNEO.

LABUAN.

The following letter has been forwarded by Lieut. Burn, Master Attendant at Singapore, to be published for general information. The danger alluded to, not having before been reported, should be carefully marked on their charts by all shipmasters.

LABUAN, 30th April 1864.

Sir,—I have the honour to inform you that on the 27th inst. the steamer *South Western* struck on a small coral patch not marked on the charts, about 30 miles N. N. W. of the north end of this island, having less than one fathom water on it. The latitude by account, after a run of only four hours from Labuan, was 5 deg. 54 min. N. The longitude by observation, sights having been taken only half an hour before the ship struck, was 115 deg. 4 min. 30 sec. E. May I request you to give public notice of this danger. I have the honour, &c.,

C. C. DE CRESPIGNY, Harbour Master.

SIAM.

BANGKOK.

Sir Robert Schomburgh, for many years the British Consul at this place, returns to England by the present mail. Until a successor is appointed, Mr. Knox—who, while here eighteen months ago (says the Singapore *Daily Times*) sent home to the Foreign Office his opinion on the conduct of our local Government on the bombardment of Tringanu—will act as British Consul at Bangkok. The appointment of consul at Siam has been one of considerable importance—an importance which will increase as time goes on; it is also liberally paid, and we have no doubt but that the Imperial Government will send out a gentleman of high character and ability to fill it.

JAVA AND NETHERLANDS INDIA.

We have dates from Batavia to the 31st of May. The intelligence is of no interest.

MACASSAR.—From trustworthy reports, we learn that the *Lucky Star*, of Siam, and bound for Ningpo, was lost on the 26th of January last, about six miles off the Island of Wango-Wanga. Five Europeans, supposed to belong to the Danish ship *Jupiter*, Captain Lorenzen, lost in the Straits of Saleyer on the 23rd of January last, have been murdered by the natives of the Island of Loeking Loe, north of Saleyer.

STRAITS OF MALACCA.

SINGAPORE.

The dates hence are to June 8. The English mail of April 26 arrived on May 30.

Though in commercial circles a considerable amount of anxiety is felt, and many failures are taking place, the fortnight has been one decidedly indicative of advancement.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CAMERON—On the 6th June, at Lochiel Lodge, Singapore, the wife of John Cameron, Esq., of a daughter.

CARGILL—On the 4th July, the wife of William Walter Cargill, Esq., M.P., prematurely of a daughter, stillborn.

COGHILL—On the 13th May, at Hong Kong, the wife of J. G. Sinclair Coghill, M.D., prematurely of a son, stillborn.

JARVIE—On the 1st July, at 13, Park Circus, Glasgow, the wife of John Jarvie, Esq., of a son.

MURROW—On the 15th May, at Hong Kong, the wife of Y. J. Murrow, of a daughter.

MONTEIRO—On the 19th May, at Shanghai, the wife of J. X. Monteiro, of a daughter.

SOUTHESK—On the 29th June, at 34, Moray-place, Edinburgh, the Countess of Southesk, of a daughter.

MARRIAGES.

BUTCHER—GARDNER.—On the 9th July, at St. Mark's, Notting-hill, by the Rev. James Connell, M.A., vicar of Hammersmith, assisted by the Rev. Townly Gardner, B.A., brother of the bride, the Rev. Charles H. Butcher, M.A., Fellow of Univ. Coll., Durban, and Consular Chaplain at Shanghai, China, to Margaret, youngest daughter of the late John Lawrence Gardner, Esq., of Preston, Lancashire.

MOSS—WALL.—On the 1st July, at St. George's Church, Hanover-square, by the Rev. George Eastman, Charles, second son of John Moss, Esq., Didsbury, to Helen, second daughter of George Wall, Esq., Colombo, Ceylon.

HAFFENDEN—FOWERAKER.—On the 23rd May, at the Presbyterian Church, Singapore, by the J. Matheson, John Haffenden, jun., to Eliza Jane, eldest daughter of James Fowerakер, of Budleigh, near Exmouth, Devonshire.

SMITH—CALLAHGAN.—On the 14th May, at St. John's Cathedral, Hong Kong, by the Rev. I. J. Irwin, Colonial Chaplain, Thomas M. Smith, Overseer of Water Works, to Elizabeth Bridget Callahgan.

TYERS—MORRIS.—On the 2nd July, at Christchurch, North Brixton, by the Rev. Jas. M'Connel Hussey, M.A., incumbent, William T. Tyers, Esq., of Shanghai, China, to Louisa Duce, eldest daughter of James Morris, Esq., of Mornington House, Clapham-road. No cards.

DEATHS.

ALLAN—On the 21st May, at Claremont House, Penang, Harriett Scott, wife of John Allan, Esq.

BRYAN—On the 14th May, at Shanghai, H. P. Bryan, aged 27 years.

BEFORE CHANG-CHOW-FOO.—Col. Morton, Capt. Smythe, Capt. Rhodes Lieut. Greenlaw, Lieut. Williams, and Lieut. Brown, all officers of the Quinsan force, Capt Murphy.

CASTLE—On the 15th May, at Hong Kong, found drowned, George Castle, boatswain, British ship Seawfell.

FERNANDES—On the 13th May, at Hong Kong, Louis Fernandes, Indian Usher and Process Server of the Police-court, aged 66 years.

JOHNSON—On the 6th July, at 17, Robertson-terrace, Hastings, Katherine Bulkeley, the beloved child of Francis Bulkeley Johnson, Esq., of Shanghai, China, aged one year and nine months.

M'KENZIE—On the 10th May, at Shanghai, of small-pox, Capt. M'Kenzie, late of the Hellespont.

PARSONS—On the 4th May, at Shanghai, of fever, Henry Arthur, eldest son of Henry Parsons, Esq., of Blenheim-crescent, Notting-hill, in his 18th year.

TWYNAM—On the 29th June, at Bideford, N. Devon, Francis Frederick, the infant son of Captain Twynam, late Indian Navy.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—With the termination of the season, the usual exhaustion of stock has occurred. The remark applies with peculiar force and effect to the season now about to close, for the exhaustion (with the exception of a bagatelle) both at the ports and in the producing districts is complete, whether of black or green. As for the new teas, some have arrived at Amoy and at Foochow, and business appears to be going on apace at the producing districts. The advices as to quality and price are, as usual, conflicting, but there appears no doubt about the quantity being full. Several steamers and a large number of first-class clippers are either engaged or awaiting to load with the new Congous for London, so that large supplies will go forward early. The first shipments will be contract teas, of which there are not many this season. There may be some delay in opening the market, for last year's rates cannot be given by the exporters, and as it seems their rule, in the producing districts, there should be a struggle at the ports between the dealers and the buyers.

CANTON.—Scented teas are much higher than they were at the opening of last season. The prevalence of rainy weather having injured the flower used for scenting, fine qualities are scarce. Canton Greens have been dealt in to a moderate extent at high rates; latterly buyers have become more cautious, but holders are extremely firm. The stock on the market is thus given. Tayshaans Congou 1,400 hf ch. Powchong 2,500 hf.ch. Oolong 1,200 hf.ch. Scented Orange Pekoe 6,000 boxes. Scented Caper 7,000 boxes. Canton Greens, 15,000 boxes.

FOO-CHOW.—The only settlements we hear of are:—Congou, 600 chests at taels 14 to 15½ for common to low flavory. Stock 1,700 chests. Oolong, 1,000 ½-chests at taels 8.5 for very common. The first sample of new teas was shown on the 12th instant, being three days later than last year, and to date only 3,200 chests (of which part are contracts) have arrived. It is therefore to soon too give an opinion as to the quality of the new crop.

SHANGHAI.—Black: Settlements of the fortnight, 2 chops Oonam (2,070 chests) at 16 to 18 taels, and 500 chests Japan Oolong at 23 to 29 taels. Besides which, 830 chests Congou have been transshipped on owner's account. The above rates for the Oonams display a fall of fully one tael on last quotations. The stock on the market is reduced to 2,000 chests Congou. Green: Transactions and rates are quoted slightly easier, both which effects are traceable to the same cause, namely, the poor assortment on offer, which are almost entirely of common Kewkiang packed teas. At that port there is not a chest on the market. Reports are to hand from the Pingsuey districts, which state that the price of the leaf has opened very high in consequence of the competition caused by foreign contractors. Good teas are not likely to be laid down under 44 taels.

HANKOW.—The market for new teas reported open in the Yung-low-toong and Hip-ca-see districts. The weather had been very unfavourable for tea picking, but a few lots of leaf were said to have been settled at 500 cash per catty, which would lay down finest chops in Hankow at 34 to 35 tls. or about two tls. higher than last year; the quantity bought, however, was so small the market could scarcely be said to have fairly opened, and these figures could not be taken as a criterion of what prices will be. Small musters of unprepared leaf had been shown, but as they were evidently picked samples, no opinion could be formed of the crop. Supplies were not expected to arrive before the first week in June.—Total export for the season 683 chops or 366,300 chests, against 286,391 chests last year.

KEWKIANG.—Green Teas: The market had been cleared of the stock left at the date of our last, and the supplies from the interior having been exhausted the season is closed. Exports show a falling off of 39,272 half-chests, which, including 5,300 half-chests of old teas stated in this season's export, exhibits a total deficiency in the yield of about 50,000 half-chests as compared with the previous season. Export to date 231,549 half-chests. Against season 1862-63, 270,928 half-chests. Black Teas: Advices had been received of the opening of the market for new leaf in Ningchow at 280 cash, and of the advance in two days to 320 cash per catty—equal to taels 27.5 in Kewkiang—with higher prices anticipated. At Hohow the market had not yet opened, and lower prices were expected. The rebels had been compelled to take a more southerly direc-

Digitized by Google

tion which had enabled the pickers to return to their work. Export to date 112,437 chests. Against season 1862-63, 52,275 chests.

NAGASAKI.—Little or none offering. Samples of the new season's crops have been exhibited, and parcels are expected in the market shortly.

YOKOHAMA.—We can now report a few new season's musters offering, but we hardly believe that they represent parcels. The prices asked are very high, $30 to 32 being the general sale for teas similar to what were bought last season at $18 to 20 and 22 per picul. No business is likely to be done at these rates, and we imagine by the time that supplies of any amount are to hand the merchants will become more reasonable in their ideas.

RAW SILK.—SHANGHAI.—The business of the fortnight has amounted to about 600 bales of Tsatlees and Hainings, at prices showing no alteration on those last quoted, but as the rate of exchange has advanced, the laying down cost has been somewhat increased. The reports from the interior with respect to the coming crop are so far favourable, but there appears little doubt that the total yield will again be a very small one. The unprecedentedly low price of mulberry leaves (usually $1 to 2 per picul), now selling at 200 cash per picul, argues in favour of the Chinamen's reports of a scarcity of worms, but if we may judge of the coming crop by a small hank new Sewhing just received, it would appear that the quality and colour will be good. The dealers are again talking of high prices, especially for Taysaam sorts adapted to the requirements of the local consumption. Hank musters of Tsatlees and Taysaams are expected down before departure of next mail. From Japan 503 bales have come forward. Prices there have declined $10 to 15 per picul, and with larger arrivals the stock has increased to about 600 piculs. The transactions of the fortnight are reported at 1,300 bales, against 1,000 bales corresponding fortnight of last season, and 1,500 bales the season before. The present unsold stock is 1,500 bales, against a still smaller quantity last season, and about the same the season before. The following are the latest quotations:—Tsatlees, No. 1 chops 440 tls. per picul; No. 2, 420 tls. per picul; No. 3, 400 tls. per picul.

CANTON.—A few musters of new Canton silk came to hand shortly before the departure of this mail, and a few parcels have lately reached this, and been taken for India at prices which are considerably in advance of last season. The silk of the first crop was reported by the brokers just prior to last mail's departure as likely to be abundant, this is now generally confirmed, and the quality of the silk appears good. The 2nd crop is stated to be progressing very favourably, and the silk may be looked for in about three weeks time, when it is hoped that a more abundant supply will have the effect of causing a considerable decline in the prices now asked. The settlements reported to have been lately made by the Indian houses—the only buyers—consist of a few bales Loong-Kong at $430 per picul, and Kow-Kongs at $397, altogether some 50 piculs are said to be going forward per present steamer for India. As the extravagant rates paid for Bombay do not constitute a fair market price, quotations given are regarded as merely nominal, and are not likely to be maintained —viz.: Loong-kong, No. 1, $425 to 430; do., No. 2, $410 to 415; Kow-kong, $395 to 400; re-reeled Cumchuck, $480 to 483 (a few boxes settled for America).

YOKOHAMA.—We have no particular alteration to report in this market. A few parcels have been sold, among which are some very inferior Hatshogees, at $320 to 330. The stock, amounting to about 800 bales, is composed almost entirely of hank silk, for which there is but little demand, our prices being still too high, compared with the European markets.

DRUGS, &c.—CANTON.—Cassia Lignea: $15.50 to 16; no settlements reported; stock, 2,000 piculs, only a small portion whereof is new. Cassia Buds quoted $54½; stock, 40 piculs. Essential Oils: None on the market. China Galls: 100 piculs have been taken at $13.60, and a like quantity is still on the market, held at $13.75. Rhubarb: Still no supplies, and none fit for shipment to Europe or United States on offer. Musk: The stock consists of 25 catties of an inferior description. Galangal: No settlements; 200 pls. held at $13.50.

HONG KONG.—Since the arrival of telegraphic advices from London to 11th April, a good business has been done, both foreigners and Chinese buying in expectation of an advance. The settlements of the fortnight amount to 15,000 bags, principally Japan, which has been in full supply. In the early part of the fortnight this description was quoted $32, but has now advanced to $33.50.

CHINA IMPORTS.

COTTON YARN.—The lower numbers of Yarn show a decline in value of about $1 to $1.50 per picul, while the higher grades remain without change to notice. The sales reported during the fortnight amount to 212 bales. In Canton, where the lower grades have also declined, 150 bales have changed hands. Grey Shirtings: There is not any alteration to notice in the quotalions given for these fabrics, which remain at the prices given in last report. The business transacted during the fortnight is comprised in sales of 2,800 pieces reported to be purchased by Chinese dealers and foreign buyers in equal proportions. 1,000 pieces of 8¼ lb. fabrics have been taken in Foochow at $5.50 per piece, and from Amoy the sales advised amount to 1,100 pieces of a similar weight at $5.50 to $5.60. White Shirtings: The settlements of these goods reported in this market amount to 700 pieces, while from Amoy sales of 500 pieces 64 reed at $5.65, and from Foochow 970 pieces, 64 to 66 reed at $5.70 to 6 are advised. T-Cloths met with but very little inquiry in Hong Kong, and the settlements effected amount to only 1,650 pieces. From Foo-chow sales of 4,100 pieces are reported at prices ranging from $3.65 to 4.10 for 6lb. to 7lb. goods. White Spotted Shirtings, Dyed do., Brocades, White and Coloured, have not been in great request, and sales during the fortnight are limited to 500 pieces of Dyed Brocades taken at $5.25. Damasks are without sales to report. Chintzes: The sales of these goods effected in Hong Kong amount to 250 pieces sold by auction. Handkerchiefs have been placed in Hong Hong to the extent of 800 dozens, in addition to which some 1,400 dozens have been moved off by public sale.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: All these fabrics have remained without any inquiry both in this market and that of Canton during the fortnight. Long Ells: There are not any transactions to report in Long Ells since the date of last report from Hong Kong, but in Canton, where prices had declined about 20 cents per piece, sales of 1,700 pieces have been effected. Camlets remain as before quoted, with sales in Hong Kong to the extent of 240 pieces. Lastings: 60 pieces have changed hands during the fortnight. Blankets: Have found purchasers to the extent of 300 pairs, in addition to which 1,050 pairs have been moved off by auction.

METALS.—Iron Flat, &c.: The prices of almost all descriptions of Iron again show a material advance upon the quotations current on the departure of last Mail steamer, and the amount of business transacted during the fortnight both in this market and Canton has been upon a fair scale, amounting to 6,000 piculs, and 2,000 piculs for each port respectively. Lead remains at previous quotations, with sales in Hong Kong to the extent of 450 piculs. In Canton there have not been any settlements. Tin: 1,408 slabs have found buyers in this Colony. Tin-plates have declined in value both here and in Canton, with sales during the fortnight to the extent of 750 boxes. Steel: Without change to notice in quotations has been sold to the extent of 500 tubs. In Canton rates have advanced 10 to 20 cents, but there has not been any business transacted in the article.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—From London: May 11, Coulnakyle; 19, Fychow; and 20, White Adder. From England: 13, Fokelin, (str.). From Cardiff: 6, Pudsey Dawson. From Clyde: 19, Taiping.

At FOOCHOW.—None.

At HONG KONG.—From England: May 24, Yuentse-fee (str.). From Sunderland: 20, Race Horse; and 21, Emperor. From Newport: 20, Margaret Mitchell. From Hamburg: 15, Dorothea; and 20, J. H. Bockleman. From Bremen: 21, Hohenstanffen. From Boston: 21, Madelia.

At MANILA.—From Liverpool: May 6, Patriot King.

At SINGAPORE.—From London: May 24, Alice Mary; and 26, Benvenue. From Liverpool: 22, Invincible; 26, G. H. Wappans; and 29, Bolden Lawn. From Glasgow: 23, Lockleven Castle; and 24, Majestic. From Bordeaux; 30, Prophete. From Amsterdam: 21, Jan Van Brokel. From New York; 26, Constance.

DEPARTURES.

From JAPAN.—For London: 26th April, Lady Ebrington; May 5, Harwood; and 14, W. W. Smith.

From SHANGHAI.—For London: 7th May, Keepsake. For Liverpool: 10, Unrivalled; 13, Helvellyn; 18, Eliza Nicholson; and 19, Australia. For New York: 12, Anita; and 20, Gleam.

From FOOCHOW.—None.

From HONG KONG and CANTON.—For London: 20th May, Chandernagore. For Liverpool: 19, Glenlee.

From MANILA.—For London: May 17, Alavesa. For Falmouth, 15, Der West.

From SINGAPORE.—For London: 22nd May, Tartar; and 22, Princess of Wales. For Liverpool: 28, H. Puddemsey; and 31, Bombay. For Boston: 29, Magnet.

From PENANG.—For Cork: 4th June, Ceylon. For Bordeaux: 23rd May, Suphis.

LOADING.

At JAPAN.—For London: Canton, Patrician, and Yokohama.

At HANKOW.—For London: Robert Lowe and Sea King (strs.), Challenger and Falcon.

At SHANGHAI.—For London: Brockham, Guinevere, Silver Eagle, Taiping, Eliza Shaw, and Knight Templar. For Liverpool: Fanny, Daniel Jex, Cyclone, Reigate, Esk, Surrey, Warwick Castle, Peerless. For New York: Bessie Staunton.

At FOOCHOW.—For London: Fiery Cross, Flying Spur, Dora, Min, Serica, Yangtsze, Robin Hood, Young Lochinvar, Childers, Holmsdale, Ziba, and Ellen Rodger. For Liverpool: Ziba.

At AMOY.—For New York: Samuel Russell.

At HONG KONG and CANTON.—For London: Kelso, Banian, Glenaros, Belted Will, Thos. Blyth, and Scawfell. For Liverpool: Edward Percy. For New York: Robert and Alexander.

At MANILA.—For London: A. de Winter, Albuera, and Cambodia. For Liverpool: Alicia Annie, Barinaga, and Sales. For Falmouth: Achilles. For New York: George Peabody, Nor' Wester, and Tropic.

At SINGAPORE.—For London: Dewa Gungadhur. For Liverpool: Invincible. For England: H.M.S. Ringdove. For Falmouth: Daniel Rankin. For New York: Gertrude (via Padang) and Ocean Home. For Boston (via Penang): Agnes.

At PENANG.—For London: Rothwell Castle, Salvador Packet, Zingra, Sea Wave, Ferozepore, and Bristolian.

FREIGHTS AND CHARTERS.

JAPAN.—To London: Silk £7; Tea, £5. 10s. to £6.

SHANGHAI.—Several fine clipper vessels are waiting for the new Teas, which they will take at £4. 10s. to £6 per ton of 50 cubic feet; for Liverpool the rate is £3. 5s., and to New York £4. 5s. There is a fair inquiry for the coast.

FOOCHOW.—With so large an amount of tonnage in harbour it is hardly to be expected that the rates for the new Teas will exceed £4. 10s. per ton. One or two vessels have been circulated for freight at £5 and 10s. extra for first arrival, but we do not learn of any engagements having been made.

HONG KONG AND CANTON.—The vessels in harbour are numerous, but owing to the rise in the Rice Market at the north numbers have found employment, but not at very remunerative rates. Geo. Holmes's circular gives the following:—Kelso to London at £3. 15s.; Banian and Glenaros, on the berth at Canton for London, £4. 10s.; Peerless (777 tons), to a port in Java, to Falmouth for orders to U. K. £4, if to Continent 5s. extra; Edward Percy (879), on for Liverpool at £3. 10s; Peveril of the Peak (713), Manila to Liverpool £4 for sugar and £5. 10s. hemp; Congo (435), to Bombay $3,700 in full. To Bangkok and back the rates are 40

Digitized by Google

to 45 cents per picul, if on to North 27½ cents extra; to Ningpo and Shanghai 27½ to 35 cents.

MANILA.—The "Alicia Annie" and "Patriot King" were fixed for Liverpool shortly after departure of last mail, at £4. 15s. for Unclayed Sugarand £5. 10s. for Hemp.

The "Nor' Wester" (Amer.) loads for New York, at $15 currency, per 4 bales hemp.

SINGAPORE.—Little inquiry exists, except for the rice posts and China. The following are some of the settlements:—Mary Whitridge (972), to Hong Kong, at 35 cents per picul; Music (444), do., at 45 cents; General Nowell (1,500), to Hong Kong, at 27½, to Shanghai, 45 to 50 cents; Falcon (337), to Ningpo, 70 cents per picul; Sea Wave (316), to load at Penang for London, £3. 12s. 6d., dead weight, light freight £4. 10s.; Majestic, to load in Java (two ports) cargo of sugar to Holland, £6, 50 lay days.

PENANG TO LONDON.—£3. 15s. dead weight, light freight and measurement at £4 to £4. 5s. per ton.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—May 9, City of Quebec, from London to Shanghai; 9, Isabella, Newport to Hong Kong, Philomela, London to Hong Kong; 10, Assyrian, London to Shanghai; 12, Corea, London to Hong Kong, Ocean Spray, Newport to Hong Kong, Wavering Bell, Sunderland to Hong Kong; 14, Launceston, Cardiff to Shanghai; 15, Invincible, Liverpool to Singapore; 15, Salatiga, London to Batavia, Three Bells, Glasgow to Batavia; 17, Helene, Bordeaux to Batavia; 18, Maggie Leslie, Newcastle to Hong Kong, G. H. Wappans, Liverpool to Singapore, The Cedars, Newport to Hong Kong; 20, Sailora Home, Newport to Hong Kong; 22, Far East, London to Hong Kong; 23, Romelino, Shields to Hong Kong, Guurtie Maria, Falmouth to Batavia; 24, Great Western, Cardiff to Shanghai; 25, Winlow, Sunderland to Singapore.

From UNITED STATES to CHINA, &c.—19, Daniel Draper, Boston to Hong Kong, and Nabob, New York to Hong Kong.

From CHINA &c., to ENGLAND and CONTINENT.—13, Caroline Chisholm, from Singapore to Liverpool; 14, Lauderdale, Shanghai to Liverpool; Spirit of the North, Shanghai to London; 21, Ann Adamson, Japan to London; 23, Ferris, Singapore to Liverpool, Hindostan, Singapore to London.

From CHINA, &c., to UNITED STATES.—8, Egean, Shanghai to New York; 9, Eva, Foo-Chow to New York.

CASUALTIES.

SINGAPORE.

The Neth. Ind. schooner Chieftain, Captain van Suchtelen, struck on a reef off the Thousand Islands, on the 15th May.—The steamer Tjiliwong went to her assistance with prows and saved the crew and cargo.

BULLION TO THE FAR EAST.

According to the Circular of Mr. F. W. Page, bullion broker, the export of specie during May was:—

	Gold.	Dollars.	Bar Silver.
China	£5,000 ..	£30,200 ..	£21,572
Straits and Java ..	—— ..	92,623 ..	16,432

The totals from 1st January being, to China, £888,911, and Straits and Java £403,171.

TREATY BETWEEEN THE VICEROY OF CAMBODIA AND THE EMPEROR OF THE FRENCH.

AUGUST 11, 1863.

This Treaty having been duly considered and concluded between the Admiral on the part of the Emperor of the French and the Prince of Cambodia, in order that Cambodia may be in peace and prosperity [with Lower Cochin-China], and as the two nations are contiguous, the Cambodians must not be on unfriendly terms with the French. For this reason the Emperor of the French commanded the Commander-in-Chief, Vice Admiral de la Grandiere, Governor of Saigon, to consult with the Prince of Cambodia, to make it publicly known that the Emperor of the French will assist to protect Cambodia. For carrying into effect this object the Commander-in-Chief, Admiral de la Grandiere, Governor of Saigon, and the Somdetch Phra Maha Uperat, Governor of Cambodia, have concluded the following treaty:—

Art. 1. The Emperor of the French will assist to protect Cambodia.

Art. 2. The Emperor of the French will appoint a French officer as consul to reside near the Prince of Cambodia, to enforce the observance of this treaty by both nations. This French officer will be under the orders of the Commander-in-Chief at Saigon. The Prince of Cambodia will appoint a Cambodian officer to reside with the Commander-in-Chief as Consul.

Art. 3. If a French officer reside in Cambodia in the above mentioned capacity, he is to be considered as a noble of high rank, and to be respected and feared as such.

Art. 4. If any other Foreign nation desire to appoint a Consul in Cambodia, the Prince of Cambodia and his chief nobles will consult with the French Commander-in-Chief at Saigon, and if all agree, then that Foreign nation can appoint a consul. If the Prince of Cambodia and his nobles will not consent to allow any foreign nation to appoint a Consul in Cambodia, the Admiral Commander-in-Chief at Saigon will also refuse his consent. If the Prince of Cambodia and his nobles consent to the appointment of the Consul, the Admiral Commander-in-Chief will also consent.

Art. 5. If any French subjects desire to travel about for the purposes of trade, or to build houses in Cambodia, they must inform the Cambodian authorities, who will provide them with documents to enable them to do so.

Art. 6. If any Cambodian subjects go to the French territories they shall have like privileges and power.

Art. 7. If French subjects and Cambodians have disputes together they must complain to the French Consul, and if after investigation the case is not settled, the Consul and the Cambodian officers will consult together and arrange the matter justly. If Cambodians and Cambodians have disputes, the French Consul will not interfere in the matter. If French subjects have disputes among themselves the Cambodian officers will not interfere. If foreigners, natives of Europe, have disputes with the French, the French officer will settle the case. If a French subject, having committed an offence, fly to Cambodia, the Cambodian authorities will assist the French Consul to convey the defaulter to the Commander-in-Chief at Saigon for judgment. If there be no French consul or officers in Cambodia, the French Commander-in-Chief will have power to act for the Consul in arranging such matters.

Art. 8. If a French subject wish to reside in Cambodia he will register himself at the French Consulate, and the French Consul will inform the Cambodian authorities of the circumstance.

Art. 9. If a Cambodian wish to reside in French territory, and there is no impediment to his doing so, he will be registered by the Cambodian authorities themselves, or by the Cambodian officer appointed by the Prince of Cambodia to reside at Saigon.

Art. 10. If traders bring merchandise of any description from foreign ports with the exception of opium, for sale in Cambodia, and they have a pass from the Saigon authorities permitting them to come, the Cambodian Custom-house must not levy any duty, but if the traders bring opium, the Cambodian authorities can levy a duty on it.

Art. 11. All articles of commerce which traders take from Cambodia to Cochin-China, if the Cambodian Custom-house officers have already collected the duty on them, and the "Tangkau" has a pass from the Cambodian authorities, which will be countersigned by the French Consul, will be permitted to be sold in the French territory free of duty.

Art. 12. If any French subject in pursuit of science come to Cambodia, he must inform the Cambodian authorities, who will render assistance for his safe conduct.

Art. 13. If French ships or junks be plundered by pirates anywhere within the Cambodian territory at any time, and the Cambodian authorities of that place are informed of the circumstance, they will examine the matter, seize and punish the robbers according to law, and the property recovered will be restored to the owners or to the French Consul, who will deliver it over to the owners. If the robbers are not found, and no property recovered, and if the Cambodian authorities have made every search without success, the said authorities will not be held responsible. The above is also applicable to the property of French subjects in Cambodia.

Art. 14. If Cambodian ships or junks be plundered by pirates in the French dominions, the French authorities of the nearest place on being informed will search for the robbers, seize and punish them according to law, and the property recovered will be restored to the owners; if the owners be absent, to the Cambodian officers for transmission to them. If after making search for the robbers and property the French officers do not find them they are not to be held responsible. If Cambodian officers in French territory be plundered of any kind of property the above is also applicable to them, and if the French officers have done their utmost to find the robbers and property, but without success, they will not be made answerable.

Art. 15. All French bishops with authority to teach religion throughout the territories of Cambodia, the Cambodians will place no impediment to their doing so. If they wish to build churches, schools, or hospitals, they will inform the Cambodian authorities, whose consent will be necessary.

Art. 16. The Emperor of the French recognises the Prince of Cambodia as a legitimate Prince and agrees to assist him in preserving peace and friendship, and to protect Cambodia from her enemies and from the oppression of other countries. The Emperor of the French honestly will assist the Prince so as to enable him to collect duties from the traders and to enable them to proceed to sea.

Art. 17. In order that the foregoing article may be easily carried into effect the French Commander-in-Chief, Governor of Saigon, desires some land at "Charvey Chung" to build houses for coals and godowns for rice for the French vessels. The Prince of Cambodia to give the said land at "Charvey Chung," viz., from the north of the fort and stockades upwards of 15 seu (1,800 feet). If any Cambodian temple ground intervene it must be avoided, and such ground to continue to remain and belong to the said temples. If the French Commander-in-Chief desire any more land anywhere the Prince and his nobles if after consideration find a piece suitable they will grant it on the same conditions as at "Charvey Chung."

Art. 18. In order to show their gratitude for the protection afforded by the Emperor of the French for the purpose of promoting the peace and prosperity of the country, the Cambodians agree that if the French wish to cut timber in the Cambodian forests for the purpose of building the ships of the Emperor of the French they shall be permitted to do so upon informing the Cambodian authorities, who will send instructions to the Governors of the Interior to that effect. On the part of the French they agree to pay all expenses incurred. If the French buy any merchandise in Cambodia they will be permitted to do so with facility, the price of such merchandise to be arranged between the purchaser and seller.

Art. 19. This treaty being concluded, requires only the Emperor of the French's consent by placing his seal on it; three copies have been made. The Prince of Cambodia Somdetch Ong Phra Naradom has signed and sealed them, together with the French Commander-in-Chief.

Dated Udong, 11th August, 1863.

Her Majesty has issued an order, dated the 9th of July current, making further provisions to prevent the participation of British subjects in acts of war or rebellion against the authority of the Emperor of China. We shall give this in our next issue.

LONDON, THURSDAY, JULY 14, 1864.

THE FRENCH TREATY WITH CAMBODIA.

IN May last we took occasion to notice a question put by Lord ENFIELD in the House of Commons to the Under-Secretary for Foreign Affairs relative to the treaty recently ratified by the Emperor of the FRENCH and the Prince of CAMBODIA. The purport of that enquiry was to ascertain if the current report had any foundation that the said treaty excluded other foreign nations from its benefits. Mr. LAYARD replied that the French Government had been communicated with on that point, and an evasive answer received, if such a clause was inserted it must have been by inadvertence. We then pointed out that no copy of the treaty accompanied the quasi-assurance "that no privileges were given to French subjects which were "not equally extended to the subjects of all other nations." Now at the time this subterfuge was perpetrated by the minister who holds the Foreign Portfolio, M. DROUYN DE L'HUYS, we know, from facts which have come to our knowledge since then, that a special plenipotentiary had just been sent to Siam and Cambodia with this most exclusive treaty ratified by the EMPEROR; a translation of which, *in extenso*, we produce in this issue, and which we believe is published for the first time, or its nineteen articles brought under the cognizance of Her MAJESTY'S Government and the Houses of Parliament.

On reference to this document it will be seen by Article first that "The Emperor of the FRENCH will assist to protect "Cambodia." In fact, this means that the French have assumed a protectorate over the former tributary state of Cambodia as it existed under the Cochin Chinese Government; which tribute they claim to inherit by right of conquest, so that TU-DUK, the King of Upper Cochin-China and Tonquin, no longer possesses power, according to the French interpretation of VATTEL'S "Law of Nations" bearing on treaties, but not supported by that eminent authority. However, as the reception of tribute is not in accordance with the spirit of European civilisation, the French substitute for it this convention, including special privileges and cession of territory. But then the King of SIAM is a joint receiver of tribute from Cambodia, and its present viceroy was appointed by him, consequently he demurred to the newly-assumed power of the French over that dependency. This point was easily overcome by M. AUBARET, the new *Charge d'Affaires* for Siam, who was instructed not to interfere with the rights of the Twin-kings and Government, but to recognise the payment of tribute as formerly; proposing at the same time to erect Cambodia into a distinct kingdom, and crown the present ruler, the Somdetch ONG PHRA NARADOM, king. This proposition was at once acceded to by the Siamese Government and kings, who appointed two of the principal Ministers of State, with four nobles, and a retinue of fifty retainers carrying the insignia of titles and honours, to repair to Udong, and there, in conjunction with a body of French dignitaries, to perform the ceremony of coronation with the customary eastern magnificence. These officials arrived at Saigon from Bangkok in April by the French war steamer *D'Entre Casteaux*, accompanied by M. AUBARET, and were to proceed to Udong in the same vessel with Rear-Admiral de la GRANDIERE, Governor and Commandant of French Cochin-China, and other French functionaries, when the coronation would take place on some auspicious day in May. From this it will be seen that not only is the treaty a *fait accompli* of the most exclusive character, but the French have established an indisputable protectorate over Cambodia by erecting it into a separate kingdom, and forming a defensive and offensive alliance with its king, created at their own hands. At the court of this new sovereign there is to be a French plenipotentiary, who will have the veto of excluding the representatives of any other nation; while in the capital they are to have a large tract of land ceded for the ostensible purpose of building houses and stores, but which, no doubt, will, be turned soon into a naval arsenal and military station as at Saigon. In all these concessions on the part of Siam and Cambodia no doubt their Governments are actuated by the spirit of an alliance against the common enemy, TU-DUK and the Annamese Government, who are the natural foes of both Cambodia and Siam, and who are ignored by this compact of the three Powers from ever interfering in the affairs of their former tributary prince. It is just possible that this usurpation of his authority may rankle in the mind of the proud Annamese King, and hostilities again break out against the invading French and seceding Cambodians. In that case there would in all likelihood be a union of forces, and the former gain an immense accession of strength from the latter, who are reputed as excellent raw material for disciplined troops; and a contingent of Siamese braves might be sent to protect and maintain the integrity of the new kingdom. Although, hitherto, the relations subsisting between France and Siam have not been of the most friendly character, nay, the reverse, yet it would appear that this astute act of diplomacy has cemented the two Governments in the strongest bonds of political intimacy, which promises to increase the power of the French at the Court of Bangkok beyond that of any other nation who have representatives there. At present they are in accord with each other, but how long may this last? The very circumstance which has brought them into close connection may ere long be the cause of quarrel, and the invasion of Siam by French forces. The consideration of what may result from this unholy alliance is creating uneasiness in the minds of British and other foreign residents at Bangkok; while the native authorities are desirous of having stronger and more direct diplomatic relations with England. It is in contemplation to establish a consulate of that power in this country, so that the interchange of commercial relations as well as diplomatic may be facilitated. As far as trade is concerned, England has the greatest interest of any foreign nation in the external relations of both Siam and Cambodia. For a very long period there has been an increasing traffic between Bangkok and Kampot with Singapore, Penang, and Hong Kong, not only in native craft but in ships of European build, commanded by Englishmen. Indeed, at Bangkok, English is not only spoken by the kings and officials, but the former can write very fairly in it as well as many of the latter, while French is so far unknown that in the documents interchanged with that consulate they are written in our own language. This will serve to show how intimately we are socially and politically connected with these new-born states; and it behoves our Government to make further inquiry into the nature of the convention made between the Emperor of the FRENCH, the Viceroy of CAMBODIA, and the King of SIAM.

It requires no editorial pen to point out the importance of this treaty as evincing the rapid progress of French influence in Indo-China and the neighbouring states, for this is abundantly manifest; but it is our duty to inquire how far that influence will prejudice British relations in these countries, where our commercial interests are vastly more important than those of France. Ever since the invasion and conquest of Lower Cochin-China, this journal has consistently represented the insidious progress of the French to the westward into Cambodia, and up the great river Me-kong, which penetrates to the confines of Eastern India and Western China, with a view evidently to secure by demonstrations of their naval and military strength exclusive privileges in these territories, as shown by the tenour of this Cambodian Treaty. From time to time we have pointed out the necessity of securing the right of communication through the countries which command the route from our Burmese possessions to Western China and Tonquin. In this treaty we see the first step accomplished towards that consummation being exclusively obtained by our more active neighbours. They have forestalled all other western nations in this important business, and from their success in the negotiation we may consider it the precursor of others with

Digitized by Google

Siam, Annam, and the Laos States, that in time will extend the "French East Indies," with its protectorate over fifty millions of people, from Saigon to the confines of Burmah. Already the prospects of unlimited power in the Far East are dawning upon the Imperial mind, as will be seen in the communication of our PARIS CORRESPONDENT, wherein he states that the Ministerial journals are at present much occupied with the subject. The purport of their articles verify what we have stated, although, for obvious reasons, they are not in possession of all that has come to our knowledge, and none of them publish the terms of the Treaty. We trust that Lord ENFIELD will again put his question to the Under-Secretary for Foreign Affairs, and elicit this time a more satisfactory reply.

GIGANTIC TELEGRAPH WORKS.

We have noticed in previous issues the American projects of Mr. Collins. It appears that a Committee of the Senate has been inquiring into the matter at Washington and Mr. Secretary Seward, being called upon to state his views for a line connecting the Russian system of telegraphs with those of America, reports that throughout Mr. Collins' negotiations with the Russian and British Governments for leave to pass through their American possessions he has been acting under the instructions of the American Government, and that his application to Congress for a right of way across the public lands and the use of a national vessel is reasonable. Mr. Seward proceeds to say that the line which the Russian Government is constructing, or has undertaken to construct, from St. Petersburg to the mouth of the Amoor, is but a small part of the stupendous work which the Emperor has begun.

His Imperial Majesty's design embraces also a telegraph wire from the mouth of the Amoor, over the islands of Sakhalin and Jerro to Jeddo; also, from the Amoor, along the bank of the Usuri, to Viadi Vostok on the coast of Tartary, Viadi Vostok being selected by the Emperor for his naval station on the Pacific coast; also a wire from the Irkoutsk telegraphic line, through the vast territory of the Mongols, to Peking; and American citizens in China are soliciting, with good prospect of success, permission from the Chinese Government to extend this line to Nanking, Shanghai, Amoy, and Canton. Further, the Russian scheme comprises a telegraphic wire from the main Continental-Russian line at Omsk, near the southern boundary of Asiatic Russia, through Mongolia, China, Turkestan, Bokhara, and Cabool, to meet the telegraphic system of India in the Punjaub, and connect it with Europe; and also a wire from Kazan on the main central Russian line, passing along the shore of the Caspian Sea to Teheran and along the banks of the Euphrates to the Persian Gulf, there to be connected with the telegraph system of India.

Mr. Seward, however, confines his remarks chiefly to the line immediately in question, connecting America with Russia through Behring's Straits. He submits to the Senate that it is impossible to over-estimate the direct effect of such works in the development of the resources of the American States, or to assign limits to the increase of national influence which must result from such new facilities for extending throughout the world American ideas and principles of public and private economy, politics, morals, philosophy, and religion. The telegraphic wire is at present, he says, timidly employed and clumsily handled, with a very imperfect knowledge of the fulness of the power which resides in it; he anticipates that telegraphic communication will become far more practically effective. He trusts that an Atlantic wire will soon connect Cape Clear and Cape Race, thus completing with the proposed line through Russia a telegraphic circuit round the earth between 42 and 65 deg. of north latitude; but he holds it to be certain that the great interests of society will, at a very early period, require more than one, and more than even two transoceanic world-encircling telegraphs.

THE JAPANESE AMBASSADORS.

(FROM OUR PARIS CORRESPONDENT.)

The Japanese Ambassadors, as you know, left for the Far East by the *Euxine;* they staid two days at Marseilles, occupying their former apartments at the Grand Hotel—nobody ever stays anywhere now-a-days but at a grand hotel. The Ambassadors left marks of their munificence at each step of their route, presenting all who came in contact with them with cuttings of rare stuffs resplendent with gold and silk of every hue, and other proofs of Japanese art, and Japanese courtesy and policy. The servants at the hotels are full of admiration now for the Tycoon's emissaries, on the principle of "Handsome is, that handsome does." It is a pity that they should have carried back a vast amount of the magnificent presents intended to be placed elsewhere, but we shall soon see them again I opine!

The Ministerial journals are much occupied now with questions relating to the Far East, which the Government is intent on cultivating. As regards Japan, reference is made to recent news concerning the Tycoon's arrangements with the Mikado, and the inference is drawn, perhaps a little hastily, that the former has become the real Emperor of Japan, and has completely succeeded in concentrating all power in his own hands, and destroying the feudality of the Daimios. It is taken for granted in some quarters, though not in all, that the Tycoon will at once establish a regular army, commanded by European officers, an effective steam navy, railroads, the electric telegraph, and gas. It will be judicious to wait a little for the proofs of the Tycoon's ability to carry out this grand programme. The official *Moniteur de Soir* speaks with great confidence of the effect produced on the mind of the Tycoon by contact with Europeans as evinced in the whole tone and bearing of the ambassadors who have just quitted the shores of France, and believes that he "will take energetic measures to render effective the opening of the Straits of Simonosaki, in favour of *our* navy and of *our* commerce, as provided for in the last arrangement made between the Japanese Ambassadors and M. Drouyn de Lhuys."

Previous to quitting Paris the Ambassadors paid a visit to Nadar, of baloon celebrity, who has produced a capital photographic group of the three envoys in all the splendour of their state costumes and insignia, the first Ambassador being distinguished by a long stick, ornamented spirally throughout its whole length, and which certain wags persist in declaring is nothing but a miniature barber's pole.

The same journals give glowing accounts "from private sources" of the progress which is being made by the representatives of France in Cochin-China; we are told that since the little affair of Bahria, "all the provinces of Lower Cochin-China have enjoyed the most perfect tranquillity"; that "the Court of Siam has received the explanations given respecting the treaty which placed Cambogia under the protection of France in good faith, and that the understanding with the two kings is perfect. The French Government has decided that besides the service of the *Messageries Imperiales* an intermediate one shall be established between Saigon, Poulo-Condor and Singapore, to meet the English mail at the latter place. The despatch boat *Echo* is appointed for this service. The plans for the Grand Canal, central market, Bourse and Cathedral of Saigon have been approved by the Government here. Lastly, we are told that the Emperor Tu Duc has been greatly impressed by the reports of his Ambassadors, who recently visited Paris, and has determined now to rely entirely on France in the most absolute manner, and will before long agree to fresh and important concessions.

The Emperor Louis Napoleon, you will remember, undertook, some time since, the task of arbitrating between the Viceroy of Egypt and the Suez Canal Company; the award has not yet been made, I believe, but the purport, or supposed purport of it has appeared in some of the Paris papers, and is as follows:—The company to give up the clause of the treaty which bound the Viceroy to find 24,000 native workmen; or, in other words, the employment of forced labour has fallen before the expression of public opinion in Europe; to resign all claim to the lands lying on both sides of the canal, with the exception of such as is actually necessary for the works themselves; to make over to the Egyptian Government the fresh water canal, for the sum of twelve million francs; and, lastly, the Viceroy is to pay seventy-two millions more by way of compensation for the former concessions, making in all a sum to be received by the company equivalent to £3,360,000, which, perhaps, will set it upon its legs again.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, July 8.

Now that the elections are properly finished, except in the district Hoorn or Haarlem, where the same candidate, Mr. Van Nierop, is elected, every party cries victory, the Liberals as well as the Conservatives. The first because the position of

Digitized by Google

the Cabinet will be reinforced by the voting of five or six members, the second because the defeat was so insignificant, that there was a moment that the Opposition believed that it could cry victory. The Liberals, however, have decidedly won by the second election. The struggle at Amsterdam ended in their favour. Mr. C. Van Henkelom and the Lieut.-General van Swieten procured a small majority. The replacement at the Hague of the member Mr. W. T. Gevers Deynoot by Mr. T. P. P. Baron van Zuylen van Nyevelt (now), *pur-sang*, Conservative and ex-Minister of Foreign Affairs. When this gentleman, who is an excellent orator, ceases to be governed by his revengefulness for Thorbecke, who forced him to resign, he will be, doubtless, a great reinforcement for the Conservatives; meanwhile, it is feared that the debates, at least, at the first session, will be more personal than national.

The Liberals, who are disconsolate for the defeat of Mr. Gevers, intend to proclaim this gentleman candidate for Haarlem or Hoorn. Indeed, it would be very unhappy for him that he should have lost his seat, just now that he has voyaged in the Far East. He thought that his voyage would be a letter of credit for his re-election, and certainly his supposition would have been in the right, when Mr. Vanzuylen, like Mr. D. de Brauw, had not made a league with the entire revolutionary party; a league, however, which will cause much disagreement.

On the 24th of June a general rural economical meeting assembled at Haarlem, which was not without interest for your readers. Many authorities were present to discuss some points concerning the Indian agriculture. In the first place was deliberated, "If steam power could be applied with great advantage in the tropical regions." No one opposed, but it was generally regretted that the engines were too high in price to be of common use. A general discussion took place on the question of the cultivation of cotton in Java, and, generally, the conviction seemed to be settled that there existed difficulties which hardly could be surmounted; large advantages were also not to foresee. As to the cultivation of indigo, all were of the opinion that this was exhaustive, as well for the population as for the grounds, and, therefore, the majority thought it desirable that this cultivation should be decreased as much as possible. The manuring of sugar-fields with guano, which has given such favourable issues on the grounds of the sugar factory *Wono Pringo*, was supposed to be desirable for the grounds of certain regions, but the cost of application was too high! Mr. T. T. Rochussen, Minister of State and ex-Governor-General of Netherlands India, gave an account of the experiments made in India with the discovery of Mr. Hovibreaak, viz., artificial impregnation of fruit-bearing trees and vegetables.

Within the next few days some French functionaries are expected at the Hague. They will successively visit Holland, Belgium, and England, to deliberate with the respective Governments to project a common action on the sugar industry. The difficulties which they will have to overcome are many in number, and generally it is expected that they will not succeed in their mission.

Some weeks ago it was said that the Emperor and Empress of the French would make a visit to our country. This *on-dit* has not been confirmed. The times of Napoleon's predomination are not yet forgotten; to prove this I have only to say that the Rear-Admiral H. Wipff was forced to resign because he refused to give the usual salutations to the Imperial yacht at Flushing. Our Prince of Orange is not of the same opinion as the people. He made some days ago another excursion to the capital of France. The Imperial family, or Paris, at least, has many charms for our Prince.

The jubilee of the Royal Silver Wedding is suddenly changed for sorrow by the death of the King of Wurtemburg, the father of our Queen. Her Majesty returned with the Prince on the 5th from her sorrowful excursion to Stuttgard. She was not present at his death.

The tramway lately laid down by an English company from the Hague to Scheveningen (the seaside) has been opened to the public. Eight trains go each way daily, the fare being 30 cents first-class, and 50 cents return tickets. There is a project also to construct a tramway to connect the two railway stations in Amsterdam.

The Palace of Industry (Paleis voor Volksvlyt) at Amsterdam will be opened in the first days of August. On the 30th of June the Royal Academy at Delft was annulled.

P.S. Dr. Winkler Prins, elected for the district Winschoten, has announced that it is impossible for him to accept the post.

H.M. corvette, *Prinses Amelia*, Capt. T. T. Wichers, was, on the 7th June, still in the docks of Rio Janeiro. She would be ready within a few days to sail for Batavia.

H.M. frigate *Zeeland* will start for Java after being repaired at Nieuwe Diep.

The First Lieutenants G. C. Munters, W. H. Voorman, T. W. E. Schadee van der Does, and W. Q. E. Vetter are detached to the E.I. Army.

A detachment of supplementary troops, of 150 soldiers, under the command of Capt. R. N. Bar, returning to duty from leave of absence to this country, and accompanied by the Second Lieutenants E. T. C. Heyligers, Thr. T. L. N. Calkoen, has left the colonial recruiting depot at Harderwyk, and embarked here on board the *Mary* and *Hillegonda*, Capt. P. Walters, for Batavia. Next year the contingent of supplementary troops will number 1,500 men.

H.M. King Leopold has been pleased to appoint A. Cateaux as Consul for Belgium at Singapore, in replacement of Mr. H. Hinnekindt.

The Netherlands Bank has opened a branch at Rotterdam. Messrs. T. van der Hoop and T. L. de Bie are appointed as directors, and Mr. Mirandolle as secretary.

The Senate of the Free and Hanseatic city of Hamburg has appointed Mr. J. H. Bandow to be Consul for that republic at Bassein.

By Royal Patent, dated Copenhagen, the 20th June, the King of Denmark has appointed Mr. Robert Simpson Scott to be His Majesty's Consul at Bangkok.

COMMERCIAL.

COFFEE.—Some inquiry, but nothing of great interest doing. At private auction were sold 1,735 bags Java at 39½ to 43½c.; and 1,635 bags do. at 38 to 38¼c.; retired were 2,052 bags. Besides 500 bags Java ex Capella were sold at 41½ to 43½c., and 1,700 bags do. ex Maria Catherina at 42¾ to 43½c. By the Netherlands Trading Company 86,900 bags Java will be offered at auction on the 13th. Stock 1st July, 417,900 bags N.T.C.; 39,200 bags part.

SUGAR.—The market very dull. Increasing heaviness prevailed, partly owing to the unfavourable state of political affairs, but also to the lower prices at London. Only 550 kran. Java "to arrive" were sold at ¾f. to 1f. under the May prices. Private Stocks, 5,398 kran. Java. The N.T.C. will sell by auction on the 22nd 73,300 kranjangs.

RICE.—Dull, and no sales. No lots are offered. Stock, 50,400 bags.

SPICES.—Nutmegs: Still animated, with buyers for export and speculation. No 1, 1860-63, was paid with 86 to 87c.; No. 2, 78c.; No. 3, 48c.; and No. 4, 36c. Mace D, 65c.; E, 63c. Cloves No. 1, 30c.; No. 2, 29c.; No. 3, 28c. Pepper, 1,600 bags, ex Danube, sold at 20¼c. Stock 5,550 bags. The market is in a firm condition.

COTTON.—The market was rather more active. Several lots of E. Indian were sold for exportation.

BANCA TIN.—The 146,921 blocks offered at auction by the N.T.C. are sold at 61¾f. No sellers without an advance of ¾f. to 1f. on the auction price. Stock N.T.C. 5,717 blocks.

TOBACCO.—There is scarcely any demand for Java. Only 318 bales S. and 600 bales V.S. were sold at 53½ to 61½c. The 1,224 bales Manilla (Cagayan) offered by auction were nearly wholly retired. The quality was inferior, the prices too high, and great quantities are to arrive. Stock on the 7th July 11,414 bales Java.

INDIGO.—Business to a fair extent done privately at full prices. A.o. lots 124 chests ex Danube were sold.

TEA.—The business is confined to the execution of a few small orders for consumption. China Congo 95c. to 105c.; good to fine 130c. to 130c.

HIDES.—Without important transactions. Only 844 p. Padang, 600 p. Java ex Johanna Maria, and 500 p. Java ex Van der Palm, we sold. Prices unknown.

ARAK.—80 casks ex Oscar]I., and 59 do. ex Nederland, have been sold at prices that did not transpire.

MONEY.—Easy. Discount 4½ per cent. Open market 4½ per cent. Exchange London, fl11.85. Three months fl11.67. N.W.S. 2½ per cent., to 62½, do. 3 per cent., 74⅜, do. 4 per cent., 98¼ to 98½. Handelmaatschy 147.

LOADING.

At AMSTERDAM.—For Kanagawa and Decima: Adriana Johanna, Yokohama, Engel. For Padang: Padang Packet. For Batavia: Johanna Elizabeth, Jocobaz, Christina, Regina Maris, Herman de Ruiter, Nederland, Hendrina, Gebroeders, Quartet, Admiraal de Ruyter, Guede Verwachting, Jan van Schaffelaar, Cornelis Gips. For Samarang: Henrietta, Zaanstroom, Kykduiss, Theodora Mechtelda, Marinus Willem, Californie, Sindbad. Cape of Good Hope and India: Concordia, Kaapstad Packet.

At ROTTERDAM.—For Batavia and Cheribon: Bilderdyke. For Batavia: Doelwyk, Eva Johanna. For Sourabaya: Johanna Maria, Wilhelmina Johanna, Edouard Marie. For Samarang: L. J. Enthoven. For Padang: Isaac da Costa. For Singapore: Maria Louisa Antoinette, Jan van Galen. For Hong Kong: Singapore.

READY TO SAIL.

At TEXEL.—A. R. Falck, v. d. Plas, Samarang.

At BROUWERSHAVEN.—Johanna Christina, C. Clercq, Batavia; Zeemanshoop, Reiniersen, Samarang; Generaal Michiels, Visser, Singapore; Mary and Hillegonda, Walters, Batavia; Alblasserwaard, Zack, Batavia; Voorwaarts, Kerkstra, Batavia; Susanna Johanna, Pieters, Batavia; India, Vonck, Batavia; Europa, Lupcke, Batavia.

At FLUSHING.—Burgemeester van Middelburg, Hock, Batavia.

PASSENGERS OUTWARD.

Per Axia, Capt. Molenaar, from Amsterdam to Batavia: Mr. G. P. T. Ockerse and family, Mr. T. van Varelen and family, Mr. H. L. v. d. Waarden, Mr. W. Bedier de Prarie, Miss M. Monnier, and Miss M. Fuscher.

Per Europa, Capt. Lupcke, from Rotterdam to Batavia: Mr. N. Graafland and family.

PASSENGERS INWARD.

Per Electra, Capt. Wegman, at Amsterdam from Batavia: Messrs. Termytelen and family, Mr. Thieme and family, Mr. Rawson and family, Mr. v. d. Veer and family, Miss Canneman and brother, Miss Bakhuis.

Per Padang Packet, Capt. Huidecoper, at Amsterdam from Batavia: Mr. Boon and family.

Per Argo, Capt. Ankringa, at Brouwershaven from Java: Mr. T. Beyerinck.

HOUSE OF COMMONS.—THE ANGLO-CHINESE FORCE.—Mr. Liddell asked the First Lord of the Treasury whether any official information had been received of Major Gordon's retirement from the command of the Anglo-Chinese disciplined force, in compliance with the terms of the order in council of March last, or whether any "secret orders," or reservations, or discretionary powers were conveyed to Major Gordon or any other English officer in China along with such order in council, and, if so, whether there was any objection to state the nature of such secret orders or reservations, and under what circumstances such discretionary powers were to be exercised? Mr. Layard said the order in council which revoked the previous order was dated the 1st of March, and left this country on the 10th. Her Majesty's Government had informed General Brown commanding there that if he could place Colonel Gordon under his own orders, and not under the Chinese orders, he might withdraw him altogether from the Chinese service, and still retain his valuable services within the thirty miles radius.

DIVORCE COURT—ROUTH V. ROUTH AND LE MEASURIER.—Dr. Wambey and Dr. Tristram appeared for the petitioner; Dr. Spinks for the respondent, and Dr. Swabey for the co-respondent. The marriage took place at Brussels in April, 1847. The petitioner was then a cornet in the 16th Lancers, but he afterwards sold out and became an engineer. In 1854 they went to Australia, and they afterwards proceeded to India, where they made the acquaintance of the co-respondent, who was employed upon an Indian railway. After staying for a few years in India they returned to England. The petitioner afterwards went to China, leaving his wife in London with her family, and subsequently he again went to India and obtained a situation as surveyor upon the same railway as the co-respondent, with whom he was on the most friendly terms. In 1861 the co-respondent came to England, and renewed his acquaintance with Mrs. Routh. An adulterous connection was formed between them, and they went together to Paris and Genoa, passing as husband and wife. She had given birth to a child, of which the co-respondent was the father.—Decree *nisi*, with costs against the co-respondent.

The *Narcissus* frigate, bearing the flag of Rear-Admiral Sir Baldwin Wake Walker, K.C.B., is hourly looked for at Spithead. She will there land the admiral and his family.

Monetary and Commercial.

The amalgamation of the Oriental and General Marine Insurance Company with the Albert Office has now been completed. The Albert being an old-established office for Life, it has been deemed best to retain that title. The business of the Marine department will be conducted on the old premises of the Oriental in Finch-lane, City, and Mr. Secretan remains as the under writer. The agencies in India and China will be found detailed in our advertising columns.

The Land Mortgage Bank of India have invited subscriptions for £500,000 mortgage debentures, bearing 5 per cent. interest, redeemable within 30 years by a sinking fund of 1½ per cent. per annum. The price of issue will be 95, and the amount may be paid at once or by instalments extending to the 1st of January next. The issue of debentures by this company is always to be limited to the sum held by them in mortgages on real property, or in Government funds, in addition to which the subscribers will have the security of the capital of £2,000,000, on which £400,000 is paid up.

The Netherlands India Steam Navigation Company have contracted for steamers to carry out the contract made by Mr. Robinson.

BOARD OF TRADE RETURNS.

The Trade and Navigation Accounts for the month and the five months ending the 31st May in the present year, repeat and augment the gratifying results presented by the similar returns published at the close of each preceding menstrual period of 1864. As compared with the two antecedent years, the total Declared Value of British and Irish Produce Exported stands thus:—

	1862.	1863.	1864.
	For the month ended 31st May.		
All articles	£11,298,587	£11,284,289	£14,176,640
	For the five months ended 31st May.		
All articles	£47,545,238	£50,472,670	£64,069,060

The Exports to the countries and ports of the Far East, in regard to the articles enumerated, are returned as follows:—

CHINA AND HONG KONG.

	1862.	1863.	1864.
	For the month ended 31st May.		
Cotton yarn	556,084	121,520	266,400 lbs.
Cotton manufactures ..	14,845,612	6,455,026	11,513,490 yds.
Worsted stuffs	1,159,318	1,023,188	1,550,922 yds.
Wool and worsted manufactures	323,624	202,435	208,780 yds.
Lead	1,628	1,798	1,493 tons
	Value for the five months ended 31st May.		
Cotton yarn	£128,931	£37,027	£97,423
Cotton manufactures	820,201	387,622	835,699
Wool and worsted manufactures	127,756	142,660	126,208
Worsted stuffs	154,370	229,807	326,397
Lead	75,957	150,838	77,567

The Export of Cotton Manufactures to other quarters east of British India is returned thus:—

	1862.	1863.	1864.
	For the month ended 31st May.		
Singapore	4,965,900	2,639,069	1,582,764 yds.
Java	6,862,495	2,808,053	3,722,803 "
Philippine Islands ..	1,060,452	—	4,651,404 "
	Value for the five months ended 31st May.		
Singapore	£328,975	£170,682	£420,378
Java	305,699	100,948	326,344
Philippine Islands ..	120,021	77,242	286,059

Of Cotton Yarn, 43,008 lbs. was exported to Singapore in May, 1864, against 185,776 lbs. in May, 1863, and 173,400 lbs. in the same month of 1862; the value for the five months of 1864 being returned at £58,126, against £55,906 in the similar period of 1863, and £49,459 in the year preceding.

IMPORTS.

Of Sugar, the quantity imported from Java and the Philippine Islands under the new duties which came into force on the 16th April in the present year, is as follows, for the month ended 31st May:—2rd quality, 8,508 cwts.; 4th quality, 26,042 cwts. The value of the Unrefined Sugar imported from the same quarter during the four months ended the 30th April in the present year was £42,959.

The quantity of Hemp imported from the Philippine Islands in the month of May, 1864, was 13,599 cwts; and for the five months ended the 31st May, 58,334 cwts., against 122,397 cwt. in the same period of 1863, and 68,664 cwt. in the previous year. The value of the import of this article from the Philippine Islands for the four months ended the 30th April, for the year 1864, and two preceding years, is given as follows, placing the present year first:—£79,568, £84,536, £78,589.

Raw Cotton is shown by these returns to be forwarded from China in surprising quantities, considering that the trade in this article from thence is so very recent in its origin. The comparative quantities and values are as follows:—

	1862.	1863.	1864.
	For the month ended 31st May.		
Quantity	6	31,750	90,046 cwts.
	For the four months ended 30th April.		
Value	£32	£254,064	£1,806,422

The Declared Value of British and Irish Produce and Manufactures exported from the United Kingdom to the quarters mentioned below, for the four months ending the 30th April in the present and two preceding years is stated to be as follows:—

	1862.	1863.	1864.
Singapore and the Eastern Straits	£425,818	£310,899	£579,837
Hong Kong	437,522	318,997	476,430
China (exclusive of Hong Kong)	714,095	647,236	849,444
Japan	—	37,146	79,205
Netherlands India (Java, &c.) ..	284,464	72,931	314,280
Philippine Islands	151,609	125,169	213,587
Siam	—	1,374	11,253
Cochin China, Camboja, and Tonquin	—	35,000	—

The biddings for £300,000 in bills on India took place at the Bank of England. The proportions allotted were to Calcutta £163,200; to Bombay, £120,000; and to Madras, £16,800. The *minimum* price was as before 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay. The

Digitized by Google

applications within the limits amounted to £1,710,000. T ders on Calcutta and Madras at 1s. 11¾d. will receive about 31 per cent., on Bombay at 2s., about 24 per cent., and all above these prices in full. These biddings compared with those on the last occasion show a slight diminution of demand.

The amount of bullion by the P. and O. Co.'s steamer *Baroda*, from Southampton on the 4th inst., was—In gold, to Galle, £500; to Madras, £607; to Hong Kong, £5,000. In silver: To Singapore, £9,980; to Hong Kong, £2,112; to Yokohama, £8,600; to Shanghai, £300. Total, in gold, £6,107; in silver, £20,992.

ARTICLES OF IMPORT.

TEA.—Recent sales of low and dusty kinds of Congou show a decline of about ½d. per lb. Fair to good common leaf remain scarce at about previous prices. Fair to good flavory kinds have been less saleable, and prices in some instances have given way ½d. to 1d. per lb.; good Kaisow kinds show no material change, the supply being moderate. Common to fair blackish-leaf kinds remain dull at the decline last quoted. Good qualities maintain former value. There is no change to notice in fine to finest Monings, Wopaks, and Kaisows, sales of which are made in limited quantity. Tayshans and new-make Canton Congous remain as before. Fine Oolongs have been inquired for; other sorts are not much in request. Souchongs are only saleable in small quantities at about previous prices. Flowery Pekoes show no improvement. Scented Orange Pekoes have been steady at the late advance, but without activity in demand. Scented Capers have been saleable to a fair extent at previous prices. There is some inquiry for common to good uncoloured Japans at from 1s. 2d. to 1s. 4d., but holders generally require higher prices than buyers are willing to pay. The small public sales of Indian Teas went at extreme prices for good to fine qualities. In Green Teas business has been less active, and the extreme rates lately current have been barely maintained. Some parcels have been returned from America, owing to the great advance in the rate of exchange. Gunpowders under 3s. 3d. per lb. continue very scarce, and are fully supported. Hysons have been in full supply, and sales more difficult to make. Young Hysons must be quoted rather lower. Canton-made Teas show no material alteration. The public sales have comprised 28,267 packages, of which 575 packages were Indian Tea, and 7,385 packages were printed without reserve; of these about 9,623 packages sold, including the Indian Tea.

Messrs. Sheppard, Harrison, and Rehden, in their Circular, state that the deliveries for the six months ending 30th June are the largest on record, and stand as under:—

	1864.	1863.
Home consumption for London from 1st Jan. to 30th June	27,950,000 ..	25,710,000
Exported do.	15,401,000 ..	10,113,000
Sent coastwise, do.	15,110,000 ..	16,330,000
	58,461,000	52,153,000

The last French mail steamer brought 200 boxes of Canton district new leaf made up as Kaisow, and although the quality was not first class, it fetched 3s. and 3s. 4d. per lb. The steamer which arrived at Marseilles on 5th inst. has 1,260 packages on board, but we question if there will be much competition for them, as most buyers prefer waiting the arrival of the bulk of the new season's Kaisows, by the regular sea route. For export there have been very few purchases, although considerable shipments have been made to the Baltic ports of teas bought during the Spring; to other parts little has been sent, whilst 2,000 packages Green have been received from New York. The quantity afloat is 6,367,211 lbs., against 15,580,000 last year.

SILK.—We had a very extensive business in China and Japan Silk during the early part of last month, and prices experienced a considerable advance; latterly the market has been more quiet, though the advance has been fully maintained. The deliveries, as might be expected from the amount of business done, are larger than they have been for some months past.

SUGAR.—Owing to heavy arrivals and the uneasiness produced by political affairs the market continued dull until within a few days since, previous to which a few transactions with difficulty took place. A little more firmness is now shown. The sales have been:—140 tons Penang, middling to fine brown, 38s. to 40s. 6d.; low to good yellow, 41s. to 44s.; 100 tons clayed Manila have been sold, first at 38s. 6d. to 39s., but afterwards at 37s.

COTTON.—China Cotton has been rather neglected. The damaged condition of most of the bales is a cause of much annoyance to buyers. Fair quality, after declining to 18d. per lb., has advanced to 18¼d. which is to-day's quotation.

COFFEE.—The arrivals have been heavy and a general dulness prevails, although the Dutch Trading Company's sale went off tolerably well, amounting in all to 86,100 bags. Good ordinary realising 43 to 43½ cents, 230 bags fine ordinary pale Manila at 73s. to 73s. 6d., and 330 bags Cochin, chiefly pickings, at 40s., is all the sales we have to report.

RICE.—During the greater part of the past month the market has been firm, and sales took place at advanced rates, but less inquiry now exists. 95,000 bags were sold on the spot. Bengal, low and middling sort, at 8s. to 9s., middling to good old white, 10s. 6d. to 12s.; 1 cargo 750 tons Moulmein for Liverpool realised at 10s. 3d.

CAMPHOR.—At auction 107 cases were retired. A limited business has been done privately at £4. 10s. to £4. 12s. 6d. per cwt. Japan firm at £5.

CASSIA LIGNEA.—Of 1,170 chests offered at auction nearly half were sold at 86s. to 93s.; the remainder retired at high prices.

DRUGS.—Cubebs: A limited business has been done at £5. 10s. Dragon's Blood: Fine seed realised £17 at auction; 2 cases sold; other kinds, no demand. Galangal Root: Flat; 120 bags at auction all retired. Rhubarb: Nothing of consequence doing; 12 cases at auction retired.

GUMS.—Benjamin: Quiet; 2 cases at auction sold at £24 to £26 per cwt. for second quality block. Sumatra: 42 cases were offered at auction, about a quarter of which were sold at £6. 2s. 6d. to £6. 5s. for first thirds. Damar: Steady; of 376 offered, two-thirds sold at 42s. 6d. to 43s. per cwt. for fair picked. Gamboge: Scarce and firm; nothing of any consequence doing.

GUTTA PERCHA.—Quiet; 11 tons were offered. The little that was sold fetched 2s. per lb.

INDIA-RUBBER.—Dull, 91 bags Singapore at auction retired. 229 bags Mauritius sold at 1s. ½d. to 1s. 1d.

HEMP.—The Manila market is decidedly better, and the finer qualities 10s. to 15s. per ton higher. 439 bales at auction mostly sold readily at £34. 15s. to £36 per ton; private sales very limited.

OILS.—Anniseed: Dull, no auctions. Cassia: Very inactive, 10 cases at auction retired at 9s. 3d. per lb. Mace and Nutmegs: Nothing doing, 14 cases paste at auction, all retired.

JAPAN WAX.—Steady—of 1,076 boxes at auction a small quantity sold at 63s. to 65s. 6d. per cwt. for good to fine saucers.

SAGO.—Very little doing, prices for most kinds have declined 6d. per cwt. 1,956 boxes were offered at auction, about half of which sold at 21s. 6d. to 22s. for fair to good small, and 20s. 6d. to 22s., middling to good medium.

TAPIOCA.—Penang attracts but little attention, but 1,220 bags in public sale were principally disposed of, good white, 3¼d.; middling to fair, 2¼d. to 2¾d.; low, 1¾d. 50 cases indirect Singapore were sold at 1¼d. to 1¾d. per lb.; and 64 cases Taipoca flour (in tins) at 4¼d. to 4½d. per lb.

SPICES.—Black pepper: flat, a few parcels sold at easy rates—Singapore 3⅝d., Penang 3½d. to 3¾d.; 210 bags common Penang recently sold at 3½d. to 3⅝d. Zanzibar Cloves were purchased in small quantities at firm prices until within the last few days, when 340 bags were forced off at Auction at a decline of ⅜d. to ½d. per lb.; Common to fair 3⅞d. to 4½d. 43 cases Penang chiefly sold at lower rates, good quality, 1s. 1½d. to 1s. 0¾d. per lb. Mace: Nothing doing. Nutmegs have been in good demand at an advance of 1d. to 2d. per lb.; 200 cases at auction were all sold, small and middling, 1s. 1d. to 1s. 6d.; good middling, 1s. 7d. to 2s. 2d. Terra Japonica, Cutch, Pegue: The market is very flat and inactive; 293 packages at auction all retired.

TOBACCO.—Manila: The long scarcity of stock of this growth in our market is coming to an end. At the sale on 29th June only two lots found buyers. Cigars and Cheroots: Those free from musty smell are rather firmer in price; inferior neglected. Of Java good parcels in demand. The quotations are: Manila leaf, 1s. to 3s. 6d.; Cigars, 7s. to 7s. 6d.; Japan, 4d. to 6d.; Java, 6d. to 1s.

MISCELLANEOUS.—Black Lead: Steady; of 446 at auction, half sold at 14s. 6d. to 16s. 6d. for fair lump, and 7s. to 7s. 3d. ordinary to good dust. Galls: 1 case China retired at 80s. per cwt., and 45 cases Japan at 80s. to 90s. Recent arrivals of Tonquin and grain brought to auction, and realised as follows, viz., 118 caddies of the former, of which four-fifths found buyers at 33s. 6d. to 35s. per oz. for fine picked; 22s. 6d. to 29s. 6d. inferior to good; and 21s. to 22s. pickings; and 9 tins of the latter, of which 8 sold at 41s. to 51s. 6d. fair to fine, and 21s. inferior. Rattans: Steady, of 2,942 bundles Singapore at auction two-thirds sold at 4s. 3d. to 6s. 4d. per 100. Sapanwood: Firm, 19 tons Manila at auction sold at £7 to £9. 10s. per ton. Mother-o'-Pearl Shells: Nothing doing. Star Anniseed: 100 boxes brought to auction and about half were placed at £7 for good, and £6. 5s. for mouldy. Sticlac, Siam: Very quiet, 490 boxes were brought to auction, all retired. Tortoiseshell: Nothing doing, fine quality, 22s. to 26s.; sorts, 13s. to 20s.; inferior, 10s. to 12s. Turmeric: Of China 40 bags at auction were retired at 40s. per cwt. Nothing of any consequence doing in Java.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £8 to £8. 10s.; nail rod, £9. 10s.; hoops, £11; sheets, single £12; Staffordshire bars, £10; rails, £7. 10s.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and Sheathing, £100 per ton; yellow metal, 8½d. to 8½d. per lb.

TIN.—104s. for block; 105s. for bar. Tin plates, best charcoal, I.C. 30s. per box.

LEAD, &c.—English pig, £21. 10s. to £22; W.B., £23; shot, patent, £24; sheet, £22; spelter, £24 to £24. 10s.; zinc, English sheet, £28; quicksilver, £8. 12s. 6d.

MANCHESTER MARKETS.

Mr. Mendel's Circular states that, after some days of marked activity in sales at full and advancing prices, both spinners and manufacturers, forced by the position of the cotton market, now demand higher values, sufficiently so to check buyers in their operations. The feeling is one of confidence in favour of present or even higher rates than now current. Grey Shirtings, 7 lbs., 18s. to 18s. 6d.; 9 lbs., 25s. Cotton Yarn, 16-24, 2s. 10d. to 3s.; 3s. to 3s. 2d. Maddapollams, 7s. 9d. to 8s. Long Cloths, 21s.; T-Cloths, 14s. White Spot Shirtings, 21s. 9d.; White Brocade do., 22s. White Damasks, 37s. 6d.

FREIGHTS AND CHARTERS.

In berth freights there is little or nothing stirring. Cargo is still scarce, and the loading brokers are accepting very low rates in order to fill up. There is a prospect, however, of an improvement in the freights for coals, which will lead to a beneficial reaction in berth freights. Homeward freights are rather duller, but there are charters in the market from the rice ports, Maulmain and Java, at good figures.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £40, and £1. 18s. For Shanghai: £50 and £2. 9s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £28 and £1. 5s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have ordered the Oithona to be surveyed for the conveyance of 444 hhds. porter and a few combustibles, from the River Thames to Hong Kong.

At MAURITIUS.—May 28, Glengairn, Garrick, from Shanghai, for Liverpool. June 3, Mo-Yuen (str.), sailed for Singapore.

The screw steamship Columbian, which recently returned home from India, where she has been employed some years in the Peninsular and Oriental Company's service, left for glasgow in charge of Capt. T. Jamieson, she having been sold to Mr. John Scott, her builder.

MESSRS. EVANS and Co., Merchants, Shanghia, beg hereby to give their friends and the public notice that the only person who can now lawfully pledge the credit of the firm is Mr. HENRY EVANS, whose authentic signature may be seen at the office of Messrs. Godwin and Son, Solicitors, Newbury, Berks.

HOLLOWAY'S PILLS can be confidently recommended as a domestic remedy for the ailments of all classes and conditions of people. Young and old, men and women, parents and children, may take this medicine with the certainty of deriving benefit from its use when disorder and disease is making them miserable. Holloway's Pills are unrivalled for their purifying, aperient and strengthening properties. They remove indigestion, palpitation, and headaches, and are specially serviceable in complaints peculiar to females. Each box of Pills is wrapped up in printed instructions for the guidance of invalids, who will readily understand from carefully studying them the best way of regaining health. Holloway's Pills work a thorough change in the constitutions of the weak and nervous.

The above mails received this day are overdue five days, owing to an accident to the machinery of the steamer Orissa on the passage from Hong Kong to Singapore. In consequence of this delay, the Orissa did not call at Penang.

The incoming French mail arrived at Suez on July 28, and will be delivered in London on the 7th inst.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, arrived July 31.—From Shanghai: Mr. E. Wadman, Rev. — Bardon, Mr. R. Reid, Mr. E. Fuche. From Hong Kong: Dr. James Dewad, Mr. H. Severs, Mr. P. Sweetzen. From Singapore: Mr. Monters, Mr. J. Myrtle, Mr. E. Barnett.

PASSENGERS OUTWARD.

Per P. and O. steamer Ceylon, July 20, from Southampton.—To Singapore: W. C. Fisher. To Penang: Mrs. Smith, two Misses Smith. To Hong Kong: Lt. T. M. Magnay, R.N., Miss Harper, Messrs. Gray and M'Leod, C. F. Carpenter. To Shanghai: Messrs. F. Gibson and M'Culloch. To Calcutta: Capt. and Messrs. Orman and two infants, Capt. Mayne, Messrs. W. M'Cleery, W. Quarry, R. C. Anderson, R. H. Tulloh, R. D. Falkner, I. M. Algie, W. P. Heath, C. H. Ringwood, H. W. Hughes, G. Murray, and J. H. Bengough, Miss E. Smith, Robt. Anderson, E. A. Gillon, Miss H. Jewell, Miss I. Russell. To Madras: Lieut. W. Irvine, three second-class passengers. To Ceylon: Messrs. J. Cowell, F. W. Hill, and W. Stoddart, three second-class passengers. To Alexandria (and back to Marseilles): Two Misses Falvey, nine second-class passengers.

From Marseilles, July 28.—To Shanghai: Mr. C. Ziegler. To Hong Kong: Madame C. Guirca. To Singapore: Messrs. Hissink and Rutger. To Calcutta: Lieut. G. H. Heaviside, Mr. I. B. and Mrs. Reutiers, Messrs. T. B. Fowler and D. A. Smith, Capt. Cherry, Mr. J. H. Arathoon, Herman Stickel. To Madras: Capt. P. Holmes. To Alexandria: Mr. Duffus.

Per P. and O. steamer Poonah, August 4, from Southampton.—To Singapore: Mr. C. Wood. To Hong Kong: Mr. S. G. Bird. From Marseilles, August 12.—To Hong Kong: Mr. Maurice Brussel. To Singapore: Mr. S. Young. From Gibraltar.—To Singapore: Mr. R. and Mrs. Barras, Mr. M. Tavora.

Per P. and O. steamer Delta, August 20, from Southampton.—To Hong Kong: Mr. Gatton, Mr. and Mrs. Adams, Miss. Brown. From Marseilles, August 28.—To Shanghai: Mr. J. A. Taylor. To Hong Kong: Mr. and Mrs. D. Crawford.

Per P. and O. steamer, Sept. 4, from Marseilles.—To Shanghai (via Bombay): Mr. Wm. Jackson, Mr. J. Webster. To Penang (via Bombay): Mrs. Rodyk and infant.

Per P. and O. steamer, Sept. 4, from Southampton.—To Hong Kong: Miss Manuel, Miss Pagden, Mr. I. P. Mollson, Col. and Mrs. Gray, Miss P. Plumridge, Miss Longstaff, Mr. P. Bird. To Shanghai: Mr. E. Iveson, Rev. C. H. and Mrs. Butcher, Mr. F. Stokes, Miss Nelson.

Per P. and O. steamer, Sept. 28, from Marseilles.—To Singapore: Mr. P. C. Keake.

Per P. and O. steamer, Oct 4, from Southampton.—To Hong Kong: Mr. and Mrs. Preston and infant. To Shanghai: Mrs. Jarvie. From Marseilles, Oct. 12.—To Singapore: Miss Cooke and servant. To Shanghai: Mr. Gorden and friend.

Per P. and O. steamer, Oct. 28, from Marseilles.—To Hong Kong: Mr. J. Tait. To Shanghai: Mr. A. Schultze. To Singapore: Mr. and Mrs. H. W. Wood and lady friend.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The dates hence are to the 26th May. The *Nepaul*, with the London mails of the 26th March, arrived from Shanghai on the 18th May.

Sir Rutherford Alcock, Her Majesty's Minister Plenipotentiary, went up to Yedo on the 16th May in the *Coromandel*, but was back at Yokohama on the 18th A military guard left by land for Yedo to serve as escort to the Minister. This was a very necessary measure of precaution, if it be true, as stated, that the Gorojio warned his Excellency he would run the risk of being assassinated if he went to Yedo. Some anxiety had been felt from the fact of a body of some 150 *ronins* having quartered themselves in the environs of Yokohama, without any apparent let or hindrance from the Government. "It would be idle," remarks the *Commercial News*, "to ignore all consciousness of their presence, for in a country so notable for espionage, where even domestic incidents are secretly noted and removals from one street to another subjected to discussion and the pleasure of the authorities, such a circumstance as the visit of predatory freebooters *en masse* could not escape attention."

In reference to Sir Rutherford's request for troops, it is stated that a plot had been discovered, organised by some hostile Daimios, for the murder of the foreign residents at Yokohama, and that the Governor in giving notice of it to the British representative, said that it would be out of his power to afford them protection. The latter replied that it would soon be no longer required, as a body of troops were daily expected from Hong Kong. He accordingly wrote down to Hong Kong to expedite the departure of the *Conqueror* with the reinforcement of Marines, and to request that the 20th Regiment might also be sent over as soon as possible. When those troops arrived, it is generally current that the fleet would proceed to open up the Inland Sea, still closed against traffic by the Prince of Tsiosie, who fires on every vessel that passes Shimonoseki Bay.

The *Japan Herald* of the 26th May states that the main object of Sir Rutherford's visit to Yedo was to complete arrangements for the location of the men expected by the *Conqueror*, which vessel was looked for daily.

On the 20th M. Leon Roches, the French Minister, and suite, went up to Yedo on board H.I.M.S. *Dupleix*. This was a complimentary visit merely, and his Excellency returned the following day. The Consul-General for the Netherlands arrived at Yokohama on the 15th May, per H.N.M.S. *Djambi*, from Nagasaki.

The *Japan Herald* notices the general aspect of affairs in the following terms:—

"We cannot advise by this mail a continuation of the same satisfactory feeling in respect to the political aspect of affairs, which we last reported;—not that any events of great moment have occurred, but rather a combination of trifles which, in the sum, have tended to convey an idea that a feeling of uneasiness is attempted to be thrown upon us. It seems open to but little doubt that the Japanese continue to be eager to foster at least an idea of uncertainty. Such we take to be

Digitized by Google

the purpose of representations made recently at Yedo;—such the end very probably aimed at in reported inroads of ronins upon Yedo; such very possibly the purpose of a new move—the attempt to restrict the resale of exchange itzibus by the incarceration of the small merchants trading in them;—and such is most probably the real cause of the appearance the other day in a local print (in which Japanese sensation news always finds ready admission) that '*Tsiosiu was on his way up from the south en route for Yokohama with a considerable body of men.*' These are all as clouds in the horizon; do they portend coming showers,—or do they indicate those passing away? These are the important questions which the most weatherwise in Japanese political questions seem at present at a loss to answer;—which will probably only be answered by the event."

According to the *Commercial News*, the Japanese Government who have the foreign newspapers regularly translated for their information, have experienced considerable annoyance at finding certain information published therein which it would have desired to withhold; and have come to the conclusion that it has been imparted by Japanese teachers in foreign employ. The Government have, therefore, ordered that in future all teachers employed by foreigners shall receive certificates from the Yokohama Custom House authorities, who will register their names, and take other precautions to ensure their secrecy. Those already engaged have been intimidated and warned to be cautious. Domestic servants are also to be re-registered.

The summary of events for the week ending the 26th May contains one very sad item,—notice of the decease of Mr. Henry Hubbard, the last newly admitted partner of the house of Dent and Co., which occurred on board the P. and O. S. *Nepaul*, the day before her arrival in port.

The main part of the British squadron continues in the harbour, in which also there was one French and two Dutch men-of-war. H.B.M.S. *Racehorse* left on the 21st May for Hakodadi, C. A. Winchester, Esq., H.B.M.'s Consul for Kanagawa, being passenger by her. Marcus Flowers, Esq., Vice-Consul, has assumed acting charge of the British Consulate during his absence. The *Rattler* left for Nagasaki on the 25th. The *Pelorus* arrived from Hong Kong on the 16th.

The health of the Settlement was in a very satisfactory state. We hear of no more cases of small-pox on board the fleet, and but one or two slight cases on shore.

Very unambitious in its ideas of amusements, Yokohama has been enlivened during the fortnight by a couple of boat races. On the 19th of May a match for $50 a side came off between two favourite gigs, Messrs. George Barnet and Co.'s Sin Fa, and one belonging to W. McDonald, Esq. The Sin Fa crew were the following amateurs—1, Captain Blount, 20th Regt.; 2, E. J. Spence, Esq.; 3, H. Cope, Esq.; stroke, J. W. Murray, Esq., D.A.C.G.; coxn., H. H. Dyke, H.M.'s *Euryalus*. The other crew were Japanese, five men being allowed, to compensate for the boat being a little heavier. Distance 1¼ mile; a good race half the way, when Sin Fa went ahead and won easily by some fifteen lengths. The other was a match between the very excellent Japanese crew of E. M. Van Reed, Esq., in his fine whale-boat, against the gig's crew of the captain of the *Nepaul*, the Nippons running away from their Celestial brothers with ease.

There had also been a rifle match, at 500 yards' range—First prize, Captain Mears of the 20th, 2nd and 3rd, Captain Alexander, R.N., and Captain Applin, Mounted Escort.

The 24th, the Queen's birth-day, was so wet and stormy as to be almost entirely unsuited for out-door demonstrations, which were principally confined to the salutes from H.B.M.'s ships in harbour, and to their decoration in full bunting, which latter compliment to the day was also paid by the French and Dutch men-of-war, and all the merchant shipping in harbour. There was a gathering of the officials and some of the residents at the British Legation in the evening.

NAGASAKI.

We have dates hence to the 24th of May. The foreign residents had celebrated the Queen's birthday by an unusual "jollification." Her Majesty's ship *Perseus* fired a salute at noon, and was followed by one of the shore residents, who kept up a brisk, if not heavy fire for some short time. The thirst for amusement had been by no means subdued, for we hear that a grand theatrical performance was to come off on the 26th, on board Her Majesty's ship *Perseus*, while the 25th had been appointed for a regatta.

CHINA.

TIEN-TSIN.

A correspondent, writing under date of the 27th May, mentions that the two Danish vessels seized by the *Gazelle*, the *Caroline* and the *Catharina*, have been released, and now sail under Prussian colours. The *Falk* has been unrigged and is lying off the British settlement. The *Gazelle* left on the 18th May for Chefoo.

SHANGHAI.

The English mail of 10th of April arrived with the French mail of 17th, on 4th June. The dates are now down to the 6th.

The force under command of Major Gordon has been disbanded, and no longer shows a trace of its existence as a disciplined contingent within the walls of Quinsan, if we except the continued residence of the gallant major, the medical men, and the wounded still in hospital. The artillery branch have been taken over by the Futai, and are now proceeding from Soochow to Woochufoo, under command of Majors Doyle and Baily, which city is expected to capitulate and surrender with the usual shaving of heads and bending of tails. For once the Futai has behaved liberally, and has bestowed compensation varying from 200 dollars to junior officers of the late force newly joined, to 4,000 to those who have borne the heat and burden of the day, and many of whom, covered with wounds, have on every occasion distinguished themselves before the enemy. Amongst these we may mention Colonels Kirkham, Williams, Howard, Rhode, &c., most of whom leave our shores by the outgoing mail to recruit their shattered bodies and impaired health, the effects of wounds and arduous service in the field.

The artillery arm of Gordon's force is, we learn, to retain its present organisation after the disbandment of the infantry, and will remain in the Futai's service, under the command of Major Doyle, one of its present officers.

Tan-yang was evacuated by the rebels without attempt at resistance, and at once occupied by the Imperialists. It is believed that the whole of the open country in this province is now clear of rebels, and that Li Futai will soon march with his forces to join in the siege of Nanking, which is likely to be assaulted at the end of the hot season. The Imperialists hold a strong position at present, but are nearly inactive.

The Franco-Chinese and Imperial forces are encamped some distance from the city of Avochow, and had not, up to the 18th May, had any engagement with the rebels. The latter, who were strongly posted amid some heights in the neighbourhood, showed a disposition to advance. The Futai of Keangsoo is about to despatch 40,000 men to aid the Che-kiang troops in the siege.

An Imperial decree has appeared in the *Peking Gazette* of the 21st May, conferring on Gordon the rank of Ti-tu, and an honorary distinction equivalent to the English G.C.B.

The various actions since Colonel Gordon took command of the disciplined force we recapitulate, from a memorandum furnished by one of his late officers. Capture of Fushan, 4th of April, 1863; capture of Taitsan, 1st of May, 1863; capture of Quinsan, 31st of May, 1863; capture of Wokong, 27th of July, 1863; capture of Palachiaou, 29th of September, 1863; action at Wokong, 13th of October, 1863; capture of Walungchiaou, 23rd of October, 1863; action at Wokung, 26th of October, 1863; capture of Leekee, 1st of November, 1863; capture of Wanti, 11th of November, 1863; capture of Fusignan, 19th of November, 1863; unsuccessful attack on the Lowmun of Soochow stockades, 27th of November, 1863; capture of Yesing, 29th of February, 1864; capture of Leyang, 9th of March, 1864; unsuccessful attack on Kintang, 23rd of March, 1864; Chang-chow-Foo, 11th of May, 1864.

From Soochow we learn that the state of the city is improving in many respects. Business is carried out on a larger scale than formerly, and the appearance of the surrounding country, which is being gradually brought under cultivation, proves that agriculture is not neglected. The peasantry are content for the present to live in mat huts until they can afford to build more comfortable habitations. Large quantities of provisions are brought in every day, but in order to guard in the most effectual manner against the ingress of spies, each one who enters is stamped on the cheek with a chop, which is borne until the hour of closing the gates, when all visitors are excluded. A few days ago a rebel head-man was discovered riding in Mandarin dress through the Chá mun. On being searched, the small flag which is the symbol

Digitized by Google

of authority and shows the authenticity of any order given, was found hidden in his horse's hoof. The broken wooden bridge outside the Lo-mun has now, in its place, a firm and ornamental one, and the granite bridge near it, which was very much damaged, has been repaired. The larger creeks in the city have been cleared of the filth which filled them during the rebel occupation, and the smaller ones, over many of which it was possible to ride, are now undergoing the same cleansing process. In addition to these improvements, postal communication has been established with Shanghai. A small official goes about to the houses of the principal mandarins and shopkeepers every morning, to collect their letters. The Futai has exerted himself to bring about these improvements, and will soon see the effect of his efforts in the growing prosperity of the city and its inhabitants. From the front, our advices extend to the 20th inst. The rebels did not make even an attempt to defend Tan-yang, but evacuated it immediately on the approach of the Imperialists, by whom it was re-occupied. Now, that the whole of the open country in this province may be considered free from insurgents, it is supposed that Li Futai will go to assist at the siege of Nanking, which will probably be assaulted at the end of the summer. The Imperialists are doing nothing at present; but hold a strong position.

The close of the theatrical season has not put an end to the amusements to be found here. Mr. Black, a new candidate for public favour, gave the first of a series of entertainments entitled "Evenings at Home," which seemed to afford universal satisfaction. His second and third performances were equally successful. The games came off on Saturday afternoon at the Ningpo Joss house, and were kept up with great spirit. In consequence of the death of Mr. Gray, R.N., the men of H.M.S. *Leopard* did not attend; although this was no doubt a drawback to the pleasure derivable from such a trial of strength and agility, both the performers and spectators enjoyed themselves thoroughly.

The weather in Shanghai has been fine. There has been considerable mortality caused by cholera; although chiefly among the shipping, a few cases have also occurred on shore.

The surveying expedition sent from Shanghai to the mouths of the Yang-tsze, was working fair progress. The last account was to the effect that the officers engaged were getting on satisfactorily, but were much inconvenienced by the loss of the junks which accompanied them at first, but left unceremoniously after a short time. The *Hardy's* rudder became damaged during a storm which set in last Sunday, and she has accordingly returned to Shanghai for repairs. The efforts made to discover the whereabouts of the Yang-tsze beacon have hitherto proved unsuccessful.

A general impression (says the *North China Herald*) prevailed before Sir Harry Parkes' arrival at Shanghai, that he would take office with the higher title of Consul-general, and much surprise and disappointment were expressed when it became known that he would only assume the simple rank of a Consul. There is probably no other place in the world at which a Consul is called on to exercise so many and various functions as at this port. Besides the ordinary duties incident to his position, a Consul at Shanghai—especially an English Consul—finds himself frequently called upon to discharge those both of a governor and a diplomatist. He is the natural referee to whom the Municipal Council have to look in all cases of difficulty, and the real decider of most, if not all, questions that may be referred to the Minister at Peking, who must be mainly guided by his opinion.

Two attempts have been made to break up and remove the wreck of the *Lord Lyndhurst*. On account of the force of the tide, it was found necessary to work at slack water only. Accordingly, at 8.30 A.M. on Saturday, the 21st May, a blasting charge was sunk in the forehold, and exploded. At 2.30 P.M. a similar attack was made on the main hold, a charge heavier than that which was used in the first case having been introduced. The effect was extraordinary. A column of water about twelve feet in height was thrown into the air, the deck-house was forced above the surface of the water, the mainmast was snapped about four feet below the cap, and the keel completely shattered. An explosion in the forehold will, it is hoped, in a few days, complete the work, and again leave that part of the river free from obstructions.

HANKOW.

The tea season opened on the 26th of May with 7 chops, settled at taels 36.50 to taels 38.25 per picul. On the following day a further settlement of 8 chops were made. Highest prices, taels 38.50. With few exceptions the musters are equal to last year's, and in cases where inferiority is detected it arises probably from the wet weather which set in at the commencement of the picking season. The latest sales in Shirtings are reported at taels 4.20 (high). San-ko-lin-sin has entered the Huquang province at the head of an army, in obedience to an Imperial order desiring him to assist in suppressing the rebels. He is now about a hundred miles from Hankow. Liang-hung-chun, another general, who was deputed some time ago to suppress the disturbances a short distance from Hankow, has fallen into disgrace. After capturing a small town from the insurgents, he not only permitted, but encouraged his troops in maltreating and outraging the country people. It is feared, however, that he will be screened from the punishment he deserves, as he has many influential friends among the mandarins of the province, and is a great favourite of the Futai, who will do all in his power to protect him.

The following is the *Shanghai Record's* letter from its correspondent in Hankow:—

HANKOW, May 22, 1864.

Since last, the following clippers have arrived,—the steamer *Sea King*, steamer *Robert Lowe*, and ship *Challenger*. They are all laid on for London at high rates of freight. It is quite a relief to the eye to see these beautiful vessels moored off the foreign settlement; however welcome the river steamers may be, one gets tired of the eternal beam-engine and castle of houses *a la American*. We have had cases of small-pox, one being fatal. Thanks to the unremitting attention and skill of Doctor Faulkner, the disease has in most instances been baffled; really we are lucky to have such a skilful "medico" amongst us; his time is so much taken up that he is getting out an "assistant."

About fifty or sixty dead bodies floated past the police-station yesterday morning; most of them had been decapitated, and others with arms and legs cut off, &c. The Chinese here say a great battle has been fought between Neinfi and Mandarin soldiers, a long way up the Yangtse; this will account for the corpses.

A number of encampments (without Knights Templars) are situated on the opposite shore on the hills; they drill daily, and go through their manœuvres in true Chinese style. For the past fortnight we have had very pleasant weather, but during the last two days a little too hot.

The "Band" is nearly finished, and when hardened will add materially to the beauties of Hankow. It is a pity we have not a good photographic artist here to photograph our houses, settlements, etc., etc.

The "Customs" remove into the Hong recently occupied by Messrs. Fletcher and Co., on the 1st of June; this will facilitate trade; the establishment being in the centre of Hankow and next to the S.S.N. Co.'s premises.

SHIPPING. — Hardy, H.M. Gunboat; Sea King, British screw steamer; Robert Lowe, British screw steamer; Challenger, British ship; Chekiang, American steamer; Wrecker, American schooner; Cracker, American schooner; Knagawo, American lugger; Flirt, American lugger; Surprise, American lugger; Que Que British lugger; Cæzar, British lugger; Amelia, British lugger; Prince Eugene, French lugger; twelve Chartered junks loading for Chinkiang by Barraud and White, Junk Agents.

NINGPO.

The rapid breaking away of the granite sea-wall in Hang-chow Bay is likely to produce the most serious consequences. Formerly this wall was the object of great care to the Imperial Government, and was then properly attended to, but it has for some years been neglected, and the Government excuses itself on the ground of the pecuniary difficulties caused by the rebellion. The rice districts in the vicinity of Ningpo have already suffered from the salt water which fills the creeks. Starvation must follow, and the effects will not only be felt in Chekiang, but, in consequence of the failure of those large supplies of rice which have been brought yearly from Ningpo and Hang-chow, the inhabitants of Kiangsu will also be seriously affected.

HONG KONG.

The English mail of 26th April arrived out on the 7th June. The dates are down to the 13th June. The double screw steamer *Far East*, Captain Jones, arrived out on the 7th. The following report is published in the Hong Kong papers:—

The *Far East* left the Thames on the 25th February, and discharged her pilot off Portsmouth on the 26th, getting out of

Digitized by Google

the Channel on the 28th. She then encountered strong gales from the southward, with the usual high sea of the Bay of Biscay. These winds continued up to the 8th of March, when on that evening the wind backed to south south-west, and blew a hurricane, laying the ship down with topgallant sail under water, and carrying away gaffs and jackstays of steelyards. The lifeboats were also washed away, and everything on decks; the barometer during the time falling to 28.90. The wind, however, veered to the westward, where it continued and moderated, and from that time to her arrival the weather has been fine, and the winds have been unusually light, never reaching a reefed-topsail breeze, even down in 43 degrees south. The vessel during the passage has been under steam forty days, and was latterly short of coals; while, owing to the builders having directed in loading the placing of all heavy weights on the water line between decks, she became so crank after burning much coal that she would not stand up to her canvas with a side wind. The masts, yards, and rigging stand well, and the ship sails very fast, staying readily and steaming well. On the 30th May, in lat. 7.6 N., long. 106.50 E., at 6.30 A.M, she passed a large bamboo buoy, carefully moored, with Messrs. Jardine, Matheson, and Co.'s flag hoisted on a pole. She lowered a boat, when a 5-inch rope was observed to be attached to the buoy with a becket, wrought as if to lift some heavy weight. She was in company with the British brig *Woodbine*, from London, bound to Hong Kong at the time. On the 31st, in lat. 8.14 N., long. 108.6 E., she signalled the ship *Corea*, from London to Hong Kong, with loss of mizzen mast.

The following is from the *Daily Press*:—

The storm of Sunday night and Monday morning last inflicted vast injury in this colony. We should say, at a rough guess, that if the damage done to public and private property were estimated at half a million of dollars that it would be within the mark. In addition to the destruction of property, there has been a considerable loss of life among the Chinese. We would suggest that the well known beneficence of this community should be directed towards the alleviation of the misery caused by this catastrophe. Many Chinese have lost their homes, together with all their goods and chattels, and others whose houses have been spared have lost all their worldly effects.

How many times did we prognosticate that Wyndham-street would be torn up by the next following rains? Year after year did the catastrophe which we predicted, occur—thousands and thousands of dollars were year after year expended on the miserable patch-work, the whole of which money was misappropriated simply because not a cent of it was ever voted. It is excusable in any man to make a mistake, but for an engineer to make half-a-dozen attempts to construct the self-same work, and for all of them to fail, is a sheer absurdity Yet this was the case with Mr. Cleverly in his attempts to construct the drain down Wyndham-street. The Government allowed him to botch and blunder away, succumbing to his supercilious assumption of authority, and never calling in the advice of the military engineers who were available almost by the dozen, some of whom to our certain knowledge derided the modes adopted by the Surveyor-General, and utterly condemned them.

Wyndham-street would have defied the Surveyor-General to the end of time, had not a happy idea struck him. This was a catch drain up the hill, which shoots a great portion of the water into the military nullah.

How many times did we prognosticate the downfall of the gaol wall in Chancery-lane, and how many times were we right? At last Mr. C. H. Storey devised a plan of construction, and obtained the services of a sapper to overlook its execution; our dismal prognostications ceased, and the wall has since stood.

Many a time and oft have we designated the drains which were constructed to carry the water from the hill as mere agricultural ditches; again and again we have pointed out their frailty and their faultiness, and have ever prognosticated that they must burst to the first heavy rains which occurred, as they have hitherto invariably done.

The Surveyor-General's excuse was that he was overworked, and this pretext was good and valid whilst the man was allowed at the same time to be on the Legislative Council, to be the architect for the Consulates, to be a land speculator and house builder on his own account, to be a public architect, to attend to the laying down of buoys in the harbour, to construct floating police stations, to equip the convict hulk, and to do all sorts of things.

A deputation of the community should call on the Governor, and request him to have the damage surveyed by the military authorities.

Whilst on the subject of the storm we should state that, strange to say, although it lasted so long, it was purely local. At Canton and Whampoa it was not felt at all; the passengers per *Kinshan* on Monday night met it half way down. At Macao it was felt but slightly. On Monday afternoon, however, a water-spout descended near Whampoa, drowning about two hundred Chinese.

The following account is from the *China Mail*:—

The heavy rains which fell on Sunday night and during Monday have done more damage to the streets and to private property than was to have been expected in so short a time. Old residents say that they have known much heavier showers do less damage than the late rains have done; and we suppose that the destruction now visible in certain parts of the town is mainly owing to the ground having been prepared by the rain of a week previous, and so rendered easily assailable by the lashing torrents of Monday morning. We are as yet without information as to all the damage done, but a glance at that part of the city which lies eastward from the large water-tank presents a pitiful sight. Behind the tank a large portion of the road has resolved itself into silt, and disappeared from view, having been carried down the hill by the torrents of water. Coming eastward, we arrive at Mosque Terrace, where the road is also gone, and nothing but a yawning abyss remains in its place; the road leading to the castle is now only the track of a mountain torrent. Caine road has suffered badly, and has, just behind Captain Heaton's bungalow, burst in such a way as to throw down the retaining wall and inundate the house below with floods of water and silt. Shelley street, from top to bottom, looks like a skeleton from which the bones have been picked. At the sides of the street may now and then be seen the hollow shell of a footpath, whose hard chunam-work had resisted the water, projecting like a snow-wreath during a thaw. In fact, the damaged roads have all more or less the appearance which snow-covered land presents on the approach of fresh weather. Arrived at the foot of Shelley-street the torrent has turned to the left, and cut up the road most effectually, turning sharply round and forcing a channel for itself along Lyndhurst-terrace, again making a turn to the left and burrowing deep into Gage-street, with an overflow into Cochrane street, which did damage. But all the while another tremendous torrent had been hurling its whole momentum from Mosque-terrace down the whole length of Peel-street, as also down by the London Mission-house, where a portion of the eastern wall came down by the run. The whole of Graham-street, from the New Union Chapel site to Queen's road, is denuded of mould, and looks like the bed of a mountain stream. Chinese houses in the western part of the city are in many cases destroyed, and a good few lives lost.

We notice that convicts are at work repairing the damage, but as the chasms are only being refilled with soft earth, the remedy can only be temporary, lasting until the next heavy rains.

JAVA AND NETHERLANDS INDIA.

We have dates from Batavia to the 14th June. The steamer which arrived from Singapore on the 3rd June with the Europe mails of the 26th April, brought the remaining portion of the previous mail which had been left behind.

A slight disturbance of some importance had taken place in the vicinity of Batavia. A notorious horse-stealer of the name of Arbie, having raised a band of some one hundred marauders, committed serious depredations on the adjacent Tangerang estates. His career was but a short one. Troops most promptly sent to the infested district were soon on his track. He was pierced by several balls in the attempt to capture him. The actions of the man had not the slightest political colour, but were simply the results of his wish to revenge himself upon the *Schout* (police officer) at Mauk, who once before had delivered him to the authorities at this place upon a charge of horse stealing. He belonged to a tribe of men to be found in the *Kampongs* (villages) on the borders of the residency, and, unfortunately, only too numerous.

His Excellency the Governor-General left for Samarang on June 13 to lay the foundation stone of the railway-station at

Digitized by Google

that port. Cholera has suddenly commenced its ravages there, and would appear to be peculiarly virulent, felling its hundreds daily. The victims are, however, for the most part of the native population.

The number of arrivals under the Dutch flag in Netherlands India from foreign ports during 1863 was, according to the *Javasche Courant*, ninety-one vessels, measuring together 26,854 lasts, of which thirty-six were in ballast. The departures were twenty-five vessels, measuring 7,448 lasts.

The news that the Bill for fixing the estimates of India by the Legislature had passed the Upper Chamber (remarks the *Java Times*) and thereby had become law, was but very coolly received here, the idea being predominant that India has little to gain by the change, and probably much to lose. Until it will have appeared in approaching sessions how the new regulation works, the Bill in question will be looked upon with unqualified suspicion. India, delivered over to the tender mercies of men with whom parsimonious economy is a virtue, is not a pleasant prospect for those who believe that only a profuse expenditure of capital can properly develope the unbounded resources of these islands. A great part of this capital should come from Government, but the explication given to Art. 7 of the Bill (see *memorie van toelichting*) discourages the idea of a more lavish expenditure for the future. The greater publicity which Indian affairs will enjoy under the new *regime* is, however, a boon which cannot be too highly appreciated.

MALACCA STRAITS.

SINGAPORE.

Dates hence are to the 26th June. The London mail of the 10th May reached by the steamer *Malta* on the 11th June, making the transit in two days less than the contract time. The Messageries steamer *Erymanthe*, with dates from London to the 17th, and from Marseilles to the 19th May, reached on the morning of the 19th June. The steamer *Orissa*, which brought on the present mail, did not arrive at Singapore till the morning of the 26th June, having been detained five days beyond her time by the breaking of the screw shaft on the passage down from Hong Kong. The shaft, however, was repaired at sea, and the *Orissa* proceeded to Galle at two o'clock on the afternoon of the 26th, and it was expected would reach there in time to catch the Calcutta boat. She was not to call at Penang.

The principal interest of the fortnight has been of a commercial nature. In our last (says the *Overland Journal*) we reported that several extensive traders had given way, with liabilities amounting in the aggregate to nearly a million and a half of dollars. Since then, one very large house and one of long standing, carrying on partly an import and partly a local trade business, has had to suspend, with liabilities amounting to about a million of dollars. This failure has been followed by a few more among the Chinese dealers, and they together bring the gross amount of insolvency since the 1st of January this year up to somewhere about three millions of dollars—a large sum certainly. But still, more than half of the debts in all cases are to secured creditors, and as the dividends likely to be realized will probably reduce the balance by a third, not more than a million of dollars will be the amount actually lost; and this sum scarcely amounts to 2 per cent. on the yearly trade of the port, if the value of imports and exports are taken as the index of that trade.

The failure referred to is the following, thus noticed in the *Straits Times* of the 9th June:—

"The old and much-respected house of D'Almeida and Sons, owing to recent heavy losses, and to the unfavourable state of business, had to call their creditors together yesterday to deliberate upon the best course to adopt in their difficulties. According to a preliminary statement which had been drawn up, the liabilities of the house were set down at 912,000 dols., of which 487,000 dols. are to covered and 425,000 dols. to uncovered creditors; to meet the claims of the uncovered creditors there are assets to the estimated value of 313,000 dols.; but the great tightness in the money market, and the generally bad condition of business, may prevent their realising their full value." On the 25th of June, however, the same authority states:—"The firm of Jose D'Almeida and Sons, whose suspension of payment we have already noticed, have found it advisable voluntarily to place their estate in the Insolvent Court. It was found from the large number and value of foreign creditors, that under the directorship very little power would be given to act, and that many interests might be sacrificed. The present arrangement will therefore be the most satisfactory for all parties, and chiefly for the foreign creditors."

The steamer *Arracan*, which arrived on the 16th June, brought the following officers and men, namely—Lieut. McCarthy, Lieut. Lavie, Staff Assistant Surgeon Ashton, with No. 6 battery of the 17th Brigade Royal Artillery. Battery No. 2 of the same brigade, which has been here for a considerable time, will proceed in the *Arracan* to Penang, accompanied by Captain Marshall and Lieut. Weston. The *Arracan* will take to Madras the few Native Artillery that are here and at Malacca, as also the Local European Battery at Penang, accompanied by Captain Hitchins and Lieut. Bright. Lieut. Rolland, who was in charge of the Native Artillery at Malacca, rejoins his battery here. The stay of the *Arracan* is uncertain, as she is loading with ordinary stores and awaiting arrival of the steamer *Rainbow* from Labuan, with a detachment of ordnance people from Madras.

Official Notifications.—M. Mege has been appointed to assume charge of the office of the Consul for France at Singapore, during the approaching absence of M. C. Troplong. His Excellency the Viceroy and Governor-General in Council is pleased to recognise the appointment of Mr. Alexandre Conighi as Provisional Consul for Austria at Singapore. Mr. J. Bennett, Special Assistant Engineer, assumed charge of the Penang division from Major Helliard on the 9th May. Mr. W. W. Williams, Collector of Stamps, has been appointed Commissioner of Stamps, including postage stamps, at Singapore. Mr. George Norris has been confirmed in his appointment of Assistant Stamp Collector. Mr. Isaac Stone has been appointed Consul for the United States at Singapore.

Captain Grant, and the crew of the British brig *Morning Star*, who arrived at Singapore on the 20th June in a Dutch schooner from Billiton, report the loss of the abov vessel in Gaspar Straits on the Alceste Reef, on the 29th May. The *Morning Star* was bound on a voyage from Manila to New York. Her cargo consisted of hemp, sugar, and cigars. No lives were lost, and the cargo was partly saved, but in a damaged state. The cause of wreck is attributed to the greater extent of the reef to the Northward than that laid down on the chart. The following cross bearings were taken after the wreck:—Small island east of Puloh Liat, S.E. by S. ½ S. do. West side, Puloh Liat bearing S.S.W. Dry sand bank north end Puloh Liat, viz., South 2 miles distant: all way bearings.

On Saturday, the 4th June, a numerous and influential body of gentlemen interested in the cause of education met at the school-rooms, Tanjong Paggar, at the invitation of Mr. C. P. Lalla, to witness the opening of the "Cama Free School." Mr. Woods, who was placed in the chair, said the district of Tanjong Paggar was highly favoured in school matters; for some years a Malay school had been carried on at the sole expense of Mr. Guthrie, an old resident; and now the same district was blessed with the present school, founded by the Cama family, and intended for all creeds. There were already 56 Chinese boys, comprised in five classes; and the monthly expenses of the school—about one hundred dollars—were entirely defrayed by Mr. B. H. Cama. Mr. Woods concluded by declaring the Cama Free School open, and invited the friends present to accompany him to an adjoining room—where refreshments were provided—and there drink success to the undertaking. This having been done in champaign, Mr. Lalla's health was drunk with three cheers. The scholars sang a school song, showing that they had already derived some benefit from their new teacher, and the guests departed apparently well satisfied with their entertainment.

It was expected that the second King of Siam would visit Singapore at the latter part of June or the beginning of July.

The Chinese have long been acknowledged to be an ingenious people, and unfortunately their ingenuity is not always applied to completely legitimate purposes. They make good mechanics and first-rate lock-pickers. A somewhat novel display of Celestial ingenuity has been disclosed before the police magistrate. A Chinaman was brought before him charged with smuggling chandoo tin boxes let into the soles of each of his shoes. The shoes in question were produced, and it was found that into the soles of each shoe a tin box was fitted with great nicety. The two boxes contained together about $7 worth of illicit chandoo. The ingenious smuggler had been caught boldly walking along South Bridge-road. He was fined $100.

PENANG.

It deserves to be noticed, says the *Penang Gazette*, that there are no less than six vessels at present loading here for London, representing 2,968 registered, or 4,500 tons of carrying capacity. We believe such an occurrence has never before been seen in Penang. Certainly there was a great want of tonnage some time ago, and produce, therefore, accumulated; but no one, probably, had the least idea that there was so much elasticity in Penang as to give employment to so many ships at one time, and bound home to the same port.

Recent arrivals from the Pedier coast (reports the *Penang Argus* of the 2nd June) mention that Lim Yeong, a merchant of Penang, has been murdered on that coast about three miles from Timeang. It appeared that Lim Yeong, was returning to Penang, in his trading prahu, about 12 coyans burden, with a cargo of black pepper, hides, and gutta-percha, when two Malay sampans, with about twenty men, boarded his vessel, and after killing him and all on board, they removed into their sampans what they could find and set the prahu adrift. A few months ago a trading prahu belonging to another Chinese merchant of this island was gutted by the Rajah of Timeang. It is time that the local authorities take steps for punishing these misdeeds, and adopt some measures for the due protection of British trade carried on by our merchants and traders with the adjacent islands.

TRINGANO.

The Sultan of Tringano, says a correspondent from that State to the *Straits Times*, received a few days ago a bronze medal of the Great Exhibition of England, with a very kind letter from the Governor of the Straits, also a certificate signed by Earl Granville, Chairman of Her Majesty's Commission. It was brought here by a Tringano prow, but his Highness, hearing the name of her most Gracious Majesty the Queen mentioned in the letter, ordered it to be received with the greatest honour. The next day thousands of his nobles, &c., took it with them to the harbour, and from there brought it back to his Highness's palace under a royal salute of the guns of the Pabean. It was an impressive sight to see the happy faces of the people, at hearing that their beloved Radja was rewarded so well by the Queen's Commissioners.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BARLOW—On the 18th July, at Torkington-lodge, near Stockport, the wife of Thomas Barlow, of a son.

CARTWRIGHT—On the 17th July, at 3, Clifton-place, Lady Elizabeth Leslie Melville Cartwright, of a daughter.

DENT—On the 21st July, at St. Omer, France, the wife of Commander Charles B. C. Dent, R.N., H.M.S. Edgar, of a son.

FAGAN—On the 22nd July, at Cheltenham, the wife of Capt. C. S. Fagan, Madras Staff Corps, and Commandant 1st Regt. Infantry, H.C., of a daughter.

HOWELL—On the 20th July, at The Hurst, West Moulsey, the wife of W. G. Howell, of a son.

SAUMAREZ—On the 12th July, at The Firs, St. Lawrence, Jersey, the wife of Capt. Thomas Saumarez, R.N., of a son

SHORT—On the 12th June, at New Harbour, Singapore, the wife of Sep. Short, Esq., of a daughter, stillborn.

UNDERDOWN—On the 8th July, at Claremont, Higher Broughton, Manchester, the wife of Mr. R. G. Underdown, of a son.

WALLER—On the 2nd June, Mrs. William Waller, of a daughter.

MARRIAGES.

CLARK—COOPER—On the 19th July, at St. Matthew's, Oakley-square, by the Rev. C. Phillips, M.A., incumbent, Captain Clark, late of Shanghai, China, to Sarah, youngest and only daughter of Thomas Cooper, formerly of Kendal. No cards.

LOVE—HENRY—On the 9th June, at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, D.D., Colonial Chaplain, Joseph Love, jun., of Shanghai, to Miss Lucy Sarah Henry.

MAYERS—MCKENNA—On the 20th July, at the parish church, Barnes, Surrey, by the Rev. Robert Carrington, Frederick Mayers, Esq., of H.M.'s Consular Service, China, to Jeannie Cecilia, daughter of the late Hugh Malcolm McKenna, Esq., of New York.

POTTER—IRWIN—On the 7th June, at St. John's Cathedral, Hong Kong, Frank Potter, Capt. H.M.'s 99th Regt., to Mary Elizabeth Irwin, daughter of the Rev. J. J. Irwin, Colonial Chaplain.

DEATHS.

CHOAKE—On the 1st June, at Kowloong, Ernest Blenheim, infant son of Sergeant Choake, H.M. 99th Regt., aged 9 months.

CLEMENTS—On the 4th June, at Hong Kong, Sarah, wife of Capt. William Clements, ship Passing Cloud.

GRAY—On the 28th May, at Shanghai, of cholera, Henry Gray, Esq., Paymaster H.M.S. Leopard, aged 39.

HAVILAND—On the 27th May, at Kiu-kiang, Jacob C. Haviland, of Pokeepsie Duchess County, New York, U.S.A.

HUBBARD—On the 17th May, on board the Nepaul, on the voyage to Yokohama, Henry Hubbard, a partner in the firm of Messrs. Dent and Co.

SMITH—On the 6th June, at Hong Kong, George Smith, gunner Royal Artillery, aged 31 years.

WALLER—On the 6th June, at Shanghai, the wife of Mr. William Waller, aged 26 years

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 7d. to 6s. 7¼d.	6s. 7d. to 6s. 8d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...
At Canton, At Hong Kong, At Macao	6	ditto	4s. 9½d. to 4s. 10d.	4s. 11d. to 5s. 10d.
At Singapore	6	ditto	4s. 10d. to 4s. 10½d.	4s. 11d. to 5s. 0d.
At Manila	6	ditto	4s. 9d.	4s. 9d. to 4s. 10d.

At Shanghai: Bills on India, Rs. 315 to 316 per 100 taels. At Hong Kong: Rs. 226 to 227 per $100. Bar Silver at Shanghai, taels. Hong Kong, 7 prem. Mexican Dollars at Shanghai, ; and exchange on Hong Kong, 27 discount.

From Mr. Sharp's Exchange Circular:—

GOLD.—The market for this bullion has been very steady during the fortnight, but very little fluctuation occurring from day to day—the extensive agency now at work for beating the gold into leaf secures a ready market for all kinds of gold, whether in bars, coin, or dust. The amount received since last report is two hundred and ninety thousand dollars value, and that exported, including the sum by the *Emeu* on 30th May and excluding that to leave by the *Orissa* on the 13th, is two and a half lakhs.

SILVER.—Two lakhs and a quarter have been received, and one lakh and a quarter has been sent away. This latter is exclusive of an amount to leave by the *Granada* to-morrow, which in the case of Silver Bar and coin will be included in next account. The value of Bar Silver has increased within the last day or two.

DOLLAR CURRENCY.—Receipts, nine hundred and four thousand; exports, thirteen hundred and thirty-one thousand, of which over twelve lakhs have gone North. A certain degree of caution is beginning to be manifested in reference to receiving in large amounts the very mutilated coin which comes from Canton and the Coast. Clean coin have receded in value upon the Shanghai advices.

DISCOUNTS AND MORTGAGES.—Bank bills have been done at six for short, private at eight, and advances upon produce have been made at nine per cent.

EXCHANGE.—Notwithstanding the heavy shipments of treasure to Foochow and Shanghai, there is but little improvement in the rate for buyers of sterling. Rupees have been at a very good price, but close at lower rates. The hatful of bills expected from Foo-chow seems to have been bought up there, and but few have been put on this market.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—Little or no new Congou is expected this season; 40 chops are talked about; their coming is doubtful. A few Tayshan have been placed at full rates. A fair business has been done in Scented Teas, the rate for Capers tending downwards. Canton Gunpowder continues saleable at previous rates. Young Hyson tending up.

AMOY.—Arrivals this season commenced later than usual but are now beginning to come down freely. The market has not yet opened; so far buyers evince no wish to operate except at a far lower range of prices than the Teamen will as yet concede. Congous: Most of the teas which have arrived prove inferior to last year's both in quality and strength, but more attention appears to have been paid to the make of the leaf than in previous years. Arrivals at market, 5,591 half-chests. Contract, 2,156 half-chests and 61 boxes.

FOOCHOW.—The market for Congous was opened on May 25th, by purchases of Suey Kut and Kien Ning kinds, at taels 32 to 34: being about taels 1½ to 2 lower than last year. Yung Hows and Hap Yangs were at first neglected, but three days later were freely taken at 27 to 29 taels, being 3 taels lower than last season. Finest Kisows (which had not arrived when the market first opened) began at the same time as Yung Hows, at 36 taels; and each chop has been eagerly bought on arrival at advancing prices, 37 and 37½ having been paid for favourite chops. On the other hand, Hap Yangs and Yung Hows have declined 2 to 3 taels on opening rates. The quality of the crop is in general better than last year's, the teas being stronger and heavier. In many cases, however, the condition has been much injured by the wet weather. This was particularly the case with the earlier arrivals of Yung Hows. The true Kisow teas are very fine, much better than last year's; and we think, even finer than, though scarcely so strong as, those of season 1862-63. The settlements reported are 42,261 chests, 33 000 hf-ch. and 5,200 boxes. New Congous; say Inferior (mixed with old tea) 2,734ch., 3,800 hf-do. and 800 boxes at 21½ to 28 taels. Second class Kisows, 16,800 ch., 15,000 hf-ch., and 1,100 boxes at 32 to 34 taels. Good to fine.—13,300 ch. 12,350 hf-ch. and 3,300 boxes at 35 to 37 taels. Finest, 6,400 ch. and 1,000 hf. do. at 38 to 39 taels. Also 4,700 hf ch. and 200 boxes Oolong, fair cargo to superior at 24½ to 32 taels. The supplies of new teas to date amount to 85 000 ch. Congou, 840 ch., Souchong, 7,200 hf-ch. Oolong, and 1,200 boxes Scented, against same time last season, 98,700 ch. Congou, 2,700 ch. Souchong, 400 ch. Pekoe, 3,350 hf-ch. Oolong, and 3,150 boxes Scented. Three clippers with new teas have sailed for London and two others are under despatch.

SHANGHAI.—Black: Settlements of 1,600 chests common Congou are reported at 15 to 21 taels, leaving only 320 chests of old tea in stock. There have been no arrivals of the new crop, but supplies are daily expected. The total shipments of Congou from Shanghai for the season just closed amount to 435,000 chests (inclusive of 35,000 direct from Hankow) against 294,000 the previous season. Green: But a small business has been done.

KIUKIANG.—Green Teas: The market is swept of last season's teas. The intelligence regarding the coming crop is varied. The Fychow district was reported clear of rebels, and the gathering of the leaf was proceeding apace. The Moyune district was threatened, and the rebels were in its vicinity; the consequence was that the communications were disturbed, and a great lack of confidence the result. Of Taipang leaf little is expected, and that only of inferior quality. The extent of the coming crop is of course only matter of conjecture; but it can hardly be expected to exceed the supply of the season just closed, short as that supply was.

YOKOHAMA.—Very little business has been done during the fortnight. There have been a few inconsiderable transactions in the Old Teas, and the stock is very small. From 200 to 250 piculs of New Teas are reported in the market, but the teamen are asking extreme rates, no settlements are made.

Digitized by Google

NAGASAKI.—Little or none offering. Samples of the new season's crops have been exhibited, and parcels are expected in the markets shortly.

RAW SILK—SHANGHAI.—There has been very little done, and prices remain unchanged. The settlements of the fortnight are estimated at 70 bales only, and holders are by no means anxious sellers. Little can be said regarding the prospects of the coming season. Hank musters of Tsatlee and Taysaum have been received, but until the bale musters (expected in a few days) shall reach, no reliable opinion can be given. The dealers appear indisposed to make contracts, and none are reported. The coming crop is believed to be deficient, and the general impression is that rates will rule high.

YOKOHAMA.—There has been a fair inquiry during the last fortnight, and about 600 bales have been settled at a small reduction upon previous prices.

NAGASAKI.—None offering.

DRUGS, &c.—Canton: Cassia Lignea dull and drooping; sale, 400 piculs, at $15 to 15.50; stock, 2,000 piculs. Cassia Buds: Quiet at $54.50; 40 piculs offering on the market. China Galls: 100 piculs reported at $13.50 to 13.75; 200 piculs are on the market, held for the higher quotation. Vermilion: $43 to 44 per box. Rhubarb: No transactions. Musk: Of inferior quality only is being offered. Galangal is quoted $3.50, with a stock of 200 piculs, but is quite neglected. Essential Oils: None on the market.

CAMPHOR.—HONG KONG.—New supplies of about 1,500 piculs have arrived from Formosa a few days ago, but no sales have yet been reported. Holders are asking $19 to $19½ per picul unpacked and do not seem anxious to realise. A lot of some 600 piculs Japan, held five or six weeks for prices above market value, has been shipped to Liverpool.

RAW COTTON.

HONG KONG.—A fair amount of business has been done during the last fortnight, on the strength of the favourable accounts received from England. Supplies of Japan staple continue to come forward freely, and being preferred to Chinese descriptions, it meets with a ready sale. The transactions of the fortnight are stated at 7,000 bags China Cotton (Shanghai at $30 to $32, Ningpo $31½ to $32) and 5,000 bags Japan at $33½ to $34. The stock is estimated at about 27,000 bags. The present quotations are—Shanghai, $29 to $31.50, Ningpo, $30 to $32, Japan, $33.50.

SHANGHAI.—Prices are nominally the same, say Tls. 19.50 to 20.00 per picul for No. 1 Shanghai denomination; transactions are to a very limited scale. This may be accounted for from the absence of good staple on the market, the parcels offering being nearly all of very inferior description; and the smallness of stocks. The private telegrams brought by the *Fok-hien* from Hong Kong to the 11th April, via Bombay, had some little effect on the market, but buyers soon resumed their previous inactivity, preferring to wait the arrival of the mail here, by which seven days later intelligence is looked for. We have not heard of any further transactions for the new season's crop during the past fortnight. Advices by this and the ensuing Mail will no doubt very materially affect the early quotations, if not give a tone to the season's sales. Should the report of the Liverpool market, brought *via* Bombay, be verified, we may expect an active inquiry for new season's cotton. Our market here will be entirely dependent on advices from home; the crop, no doubt, will be much larger than that of last year, but this will not affect price. The experience we have gained of the Chinese proneness to false packing, and the suggestions they must have received from Europeans as to the poverty of staple and quality generally, may conduce to a better description of article being brought forward. At present there are about 10,000 bales of all descriptions in Shanghai, the bulk of which is of so unmerchantable a quality as to render dealers and speculators alike shy of operating at any price.

CHINA IMPORTS.

COTTON YARN.—There is not any change to notice in the value of cotton yarn as compared with the quotations given under date of 28th ultimo, and the transactions of the fortnight are limited to a sale of 55 bales, and 50 bales purchased on foreign account for shipment coastwise. Grey Shirtings also remain without much alteration in price, and the business of the past fortnight is comprised in settlements of 3,500 pieces purchased by the native dealers, and 700 pieces of damaged fabrics disposed of by public auction. Sales of 500 pieces lbs. 7.8 are reported from Foo-chow at $5.10 per piece. White Shirtings: The settlements of these goods reported in the Hong Kong market amount to only 1,000 pieces, taken at about previous quotations. T-Cloths: Have met with a moderate amount of inquiry in this market during the past fortnight, but the value of the lighter descriptions of goods to which settlements have been mainly confined is slightly below the quotations given in last circular. The sales effected since the commencement of the month amount to 10,062 pieces. There has not been a single sale made of any of the above-mentioned descriptions of imports in Canton, although prices are nominally quoted as under the date of last report. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: Have continued without inquiry, and the only sale reported during the past fortnight consists of 500 pieces of Dyed Brocades. Damasks: Are without sales to report. Chintzes: Have likewise continued without any inquiry. Handkerchiefs: The sales of these goods in Hong Kong during the fortnight amount to 2,250 dozens, there being no change noticeable in their value.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies and Habit Cloth: There has not been any inquiry manifested for those goods, either in this market or in Canton since the date of last advices, and prices remain nominally as then quoted. From Foo-chow a small sale of 96 pieces at 86 cents per yard is reported. Long Ells: The only sales of long ells to be noticed forthe present mail is one of 100 pieces. Camlets: Neither have these goods met with brisk inquiry, the sales of the fortnight being limited to 250 pieces. Lastings: There are not any sales of these goods to report. Blankets: Nothing doing.

METLS.—Iron, Flat, &c.: Prices remain without change both in this market and in Canton. The settlements effected in Hong Kong have been upon a small scale, and do not exceed 2,500 piculs of all kinds. From Canton there are not any sales to report. Lead: Also remains at previous quotations, with sales of 580 piculs reported in this Colony. The Canton market remains without change in value or settlements to notice. From Foo-chow we hear of 520 piculs having been placed against Tea, at $7 to $7.50 per picul. Tin: Some 1,200 slabs have found buyers in Hong Kong. Tin Plates: Remain as before quoted, with sales of 200 boxes in this Colony. Steel: Without sales to notice.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—From London: June 2, Pegasus. From Liverpool: May 23, Southern Cross, and, 31, Caractacus. From Cardiff: 27, Jane Isabella; 29, Nicolitre. From Sunderland: June 1, Sherlington.

At FOO-CHOW.—None.

At HONG KONG.—From London: June 7, Far East (str.), Philomela, Corea, and Kestrel. From Liverpool: 8, England and Everest. From Newcastle: 5, Jessie Beazley; 6, Melanie; 10, Maggie Leslie. From Newport: 8, Everest, The Cedars; 9, Isabella. From Sunderland: 8, Yeavering Belle; 10, Chanticleer. From Cardiff: 3, Malabar, and, 12, Good Hope. From Hamburg: 3, Alexander. From New York: 9, Pluto (str.); 11, Nabob. From Boston: 9, Daniel Draper.

At MANILA.—From Hamburg: June 1, Voladora.

At SINGAPORE.—From London; June 9, James Paton. From Liverpool: 21, M. Lauder and Brami. From Sunderland: 9, Miss Nightingale; 10, Hjalmar; 14, Winlow. From Shields: 16, Rangoon. From Glasgow: 17, E. Ronneberg, Figaro, Dunnikier, and Cleroloph Donneberg. From Antwerp: 13, Casilda. From Boston: 9, General Ward.

At BATAVIA.—From London: Salatiga. From Glasgow: Three Bells.

DEPARTURES.

From JAPAN.—None.

From SHANGHAI.—For Liverpool: May 25, Cyclone and Fanny. For New York, 20 Gleann.

From FOO-CHOW.—For London: May 29, Fiery Cross; June 1, Flying Spur; 2, Serica; and 4, Young Lochinvar.

From HONG KONG and CANTON.—For London: June 3, Belted Will. For England: 9, H.M.S. Vulcan.

From MANILA.—For London: May 25, Cambodia. For Liverpool: 28, Alica Annie; 30, Barinaga. For Falmouth: 24, Albuera. For Havre: 17, Nouvelle Antoinette. For New York: June 2, Tropic and George Peabody.

From SINGAPORE.—For London: June 11, Dewa Gungadhur. For New York: 12, Ocean Home, and Gertrude.

From BANGKOK.—None.

LOADING.

At JAPAN.—For London: Patrician, Natal, Merse, and Yokohama. For Liverpool: Red Deer. For Falmouth: Twee Corneliessen.

At HANKOW.—For London: Robert Lowe and Sea King (strs.), Challenger, and Falcon.

At SHANGHAI.—For London: Brockham, Coulnakyle, Guinevere, Silver Eagle, Taeping, Eliza Shaw, Knight Templar. For Liverpool: Pegasus, Fychow, Highflyer, Reigate, Esk, Surrey, Warwick Castle, Peerless.

At FOO-CHOW.—For London: Robin Hood (cleared), Min, Yangtzse, Dora, Ellen Rodger, City of Aberdeen, Childers, and Holmsdale. For Liverpool: Zibu.

At HONG KONG and CANTON.—For London: Kelso, Banian, Marlborough, Glenavos. For Liverpool: Edward Percy and Geologist. For New York: Roslin Castle.

At MANILA.—For London: A. de Winter, Labrador, and Seaforth. For Liverpool: Frederika, Indiaman, Kathay, Patriot King, Sales. For Falmouth: Achilles, Fagel, and Peveril of the Peak. For New York: Guletia and Norwester.

At SINGAPORE.—For London: Bonanza and Miss Nightingale. For Liverpool: Invincible. For Falmouth: Daniel Rankin. For Boston: Constance.

At BANGKOK.—For New York: Eastward Ho.

At BATAVIA.—For Amsterdam: Nicot. For Rotterdam: Fred Warren, Whampoa, Balaklava, Adriana Petronella, and Robert Dixon.

FREIGHTS AND CHARTERS.

JAPAN.—To London: Cotton and Tea, £5. 10s. to £6; Silk, £6. 10s. to £7 per ton of 50 cubic feet. To Hong Kong: Per sailing vessel $8, per steamer $9 per ton of 40 feet.

HANKOW.—To London: The Sea King is loading at £12. 12s., and the Robert Lowe at £9 (both strs.), per clipper vessels £8.

SHANGHAI.—The Eliza Shaw is the only vessel on the berth for new teas, and has been partly engaged at £6, but as there are plenty of fine vessels waiting to be taken up, this rate can hardly be expected to be maintained, for the coast business is but limited.

FOO-CHOW.—The Fiery Cross loaded at £5. 10s. per ton of 50 cubic feet, and 10s. per ton extra if first ship to arrive in England. The other clippers are and have been loaded at £5 per ton, and 10s. per ton extra if first ship home.

HONG KONG.—For the coast and rice ports there is but little enquiry. The following from Geo. Holme's circular will show the principal charters:—Marlborough, 890 tons, to London, £3. 10s. per ton; Geologist, 854 tons, to Liverpool, £3. 10s. to £3. 15s.; Margaret Michell, to load at a port in Java, to Falmouth, for orders, £4 if to United Kingdom, if Continent, £4. 5s. per ton, 2s. 6d. per ton extra if loaded at two ports; Roslin Castle, on the berth at Whampoa, for New York, £3. 10s. per ton for teas, and £4. 10s. for silk. To Bangkok and back the rates are 40 to 47½ cts. per picul, and 15 to 20 cts. extra if to northern ports.

MANILA. To London: £4 to £4. 5s. per ton for unclayed sugar; clayed, £2. 15s. to £3; hemp, £5. 5s.

SINGAPORE.—To London: Dead weight £3, and measurement £4 per ton.

HONG KONG.

...t into Hong Kong, having been in collision with the Russian frigate Gaze... ...le. The former reports as follows:—

On the morning of the 2nd, at about 3.50 A.M., a large vessel was sighted on our port bow, but no ligh... ...s were visible, and the officer of the watch thought she was steering the sa... ...ne course as ourselves, but afterwards found we were closing on each o... ...her, and consequently put his helm to port, to clear him; whereupon the fri... ...ate put her helm to starboard to cross our bows; our engines were then stopped and backed, but it being inevitable that a collision was to take place, our helm was shifted and we struck her on the starboard bow abaft the foremast, carrying away our jibboom, bowsprit, figure head, and bulging in our iron plates forward; but I am glad to say no damage was done below water line. She appeared to have come in for a large share, as when we passed yesterday afternoon she was still repairing damages. This notice is sent that vessels, and steamers more particularly, may know that the frigate cruises under steam with her lights screened, a very dangerous practice these dark rainy nights; when we struck her there was not a light to be seen, nor for some time after; I have no doubt this is done that she may catch her prey more easily.

2. As I am writing this the Gazelle has arrived with sch o oner a pr in tow.

COMMERCIAL POSTSCRIPT.

A prospectus has been issued of a new bank for India, the Eastern Archipelago, China, and Japan, which will be found in our advertising columns.

ARRIVALS NOT INCLUDED IN THE TABLES.—Aug. 1, at Deal, from Singapore, Eliza Thornton; at London, from Penang, Scotland; from China, Berdinkha; July 28, off the Wight, from Batavia, Dionysia, Catharina; 28, off St. Maws, from Batavia, Johannes Hendrikus; 27, at Helvoet, from Banjoewangie, West Kapelle; 28, at Brouwershaven, from Banjoewangie, Maria Anna; 30, at Deal, from Sourabaya, Maria Adriana; 27, at Cuxhaven, from Bassein, Nordstern.

DEPARTURES.—July 26, from Sunderland, for Singapore, Charmer, Thurso; 27, from Liverpool, for Batavia, Oceaan, for Singapore, Mount Vernon; 29, for Hong Kong, Prince Arthur, Tricolor.

At ST. HELENA.—July 2. Hollandria, from Batavia, and sailed for Amsterdam; she had experienced a heavy gale off the Cape, June 13, when she lost sails, &c.

SPOKEN.—Johannes Martinus, Rotterdam to Singapore, June 7, 16 N., 23 W.; A. R. Falck, Amsterdam to Samarang, July 15 47 N.; Catharina Maria, Zierikzee, to Batavia, July 19, 49 N., 6 W.; Devondale, Penang to London, June 12, 15 S., long. 6; Maria Agnes (Dutch barque), Java to Amsterdam, 104 days out, July 9, 33 N., 40 W.; Henrietta Gertruida, Amsterdam to Sourabaya, June 15, 8 N., 21 W.; Norden, Banjoewangie to Amsterdam, May 26, 16 S., 5 W.; Anna, Amsterdam to Sourabaya, June 10, 7 N., 25 W.; Herman, Amsterdam to Padang, June 11, 6 N., 26 W.; Ouderkirkaan den Amstel., Batavia to Amsterdam, July 4, 12 N., 28 W.

LAID ON.—At London, for Shanghai, Norwood; for Nagasaki, Millbrook; at Liverpool, for Singapore, Richard Cobden, Bentinck; for Manila, Thomas Roydon.

Naval and Military.

Colonel Guy, C.B., now commanding at Colchester, has been selected to succeed Major-General W. G. Brown, in the command of the troops in China. He has been forty years in the service, and commanded the first battalion 5th Fusiliers through the Indian Mutiny. Lieutenant T. M. Magnay, recently appointed to Her Majesty's ship *Princess Charlotte* at Hong Kong, proceeds by next mail.

The screw steam corvette Encounter, 14, Captain Roderick Dew, C.B., arrived in Plymouth Sound on the 21st inst. She left Yokohama on December 29, Nagasaki on January 12, Shanghai on the 20th, Ningpo on the 26th, Amoy on the 29th, Hong Kong on March 8, Singapore on the 23rd, the Cape of Good Hope on May 14, St. Helena on June 4, Ascension on the 8th, and Fayal on July 7. The Encounter has been in commission nearly five years.

The new military arrangements suggested by the Colonial Office for the Australian Colonies, exclusive of New Zealand, have been made public. It is proposed to allot in future 15 companies of infantry, consisting of one entire regiment, and the head-quarters wing of another regiment, in the following proportions:—New South Wales 4 companies, about 19 officers, 340 men; Queensland 1 company, about 3 officers, 88 men; Victoria 5 companies, about 22 officers, 423 men; Tasmania 3 companies, about 11 officers, 249 men; South Australia 2 companies, about 6 officers, 166 men; being a total strength of 1,327 of all ranks. The four companies in New South Wales and the single company in Queensland will probably be a wing of a regiment, of which the other wing will be in New Zealand. Another regiment will in that case furnish the ten companies in Victoria, Tasmania, and South Australia. The colonists have been asked to contribute a payment of £40 per man actually maintained up to this strength; but the scheme still remains uncompleted, owing to a hitch on the part of the Colonial Parliament.

Vice-Admiral Sir Michael Seymour, G.C.B., Naval Commander-in-Chief at Portsmouth, accompanied by his flag captain, Captain Scott, C.B., aide-de-camp to the Queen, embarked in the Fire Queen steam yacht, Staff Commander Paul, and, proceeding out to Spithead, paid a visit to Vice-Admiral Edham Pasha, the admiral commanding the Imperial Ottoman squadron now lying at Spithead, on board his flagship, the Paik Nusrett, 92 guns, Captain Ari Bey.

The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the undermentioned officer of Her Majesty's Indian forces, whose claim to the same has been submitted for Her Majesty's approval, for his gallant conduct during the operations at Umbeyla, on the north-western frontier of India, as recorded against his name, viz.:—Bengal Staff Corps—Lieutenant Henry William Pitcher, Adjutant 4th Punjaub Infantry—For the daring and gallant manner in which, in the course of the recent operations against the frontier tribes, on the 30th of October, 1863, he led a party of his regiment to the re-capture the Crag Picket, after its garrison had been driven in by the enemy; on which occasion sixty of them were killed in desperate hand-to-hand fighting.

The experiments at Shoeburyness have resulted so far in showing the superiority of the Lancaster gun over its competitors rifled on the French, the Scott, and other systems. The shooting of the 600-pounder gun has given great satisfaction, the accuracy of its aim being as remarkable as the length of its range, while as the gunners get used to it they can handle it much more effectively, and load it much more quickly than was at one time supposed to be possible.

The Himalaya, screw troopship, Captain E. Lacy, arrived at Portsmouth from Quebec, whence she sailed on the 6th inst., with troops and invalids on board.

On Wednesday, the 21st inst., a Royal review of the troops at Aldershott was held. His Royal Highness the Prince of Wales, accompanied by Prince Louis of Hesse and the Field-Marshal Commanding-in-Chief, arrived at Farnborough Station shortly after nine o'clock, and at once proceeded to Cove Common, where the division was formed up in lines of brigade, with the Royal Horse Artillery and the field batteries massed upon the left, on the high ground opposite the Queen's Hotel. The three brigades of infantry were drawn up in three lines, the third brigade in front, the second in the centre, and the first in the rear. The six regiments of cavalry were divided into two brigades, light and heavy, the right of the latter being occupied by the 2nd Life Guards. The Royal Engineer Train and pontoons, and the two battalions of the Military Train, were formed in rear of the artillery. Precisely at 9.30 A.M. their Royal Highnesses and suite rode on to the ground, where they were received by Lieutenant-General Sir John L. Pennefather, K.C.B., commanding the division, and the whole of the divisional staff, the troops presenting arms and the bands playing the National Anthem. The troops, after the march past, formed echelons of regiments in the hollow, immediately below the hill. They then advanced from their right by battalions, the whole front being covered by skirmishers from the 60th Rifles. As they advanced, two batteries of artillery kept in reserve were brought to the front, and the officers commanding desired to take any ground that might be considered suitable for maintaining the action against the supposed enemy. On nearing the canal the 3rd Brigade, under General Russell, took the Eelmore-bridge, and the 1st Brigade, under General Brook Taylor, on the right of General Russell's brigade, crossed the pontoon bridge. The cavalry, which had been sent a long distance away, and through Cove village, took the enemy on the right by the pontoon bridge. As soon as the canal was crossed and the neighbouring heights above gained the enemy was supposed to be defeated and the review terminated. His Royal Highness the Field-Marshal Commanding-in-Chief then sent the infantry home and ordered the cavalry to remain for extra manœuvres, the marching past of some of the cavalry regiments, and particularly of the 2nd Life Guards, causing his Royal Highness some dissatisfaction. The attendance of spectators was unusually numerous, and the spot selected for the marching past and the manœuvres generally being entirely covered with heath was comparatively free from dust. On the conclusion of the review their Royal Highnesses the Prince of Wales, Prince Louis of Hesse, and the Duke of Cambridge and suite, proceeded to the quarters of Sir J. L. Pennefather, K.C.B., where they partook of dinner, the band of the 14th Regiment playing a selection of music under the direction Mr. Doorly.

Literature.

The Chinese and Japanese Repository for June is a number of unusual interest. It comprises a continuation of Mr. Lockhart's "Medical Missionary Practice in Peking in 1861-2;" an article on the Situation of Peking, abounding in curious and interesting details; another chapter of the "Story of Han-wan and the White Serpent," a tale which well deserves the honour of separate publication; and further instalments of the other articles that have been in course of reproduction in this periodical. Great astonishment has been often expressed at the vast distances to which immense blocks of stone must have been transported by the ancients. We shall have many of these wonders explained as we know more of the interior of China, where the practices and arts of antiquity will be found still in vigour, in a way that will illustrate many things told us by the historians of Greece and Rome that we still continue to esteem as scarcely credible. We read—

Digitized by Google

Some time ago a block of white marble, 15 feet long by 12 feet thick, and 12 feet broad, and computed to weigh 60 tons, was dug in these quarters [distant about 50 miles from Peking], and carried along a road 100 miles long, constructed for the purpose, to the Eastern tombs of the present reigning dynasty, to be cut into the figure of an elephant for the tomb of the late Emperor, Heen-Fung. The block of marble was placed on two ponderous trucks, made of large beams of timber lashed and clamped together, moving on 16 wheels, and drawn by 600 mules and horses to the tplace of its destination. It was an extraordinary sight, and almost all the foreign residents went to see it as it passed near the city tothe tombs.

The *British Army and Navy Review*, a first number of which is before us, is a spirited attempt to establish a new monthly shilling magazine for the large classes interested in military and naval affairs. The contents include an excellent original paper on Lee's Second Year of Campaigns in Defence of Richmond, by Capt. CHESNEY, R.E., Professor of Military History at Sandhurst College, relating principally to the invasion of Pennsylvania in June, 1863; also articles entitled "The Story of Major André," by JAMES GRANT; "The Volunteers, Prospect of the Force in its Fifth Year," by the author of "Tom Brown's School Days;" "The Navy of the Confederate States—the *Alabama*," by Commander BEDFORD PIM, R.N., &c., &c. The number also includes tabular information as to the stations of the army and navy at the present time.

Messrs. Hurst and Blackett publish this week *Life in Java, with Sketches of the Javanese*, by WILLIAM BARRINGTON D'-ALMEIDA. The work will be in two volumes, with illustrations, and shall receive a notice in our next number.

De Homœopathische Huisvriend, door E. GUERNSEY, M.D. London: Turner and Co., Fleet-street.—This neat little volume is a translation into Dutch of the "Homœopathic Domestic Practice" of Doctors Guernsey and Thomas. The reputation of the original is so well established that there can be no doubt of a large sale of the translation wherever the Dutch language is spoken, and those who are converts to the system of medicine to which the book is adapted will have reason heartily to thank Mr. Turner for furnishing them with a manual that must have long been a desideratum.

"THE TIMES" SHANGHAI CORRESPONDENT.

The Custom House returns of import and export trade of Shanghai during the past twelve months have been published during the past fortnight. There is a large falling off in exports, owing to the deficient arrivals of silk from the interior; but almost every other article of commerce, with this exception, shows an increase, and the value of imports is £6,845,622 higher than during the previous year. The exports of silk fell from 68,300 piculs, valued at about £7,000,000. This falling off is, of course, attributable to the disturbed state of the country. There has been a gradual diminution in the arrivals from the silk district since the first year that they fell into rebel possession, although proportionately to the crop produced the quantity sent to the foreign market had never been so large. All the silk produced which was not required for their own consumption was sent by the rebels to Shanghai, so that the actual deficiency in the crop was greater than the apparent falling off, as judged from the quantity which reached the foreign market. During the past year, however, the silk districts, which had been rapidly overrun by the rebels, and conquered with comparatively little fighting, had been reconquered by the Imperialists, and consequently again looted and desolated worse than before. The defeated rebels carried away with them in their retreat all the property on which they could lay hands, and impressed the inhabitants as coolies, while the advancing Imperialists again looted what little was left, and this, judging from the accounts that have been received of the state of the recovered districts, can have been little indeed. Thus the production of silk during the past year fell off to a serious extent, and it is to be apprehended that during 1864 the crop may be still smaller. So far as regards the trade of Shanghai, however, I have no hesitation in asserting that the local Government has been the only sufferer through the falling off, on account of the reduction in duties. Merchants have been saved by it from heavy losses. Almost every shipment of silk which has been made to England during the present year has shown a loss, and it is logical to infer that if the shipments had been larger the prices realised would have been lower and the losres heavier. The increased demand for cotton for exportation had the effect of nearly quadrupling the arrivals from the interior, the quantity exported being valued at three millions and a half sterling, instead of one million during 1862. The exports of tea also during 1863 exceeded those of the previous year by more than 10,000,000 lb. With the exception of an increase of £700,000 in the value of opium, and £1,000,000 in treasure imported, the increase of six millions and a half which is shown by the return in the total import trade of the port is referable rather to a general increase than to any particular article. The tonnage of inwards shipping in 1863 exceeded that of 1862 by 240,000 tons, and that of outward vessels by 273,000. Of this increase about 150,000 tons were in British, and 50,000 in American ships. Thus it will be seen that, notwithstanding the falling off in the silk trade, the general increase in the trade of the port has been satisfactory, and now that the rebellion has been so nearly extinguished a still greater rise may be looked for—not in 1864, probably, because the struggle which has been going on in the two provinces of Keang-soo and Che-keang must have had a depressing influence on the trade of Shanghai. But if, as may be expected, this year witnesses the extinction of the rebellion, a great improvement may be looked for in 1865.

INDIA.—PAST AND PRESENT.

The annual statement of the Indian Budget presents a gratifying picture of progress, economy, and improvement. Whichever way we turn we meet with the most convincing proofs that we have at last hit upon a plan which is destined to develop to the utmost the industrial capacities of India, and to preserve the wealth which she creates for the purposes of reproduction. Within the last five years India has exchanged a deficit of fourteen millions for a surplus of several hundred thousand pounds, and that in spite of a deficiency in the article of opium alone of no less than £1,600,000. The Income-tax is, indeed, a failure. The Indian trader is not proof against the temptation which the virtue of the English trader has not been altogether able to resist, and it is announced that the tax is to be abolished as a part of the general revenue, and only retained for the purposes of local taxation.

Whatever be the injuries that the American war has done to Lancashire, it has unquestionably regenerated India; but this process would not have been so sudden nor so complete had not a wise and provident Government prepared the way for this new burst of prosperity by piercing the vast interior with railroads, by putting the finances in order, and by employing persons able not only to adapt English institutions to Indian use, but to invent new principles to meet Indian wants when the principles already known seemed not to be fit for the purpose. The picture of foreign policy in India is as gratifying as that of domestic improvement. We have at last learnt in India that indifferencef which we are endeavouring to learn in Europe. Three sons of Dost Mohammed Khan are fighting for the possession of the Affghan throne, and we in former times should have had our favourite and our enemy, and been busy with intrigues to support the one and supplant the other. As it is, we look on with perfect indifference at the unnatural conflict, ready to enter into friendly relations with the conqueror, and to give the conquered, if he escape the sword or the bowstring, an asylum within our dominions. Surely, this is much better than the costly folly of five-and-twenty years since. We have unintentionally excited the jealousy of one Hill Tribe while chastising another, and suffered severely in consequence, while in the wild and mountainous region of Bhootan our Envoy has been insulted and our complaints scornfully rejected. Time was when this would have led to a war, but now we content ourselves with occupying the passes by which Bhootan is connected with the rest of the world, and trust to this kind of land blockade to bring our refractory neighbours to reason. Such is the outline of the Indian Budget. Its statements are not only gratifying in themselves, inasmuch as they tell of peace and prosperity, but also from the promise they give that our Government will be conducted on principles which will render that prosperity durable.

Parliamentary Intelligence.

HOUSE OF COMMONS.

DESPATCH OF TROOPS TO JAPAN.

(20th.) Mr. S. FITZGERALD asked the noble lord the Under-Secretary for War whether it was the case that a regiment had been ordered from Hong Kong to Japan on the requisition of Sir Rutherford Alcock; and, if so, whether he could explain for what purpose these troops were wanted. —The Marquis of HARTINGTON said a despatch had been received from General Brown at Hong Kong, stating that a requisition had arrived from Sir Rutherford Alcock for the remaining companies of the 2nd Battalion of the 20th Regiment, then stationed at Hong Kong, to be sent to him at Yokohama. General Brown said that the requisition would be complied with as soon as transports could be obtained.—Mr. S. FITZGERALD asked whether there was any statement in the despatch as to the object for which the troops were required in Japan. (Hear, hear.) The Marquis of HARTINGTON said that Sir Rutherford Alcock spoke only in general terms of the state of affairs at present existing in Japan.—Sir J. PAKINGTON: How many men are going?—The Marquis of HARTINGTON: Six companies.—Mr. COBDEN said he did not understand how many men were to be sent to Yokohama.—The Marquis of HARTINGTON could not speak exactly as to the number of men; but he believed that there were two companies already in Yokohama, and the remainder of the troops would be six companies, or probably about 800 men.

JAPAN.

(21st.) Lord NAAS, in the absence of Mr. Seymour Fitzgerald, asked the Secretary to the Admiralty whether a force of marines had been sent from this country to Japan, of how many men it consisted, and when it was despatched from the country.—Lord C. PAGET stated in reply that on the 21st of December last Her Majesty's ship *Conqueror* was sent to Japan with a limited crew and 500 marines.—Lord R. MONTAGU asked whether the troops and marines who had been sent to Japan had been sent there on the authority of the Cabinet or only by the order of some subordinate officer. In the latter case a grave constitutional question would arise, because the Crown alone had authority to do what might amount to an act of war against a foreign Sovereign. He wished, also, to know whether, before the debate which was fixed for to-morrow, the Government would lay on the table the despatch from General Brown.—Lord PALMERSTON: The troops which were sent from Hong Kong were sent in consequence of a requisition from Sir R. Alcock in Japan, and not in consequence of orders from the Government here. The troops were sent to Hong Kong in order to be in readiness in case they might be wanted, but the immediate cause of their removal was a requisition from Sir R. Alcock. The noble lord asks whether the despatch will be laid on the table to-morrow in time for the discussion. That I am not able to say. I cannot say whether that despatch by itself is one which should be laid upon the table without other accompanying despatches, but I will inquire.

THE INDIAN BUDGET.

(21st.) Sir C. WOOD made his annual statement of the finances of India. He began by observing that the favourable anticipations he had made in past years had been confirmed, and the hopes he had held out had been more than realized. The result was that, after an equilibrium of revenue and expenditure in one year, there had been a considerable surplus in three successive years. £8,313,000 of debt had been paid off, and there was a balance in the Treasury of upwards of £19,000,000. There

Digitized by Google

had been a steady increase, he said, in all the items of revenue, the augmentation of the land revenue having resulted from the large quantity of land taken into cultivation. He went over the other sources of supply to the Indian Exchequer, explaining, as he proceeded, the nature of each and the modifications they had undergone, remarking that most of them were derived from internal taxation, falling upon the people of India. He then adverted to the expenditure, to the increase in the price of commodities and in the rate of wages. He entered very fully into the state of the cotton cultivation, showing that there had been a progressive increase in the production and in the importation of East India cotton, and stated the measures taken to check its adulteration. He read statements of the augmentation of the exports of other articles of Indian produce—coffee, indigo, jute, woods, tea, and cinchona bark. He gave details respecting the state of public works in India, where there was now an excessive demand and competition for labour; the railroads, telegraphs, &c.; and he then, after remarking that tranquillity prevailed within our own territories in India, traced the origin of the late operations against the fanatical tribes beyond the Punjab frontier, from the time of the Mahomedan schismatic, Syed Ahmed, to that of the Akhoond of Swat, their present head, and adverted to the quarrel with the chief of Bootan and his treatment of Mr. Eden, indicating the inexpensive measures to be adopted to bring the chief to reason, by occupying the passes of his territory, and cutting off his communications and supplies. In conclusion, he reviewed some of the leading measures of the Indian local Government during the past year, and vindicated the policy and administration of the home authorities. He concluded by moving the first of a series of resolutions on the financial condition of the several Governments of British India.

The resolutions presented the following result:—

The total net revenues of the several Presidencies for the year ended the 30th of April, 1863		£36,662,867
The total charges		24,968,240
Surplus of Indian revenue		£11,694,627
Interest on debt	£3,351,680	
Charges defrayed in England	6,515,601	
		9,867,281
Surplus of Indian income		£1,827,346

Mr. H. Seymour considered the statement, on the whole, highly satisfactory; suggesting, however, the more ready sale of waste lands in India in fee simple by the Government.

Mr. J. B. Smith complained that the Indian Budget was not brought before the House at an earlier period of the Session, and that it was not accompanied by the explanations of the Finance Minister in India. He complained likewise that so little attention was paid to opening out the internal navigation in that country. He, however, congratulated the House upon the satisfactory character of the report given of the finances of India.

Sir J. Elphinstone said they were now assembled on the 21st of July to enact the solemn farce which last year was performed on the 23rd of July. At the close of the session, passed in laborious duties, the fragments of the House of Commons had met to deliberate upon the Government of 200,000,000 people. In his opinion a more scandalous sight could not be presented to the British nation than the situation of the House at that moment, when the welfare of the 200,000,000 confided to their care was being muttered over to empty benches. The statement of the right hon. gentleman was to some extent encouraging, as it showed that the natural resources of the country, assisted by that providential interposition which generally came to our aid when we committed great blunders, had raised the revenue of India to a paying point. He trusted that the Government of India would feel inclined to treat the services in India with more liberality than they had hitherto displayed. By a formal decision of the House it had been declared that those services were entitled to consideration, and he gave the right hon. gentleman fair warning that if something was not done before Parliament met next year the decision of the House would again be taken on the subject. The revenue and expenditure of India which they were now discussing were matters of history, and debates of this kind simply converted the House of Commons into a debating society for expressing opinions upon India in general. He was glad to find that the recommendations of the committee for the transport of troops was about to be carried into effect, and that the troops were in in future to be transported by way of the Red Sea. The only matter of surprise was that, as a question of economy, the Government had not made such an arrangement at a much earlier period.

He should be glad, however, to learn from the right hon. gentleman whether the expense of transporting the troops from England to Alexandria would be defrayed by the Home Government or by the Government of India. In order to avoid the fevers which set in in Egypt when the waters began to fall he thought no troops should be sent from this country from the 1st of June until the 1st of November. Now that the railway system was being largely extended in India, it was the duty of the Government to consider seriously whether a reduction in the Indian establishments might not be effected. According to Sir Sydney Cotton, a most able and experienced authority, it was possible to govern India with 30 per cent. fewer troops than were now employed; but that could only be done by the abandonment of the old system of cantonments, which was now entirely obsolete, and by availing themselves of the facilities afforded by the extension of the railway system. He recommended the Secretary of the Colonies to consider whether a similar course might not be advantageously pursued in the colonies for the development of railway communication. There was, however, one point to which the attention of the Government of India did not appear to have been sufficiently turned. The whole of our efforts for the last few years had been directed to the development of the internal traffic of India. No doubt that was of paramount importance, but in order to render it effectual it was also necessary to give increased facilities for the coasting trade of India.

It had been stated by the right hon. gentleman that the labour-market of India was difficult to manage, but if the Government afforded proper facilities for conveying labour from one part of the country to another all the difficulty would cease. Three years ago he obtained a committee of that House for the purpose of inquiring into the practicability of deepening the channel between the Indian Continent and the Island of Ceylon, so as to enable large ships to go through that passage instead of going round the island. The canal to be dug for that improvement was not more than 4,000 yards, and when completed they would carry the coasting trade of India by a route 360 miles nearer than the one it now took. From the most unexceptionable engineering evidence given before the committee, it was clear that an outlay of £100,000 or £150,000 would suffice to make that channel fit to admit a line of battle ship. It was most important that such a work should be executed out of the surplus revenue of India, and he wished to know whether any steps had been taken for that object.

Another point on which he desired to have information was as to who paid for the British navy in India. The coasts of India extended over 4,000 miles, and the whole police of those seas was now managed by the Royal Navy. One of the first acts of the right hon. gentleman was to extinguish the Indian navy, which comprised more scientific men in the aggregate body of its officers than any other service that he knew of, excepting, perhaps, a strictly scientific service like the Royal Engineers. Whether employed as ambassadors, diplomatists, linguists, explorers, or seamen, those officers had maintained a position of the highest respectability and honour under the East India Company, and they had performed services of the greatest value and importance. But they had now been swept away with scanty thanks and justice. He would therefore suggest to the right hon. gentleman that with his overflowing budget he should extend to the older members of that profession some of the advantages which he was now conferring on the black inhabitants of that country which they had saved from anarchy, confusion, and despotism. These men had been replaced by the Royal Navy; and he would ask whether the taxpayers of England were to send out a navy to do the business of the right hon. gentleman, and enable him to come down to the House with a flourishing statement about the revenues of India. Instead of the old rule by which an officer's Indian allowances began when he passed the Cape, an ideal line had been drawn which did not exist in fact, and which would operate with practical inconvenience and injustice towards this country. He wished to know how the right hon. gentleman intended to deal with that matter.

He understood, also, that an important alteration was about to take place with regard to the Straits Settlements; and he would be glad to know in what that change was to consist. Since Singapore had been established and guaranteed as a free port it had undergone the most marvellous development. The whole trade of the Eastern Archipelago had been centred there, and the progress of the settlement had been mainly due to its immunity from all port charges; but he now learnt that there existed a design on the part of the Government of India to impose regulations upon Singapore. He wished to know whether or not that was really the intention of the Government, because, if so, that opportunity might be obtained in the next Session which was denied him in the present one of opposing a policy likely to be so mischievous.

Sir C. Wood said no alteration in the position of Singapore was intended; but questions had been raised by the Singapore Chamber of Commerce as to harbour-masters, and also as to moorings, and it was stated that no objection would be made to the levying of some small duty by the Indian Government if those alterations were made. He believed that he had noticed all the points that had been raised, and had only further to thank the Committee for the patient attention they had given to his statement, and to thank hon. members for the suggestions which they had made, and which he could assure them should receive his most careful attention. (Hear, hear).

JAPAN.

(22nd). Lord Naas, in reference to his motion respecting the despatch of a military force for Japan, said he should not bring it on at that advanced hour of the night, and wished to know what was to be the course of business next week, as he was anxious for an opportunity of submitting the subject of Japan to the House as soon as possible.—Lord Palmerston said the House would sit certainly on Monday and Tuesday next. He thought the noble lord would have an opportunity of submitting his motion on Monday after the resolution of which he (Lord Palmerston) had given notice was disposed of. The House would meet on Monday at three o'clock and continue the sitting without interruption.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, July 24.

The re-elections, which took place a few days ago, were not decisive, because no one of the candidates obtained an absolute majority. At Winschoten Professor J. A. Jonckbloet polled 182, and T. Borgesius 98, of the 499 votes; and at Hoorn Baron van Goltstein polled 535, Mr. W. T. Gevers Deynoot 464, of the 1,201 votes. It is now very probable that Messrs. Jonckbloet and van Goltstein will be finally elected members of the Second Chamber of the States-General.

Since my last it has been stated by the *Moniteur du Soir* that the officials who formed the commission which was recently sent by the Government of France on a mission to England, Belgium, and Holland, to resume the negotiations commenced in Paris last year, with a view to fix a uniform drawback on the exportation of refined sugar, have returned to Paris well satisfied with the result of their journey. The conciliatory disposition, says the *Moniteur*, which they met with at Brussels, the Hague, and London, leads us to hope for the proximate conclusion of a permanent international arrangement, which, by placing French, English, Belgian, and Dutch refiners upon an identical footing in foreign

Digitized by Google

markets, will put a stop to the considerable sacrifices which the system of premiums now in force imposes upon each of the States interested in the question.

At the eighty-seventh meeting of the Netherlands Society for the Improvement of Industry, held at Middelburg, Messrs. C. F. M. de Grys, Vice-Consul of the Netherlands at Amoy, and H. de Bruin, director of the public works at Batavia, were chosen honorary members.

Mr. Dirk Donker Curtius, ex-Minister of Justice, and late Minister of State, died on the 20th of July, at Spa, at the age of 72.

The revenues of the State, during the six months ending June last, amounted to 30,608,379f. 27c., against 29,351,341f. 6½c. in the first half-year of 1863.

The annual general meeting of the Missionary Society has been held here. The report proved that the results during the past year were satisfactory.

Messrs. W. C. Van Vollenhoven and L. A. Bienfait, of Amsterdam; H. T. Lõhnis, J. C. F. Nolet, of Rotterdam; J. W. D. Pape, and M. G. Van Heel, of the Hague, have been elected commissaries of the Netherlands Trading Company.

The following four first-class vessels have been chartered by the Trading Company to convey produce from Java, under the usual conditions, to the under-mentioned ports:—*Vrede*, Capt. D. van Duyvenboden, and *Herman de Ruyter*, Capt. W. L. Esink, for Amsterdam; *Sonia*, Capt. H. G. Haasloop Werner, jr., for Rotterdam; *Van der Palm*, Capt. J. van Katwyk, for Schiedam.

His Majesty has superseded, at their own request, Lieuts. of the East India army J. H. De Fremery and C. G. J. Barnaart.

The following officers of the royal navy have been placed on the list of non-active officers:—Lieuts. J. F. van Kervel and A. J. van Mansvelt.

His Majesty has been pleased to appoint Lieut. J. L. Klynsma to the *Prins Maurits der Nederlanden*; Lieut. J. B. A. de Jong to the Guardship at Amsterdam; Capt.-Lieut. C. L. d'Amecourt, commander to the *Prins Maurits*; Capt.-Lieut. W. F. L. de Vriese, commander to the *Dommel*.

His Majesty has been pleased to appoint the following medical officers to the East India army:—F. Rogier, W. F. H. Greup, A. H. Rombouts, L. van der Straaten, and F. P. G. van Loenen.

His Majesty has approved of Messrs. J. D. Ruys, J. M. Jacobson, and W. J. Jacobson as consuls for Hesse, at Sourabaya, Samarang, and Padang.

His Majesty's ships *Adolf van Nassau* and *Watergens* will start for Batavia within a few days.

At the Government wharf at Amsterdam the keel of a screw-frigate, to be named *Van Galen*, and armed with twenty heavy guns, has been laid down.

The chartered East India troop ship *Electra*, Captain P. H. Landweer, will embark at Neuwe Diep, on the 16th of August, 100 soldiers from the colonial recruiting depot at Harderwyk, under the command of Lieuts. G. C. Munters and W. H. Voorman.

COMMERCIAL.

COFFEE.—The market is very calm. Some inquiry, however, exists for the numbers quoted 41 to 42½ c. 907 bags African were sold at 37 to 39 cents.

TEA.—1,050 chests congou, imported via London, were eagerly bought by one house. On the 3rd of August 512/4 and 221/8 chests Congou, and 70/4 and 110/12 chests Souchou will be offered at public sale.

SUGAR.—Before the Company's auction very quiet. The public sale of 72,274 kr. went off very dull, all being sold at 1½f. to 2½f. under May prices. Five-eighths of the above were taken by our home-refiners and only one-eighth for export. The value at this moment is:—No. 5, 30½f., 6, 31½f., 7, 32½f., 8, 33½f., 9, 34½f., 10, 35½f., 11, 36½f., 12, 37½f., 13, 38½f., 14, 39f., 15, 39½f., 16, 40½f., 17, 41f., 18, 41½f., 19, 41¾f., 20, 42f. Stock of raw sugar 42,006,147 lb., against 52,526,351 lb. in 1863.

RICE.—Dull. No lots offered.

SPICES.—Rather firmer, after it was known that the Company would sell, on the 24th August, 1,410 casks nutmegs, 740 casks mace, 70 casks cloves, 1,378 packages Java cinnamom, 3,707 casks black pepper. Cloves are in much demand; No, 2. 1863, fetched 33 for consumption. Nutmegs: No transactions, as there are no sellers without an advance, No. 2, 1860, 1863, 84c. Mace: D 87c. to 89c. Pepper: In much demand. Stock: Nutmegs, 5,600 casks; mace, 1,836 casks; cloves 2,923 casks.

TOBACCO.—Market quiet. Only 132 bags Java Kawi were sold, 254 bags Tjibaroussa were retired. Stock, 5,719 bags Java. Manila Cigars at auction were sold 15,000, 2 a Cortado, 1861, at 35f. to 37f.; 60,000, 2 a Habana, 1861, at 30½f. to 33f.

COTTON.—In much demand at higher prices for export and consumption. 1,800 bags E.I. were sold.

BANCA TIN.—1,500 bdls. sold at 61¾f. The market has become rather flat, with sellers where there were before buyers.

HIDES.—No sales to report.

HEMP.—At public auction, 100 bales Manila were sold at 67f.; 300 bales do. retired at 68f.; 50 bales since sold at 67f.

INDIGO.—No lots offered. Confidence in this article highly improved by the result of the public sales at London.

CURCUMA.—A great quantity of E.I. was sold for export at 11f.

MANILA.—8 chests Java, 360 lb. cases, offered at public sale, were partly sold at 2½f. (damaged) to 9¾f., and partly retired from 6f. to 7¼f.

ARAK.—100 casks Batavia ex Duisburg and 168 casks do. to arrive per Baron van Heimstra sold at secret prices.

RATTANS.—59,809 offered at public sales were all sold. Bandjermasing at f.12.80 to f. 15.30; Padang at f.13.20 to 17f., Koetie f.15 15.30f.

MONEY.—Very easy. Bank rate, discount, bills 4½.: Acceptances 5 per cent. Open market, discount 4¼ per cent; N.W.S., 2½ per cent. 62 5-16; 3 per cent. to f.74¼; 4 per cent. 97½. O. T. Ly frente 97; Exchange on London, 3 months, 11.67, short, 11.83½, on Paris, 3 months, 46.30. short 47.

PASSENGERS OUTWARD.

Per Doelwyk, Captain Hoefman. The captain of the R.N. Chomel, and the 1st lieutenant Courier dit Dubekart.

The following vessels had also sailed:—For Melbourne and Java: Minister Pahud. For Batavia: Catharina Maria, Constantia, Doelwyk, Kykduin, and Ridderkerk.

READY TO SAIL.

At TEXEL.—Johanna Elizabeth, Batavia; Hendrina, Batavia; Goede Verwachting, Batavia; Theodora Mechtelda, Sourabaya; Jacoba and Christina, Batavia.

At BROUWERSHAVEN.—Java, Batavia; Isaac da Costa, Batavia via Melbourne.

LOADING.

At ROTTERDAM.—For Batavia: Eva Johanna (when arrived); for Batavia and Samarang: L. F. Enthoven vander Palm; for Batavia and Sourabaya: Johanna Maria, Medea, Eersteling, Stad Dockum; for Singapore: Maria Louisa Antoinette, Jan van Galen; for Padang: Maarten van Rossem; for Macassar: Bengalen; for Kanagawa and Decima: Nipthon.

At AMSTERDAM.—For Kanagawa and Decima: Adriana Johanna, Yokohama, Engel, Maria: for Padang: Padang Packet; for Batavia: Zaanstroom, Ortelius, Ymuiden, Electra, Gebroeders, for Samarang: Quartet, Admiraal de Ruyter, Jan van Schaffelaar, Cornelis Gips, Vrede, Henrietta, Herman de Ruyter, Californie; for Sourabaya: Sindbad, Regina Maris, Nederland.

FREIGHTS.

For Batavia, Samarang, and Sourabaya 20f. to 30f. and 15 per cent. per tun of 2,000 kilogrammes; iron, when great quantities, 15f. and 15 per cent.

HAMBURG.

(FROM A CORRESPONDENT.)

JULY 23.

Mr. Consul Wiesse has arrived in this city from Hong Kong and Singapore, and taken apartments at the Hotel de l'Europe. The following gentlemen have been appointed Vice-Consuls for H.M. the King of Sweden and Norway in China, under the jurisdiction of the Consulate-General at Shanghai:—Mr. Francis P. Knight at Newchwang; Mr. S. H. Porneroy, jun., at Tientsin; Mr. J. D. Thorburn, at Chefoo; Mr. J. H. Bohrstedt, at Ningpo; Mr. D. O. Clark, at Foo-chow, and Mr. David King, jun., at Canton.

COMMERCIAL.

COFFEE.—In spite of the advices from Rio, announcing a considerable fall in the prices, this market has not been influenced and the values of all descriptions are firm and steady. Sales of the week 15,000 bags.

SUGAR.—The raw market was not so active as in the previous week, and prices inclined slightly in favour of buyers. Among the sales were 14,000 bags of brown clayed Manila for delivery on arrival. In refined a fair amount of business was done, 10,000 loaves having found purchasers at full values.

RICE firm, and all attempts to depress the market are in vain. In rough grain 8,200 bags of Arracan per *Julia* expected, and 3,300 bags of Rangoon, part of the cargo of the *George*, also expected, have been sold for delivery on arrival.

TERRA JAPONICA.—At public sale 215 bags were taken at 16¾ to 17 marks Banco.

SPICES.—Confidence is increasing for mace and nutmegs, and prices have somewhat improved. Cloves continue to attract attention and have a tendency to rise. Pepper finds a moderate consumptive sale at full prices.

CAMPHOR dull, and prices rather lower.

SHIPS LOADING AT HAMBURG.—For Singapore and China, Maria Wilhelmine; for Batavia and Hong Kong, Leopold; for Hong Kong, St. Thomas; for Singapore and Hong Kong, Marie Lucie; Macao and Whampoa, Ino.

LONDON, TUESDAY, AUGUST 2, 1864.

RE-INFORCEMENTS FOR JAPAN.

Hitherto the British military force in Japan has consisted only of two companies of infantry, and about twenty mounted troopers of the military train; acting more as a guard of honour to the Legation and Consulates at the open ports, than for the purposes of warfare. The hostile operations recently effected, and so successfully carried out, were entirely at the hands of the naval service—of course including the gallant marines, who encountered their share of danger on shore at Yedo. It has not been for want of their presence as a land force that no British soldiers were present during the recent operations, for Colonel Neale requested General Staveley to send him reinforcements of infantry and artillery before making the attack on Kagosima, but the request was not complied with, as their presence could not be spared from Shanghai where they engaged in the operations against the Taipings. Now that this is no longer necessary, and the garrison at Hong Kong is far in excess of its requirements, we observe that General Brown has acceded to the request of Sir Rutherford Alcock, to forward an additional force from the 2nd battalion of the 20th Regiment, comprising six companies, and making in all about 800 troops at the disposal of the British Minister. We observe that a question was asked by Mr. S. Fitzgerald of the Under-Secretary for War, for what purposes they were wanted. In reply the Marquis of Hartington said that "the requisition would be complied with as soon as trans- "ports could be obtained." A conversation followed in which some hon. members anxiously inquired what Sir Rutherford Alcock wanted them for, but no definite reason was given. We take it to be the necessity he sees for having a land force at his disposal, in order to aid the Tycoon's Government should it be necessary to take hostile measures against that refractory Daimio, the Prince of Choshiu, who persists in closing the Strait of Shimonoseki, which is to be opened to foreign ships, and that, in all probability, will be followed by the free navigation of the Sea of Japan. Beyond this we are of opinion the warlike tendencies of Sir Rutherford do not extend, if even they go so far. As it is reported, he intends taking up his residence at Yedo, no doubt he deems it necessary to be provided with a stronger guard than heretofore, in order to do without the presence of native guards, who have been a body of spies, and useless against assassins. There need be no apprehension of a warlike policy in our relations with Japan as long as Sir Rutherford Alcock retains the helm of affairs. Apart from the hostile appearance of this movement of troops from China to Japan, it will have a most beneficial effect on the health of the fortunate corps. Indeed, it is only a sanitary step to do so occasionally with all the troops in China who suffer from exhaustion and disease in that unwholesome climate, and who soon become reinvigorated in the salubrious insular climate of Japan. So far, therefore, the change will be welcomed by the 20th, and we have no doubt but all friends of the soldier—stationed at unhealthy localities on foreign service—will approve of this movement of our gallant men from China to Japan.

THE HONG KONG MINT.

By the *Oithona*, leaving in a few days, some heavy iron work, such as strong-room doors, forges, engineers' tools, &c., has been shipped, to be followed in a week or two by another shipment of engines, boilers, &c. The rolling mill, engines &c., have left in the *Prince Arthur*.

It is decided to make the new dollars more perfect by placing a legend round the outer edge, to act against the prevalent system of the Chinese in placing base metal between the surfaces. It is desirable to have the letters in relief, which renders it necessary to construct very intricate, and, at the same time, powerful machinery. We have seen a sample of the new dollar, which is a very attractive coin. On the obverse there is an ornamental border, with the words "Victoria, Queen." The bust will be somewhat similar to the English florin, and the reverse has a border of the same pattern, and within are the words "One Dollar, Hong Kong, 1864," in bold black letters. The centre of the coin is formed by four shields, placed in the form of a cross, with the translation in Chinese of the above inscription. At present the words forming the legend round the outer edge are not decided on. In consequence of the great demand for the smaller coins sent out per *Robin Hood* there will be shortly shipped twenty tons of mils, twenty tons 1 cent pieces, together with a quantity of 10 cent silver coin, the latter now being at a premium. In addition to this, as soon as the new dollar coin is ready, 2½ million dollars are to be coined and shipped monthly to Hong Kong until countermanded, to meet the requirements of the Government in China and Japan. With this supply it is to be hoped that the enormous items of "loss by exchange" in the Government accounts will disappear. The erection of the mint has been undertaken chiefly on this account. The departure of Captain Kinder and staff depends upon instructions from his Excellency Sir H. Robinson. We were in error in stating that Mr. Inglis was foreman to Messrs. Rankin; it should have been formerly of the Royal Arsenal, Woolwich. Mr. Inglis has sailed in the *Prince Arthur*.

CONSULATES ON THE YANG-TSE.

We have been favoured by a resident at one of the Consular ports with the following corrected list of officers at the respective consulates:—

Hankow.—Consul, W. H. Medhurst (on leave); Acting-Consul, J. A. Webster. Acting Interpreter, W. E. King (on leave); Acting Interpreter, J. A. Webster; Assistant, Edward D. Jones, M.A. (Cantab).

Kiu-Kiang.—Vice-Consul in Charge, P. J. Hughes; Assistant, George P. Thomson, M.A. (Aberdeen).

Chin-Kiang.—Vice-Consul in Charge, Thomas Adkins.

THE STRAITS SETTLEMENTS.

In our Parliamentary columns it will be seen that in the debate on the Indian budget Sir J. Elphinstone asked if it were correct that it was intended to introduce imposts into the Straits Settlements, which would destroy their character as free ports. Sir Charles Wood stated it was only intended to levy a tax for the purpose of defraying the expense of some improvements to the harbour. This, Sir Charles stated, was proposed by the Singapore Chamber of Commerce. This we very much doubt. We believe that the merchants of Singapore would rather promote a levy on themselves, and inhabitants generally of Singapore, than that the port should be burthened with any duties. Such a policy would be suicidal in the extreme.

Our readers will understand that this subject is in no way connected with that of the transfer question, which we believe to be in the position described in a late issue—viz., that all the obstacles having been overcome, it remains only to get a Bill passed through the House next Session to carry into effect this long agitated matter.

Since writing the above, we see that Mr. Read, of Singapore, has, in a letter to *The Times*, which we append, fully confirmed our view as to the impost of taxes. We gladly welcome Mr. Read's assistance during his residence here in promoting the interests of the settlements, and exposing the errors which exist. Surely no better proof can be wanted that the transfer is urgently needed.

(To the Editor of *The Times*.)

Sir,—I have to request that you will allow me to correct a statement made by Sir Charles Wood when replying to Sir James Elphinstone in the House of Commons yesterday evening.

Digitized by Google

According to the report in *The Times* of to-day Sir Charles Wood said "that no alteration in the position of Singapore was intended; but questions had been raised by the Singapore Chamber of Commerce as to harbour-masters and also as to moorings, and it was stated that no objection would be made to the levying of some small duty by the Indian Government if those alterations were made."

This is not strictly correct. The facts are these, viz. :—It was the local authorities who proposed levying a tonnage due to meet the expense of a harbour-master's establishment. The opinion of the Chamber of Commerce having been sought by the Governor of the Straits Settlements, the members unanimously rejected the proposal as an infringement of the liberty of the port, and have ever since energetically protested against the measure.

The Indian Board will best meet the wishes of the Chamber of Commerce by leaving the port in the full enjoyment of that freedom which was guaranteed by Sir Stamford Raffles and confirmed by the Imperial Government.—I am, Sir, your obedient servant, W. H. Read,

Chairman of the Chamber of Commerce at the time the proposal was submitted by the Governor of the Straits.

Oriental Club, Hanover-square, July 22.

AFFAIRS IN FRENCH COCHIN-CHINA AND CAMBODIA.

Fresh complications are gathering around the French in their colony of Lower Cochin-China, and in their relations with the neighbouring tributary state of Cambodia, through their recent interference with the government and internal affairs of that country, in consequence of the treaty with the Somdetch Phra Naradom, and acceded to by the King of Siam. From information just come to hand, on which we place the utmost reliance for its authenticity, we are in a position to state that this treaty, instead of being the result of friendly negotiations between Admiral De la Grandiere and the Viceroy of Cambodia, was made "under compulsion," when that naval officer appeared unexpectedly at Udong, as the Governor of French Cochin-China, with a treaty, all cut and dry, backed by an armed retinue from on board a war-steamer, in which he unceremoniously spied the interior of Cambodia. The original treaty was so exacting in its terms, that the Viceroy would not entertain it, especially as he considered he had not the power to conclude such a convention without the sanction of his master, the King of Siam. However, the French Governor was persistent, and hinted at using strong measures for the compliance with his demands, which so influenced the Viceroy that he consulted with his most peaceful nobles, and modified the French treaty, so as to render it more palatable to the people and the Siamese King and Government. These modifications were agreed to by the Admiral, after strong endeavours to get all he could in the way of territorial concessions; when he hurried the Cambodian officials to render the treaty into the native language, and ordered it to be signed in twenty-four hours, thereby giving no time for mature consideration. In this manner was the bantling treaty hatched, which we published in our last issue; not only without the consent of the tribute King of Siam, but avoiding the common courtesy of advising him to that effect, through the French Consul at Bangkok. The first announcement that Monarch had of the existence of this document was through the native officials; and hence the alarm felt at the encroachments of the French beyond the frontiers of their conquered territory. Fearful of the consequences that in all probability would result from a hostile opposition to this act of aggression without his cognizance, the timid King made a virtue of necessity, and succumbed. He fell into the trap laid for him with a better grace than the French in their ambitious projects ever dreamt of. Hence the subsequent conciliatory proposals to erect Cambodia into a kingdom, and crown the Somdetch Phra Naradom, King; but, nevertheless, to send tribute to Siam. According to our advices from Bangkok, the Siamese and French functionaries were about proceeding to Udong, for the purpose of crowning the new Monarch. Accounts from thence have also reached us reporting a complete revolution in the Government of Cambodia, by a party of the most influential nobles, inimical to the French, who repudiate the treaty, and are determined to give them a hostile reception should they persist in enforcing its articles. For this purpose they have deposed the Somdetch Phra Naradom for having negotiated such a servile treaty; which literally hands over the free navigation of the Great River Me-Kong, and all the foreign trade of that noble stream, to the surveillance of the French, who may hold fortified positions at its embouchure, or any other part in the interior that suits their plans of conquest; while at Charvey-Chung they have secured land on which they could easily build an impregnable citadel, with water communication to any part of the interior to within one hundred and fifty miles of Bangkok, where their exploring vessels have been already. This revolutionary party are preparing an army to resist the advances of any French force from Saigon; and upwards of sixteen thousand armed men, chiefly the retainers of the hostile nobles, were massed together at Udong, and some on the frontiers. It was also reported that the French were hurrying up troops to put down the insurrection, and maintain Phra Naradom in his rule over Cambodia; while the insurgent party have elected his brother to reign in his stead. From the foregoing it would appear that this exclusively French treaty with Cambodia is after all a rotten affair, and will require to be enforced at the point of the bayonet. It is but another chapter in the history of French futile attempts at colonization, and in all probability is the commencement of a campaign of subjugation and conquest, similar to that of Cochin-China, where so much blood and treasure has been spent for so little profit.

Meanwhile, how fares it with that colony, which has been puffed up by every journal in France; and even in this country we are almost alone in giving a correct account of the state of affairs—which we have reason to believe is endorsed by the merchants and civilians connected with Saigon on the opposite shores of the channel. A short time back we commented upon the unsatisfactory system of government there, which was not only driving the native resources for trade from the colony, but in the most suicidal manner laid restrictions upon shipping and merchandise that are utterly subversive of commerce. The misgovernment of these naval officers has at last reached such a pitch, that the merchants of Bourdeaux have petitioned their Chamber of Commerce on the backslidings of Admiral De la Grandiere and his Executive corps, with a view to bringing it before the Imperial Government for reformation. The following is a translation of the petition :—

"Gentlemen,—The undersigned, merchants at Bordeaux, having serious transactions commenced in Cochin-China, beg to call your attention to the deplorable condition of French trade in that colony. For a long time past all their correspondents complain of the difficulties they encounter in settling in a regular manner the disputes which arise both in civil and commercial matters. All proceedings are submitted to the jurisdiction of a naval officer, who accumulates in his person the functions of civil judge, commercial judge, justice of peace, notary, and bailiff. The consequence is an inexplicable confusion in business; an erroneous or exaggerated interpretation suffices often in order that the simplest process may be converted into an offence, and the most respectable trader may be suddenly compromised in honour and fortune, or even his personal liberty menaced. The importance of the colony and that of the business transacted there require in an imperious manner the cessation of such a state of things, as contrary to the extension of commercial business, and the prosperity of so rich a country. The undersigned beg, then, gentlemen, to solicit your intervention with the Government, to request the prompt establishment in Cochin-China of a regular jurisdiction, in accordance with the laws which rule the mother country; for, otherwise, it is all over with the colony, and every merchant will be obliged to quit a country where he finds neither security for his interests nor guarantee for his liberty."

Our private advices from Paris inform us that this petition of the representatives of the struggling port, among the merchants, is having its desired effect. The ministerial bureaus are very much engaged with the subject at present, and intend substituting a civil governor and administration instead of this expensive and corrupt naval government. We further learn on good authority that the French Government has decided, after serious deliberation, to abandon the protectorate of the northern provinces of Lower Cochin-China, handing them back to the jurisdiction of Tu-Duc and the Court of Hué. In this case these provinces will be only temporarily occupied by French forces, until such time as that King pays a certain amount of indemnity, which was arranged with the Annamese Ambassadors during their visit to France. Just so! The Emperor of the French and his astute Minister for Foreign Affairs see that more profitable conquests may be made in Cambodia and Siam than in Cochin-China and Tonquin, and consequently they repeat the watchword, "Westward Ho!" The thin end of the wedge has been inserted in that direction; and the rising of the insurrectionary party against their progress is just the excuse they wanted to extend their dominion towards the rich lake and river regions of Cambodia. We shall watch with much interest the progress of these new phases of the French conquest of Lower Cochin-China.

FRANCE AND COCHIN-CHINA.

A recent number of the *Revue des Deux Mondes* contains an article which has gathered importance since publication from facts that have lately become known to the public. The Treaty with Cambodia, which first appeared in English in our columns, startled all who take an interest in the affairs of that

Digitized by Google

part of the world, by suddenly revealing a fresh stage of the course determined on by the Emperor of the French as the one to be pursued in those distant regions. Under the title of "The Expedition to Cochin-China, and French Policy in the Far East," we have a resumé of the history of French relations with the Annamite Empire since the year 1857, with the articles of the new Treaty of Saigon, of which we had already heard something; and the whole wound up by a disquisition on the path to be pursued in the future. This new treaty, which the writer in the *Revue* speaks of as "a sudden transformation in the policy of France," is identically that announced in *The London and China Telegraph* of the 13th June, from information received by way of Singapore. Let us, however, reproduce the statement made in the *Revue*:—

From this time [that is, while they were in Paris] the report was current among the public that the Annamite Ambassadors had opened a negotiation for the recovery of the three provinces we occupied in Cochin-China. Those who repeated the rumour did not believe it, so improbable did it appear. The Annamite Ambassadors took their departure, and people remained convinced that if they had made the tentative imputed to them, it was rather in obedience to a sentiment of nationality honourable to the vanquished, than from a hope of success. At the close of the year 1863, however, a few days before the opening of the legislative session, M. Aubaret, a naval officer having the rank of capitaine de frégate, set out for Hué, and advices from Saigon attribute to him a mission of some delicacy. He was the bearer, it is said, of a new treaty to King Tu-Duc, drawn up in accordance with bases agreed on in Paris with the Annamite Ambassadors. Nothing was to be changed in it. Nothing was wanted to complete it but the addition of a few accessory arrangements relative to local boundaries. This treaty stipulates that the *three* provinces of Giadinh, Bienhoa, and Dinh-tuong shall be restored to King Tu-Duc, with the exception of the city of Saigon, some ports of Thu-daomot, and the citadel of Mitho. In return for this restoration the Annamite Government will recognize the protectorate of France over the *six* provinces of Lower Cochin China, and will pay, over and above the indemnity already agreed on by the Treaty of Saigon, a tribute of three millions for each of the first three years, and of two millions for each of the following years.

The italics in the above are our own, and will enable the reader at once to catch the subtle proviso by which the at present inconvenient and burdensome occupation of *three* provinces is exchanged for a protectorate over *six*; thus doubling both the moral opportunity and territorial space for French interference. The purchase-money Tu-Duc is to pay for this concession is heavy enough; for the original indemnity stipulated by the Treaty of 1862 for the expenses of the war was only four millions of dollars, payable within ten years. According to M. Henri Galos, the writer of the article under notice, intelligence of this treaty caused intense dismay "among the manufacturers and merchants established at Saigon," who, he would have us believe, see in it a deathblow to prospects of unbounded success and magnificent fortunes. The letter, however, from "one of the most considerable inhabitants of Saigon," adduced to support this assertion, is evidently written by a person holding high government office, and not by a member of the mercantile community. The only check spoken of in it is "the annoying check to French policy—a check we must impute to our own want of perseverance, much rather than to the obstacles we have encountered." Nothing whatever is said of any damage to French commercial interests likely to accrue from the change in the Imperial purpose.

We shall not, however, take up the time of our readers with any criticism on, or much further reference to, the views held by M. Galos. When a man broaches a theory of colonisation, and leaves climate utterly unmentioned—treating the matter as one of so entirely an abstract nature that the point of whether the territory to be colonised is under the Equator, or to the north or south of the Tropics, need not intrude for one moment into the argument—thinking and business men will directly conclude that his notions on the subject are little worthy of attention. M. Galos devotes a page to the way in which the English colonised New Zealand, as if he had fastened on something apropos to Saigon. Our readers will recollect, perhaps, what was said of the latter place by the Count Escayrac de Lauture, whose "Mémoires sur la Chine" we noticed in April last. The climate of Cochin China was there stated to be "as wholesome as that of a vast rice-field can be, at the mouth of a great river, and close to the equator." Taking his cue, therefore, from the history of our own East India Company, the Emperor Napoleon, it would seem, is, for the present, content to give up the occupation of the interior, and simply hold the sea-ports. Two or three "factories," as they used to be called, along the coast, and the rest of the country will follow sooner or later. *Reculer pour mieux sauter* is an often quoted phrase. Napoleon III., by the new treaty with Tu-Duc, is about to give us a splendid example of how to draw back so as to make the surer spring.

Let us proceed, then, to that portion of the article which concerns "French policy in the Far East" as exhibited in what relates to Cambodia. Here are the facts in reference to the treaty with that country laid before the reader in a late number:—

As soon as the King of Cambodia was aware of our friendly intentions, and understood that his independence was in question, he sent Monsignor Miche, the Bishop of Cambodia, to our Governor, to make known his desire to confer with him, and to see our flag floating in Cambodian waters, so that piracy might be expelled and his own authority be relieved from the unceasing pressure exercised on it in turn by the Siamese and Annamites. Admiral de la Grandiere eagerly welcomed these overtures, and repaired to Udong. He arrived there at the very moment that an Annamite general came to summon the King to pay the usual tribute. This circumstance did but strengthen the monarch's disposition to ally himself with France. The negotiation was not long: assisted by Monsignor Miche, the Admiral signed a convention by which he accepted the offer of the Sovereign of Cambodia to place his kingdom under the protectorate of France.

This act may be the source of serious difficulties; but was it not necessary? Was it not an inevitable consequence of our position? The brave admiral who decided on taking such a responsibility on himself was under no illusion as to the complications it might create, and if he risked them it was that our undisputed ascendancy over Cambodia was the indispensable condition to our establishment in Cochin-China. It was, in fact, an imperious necessity that our new possession should be covered on the north by a sure ally, so as to dispose of our military means in watching our other frontiers, and in keeping in check the Annamites, who are rather held down than subjected, and are always ready to dispute the provinces conquered by our arms. Cambodia furnishes us with seven or eight thousand cattle, needed for the supply of our troops. From the great lake there are obtained considerable quantities of fish, which are dried and salted, and the exportation of which is capable of great development. On the banks of the river is gathered the produce that feeds Saigon; and but for this decisive act of Admiral La Grandiere we ran the danger of seeing the tide of commerce diverted from our establishment by the Hatieu canal, or the Bassac arm [one of the mouths of the Cambodia], and our new possession condemned to perish for lack of air and room.

Scarcely was it concluded than this negotiation excited the warmest protests from the Government of Siam. The Minister of Foreign Affairs at once wrote to Admiral La Grandiere that the *Viceroy* of Cambodia (as if the Sovereign of that country were a mere functionary holding from the Siamese Government) had informed him that, under constraint, he had just signed a convention with the Governor of Saigon. The Siamese Minister complained of this, and expressed his astonishment at not having been acquainted with the intentions of the French representative—the more so, he said, that such conduct was in contradiction to the words of the Emperor of the French and to the assurances given by his Minister of Foreign Affairs to the Siamese Ambassadors—words and assurances which authorised him to conceive that the question of the boundaries of Lower Cochin-China and the kingdom of Siam would be settled by direct arrangement with the Government of Bangkok. Without entering into explanations as to the forms employed, our Governor contented himself with replying that, notwithstanding her obligations towards Siam on the one hand, and France and the Court of Hué on the other, Cambodia was a kingdom whose independence and autonomy could not be legitimately contested, and that, consequently, he had the right to treat with that State without consulting the opinion of the Government of Siam. As regarded the constraint put on the King of Cambodia, Admiral La Grandiere energetically repudiated the charge. His own honourable character, even more than the attendant circumstances, and the intervention of the Bishop of Cambodia, guaranteed the perfect honesty of the convention. In signing the treaty, the Admiral took care to bind himself only until it was ratified by the French Government; but his conduct was approved, and in the month of November, 1863, the Minister of Marine announced to him that his colleague, the Minister for Foreign Affairs, had forwarded him regular powers and special instructions for giving a definitive character to the convention concluded with the King of Cambodia. At the same time, and in preparation for the execution of the treaty, M. de Chasseloup Laubat ordered the Governor, following the English system, to establish a fortified depot for coal near Namvan, or the Four Arms, a position that commands the river's course, and the place where the largest market in Cambodia is held.

In the above, then, we have the position of matters plainly defined. The French have relieved themselves from the costly task of occupying vast tracts of the Annamite country—a task no less prodigal of human life than of money; but will hold possession of the principal ports, thus commanding the entire trade of the empire. These ports will be fortified, and turned into naval arsenals, as well as depots of commerce. The Emperor has learnt from the example of England that at that distance from home a fleet is far more dreaded, whether for attack or defence, than a small garrison of unhealthy Europeans. The power of Napoleon III. in the Far East is further extended by having the protectorate of six provinces of the Annamite empire ceded by solemn treaty, and by his having induced the King of Cambodia to throw off his allegiance both to Bangkok and Hué, and become the vassal of France. If we are to credit M. Galos, England has been watching all this with a jealous eye, and making some feeble efforts, at second-hand, to counteract this extension of a rival's influence. Count de Lauture gave England the credit that though, to the general benefit, she preceded all Europe in China, she never put forward any pretence to remain there alone. So, if France makes no attempt to set

Digitized by Google

up a commercial monopoly in these vast kingdoms, Europe—and England least of all—will make no complaint that hers was the honour of first opening out new paths and new rivers to the ever-expanding activity of civilised industry and trade.

FRANCE AND COCHIN-CHINA.

(FROM OUR PARIS CORRESPONDENT.)

The steam frigate *Eldorado* is now being overhauled, and will start shortly for Alexandria with men and material for Saigon; and a sailing transport, the *Truite*, is now loading with arms, ammunition, and provisions for the same destination and by the same route.

Lieutenant Pierre, with sixteen marines, arrived at Cherbourg on Tuesday last from Cochin-China, and what this expedition has cost France in men may be imagined from the fact that those seventeen individuals are all that are left out of a company consisting of three officers and 130 men—seven-eighths having fallen victims, and one in eight returned to tell the tale of their sufferings. A battalion of *Turcos* have also just arrived, and are now on their way to Algeria in the *Labrador;* the numbers are not given in this case, but it is probable that these African soldiers have suffered less than their French comrades from the climate of Cochin-China.

There was a grand ceremony last week at the establishment of the Foreign Mission in Paris, on the occasion of the departure of several young missionaries for India and the extreme East. All the Missionaries and neophytes in Paris, with their relations and friends, were present, and the large garden attached to the mission was crowded. The Altar of the Virgin was set up for the occasion under a fine clump of trees, and hymns were chaunted in honour of the Virgin as *Protectrice of travellers and martyrs.* The whole assembly then proceeded to the chapel, when the Abbé Langrot, formerly missionary in Cochin-China, addressed the young missionaries who were about to proceed to the East; then came the most touching part of the ceremony; the appointed missionaries stood in a line in front of the altar and received the farewells of the chiefs of the community and of those with whom they had shared their studies and meditations, in that monastic establishment. The devoted young men maintained their fortitude throughout the ceremony, but when the last act arrived, and they embraced parents, relations, and friends, perhaps for the last time, before taking their places in the carriages which were to carry them to the railway station, the scene was intensely painful.

The ceremony was attended by the Bishop of Nantes, whose nephew was one of the ten missionaries, the Siamese Consul, and a young Siamese prince who is being educated in Paris, and a large number of the ultramontane party. Japan, China, Cochin-China, have few attractions for the military: the laurels to be culled there are few and far between, as well as far off, but the Far East is a favourite field of operations for the Church; the Jesuits revel in the recollection of the power which they once exercised in China and elsewhere, and dream, probably, that even in this commercial and thinking age they can rebuild and even extend the Jesuit influence in that quarter of the world. This feeling, perhaps, has something to do with the Emperor's determined effort in the East; the ultramontanes are not his warmest admirers; they do him little service at home, and he thinks, probably, that if he can find them plenty of employment abroad it may give them something to think about, afford them a large amount of satisfaction, and do him, or anyone else, little harm. The Cochin-Chinese will, perhaps, have *nous* enough to avoid any great inconvenience from the missionaries, and if the latter will attend to practical questions of morality they may do great good.

When the Japanese Ambassadors arrived at Alexandria they sent a letter, written in English, by their two interpreters, to the manager of the Grand Hotel at Marseilles. A French translation of this note has been published, and the purport is to say that the Ambassadors had an excellent voyage, that they enjoyed excellent health, and had sent their acknowledgments to the directors of the hotel for their general attention, and especially for their good feeling and kindness in the case of "poor Yokohama" who died at Marseilles.

FRANCE AND JAPAN.

(FROM OUR PARIS CORRESPONDENT.)

While everything remains in doubt respecting our prospects in Japan, the Imperial Government of France paints in the brightest colours the prospect from its own point of view. It is true that it does not give the public facts or figures, but only, as in the case of Algeria, strong assurances that all is going on as well as could possibly be expected, or a little better. And here it may not be out of place to mention that the happy issue of the late conflict in the African colony is the proclamation of martial law, in the fullest sense of the word, namely, the subordination of the civil to the military authorities. Colonisation seems not to have begun, and Algeria is as much a camp as it was in the time when Abd-el-Kader headed the Arabs against the Orlean Princes, Pelissier, and their brothers in arms. But Japan is in a different position at present, and long may it remain so, for nurseries for soldiers are not the best means of forwarding liberty, commerce, or justice. The official journals here continue to express their confidence, not only in the intentions, but also in the power of the Tycoon. In reference to other European Powers, they say that the English and Dutch squadrons are preparing to attack the forts in the Straits of Simonoseki, constructed on the domains of the Prince of Nagato; and, they add, the enterprise will be difficult, and, should it succeed, will have very important consequences. The Court of Yedo, say these writers, have adopted a very prudent position, and one by which it will profit in any case. It is clear from this that the French authorities look upon the threatened attack as no child's play, and it is almost equally clear that, like the Court of Yedo, they intend to take the part of cautious men, and risk nothing in the chivalric way by which, to borrow the expression of their own writers quoted above, they cannot fail to profit in any case. Considering the position of affairs, the conduct of the Tycoon, and the fact that all foreigners are in the same boat as regards the Prince of Nagato, this attitude of expectation is not quite intelligible; however, the less complicated an undertaking is, or, to put the matter more plainly, the fewer allies we have, especially in maritime wars, the better, and the English and Dutch Governments, if they have come to the determination to put down the Prince in question, must not allow the undertaking to be crippled or endangered by any hesitating half measures; a failure in this case would have other bad consequences than a loss of prestige in the Japansee waters.

From the same sources we learn that the Tycoon intends to establish a "Parliamentary Government." I quote the exact expression used, and further that—"The First Ambassador, who has just left France, is a well instructed and intelligent man, who knows and loves France. We are assured that when he arrives at Yedo he will promulgate a Constitution suitable for the country, and the Japanese Chambers will be opened in the month of January next." All this sounds grandly enough, but the spectacle of a Parliamentary Government at Yedo will be curious. We presume the suffrage will be universal and carefully guarded, and that the Tycoon will adopt the admirable system of the French Chambers, from the Duc de Morny to the ushers! The French have often been called the Chinese of Europe: the Japanese in compliment to them may become the French of Asia.

THE NEW ORDER IN COUNCIL FOR CHINA.

AT THE COURT AT WINDSOR, THE 9TH DAY OF JULY, 1864. PRESENT: THE QUEEN'S MOST EXCELLENT MAJESTY IN COUNCIL.

Whereas by an Act passed in the Session of the sixth and seventh years of Her Majesty's reign, intituled "An Act for the better government of Her Majesty's subjects resorting to China," power was given to Her Majesty to authorise the Superintendent of the Trade of Her Majesty's subjects in China (so long as such Superintendent should be also the Governor of the island of Hong Kong) to enact, with the advice of the Legislative Council of the said island of Hong Kong, all such laws and ordinances as might from time to time be required for the peace, order, and good government of Her Majesty's subjects, being within the dominions of the Emperor of China, or being within any ship or vessel at a distance of not more than one hundred miles from the coast of China, and to enforce the execution of such laws and ordinances by such penalties and forfeitures as to him, by the advice aforesaid, should seem fit; and it was (amongst other things) enacted that it should be lawful for Her Majesty to disallow, in the whole or in part, any laws or ordinances so to be enacted as aforesaid, and with the advice of Her Majesty's Privy Council to alter the same, or any of them, as to Her Majesty in Council should seem meet; and that it should also be lawful for Her Majesty by any Order or Orders made with the advice of Her Majesty's Privy Council to ordain for the government of Her Majesty's subjects, being within the dominions of the Emperor of China, or being within any ship or vessel at a distance of not more than one hundred miles from the coast of China, any law or ordinance which to Her Majesty in Council might seem meet, as fully and effectually as any such law or ordinance could be made by Her Majesty in Council for the Government of Her Majesty's subjects, being within the said island of Hong Kong.

And whereas under and by virtue of the said Act, and of a certain other

Digitized by Google

Act passed in the same Session of Parliament, intituled "An Act to remove doubts as to the exercise of power and jurisdiction by Her Majesty within divers countries and places out of Her Majesty's dominions, and to render the same more effectual," Her Majesty was pleased, by an Order in Council bearing date the thirteenth day of June, one thousand eight hundred and fifty-three, to make provision for the good government of Her Majesty's subjects resorting to China, and for certain other purposes therein mentioned; and thereby (amongst other things) Her Majesty's Superintendent of British trade in China, for the time being, was authorised and empowered to make and enforce, by fine and imprisonment, rules and regulations for the observance of the stipulations of treaties, and for the peace, order, and good government of Her Majesty's subjects, being within the dominions of the Emperor of China, or being within any British ship or vessel at a distance of not more than one hundred miles from the coast of China; and Her Majesty was thereby further pleased (among other things) to give authority to any of Her Majesty's Consuls within the dominions of the Emperor of China, to cause any British subject, who, after having been twice convicted of and punished for any crime or offence, should not be able to find good and sufficient security for his good behaviour, or who might be convicted before such Consul of any of certain particular crimes therein enumerated, to be sent out of the dominions of the Emperor of China, in the manner therein mentioned.

And whereas by another Order in Council, passed on the twelfth day of September, one thousand eight hundred and sixty-three, Her Majesty was pleased to order, that it should not be lawful for any person who should thereafter be sent out of the dominions of the Emperor of China, by any of Her Majesty's Consuls, under and by virtue of the said Order of the thirteenth day of June, one thousand eight hundred and fifty-three, and of another Order, dated the second day of February, one thousand eight hundred and fifty-seven, respectively, or under and by virtue of the said Order now in recital, afterwards to return to and again take up his abode within any part of the said dominions without Her Majesty's permission, to be signified as therein mentioned; and any such person so returning to, and taking up his abode within any part of the said dominions, was thereby made punishable, by fine or imprisonment, and liable to be again sent out of the dominions of the Emperor of China at any time afterwards, in default of finding good and sufficient security for his future good behaviour, in the manner therein particularly mentioned.

And whereas by a certain Ordinance made and passed on the seventeenth day of January, one thousand eight hundred and fifty five, by His Excellency Sir John Bowring, Kt., then Governor and Commander-in-Chief of the said Colony of Hong Kong and its dependencies, and Her Majesty's Plenipotentiary and Chief Superintendent of the Trade of British Subjects in China, with the advice of the Legislative Council of Hong Kong, it was enacted, that it should be a misdemeanor, punishable by not more than two years' imprisonment, or by a fine not exceeding five thousand dollars (such punishment to be accumulative or not, at the discretion of the adjudicating tribunal), for any British subject, within any part of China, to assist either the existing Chinese Government, or any or either of the different factions then engaged, or who might be thereafter engaged, in opposition to the Government, by personal enlistment in the service of either of the said several parties, or by procuring other persons to enlist in such service, or by furnishing, selling, or procuring warlike stores of any description, or by fitting out vessels, or by knowingly and purposely doing any other act to assist either party, by which neutrality might be violated; and that the tribunal for adjudicating on offences, of the description intended to be thereby dealt with, should consist of a Consular officer in charge of a Consulate, and two assessors of Her Majesty, resident within the Consulate.

And whereas it is expedient that the said Ordinance of the seventeenth day of January, one thousand eight hundred and fifty-five, should be explained and amended, and that further provisions should be made to prevent the participation of British subjects within the dominions of the Emperor of China, in acts of war or rebellion against the authority of the said Emperor:

Now, therefore, Her Majesty, by virtue of all powers enabling Her in this behalf, is pleased, by and with the advice of Her Privy Council, to order, and it is hereby ordered, as follows:—

1. Nothing in the said Ordinance made and passed on the seventeenth day of January, one thousand eight hundred and fifty-five, shall extend or apply, or be deemed to have extended, or to have been applicable, to any British subject, who, at any time heretofore may have assisted, or may hereafter assist, the Government of the Emperor of China, by the means in the same Ordinance mentioned, or otherwise howsoever, by or under the leave or licence of Her Majesty, or by or under the authority of any Order of Her Majesty in Council, at any time heretofore made, or to be hereafter made.

2. If any subject of Her Majesty, within any part of the dominions of the Emperor of China, shall, at any time after the publication of this present Order, in Her Majesty's Colony of Hong Kong, levy war, or take part in any operations of war, against the Emperor of China, or aid or abet any persons who are or who may be engaged in carrying on war or rebellion or insurrection against the said Emperor, in carrying on such war or rebellion, or insurrection, such persons shall be liable to the several penalties mentioned in the said Ordinance of the seventeenth day of January, one thousand eight hundred and fifty-five, and shall further be liable to be sent out of the dominions of the Emperor of China; and, in case of his afterwards returning within the same, shall be liable to be proceeded against and punished, and to be again sent out of the said dominions, and so from time to time, in the same manner, in all respects, as is provided by the said Orders in Council of the thirteenth day of June, one thousand eight hundred and fifty-three, and the twelfth day of September, one thousand eight hundred and sixty-three, respectively, concerning the persons liable to be sent out of the said dominions under those respective Orders.

3. Every person offending against this present Order may be proceeded against in the same manner, in all respects, as is provided by the said Order of the thirteenth day of June, one thousand eight hundred and fifty-three, concerning persons offending against any rules or regulations duly made, under and by virtue thereof, by Her Majesty's Superintendent of British Trade in China for the time being.

And the Right Honourable Earl Russell, and the Right Honourable Edward Cardwell, two of Her Majesty's Principal Secretaries of State, and the Lords Commissioners of the Admiralty, are to give the necessary directions herein, as to them may respectively appertain.

ARTHUR HELPS.

THE P. AND O. STEAMER "CANDIA."

In a passenger's letter describing the cyclone, which we noticed some time ago, we find the following:—

As a passenger I cannot but observe that it certainly appeared to us that the *Candia* was saved solely by the efforts of the Europeans, the officers of the ship, the passengers, and the fine able-bodied men comprising the complement of stewards. The passengers have marked their sense of the services of the captain, the officers, and the stewards, by presenting the captain with a testimonial in writing, and the sum of £100 for the purchase of a piece of plate with a suitable inscription. The chief officer and chief engineer with testimonials and sums of £50 each. The chief steward (acting purser), Mr. Bowen, was most indefatigable in his endeavours to supply every one with all they needed throughout the storm, and he and other officers assisted, from their own property, those passengers whose baggage, clothing, &c., were quite destroyed—he received a sum of £22 as a mark of our approbation of his good services. The stewards received a sum of £90 allotted amongst them. The two stewardesses were not forgotten, for right good services did they do amongst the ladies, and as they had lost very considerably in baggage damaged, the sum of £50 was divided between them. I must not forget to add that to our much respected and esteemed Bishop Boone, a sum was presented for the purchase of a Bible, as a mark of our appreciation of his good offices during a period of great danger, whilst suffering himself from very considerable ill-health.

PATTERN POST TO CEYLON AND HONG KONG.—On the 1st of August next, and thenceforward, patterns of merchandise may be transmitted by post between England and Ceylon and Hong Kong, either *via* Southampton, or *via* Marseilles, at the following rates of postage, which must in all cases be pre-paid by means of postage stamps, viz.:—*Via* Southampton, for a packet not exceeding 4oz., 4d.; above 4oz. and not exceeding ½lb., 8d.; above ½lb. and not exceeding 1lb., 1s. 4d.; above 1lb. and not exceeding 1½lb., 2s.; above 1½lb. and not exceeding 2lb., 2s. 8d.; every additional ½lb., 8d. *Via* Marseilles, for a packet not exceeding 4oz., 6d.; above 4oz. and not exceeding ½lb., 1s.; above ½lb. and not exceeding 1lb., 2s.; above 1lb. and not exceeding 1½lb., 3s.; above 1½lb. and not exceeding 2lb. 4s.; every additional ½lb., 1s. No packet of patterns must exceed two feet in length, breadth, or depth; exceeding such dimensions, it will be treated and charged as a letter. The patterns must not be of intrinsic value. The patterns must be sent in covers open at the ends, so as to be easy of examination. In all other respects the regulations of the Colonial book-post will apply to the pattern post with Ceylon and Hong Kong.—By command of the Postmaster-General. General Post-office, July 16, 1864.

NOVEL IRON-CLAD RIVER VESSEL.—The *Kahireh*, built for the Viceroy of Egypt, and intended for the service of the Nile, made a trial trip of her powers in the Thames, for the inspection of the Lords of the Admiralty, before proceeding on her voyage to Egypt. This vessel is of 348 tons burden, by Messrs. Samuda Brothers, with engines of 50-horse power, by Messrs. John Penn and Son, is entirely cased in armour two inches thick from stem to stern, and reaching from the gunwale to two feet below water. She has two semi-circular cupolas, or shields, on deck, one forward and the other aft, each of which contains a long 18-pounder gun, and is also entirely covered with armour-plates two inches thick. Yet, notwithstanding all this large amount of armour protection, the draught of water of the craft, with her guns, stores, coals, and provisions all on board, was something less than four feet, and the mean speed obtained by the vessel was nine knots per hour. The limited draught rendered two screws advisable, and these are arranged to work one under each quarter. The powers of the vessel were tested in every way by Admiral Drummond, and she was found capable of manœuvring and steering in the most satisfactory way, making the complete circle in 3 min. 25 sec.

OFFICIAL APPOINTMENTS.—Mr. W. Vernon Harcourt has been appointed junior counsel to the Attorney-General in matters connected with the Treasury, in the room of Mr. Welsby, deceased; the Ven. Archdeacon Parry, M.A., to be a member of the Council of the island of Barbadoes; Mr. Horace Turner to be a member of the Legislative Council of the island of Antigua; Mr. John Clarkson Maynard and Mr. Peter Thomas Huggins to be members of the Executive Council of the island of Nevis; and Mr. James Whittal to be a member of the Legislative Council of the colony of Hong Kong.

Monetary and Commercial.

The amalgamation of the Imperial Bank of China, India, and Japan with the Bank of Hindustan, China, and Japan has been announced. We must allow the directors of the Imperial to know best, but we see no occassion whatever for this step, and think it is to be regretted that they did not carry out the object for which the bank was established. The following is the circular issued by the Bank of Hindustan:—

Sir,—I am instructed by the board of directors of this bank to inform you that they have concluded arrangements with the directors of the Imperial Bank of China, India, and Japan, subject to the approval and confirmation of the shareholders of both banks, by which the Imperial Bank of China, India, and Japan will be merged in this bank. By the terms of agreement, the full details of which will be submitted at an early date to the shareholders, in addition to an increase of capital a large sum will be added to the reserve fund, and this bank will thus be placed in a posi-

Digitized by Google

ion still further to command public confidence, and to augment our already large and profitable business. The directors think, in entering on this arrangement, they have consulted the best interests of the shareholders, as, apart from the pecuniary result, they have secured a great accession of strength to the board.—I am, &c.,

July 27. R. SWIRE TOMLIN, Secretary.

The circular issued by the Imperial Bank of China is also subjoined :—

Sir,—I have the pleasure to inform you that the negotiations which have for some time past been pending with the Bank of Hindustan, China, and Japan (Limited), having for their object an amalgamation with that very prosperous institution, have now been brought to a successful issue. The directors have finally settled terms which they think highly advantageous to the shareholders of this bank. As early as practicable, in accordance with the articles of association, an extraordinary general meeting of the shareholders of both companies will be convened to confirm the arrangements made by the directors, previous to which meeting all details of terms, &c., will be laid before you.—I am, &c.,

London, July 28. HENRY TURNER, General Manager.

The shares of the Bank of Hindustan are at 10 premium, and it remains to be seen on what terms the Imperial shareholders are to be admitted.

The Bank of London has declared a dividend of 10 per cent. for the half-year, after carrying off £18,000 to the reserve fund, and carrying forward a surplus of £11,321.

The City Bank has distributed also 10 per cent., adding £10,000 to reserve fund, and leaving a surplus of £7,969.

The London and Westminster Bank, perhaps, presents the most remarkable success. The profit, after setting apart £2,000 towards the buildings of the bank, was £234,032, making, with a previous balance of £18,844, an available total of £252,876. A dividend was declared of 14 per cent. for the six months, which will absorb only £140,000. Of the balance of £112,876, the sum of £80,000 was appropriated in part payment of £187,500, the price arranged for the purchase of the business and premises of Messrs. Jones Loyd and Co.; £24,046 was added to the reserve fund, thus raised to £300,000; and a balance of £8,830 was carried forward. Mr. H. J. Norman, formerly of Messrs. Jones Loyd and Co., was elected a director.

At the meeting of the National Discount Company, Mr. F. W. Russell, M.P., in the chair, the available total was stated at £42,280. The proposed dividend, at the rate of 16 per cent. per annum for the half-year, was adopted; £1,500 was carried to reserve, which is thus raised to £100,000; and a balance of £1,830 was carried forward.

At the meeting of the London Financial Association, the proposed distribution for the half-year, at the rate of 20 per cent. per annum, was adopted, and a balance of £21,408 was carried forward.

The report of the Bank of Egypt states the profits, including a previous balance of £7,220, at £18,772, and recommends a dividend for the half-year at the rate of 10 per cent. per annum, which will absorb £12,500, and leave £6,272 to be carried forward.

The report of the Land Securities Company shows a profit to the 30th of June of £902, which is recommended to be carried forward. The advances at present negotiated by the company amount to £158,013, and the estimated profit from commissions thereon is £4,985. The directors state a belief "that all their original anticipations will be realized to the fullest extent."

The report of the Joint-Stock Discount Company (established in February, 1863, to take over the discount business of Mr. Wilkinson), shows the profit for the six months to have been £24,423, and recommends a dividend at the rate of 8 per cent. per annum, which will absorb £16,000. The sum of £7,011 is to be added to the reserve fund, which will thus be raised to £25,000, and the balance of £1,412 is to be carried forward.

The Alliance Bank report stated the available profit, including a previous balance of £6,933, at £69,330. Of this amount £31,250 was applied in payment of a dividend at the rate of 10 per cent. per annum, £1,500 was written off preliminary expenses, £30,000 was placed to reserve, and £6,580 was carried forward.

From Bombay we hear that another bank, called the China Bank, has been formed, with a capital of 60 lacs.

The biddings for £300,000 in bills on India took place as usual at the Bank of England. The proportions allotted were :—To Calcutta, £171,000; to Bombay, £120,000; and to Madras, £9,000. The *minimum* price was, as before, 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications within the limits amounted to £1,800,000. Tenders on Calcutta and Madras at 1s. 11¾d. will receive about 16 per cent., on Bombay at 2s. about 65 per cent., and all above those prices in full.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton on the 20th inst., was—in gold: To Madras, £1,922. In silver: To Galle, £360; to Madras, £15,001; to Singapore, £17,150; to Hong Kong, £50,190; to Foo-chow-Foo, £390; to Shanghai, £7,450. Total in gold, £1,922; in silver, £90,951.

ARTICLES OF IMPORT.

TEA.—Since the date of our last printed circular the market has been extremely dull and inactive, there being no disposition on the part of the trade to increase their stocks. In the early part of the fortnight some little demand sprung up for fair to good blackish leaf sort with strength from 1s. 4d. to 1s. 5d., and a few transactions took place. The French mail steamer which arrived at Marseilles on the 5th brought 1,260 packages of Canton district new leaf made up as Kaisow; these teas have been placed upon the market, and, as we anticipated, they have been difficult of sale, the trade only taking a very small portion of the finest sorts in small boxes at 3s. 6d., and half-chests at 3s. 1d., the commoner and inferior being almost unsaleable. We hear of one parcel of medium having realised 2s. 2d. Public sales by auction commenced on the 19th instant. 30,889 packages were brought forward, of which 17,095 were sold, 16,071 being without reserve. The general tone throughout the sale was that of great heaviness, and prices ruled very irregularly and rather lower. For all kinds of the common sort of red leaf a decline of ½d. to ¾d. per lb. was noticeable, whilst blackish leaf showed a reduction of say ¾d. to 1d. per lb. Several parcels of fine Pekoe flavour Congou realised 1s. 11d. to 2s. 1d., and a mark of extra fine "Ming Sing" of 1862 import brought 2s. 4d. to 2s. 5d. per lb. Kaisow of fine and extra fine quality sold at 2s. 4d. to 2s. 4½d., and 11½d. to 1s. was paid for Flowery Pekoe. Canton S. O. Pekoes sold for 1s. 4d. to 1s. 6d. per lb. Green.—Transactions have been small, and prices are well maintained for good consumable kinds. A sale of India Tea took place on the 12th inst., when 1 740 packages were offered, of which 1,521 were sold, 219 being withdrawn. The sale altogether passed off with fair spirit. Assam Company's Congou, broken leaf and Pekoe, realized 1d. to 2d. per lb. higher rates, though 2d. per lb. decline was fully established upon Pekoe Souchong. Previous prices were realized for private growth Teas.

COTTON.—The market has become more quiet. For China the demand has considerably moderated, and prices are slightly easier. Japan is in request at full rates. Of sales effected in London last week we note 320 bales China, 19d. to 19½d. for fair, and 20½d. for good; 1,845 bales Japan, 20¼d. to 20½d. for fair, 21d. for fully fair, 22d. for good, and 23d. for very good. To arrive we quote, 1,120 bales China, 19½d., to 19¾d. May and June shipment, for guaranteed fair; 350 bales Japan, 20¾d. April shipment, for guaranteed fair.

SUGAR.—There is no quotable alteration for the past week, but prices are in favour of the buyer. We have no sales of this article from the Far East to note. Of Mauritius there have been sales from 35s. to 45s. The market is in a doubtful state, for the effect of the new duties is evidently not yet ascertained. Messrs. Travers and Son say in their Weekly Circular :—"We arrive, therefore, at the conclusion that no opinion as to the future of the sugar trade can be known from its present condition, and that the most general reasoning must be applied in venturing importations to this market; the makers of sugar by a single process must be able even at

Digitized by Google

our present rates of duty to supply a class of goods such as the public prefer at an advantage when compared with the French or Dutch refiner (leaving drawback out of consideration), but they may be uncertain as to the kinds most required here, of which past prices and demand are no criterion. As a general rule, neither highest nor lowest qualities are in the greatest demand, but medium kinds, and crushed and pieces forming four-fifths of the English consumption, quotations of these goods must be taken as the best guide. Loaf sugar possibly forms less than one-fourth of the sugar sold at present to the retail trade; powdered white and yellow sugars meet with the greatest consumption, and the bright straw yellow samples are especially desirable, half of the entire consumption of the kingdom being of this character, and being at present supplied by the refiner."

COFFEE.—The demand is only moderate, and prices, though on the whole tolerably steady, in some instances have not been fully supported. The public sales of Plantation have been limited to 550 casks, 330 barrels and bags; which realised last week's rates; low middling to middling 80s. to 83s. 76 casks, 100 bags Native, however, were sold rather cheaper, good ordinary 66s. to 67s.; by private treaty, about 1,500 bags have been taken at 67s. to 68s. Mocha: 374 packages, at auction, being of undesirable quality, were mostly bought in, the small part sold consisting of middling garbled at 85s. to 86s. 6d.

RICE.—There has been a good inquiry for Ballam, but other kinds are dull of sale, and not above 18,000 bags have changed hands on the spot, chiefly Bengal, low red cargo sort to fair Ballam, 8s. 4½d. to 9s. 6d.; good, 10s.; white, 10s. 6d. to 11s. 1½d., and Rangoon, 8s. 9d. to 9s. 3d. Also a floating cargo of Nakrenzie, 900 tons, at 10s. 1½d., open charter.

CAMPHOR.—There is still inquiry, and moderate business has been done upon former terms: China at £4 10s. to £4. 12s. 6d., and Japan £4. 17s. 6d. per cwt. 58 cases at auction retired.

CASSIA LIGNEA.—Not any business of importance doing. Buds: Small sales at previous value, £14 to £16.

DRUGS.—Cubebs: Dull; 65 bags at auction, all retired. Dragon's Blood: Steady; 3 cases sold at £7. 10s to £7. 17s. 6d. for good block. Galangal Root: Cheaper; and of 201 bags at auction a few only found buyers at 19s. per cwt. for good. Rhubarb: Some inquiry; but of 47 cases at auction one half only sold at 3s. 9d. to 3s. 10d. per lb. for ordinary flat, being comparatively cheap.

GUMS.—Bengamin: Quiet; 5 cases Siam at auction retired; and of 248 cases Sumatra, a few only sold at £12. 5s. per cwt. for second quality false packed, and £6. 5s. fair third. Damer: Nothing of any interest doing. Gamboge: Continues scarce, and very firm; 3 cases sold at auction at £8. 2s. 6d. to £10. 15s. per cwt. for middling mixed to very good pipe.

GUTTA PERCHA.—No business of consequence to report. India-rubber: Remains very inactive, with limited transactions at low prices.

HORNS.—Auctions confined to six tons Ceylon Buffalo horns, sold at 24s. to 25s. per cwt., for 1¼ to 1½ lbs. average.

HEMP.—Manila: This market has been dull, and prices have latterly given way 10s. to 20s. per ton. Of 4,235 bales at auction, two-thirds sold at £34. 10s. to £36 per ton for fair roping to good Sorsogon. Private sales are reported at £33. 5s. cash.

JAPAN WAX.—Nothing of consequence doing. Quotations 55s. to 65s.

IVORY.—The quarterly sales took place on the 17th August.

TERRA JAPONICA.—Cutch, Pegue: This market remains very flat and inactive; 340 bags fair quality of Pegue, but old import, sold at auction at 23s. to 23s. 6d. per cwt., being cheap. Gambier: Business to a moderate extent has been done on the spot, and the market is firm. No sales reported for arrival.

OILS.—Aniseed: Our quotation of 6s. 7d. obtained in retail sales only; of 39 cases at auction only a few placed thereat. Cassia: Very dull; 30 cases at auction retired at 9s. per lb. Cinnamon: Steady; 6 cases at auction sold at 1s. 6d. to 2s. 6d. per oz. for ordinary to fair.

SAGO.—Prices are again about 6d. per cwt. lower; and 1,004 boxes at auction sold at 21s. to 21s. 6d. per cwt. for fair small, and 20s. to 21s. fair to good medium. Flour continues quiet. Only 100 bags sold at auction at 16s. 6d. per cwt., and nothing doing privately.

SHELLAC.—Orange rather cheaper; fine bright dark Garnet scarce, wanted and the turn dearer; other sorts without change in value or improvement in demand; of 707 cases at auction rather more than half sold—Orange at £7. 7s. 6d. to £8 per cwt.; dark Garnet £7 to £7. 2s. 6d.; pale dull, £6. 5s. to £6. 7s. 6d.; Button, £6. 15s.; and Orange block and blocky, £7 to £7. 2s. 6d.

SPICES.—Cloves: In Penang, no change; Zanzibar and Amboyna rather dearer, fair business having been done at 4d. to 4¼d. per lb. for the former, and 6d. for the latter. Nutmegs: The lower shipping qualities, 90 to 120 nutmegs to the lb., have further improved 2d. per lb., and considerable business has been done at the advance. Only 15 cases Singapore, and 28 cases Penang at auction, half sold at 1s. 4d. to 1s. 8d. per lb. for middling to fine small. Pepper: Black, remains very flat, with most limited business; 513 bags Singapore, and 1,345 bags Penang at auction, all retired. White, quiet market, without business of consequence.

MISCELLANEOUS.—Black Lead: Very quiet, and of 259 barrels at auction only one-fourth sold at 11s. to 14s. per cwt. for middling to fair lump, and 8s. 3d. to 8s. 6d. dust. Galls: Quiet; we quote China and Japan 75s. to 85s. per cwt. Musk: A small recent arrival, 15 caddies, sold at auction at moderate prices, 25s. to 26s. 6d. per oz. for middling to fair Tonquin.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £9. 10s.; hoops, £10. 10s.; sheets, single £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7. 5s.

STEEL.—Swedish keg, £16 to £17.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8¼d. to 8¾d. per lb.

TIN.—104s. for block; 105s. for bar. Tin plates, best charcoal, I.C. 30s. per box.

LEAD, &c.—English pig, £21. 5s. to £21. 10s.; W.B., £22. 10s.; shot, patent, £24; sheet, £21. 10s.; spelter, £25; zinc, English sheet, £28; quicksilver, £8 to £8. 10s.

From Penang.—At Falmouth: Schlosser. At Cork: Ceylon. At Bordeaux.—Sophis.

FREIGHTS AND CHARTERS.

Vessels having arrived from the Eastward freely during the past week, there is some difficulty in fixing acceptable engagements for the outward voyage. Homeward freights continue firm, with an upward tendency, and ships are still in demand from the rice ports, Maulmain and Java. In coal freights better rates are offering.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £37 and £1. 15s. For Shanghai: £50 and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £27 and £1. 5s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the conveyance of a small quantity of Government stores, including a few combustibles from the River Thames to Hong Kong.

CASUALTIES.

The Rainbow, Kelly, which arrived at Boston, June 30, from Singapore reports having encountered westerly gales for eight days, during which she had sails split and sprung her foretopmast.

The Philip v. Marnix, from Rotterdam to Batavia, was spoken 12th June, with two of her masts injured, but not so much so as to impede her voyage.

The Aalborg (Danish barque), Tecker, from Copenhagen for China, which put into Rio Janeiro, 9th March, leaky, was to be sold there by auction 25th June.

The Nieuw Holland, Dutch ship, from Amsterdam for Batavia, was burnt at sea, 15th June, in about lat. 3 N; crew and passengers were landed at Bahia, by the Joan, from Rotterdam to Penang.

The Alberto (Chil. barque), from Cardiff to Singapore, put into Rio Janeiro, 23rd June, with damage to rigging. Another account states that her mainmast was broken.

The Duc de Richelieu, Bernard, from Bordeaux for Saigon, put into St. Helena, 6th June, with loss of bulwarks, stanchions, rail, deckhouse,

Digitized by Google

&c, and other damage, having experienced severe weather 27th May, 32 S 13 W. She was repairing on the 28th May, and was expected to proceed in about three weeks.

The Noord Brabant (Dutch), Loos, from Batavia, put into St. Helena, 19th June, to repair damages, having encountered a gale on the 10th of June.

Intelligence has been received from Singapore of the total loss of the Morning Star, from Manila, to New York, in Gaspar Straits—crew saved.

Pernambuco, June 29.—The Gustave Adolph (British) from London to Hong Kong, put in here June 26, captain murdered by second mate, murderer to be sent home.

Held, from Sourabaya, and sailed, 4, for Rotterdam; Black Watch, Couper, from Hong Kong, and sailed for London; 5, Maria Diederika, Marion, from Padang, and sailed, 6, for Rotterdam; 6, Duc de Richelieu, Bernard, from Bordeaux for Saigon, with damage; 8, Willy, Sandstedt, from Manila, and sailed for New York; Johannes Hendrikus Ferdinand, Lodewyks, from Batavia, and sailed, 9, for Rotterdam; 9, Zeenimph, Roggen, from Batavia, and sailed, 10, for Amsterdam; 10, Osborne, Stamper, from Anjer, &c., and sailed for New York; Helena, Hedger, from Hong Kong, and sailed, 11, for Liverpool; Boujainville, Fay, from Sourabaya, and sailed, 11, for Belle Isle; Hendrika, Bus, from Sourabaya, and sailed, 11, for Rotterdam; 11, Java Packet, Hellingman, from Batavia, and sailed, 12, for Amsterdam; Loyola, Tuton, from Manila, and sailed, 13, for Liverpool; Berdinkha, Bray, from Shanghai, and sailed for London; 14, Duke of Roxburgh, Parnell, from Sarawak, and sailed, 15, for Falmouth; 15, Onderkirk a. d. Amstel, Swart, from Batavia, and sailed, 16, for Amsterdam; 20, Anne Forster, Clarke, from Batavia, and sailed, 21, for Falmouth; Ternate, Carst, from Padang, and sailed, 22, for New York; 26, Hermann, Koppelmann, from Amoy, and sailed, 27, for New York; Alexander Dempster, from Kanagawa, and sailed 30 for London; Fort William, Kennedy, from Shanghai, and sailed, July 1, for Liverpool.

At Table Bay.—May 31, Dumbarton (str.), from the Clyde for China; 21, Reflect, Deslandes, sailed for Singapore; June 5, Oriflamme (str.), Lane, for New York, and left 8, for Hong Kong.

At Simon's Bay.—May 28, Hermelin, Ouchterlone (str.), from Swansea, and left June 2, for Hong Kong: June 2, Dumbarton (str.), Findlay, from the Clyde, and left 8, for China; 19, Noord Brabant, Loos, from Batavia.

At Algoa Bay.—May 28, Milton, Osgood (Smith, late master, dead), from Liverpool, sailed June 12, for Hong Kong.

At Natal.—May 2, Hoangho, Allardice, sailed for China; 20, Chin Chin, Lorensen, sailed for Singapore.

At Santos (W.I.).—For Batavia (loading), Wilhelmine (Hanoverian).

SHIPPING STATISTICS.

According to the statistics of vessels entered inwards at the port of London, there is an increase of three vessels with a capacity of 6,518 tons from the 1st of January to the 30th of June, 1864, the difference between 487 vessels and 350,000 tons in 1863 and 490 vessels and 356,587 tons in 1864. The port of Liverpool exhibits an increase, also, of 43 vessels, with a capacity of 41,081 tons. The arrivals for six months in 1863 having been 186 vessels, and 162,242 tons, and in 1864 229 vessels and 203,323 tons. The port of Bristol shows a decrease of nine vessels, with a capacity of 5,541 tons, the difference between 19 vessels and 9,567 tons in 1863, and 10 vessels and 4,026 tons in 1864. In the Clyde there is also a decrease of five vessels, with a capacity of 724 tons; the arrivals in 1863 having been 16 vessels, with a capacity of 7,326 tons, and in 1864 only 11 vessels and 6,602 tons. The net increase has been 32 vessels, with a capacity of 31,334 tons, the difference between 708 vessels and 529,204 tons in 1863, and 740 vessels and 570,538 tons in 1864.

The vessels from China into London, Liverpool, and outports, total up (in the six months) 169, against 131 in 1863. From Singapore and Penang 28, against 25 in 1863. From Philippine Islands 11, against 40 in 1863. From Java and Sumatra 1, against 2 in 1863.

The clearances for China in the same period are 85, against 88. From Singapore and Penang 49, against 22. From Philippine Islands 6, against 5. From Java and Sumatra 5, against 8.

Secretary (pro tem.)—D. W. BALL, Esq.

Offices—Merchant Banking Company of London, 28, Cannon-street.

PROSPECTUS.

Although within the past few years considerable addition has been made to the banking capital of our great Eastern possessions, it must stillbe admitted that in India, China, Japan, and Australia, as well as in the Eastern Archipelago generally, business has greatly outrun existing banking accommodation, and the necessity again presses hard and severe upon trade in these parts for greatly increased monetary facilities.

To meet this necessity in some measure, the British and Netherlands India Bank is established; and, although it takes powers in its Articles of Association to enter upon any portion of the wide field before it, not only in India, China, and Australia, but also in the Eastern Archipelago, yet its first operations will be directed to those parts which have been chiefly neglected by the newly-created kindred institutions.

Chief among these fields in India will be the Madras Presidency, and some estimate may be formed of its value when it is stated that the import and export trade of Southern India have more than doubled within the last five years, and the extension of the railway system to that portion of Asia, and the application of European capital to the development of its great resources as a coffee, cotton, and tea growing territory, have increased its productive power to such extent that a great addition of banking capital is absolutely necessary to meet the legitimate requirements of commerce.

The British and Netherlands India Bank will also, without loss of time, establish branches in China, Japan, and Batavia, and arrangements are contemplated with an Australian Bank, by which its operations will likewise be effectually extended to that field.

As a profitable investment the British and Netherlands India Bank offers a very desirable opportunity. It will commence operations under promises of very valuable and most extensive support; and at a time when the joint-stock principle in banking is penetrating with new ease every part of the rich fields presented in the East, it will participate at once in that very lucrative business which was once the monopoly of native discounters.

Every description of exchange banking business will also be undertaken by the British and Netherlands India Bank, and it will constitute a peculiar feature of the Company, that under satisfactory securities it will issue credits to producers, through which large commissions are made to the Bank.

No promotion money will be given in the establishment of the British and Netherlands India Bank. The preliminary expenses will be confined to necessary disbursements.

The remuneration of the Directors left to the shareholders.

Prospectuses and forms of application for shares may be obtained of the brokers, bankers, and at the temporary offices of the Company; but no application for shares will be considered unless a deposit of £1 per share has been previously paid to the bankers of the Company.

The Articles of Association can be seen at the offices of the Company.

In the event of no allotment being made, the deposit will be returned without deduction; and should the number allotted be less than the number applied for, the payment in excess will be applied towards the amount due.

FORM OF APPLICATION FOR SHARES (TO BE RETAINED BY THE BANKERS).

No. ———.

To the Directors of the British and Netherlands India Bank (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of £1 per Share on Shares in the above Company, I hereby request that you will allot me that number; and I agree to become a member of the Company in respect of such Shares, or in respect of any less number you may allot me; and to pay on allotment the further deposit of £4 per Share thereon, and I request that my name may be placed on the register of members for the Shares so allotted.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author.
12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty, five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.
"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.
N.B.—Agents in India—Von Lintagy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hunam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon; Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. Consultations daily from 10 to 3 and 6 to 8.
London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT and PILLS.—THE BEST WAY.—To gain any end there are oft n many ways but there is always a BEST way. This statement applies with wonderful force to Holloway's remedies which overcome ill health by driving noxious matters from the frame, by repairing broken or injured structures, and by establishing regularity of action. This is the only safe and feasible method of combating diseases and securing sound health. With pure blood, good digestion, strong nerves, and perfect functional order most maladies may be vanquished and health surely re-established. The balsamic and healing qualities of Holloway's Ointment render it invaluable in the nursery for healing cuts, scratches, and sores, for allaying inflammations, reducing swellings, and cleansing unhealthy skins.

List of Passengers.

PASSENGERS INWARD.

Per P. and O. str. Baroda, arrived at Marseilles July 31.—From Shanghai: Mr. E. Wadman, Rev. — Bardon, Mr. R. Reid, Mr. E. Fuche. From Hong Kong: Dr. James Dewar, Mr. H. Severs, Mr. F. Sweetzen. From Singapore: Mr. Monters, Mr. J. Myrtle, Mr. E. Barnett.

To Southampton, per P. and O. str. Delhi, arrived August 6.—From Shanghai: Col. Kirkham and servant, Messrs. Scholefield, Escott, and Holland. From Hong Kong: Messrs. Bowley, Hale, Jacobson, Selby, and Hodge, Capt. and Messrs. Tepson and two children, Mrs. Gollteak and infant. From Singapore: Sir R. Schomburgh, Mr. Gilpin.

PASSENGERS OUTWARD.

Per P. and O. steamer Poonah, August 4, from Southampton.—To Singapore: Mr. C. Wood. To Hong Kong: Mr. S. G. Bird. From Marseilles, August 12.—To Hong Kong: Mr. Maurice Brussel. To Singapore: Mr. S. Young. From Gibraltar.—To Singapore: Mr. R. and Mrs. Barras, Mr. M. Tavora.

Per P. and O. steamer Delta, August 20, from Southampton.—To Hong Kong: Mr. Galton, Mr. and Mrs. Adams, Miss. Brown. From Marseilles, August 28.—To Shanghai: Mr. J. A. Taylor. To Hong Hong: Mr. and Mrs. D. Crawford. From Suez.—To Singapore: Mr. and Mrs. Hermann.

Per P. and O. steamer, Sept. 4, from Marseilles.—To Shanghai (via Bombay): Mr. Wm. Jackson, Mr. J. Webster. To Penang (via Bombay): Mrs. Rodyk and infant.

Per P. and O. steamer, Sept. 4, from Southampton.—To Hong Kong: Miss Manuel, Miss Pagden, Mr. I. P. Mollison, Col. and Mrs. Gray, Miss P. Plumridge, Miss Longstaff, Mr. P. Bird. To Shanghai: Mr. E. Iveson, Rev. C. H. and Mrs. Butcher, Mr. F. Stokes, Miss Nelson.

Per P. and O. steamer, Sept. 28, from Marseilles.—To Singapore: Mr. P. C. Keake.

Per P. and O. steamer, Oct. 4, from Southampton.—To Hong Kong: Mr. and Mrs. Preston and infant. To Shanghai: Mrs. Jarvie. From Marseilles, Oct. 12.—To Singapore: Miss Cooke and servant. To Shanghai: Mr. Gordon and friend.

Per P. and O. steamer, Oct. 28, from Marseilles.—To Hong Kong: Mr. J. Tait. To Shanghai: Mr. A. Schultze. To Singapore: Mr. and Mrs. H. W. Wood and lady friend.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our advices hence are to the 13th June. The China and Japan S. N. Company's screw steamer *Elgin* arrived on the 11th, bringing the English mail of the 11th April, and the French mail of the 17th.

On the afternoon of the 28th May the long-expected steamer *Conqueror* arrived from Hong Kong with the battalion of Royal Marines on board, and the following officers:—Colonel Suther, in command; Lieut. Colonels Penrose and Adair, Captains de Courcey, Parry, Seymour, Taylor, Lean, Colwell; Lieut. and Adjutant Poyntz; Lieut. and Quartermaster Barker—Doctors Ord, Robertson, Egles; Lieutenants Hore, Silver, Inglis, Dwyer, Johnston; 2nd Lieutenants Norcock, Peters, Larkin, Kennedy; and 530 non-commissioned officers and men. The bluff on the eastern side of this settlement (says the *Japan Herald*) has now an unusually busy appearance. Within a few hours after the arrival of the *Conqueror*, numberless carts laden with lumber and building materials of various description, and some hundreds of workmen, crowded the hill approaching the new British Consulate reserve lot, which was soon mapped out with boundary stakes, indicating the position of large and numerous buildings, the frame-work of many of which is already raised. These buildings, we understand, will be occupied by the 20th Regt. On Tuesday, at two o'clock, it was known that the *Conqueror* was about to land her passengers, and a large concourse of the foreign residents assembled on the Bund to witness the debarkation. The landing took place in beautiful order, the men were drawn up on the Bund, and when all had assembled, they were marched up to the large plateau adjoining the United States Consulate Reserve, and between that and the recently erected Japanese barracks, where they are now, under canvas. So long as the fine weather lasts, a more pleasant, as well as healthful location, could not have been found for them, and this they seem heartily to appreciate, for the men, some at drill, others lying about smoking or reading, or chatting, their band playing, the Japanese hucksters vending their wares, and the general hilarity, tempered with the order of discipline, renders it a scene evidently enjoyed by the actors, as it is pleasant and gratifying to the beholders. The fine martial appearance of the men was universally observed and commented on by all who saw them.

The embarkation on the 27th May of Mons. du Chesne de Bellecourt, late Minister of France in Japan, on board the P. and O. steamer *Nepaul* for Shanghai, *en route* for home, was a perfect ovation. Nearly an hour before the time fixed for leaving, the residents—not only the French but those of all other nationalities—began to congregate on the new Hatoba. A guard of honour, composed of the marines of the Dutch men-of-war, formed in order about eight o'clock, and at half-past his Excellency, escorted by the company of the batallion Chasseurs d'Afrique, was accompanied by Mons. Leon Roches, the new French Minister, Sir Rutherford Alcock, General Pruyn, Minister of the United States, D. de Graeff von Polesbrock, Esq., H.N.M.'s Minister, Mons. Lapeyeruse, French Consul, Mons. von Bradt, Prussian Consul, G. F. Plate, Esq., Dutch Consul, and we believe the other consuls, together with many of the junior officials of all the Legations and Consulates, to the pier. His colleagues and more immediate official friends had scarcely time to bid their farewell, when personal esteem and friendship on all hands broke through the restraint of etiquette, and a general rush was made of French, English, American, and Dutch, to obtain a parting grasp of that hand which but few would again hold in their own. Adieux, farewells, and the even more emphatic "God bless you"—saluted M. Bellecourt for many minutes. Time, however, began to shorten, and the fuming funnel of the *Nepaul*

Digitized by Google

warned all that the parting could not longer be delayed. His Excellency was conveyed on board the small Dutch steamer which had been courteously placed at his disposal. But even yet many would have still one more adieu. Every available boat was filled. A general rush—officials and civilians now intermingled—was made for the steamers—and soon the concourse which he had but just left on the Hatoba received him on the deck of the *Nepaul*. As he passed from the landing to the vessel H.I.M.S. *Dupleix*, 20th regiment saluted with 14 guns. The Kanagawa fort hoisted the French flag and saluted with a little number, which was acknowledged by the *Dupleix* hoisting the Japanese flag and returning the same salute.

His Excellency seemed much impressed with the very cordial farewell taken of him—and again—and yet once more were the adieux repeated until the vessel was almost on the move.

The P. and O. steamer *Cadiz* arrived on the 6th June, brought Mr. Lindau, who comes duly accredited as full consul for the Swiss Confederation.

On the 30th May, according to advertisement, M. Lapeyrouse, f. f. French Consul, offered to competition (among French subjects only) certain lots on the new French (Swamp) Concession. There was a very large attendance of buyers, and the bidding brisk and decided. Lot No. 1, 217 tsoubos, situated at the rear of the property of M. l'abbé Mermet de Cachon, subject to a ground rent of (say) $73 per annum, after considerable competition, was knocked down to Messrs. Hecht, Lilienthall, and Co., for $2,250. Lot No. 2, 129 tsoubos, ground rent $47, adjoining the above, was bought by E. Piquet, Esq., for $1,050.

The case of Ross, Barber, and Co. v. Samuel J. Gower, tried in the British Consular Court, before Vice-Consul Flowers, with Messrs. L. A. Joseph and G. H. Alcock as Assessors, had excited considerable interest. The plaintiffs' case was—

The steamer *Viola* was circulated for freight for Hong Kong on the 23rd May; in this circular nothing was said about payment of freight; on the 24th plaintiffs engaged freight by her; their shipping-order was signed and their goods shipped and they made out their bills of lading freight payable at Hong Kong, alleging that it is the custom of this port to make freight payable at the port of discharge. The defendant's case was, 1st—A denial that any engagement existed; 2nd, that when the shipping-order was signed he wrote a note to the plaintiffs that freight was payable here, and that he is only bound to sign bills of lading made out in accordance with the note sent with the shipping-order. To this plaintiffs replied, that the engagement, though a verbal one only, was to all intents and purposes a binding one, inasmuch as the defendant had actually told them to send the goods off; and when that engagement was made they were not told "freight payable here;" and that it was not competent to the defendants to alter the terms after the engagement of freight and when the goods were in the course of shipment. To this again the defendant said that the plaintiffs were told that the freight was payable here in time to prevent the shipping the goods, and that they were not justified in using the shipping-order if they did not intend to comply with the terms of the note; that it is the custom of Jardine, Matheson and Co. to collect freight at Yokohama, and that the plaintiffs have not established the rule that freights should always be collected at the ports of discharge, for that Jardine, Matheson and Co. have always collected theirs at Yokohama, as have also the P. and O. Company. The plaintiff claiming to have established the custom at Yokohama of making freights payable at the port of discharge, hold that Messrs. Jardine, Matheson are not exempted from such custom by their usage, and that the custom of the P. and O. Company does not establish custom over private houses.

The Vice Consul, with the concurrence of the assessors, found for the plaintiffs with costs, on the ground "that in the absence of any express stipulation freight is not due until the voyage is performed; that in the case of sailing vessels, the custom at Yokohama of freight being payable at the port of discharge is almost or wholly established; and in the case of steamers, that the same practice has been observed in the great majority of instances (the P. and O. Company's steamers being, by mutual agreement excepted); in the case of Messrs. Jardine, Matheson, and Co.'s steamers, it does not appear that it has been an invariable practice to collect the freight at Yokohama, however much the consignees or owners might have wished to establish that practice, and that it was the duty of the consignee, before accepting a contract of freight, to have stated that the money was payable at Yokohama, if he deemed that condition a material part of the contract."

The case of M. O. Flowers *v.* J. Goble had been tried in the United States Consular Court before Colonel Fisher. The plaintiff, who is H.B.M.'s Vice-Consul, charged the defendant with wilfully and maliciously shooting his dog, for which he claimed damages $150. The defendant denied the charge, and endeavoured to make it appear that, although he had shot a dog on the morning in question, it was one of a number of Japanese dogs which had much annoyed him of late, and not the dog of the plaintiff; and in his address to the court contended that it had not been proven that he did shoot the plaintiff's dog, and that even if he had done so he should have been justified under the laws of the United States in killing an animal trespassing upon his premises. An informal decision had been given, for convenience sake, on the day of the trial, the defendant being found guilty, and sentenced to pay a fine of $50. Against this he gave notice of appeal. On the following morning the Consul delivered a more formal decision. Colonel Fisher held that it was an involuntary trespass, and continued:—"A notoriously vicious dog, one that habitually worried children, and killed sheep or poultry, the defendant would doubtless be justified in killing without notice, and the defendant would be justified in ridding us all of the miserable Japanese wolf dogs that infest the settlement, of no earthly value whatever, and I am sure the community would owe a debt of gratitude to the defendant or any other party if he were to drive out all the Japanese dogs in the settlement. The dog, however, of the plaintiff was his companion in all his rambles, and proven to be, not only entirely inoffensive, but of great value. The judgment of the court therefore, is, that the defendant is guilty as charged, and that he pay a fine of $50, including costs, and the clerk will so enter up judgment against the defendant."

In reference to the defendant's motion of appeal, the Consul read from the United States Consular Regulations for Consuls in China, Japan, Persia, and Turkey, by section 3 of which the decision of the Consuls in all cases where a fine under $100 or imprisonment for 60 days can be inflicted, and also in civil cases where the damages do not exceed $500, if he sees fit he may finally decide; but if, in his judgment, any case involves perplexities, or if the damages exceed $500, in either such case it is his duty to summon not less than two or more than three citizens of the United States. If they concur the judgment shall be final; if they differ, then each shall subscribe his name to his assent or dissent, with reasons, and either party may thereon appeal to the Minister; but if no appeal be lawfully claimed, the decision of the Consul shall be final and conclusive.

The squadron of the British Admiral has received the important addition of the *Conqueror*. Three Dutch men-of-war were daily expected. The opinion that the Japanese government will see the advisability of themselves coercing Tsioshiu, and effecting the opening of the Simonosiki Straits, was daily gaining more adherents, and it was reported that some very cogent arguments had been used to that end.

There had been a Japanese report of the portion of a wreck having been seen on the rocks of Achasima, near Uraga, at the entrance of the harbour of Yokohama. Later reports further justified the surmise hazarded that it was probably the debris of the *Oriental*, the *Star of Peace*, the *Viking*, or some other old wreck, and nothing had occurred to change that opinion.

At the commencement of the fortnight (reports the *Herald*) we were enjoying some very splendid weather, the summer apparently coming in very mildly upon us, the highest thermometrical range at 2 P.M. being 77. We have, with an intermission of a few very fine days, been visited with a succession of much rainy weather, during which, in consequence of total absence of any municipal arrangements, the condition of our roads has been most wretched. Thanks, under Providence, to our sea aspect, aided by our self-inflicted newly-organised "scavenger corps," despite every other total neglect of sanitary arrangements, and the existence of every imaginable evil calculated to promote and aid the existence of malaria, the health of the settlement has been generally very good, though there are still one or two cases of small pox reported. On the 17th June a severe shock of an earthquake caused many to rise from their beds at five o'clock in the morning. We have not heard of any damage done, though this was certainly the most severe shock experienced for the last three years.

HAKODADI.

We hear from a correspondent that on the day on which the *Wild Dayrell* arrived a fracas occurred which was attended by serious, and possibly by fatal results. The first mate of that vessel, named Orkney, and the second mate, named Pain, had a quarrel, when Orkney, drawing his revolver, shot Pain in the leg. The injury was of such a character that amputation of the limb was found necessary, and the life of the patient has been considered in much danger. Orkney has been apprehended, and the case been undergoing investigation by Captain Vyse, H.B.M.'s Consul.

The small steamer, formerly the *Meteor*, lately bought by Koide Mecno no Kami, Governor of Hakodadi, for $47,000, had been her trial trip to Eesh-ka-ree-gori, and was to leave for Yedo in a few days.

CHINA.

SHANGHAI.

The London Mail of the 26th April arrived out on the 14th June. The dates are now down to the morning of the 20th.

We regret to notice that the return of the hot weather has brought back also that dreadful scourge, cholera. We trust that the residents have not neglected the precautions which we pointed out last year.

The following are the chief items of news recorded in the *Daily News*:

It has been for some days generally suspected that Burgevine has revisited Shanghai, and taken up his old pursuits. We have found difficulty in obtaining reliable information on the point, but we now learn that he has actually returned, and has, moreover, started for Nanking. Barclay, whose versatility of political opinion has justly won him so much distinction, now lies in the British Consular jail under warrant of the United States Consul General on a charge of complicity with Burgevine. We are free to confess that for the latter, weakened in mind and body by the effects of his wound, we feel a sincere and unadulterated pity, but for (Colonel) Barclay (de Tolly) we anticipate with pleasure a long continued incarceration, and a subsequent removal to some more favoured clime, where his insignificance as an individual will preclude the possibility of his becoming a plague to the community among whom his abode may happen to be fixed.

A gentleman who has lately returned from Huchow-fu has kindly furnished us with the following particulars. The investing army consists of the Franco-Chinese force to the number of about 1,600 men, under the command of General D'Aiguebelle, and 6,000 ordinary native troops Up to the present the Imperialists have not obtained a position nearer than about twenty miles from the city, and the attention of the besiegers is devoted to the cutting off of supplies, and to the preparations necessary for a speedy and energetic assault. The rebels are in great force, and strongly entrenched on the plains outside the walls. Indeed there is every indication of their purpose to oppose a vigorous resistance to the efforts of the mandarin troops. At present no fighting is going on, with the exception of an occasional skirmish between the more advanced bodies. Although, as we have said, the principal body of besiegers is still at a very considerable distance from the walls, a small portion of the French force under Colonel Schaedli, and another small body under Colonel Reynolds, are in a position somewhat closer, having entrenched themselves in a stockade lately captured from the enemy. That some disaffection exists amongst the rebel leaders is manifest, for about six weeks since two chiefs surrendered with some five thousand men, and are now fighting on the Imperialist side. This is rendered the more remarkable by the fact that one of these men had distinguished himself by the bravery with which, on the 29th of March last, he defended the breach made by the Franco-Chinese in the wall of Hangchow (vide *North China Herald*, April 16). It is rumoured that some others of the Rebel Wangs are also desirous of coming over to the Imperialists, but the majority, to judge by the reports of deserters and by the extensive preparations made for the defence of the city, have determined to hold out to the last moment. The besieged do not confine themselves to purely defensive warfare. On the contrary, about three weeks since, a vigorous attack was made by a large body of rebels upon an Imperialist camp which had been placed under the command of one of the chiefs who had deserted. It is said that the Imperialist loss on that one occasion amounted to about three thousand killed and wounded. The attack had evidently been preconcerted with some traitors in the Imperial camp, for on the approach of the enemy a large body of the defenders marched out and joined the rebels. Hangchow, if defended by European troops and properly provisioned, would be impregnable. The country in the neighbourhood of the walls is cut up in every direction by creeks, while the artificial defences are of the most formidable character and constructed on the most extensive scale.

A report has reached us through a Chinese source to the effect that on the 1st June one of Tseng-Kwo-fan's brothers, who holds a command in the Imperial city outside Nanking, succeeded, after a protracted engagement, in capturing a rebel camp on the north of the city, outside the Kuang-yin gate, to which gate the rebels were chased, and more than four thousand killed. A vast amount of loot was taken, and many official seals were found.

Li san-ta jen (Li Ho-chang), the hero of Taitsang and of many other engagements, in all of which he has practically announced his belief that the better part of valour is discretion, has, in company with four others as distinguished as himself, been granted the distinction of the Yellow Jacket. This may be intended as a compliment to the Futai, or it may be the result of a judicious bribe, but under no circumstances could a worse selection have been made. The recipient of this honour has had many opportunities of displaying bravery, coolness, and determination, but whenever he has happened to find himself in danger or difficulty his senses have deserted him, and he has disappeared from the scene with most laudable celerity.

It was reported that the *Gyrne Castle*, from Fuhchau to Japan, had been wrecked on a rock in the "Fisherman's Group," and her crew murdered by pirates. On inquiry we find that the consignees of the *Gyrne Castle* have received no advices as to her loss, but that there is reason to believe that the *Netherby* (a vessel despatched by Messrs. Smith, Kennedy and Co., from Fuhchau on the 20th of April) has foundered off the Pescadores, some of her tea having been offered for sale in Formosa. The former rumour may therefore have arisen from the latter.*

Many of our readers are doubtless acquainted with the fact that it is in contemplation to lay down a line of telegraph between Shanghai and Woo-sung. The local native authorities have accorded their permission, and the enterprise will, we understand, when complete, be in some way connected with a Chinese office. The advantages which must accrue from the construction of a telegraphic line are manifold. Vessels will be instantly reported to Shanghai so soon as they come in sight at Woosung. Vessels which may accidentally run ashore will not be left longer in a perilous position than may be necessary to transmit a message to Shanghai, and send a tug to the rescue. It will, moreover, prove a step towards establishing a line up the Yangtsze, to the North, and eventually to Hong Kong. The sharp end of the wedge having once been inserted the rest will naturally and easily follow. It is also worthy of notice that railways and telegraphic lines generally follow one another. We may, therefore, expect to see a railroad opened within a few years, and then the subjugation of China by European civilisation will be an accomplished fact.

Our Ningpo correspondent informs us that the siege of Hoochow is proceeding very slowly. The united Anglo-Chinese, Franco-Chinese, and native drilled troops are still at a distance of fifteen miles from the city, and will be compelled to seize forty stockades before they can approach the wall. It would seem from the extensive preparations made by the rebels that a determined stand will be made at Hoochow, which from its position presents a most formidable obstacle to the completion of the mandarin scheme of conquest, and ensures the rebels a base from which to operate. Reynolds' force is distant about ten miles from the French, and Schedlen (?) was, at the date of our correspondent's letter (June 10th), supposed to have been advancing in another direction. It is said that Schedlen (?) and D'Aiguebelle are not on the best terms, and that some fears of a rupture are entertained.

A curious report was amusing the public, which the *Recorder* gives as follows:—

"His Excellency the Futai at Hangchow had for three nights consecutively been troubled with a dream to the effect that the city was on fire, and on making examinations amongst the ruins twenty lakhs of treasure were discovered. It is further reported that H.E. having directed his officers to the locality they were induced to make a search, when the treasure was actually discovered, and that His Excellency with praiseworthy generosity had apportioned two lakhs to his men, eight to His Imperial Majesty, and the remaining ten to himself."

At a meeting of the North-China Branch of the Royal Asiatic Society, a very interesting paper was read on the "Architecture of the Chinese." The chair was occupied by Sir Harry Parkes; and the paper was agreed to be printed by the Society.

Messrs. Collyer and Lambert have launched a fine steamer, which is named the *Hercules*, to be used as a tug on the

* This is also incorrect, for the *Netherby* passed Anjer on 11th June.—[Ed. *L. and C. T.*]

Digitized by Google

Woosung. The sunken wreck *Lord Lyndhurst* was still causing considerable uneasiness as to the navigation of the channel on the Pootung side.

The ship *C. S. Lemon* was on shore on the North Spit, but it was hoped the efforts to be made to get her off would succeed. A number of shipmasters trading to and from the port of Ningpo have addressed a letter to the Commissioner of Customs, asking that some improvements be made in the approach to the port, which is at present without even lights or buoys.

HONG KONG.

The English mail of 10th May arrived out by the P. and O. steamer *Malta* on the 18th June. The dates are down to Sunday, the 26th, 9 A.M. The present mail brings a portion of the new teas from Foo-chow.

It is announced that the building of the Canton Consulate upon the Shameen site will be proceeded with immediately.

The *Evening Mail* records the following:—We are glad to learn that the City Hall share list promises to be well subscribed. If it were possible to raise $120,000 instead of $100,000, the money could be well laid out, as the style of the building, and its interior decoration, will be determined solely by the amount of money available. Another thing we might suggest. Mr. Robert Jardine, with the liberality that has always characterised his family, has offered to assist the undertaking up to $50,000, if necessary. We should endeavour to avail ourselves of the smallest portion of this sum possible. That is to say, we should act as if the amount of assistance promised was only to be drawn upon to the extent of assistance actually required. The community should do its best, and then see in what measure it wants Mr. Jardine's kind aid.

The shares are fixed at $100 each, and it is greatly to be preferred, we think, that they should be as widely distributed as possible, so that the interest in the building may be general. There will be an arrangement, we should imagine, by which a voice in the direction of the City Hall affairs will be given to all holding shares—not, of course, a vote per share, as that might enable a few heavy shareholders to swamp the rest, but much as they do in the conduct of a bank, where a vote is allowed to every five shares up to twenty votes, which is (in the case of the Agra Bank, at least) the largest number of votes allowed to one individual. Now, it would be well, in the case of our City Hall, that the community should be well represented, and every man who can afford it at all should take at least one share, and so acquire a right to have his say in the management. Not, we think, that there will ever arise any case for serious dispute or even for momentary dissatisfaction, but it is better for us to have the right to attend meetings and talk out boldly than to be compelled to have our grumble through letters or leading articles in the papers, though that means is not to be despised either. The great thing to be attained, and which we shall jealously watch for, is to keep as many votes as possible out of the hands of our wealthier brethren, and to get a vote for every small shareholder. We say this in good part, and only wish to be understood as desiring to have the care of the building, and its general prosperity, in many hands rather than in few. In this view of the matter, we may advise intending donors to put their money in the form of shares so as to secure a vote in the election of committees and in the framing of a sort of "constitution" that ought to be engrossed in the trust-deed, and which no committee should ever have the power of violating.

We have seen the present Amateur Committee made the subject of charges of fast and loose management, those charges being frequently false and brought forward in a somewhat offensive spirit. Our own opinion has always been that the amateurs did a great deal of work and got very little thanks for it from the organs of local opinion. The manner in which the tickets were taken up and the way in which the funds have prospered must have convinced them, however, by this time, that their efforts have been fully and widely appreciated by the community; and probably this form of response has proved more congenial to their feelings than the most elaborate newspaper applause. Be that as it may, the possibility of dissatisfaction can be taken away in the City Hall case by letting holders of scrip have a voice in the election of office-bearers; and we think that intended grumblers should take means to have themselves represented. We are saying nothing, we feel sure, that will at all jar with the ideas of those who have so kindly taken a leading share in promoting the erection of the building referred to. They have no desire to absorb the direction to themselves; indeed, the likelihood is that they would be quite as well pleased to get relieved of such a duty as not. We conclude by asking the attention of the present committee to our remarks on the subject present and future, and by advising people to show some interest in the matter by going to the Agra Bank and subscribing for shares.

The Hong Kong Volunteers, companies 1 and 2, marched out to fire a salute in honour of Her Majesty's accession to the throne. The muster took place at the Government Buildings—where the corps has its head-quarters—shortly after 5 P.M. The weather had been somewhat unsettled during the day, and it was feared that the march out would be interrupted by rain, but such did not prove to be the case. Four guns having been turned out after a little delay in waiting for the ponies (the horse-coolies having misunderstood their instructions), the corps formed the order of march, and proceeded to East Point by way of Queen's Road and the Praya, the band marching in front and playing various enlivening strains. Opposite the Artillery Barracks it was found necessary to unyoke one of the ponies as the animal was not sufficiently tractable for artillery harness and had managed to get one of its legs over the shafts. This *contre temps* was soon rectified by removing the pony and substituting manual power, and nothing further occurred to interrupt the march to East Point, which was reached shortly before sunset. Here there was a halt, when the guns were unlimbered on the quay in front of Messrs. Jardine, Matheson and Co.'s godowns, and a royal salute fired. The firing was very good, all the guns being well served, but the detonating tubes were found to be bad, no less than seven of them proving useless. They were afterwards ascertained to be old tubes that should have been condemned long ago. This did not, however, interfere with the regularity of the firing, as another gun was ready whenever one missed fire. After the firing was over, the band struck up the National Anthem, which was followed by the Commandant of the Corps ordering three cheers for the Queen, which were given with the usual enthusiasm, after which the word was given to break off. The Honourable Mr. Whittall and Mr. Henry Murray (of Messrs. Jardine, Matheson and Co.'s) then invited the various members to partake of some cool drinks which had been prepared for them, which the gallant Volunteers did with hearty goodwill. Nearly all the gentlemen connected with Messrs. Jardine's house turned out to witness the appearance of the corps, or to hear the band. Before giving the orders to limber up and re-form the line of march, the Commandant, for himself and the Volunteers, publicly thanked the Hon. Mr. Whittall and all connected with the house of Jardine, Matheson and Co., for the constant goodwill they have evinced towards the Volunteers. That was the third, if not the fourth occasion (he said) on which the corps had there been hospitably entertained, and they heartily thanked their entertainers for their many marks of sympathy and friendship. Three cheers having been given by the corps, the band played "For he's a jolly good fellow." Mr. Whittall, in reply, assured the Commandant of his strong sympathy for the Volunteers, and said he trusted this would not be the last time they should be partakers of his hospitality. Orders were then given to limber up, which was quickly done, the corps returning to town by Spring-gardens, the band leading, followed by two guns—the colours—two more guns—and the second (or rifle) company.

It was dark as they returned home, little being visible at a distance but a dense black mass of hill with a clear sharp outline against the sky. On the other side of that hill, thousands of miles away, were the homes and friends of the men who were marching into Hong Kong with their guns, rifles, cymbals, and trombones, and doing precisely what their friends are doing in England—learning to handle weapons of war. It is all the same at home or abroad, Englishmen like to maintain the same national practices. However different the clime, the mind is the same. *Cœlum non animum.*

The corps halted at Spring-gardens, when the band illuminated and resumed playing, the effect of which was that the somewhat long march to East Point and back was cheerfully concluded. We noticed that along the entire route out and in, large crowds of people lined the streets, and were, we hope, benefited by the sight of the guns. We should not be surprised if these periodical displays had a "moral" effect of their own, and helped in some measure to make our authority

Digitized by Google

respected. Be that as it may, it is evident that the Volunteer Corps is showing no signs of decay, seeing that, notwithstanding the threatening state of the weather, and the disagreeable remembrances of last turn-out, no fewer than 75 appeared on the present occasion, viz., Artillery (officers and men), 37; Rifle Company, 17; the band, 19; and two captains (commandant and adjutant); 75 in all. The next affair of note in connection with the Volunteers is likely to be firing with big guns at Kowloong, under the inspection of Capt. Kane, R.A., the day for which has not yet been fixed.

PHILIPPINES.

MANILA.

The dates from this port are up to the 21st of June. A fire broke out in the Government stores, and destroyed 87,000 quintals of tobacco.

JAVA AND NETHERLANDS INDIA.

Our dates from Batavia are to the 28th June. Advices from Europe to the 16th May reached there on the 22nd by the French mail.

The Governor-General arrived at Batavia on the 22nd June, from Samarang, where he had been to lay the foundation-stone of the railway station. His speech on the occasion was important. His Excellency said:—'It was the King's will that the railway should at all hazards go through, and that therefore he had used his every endeavour for the accomplishment of the same. That he had been materially assisted by the commercial community, and more especially by that of Samarang. That it was therefore that the grant given by him was so soon confirmed by the King. That the exertions of the company and of Mr. de Bordes had brought the affair far on its road towards a real commencement, and that there were many native chiefs who had come to him and tendered portions of ground through which the railroad might have to run, gratuitously. This railway was not to be considered a means simply for the transport of goods, persons, and cattle, but also as a means of furthering civilisation among the natives, and the amelioration of their condition. Still more it must be considered as a link in the chain which will bind, and which ought to bind Holland to Java and Java to Holland."

A number of Chinamen, sent up by the authorities of Timor Koepang, had arrived by one of the steamers from the Eastward. These people were passengers on board of the English barque *Euphrates*, Capt. D. Cowen, from Sydney to Hong Kong, which ship was obliged to put into Koepang, owing to a mutiny that broke out amongst said passengers. They would be sent up to Singapore by the first steamer leaving for that port.

It was reported that Sim Atjiet, a Chinaman reputed to be very wealthy, had absconded, leaving liabilities to some extent.

PROBOLINGO.

The Lamongan, after an intermission of five years, has again begun to emit lava. The eruption, which commenced on Thursday evening, the 9th June, was preceded by rumbling noises and detonations in the day time, and a heavy shower of ashes fell in the neighbourhood of Probolingo about 11 o'clock P.M. On the night of the 10th the eruption ceased.

SUMATRA.

Cotton still continued to be brought down from the interior to Palembang. The first exportation of the cleaned cotton by the Netherlands Indian Cotton Company from their establishment, took place at the commencement of the month.

At most places in the interior the inhabitants were busy cutting paddy and planting their second crops, most of which consisted of cotton.

At Ampat Lawang, Redjang and Lebong a brisk trade was being carried on in cotton goods, tobacco, &c., with Bencoolen.

The news from the capital and from the interior of Djambi is favourable. The inhabitants were beginning to occupy themselves more with the cultivation of coffee and cotton. Shipments of these articles to Singapore had already taken place.

BORNEO.

Sintang, a fort in the interior of Borneo, on the boundary of the Dutch possessions on the west-coast, is now the seat of war. Some time ago news arrived of disturbances in that quarter, which were then characterised as of a petty nature. They have since proved of more serious import. On the night of the 29th April a gunboat lying in the river near Fort Sintang was attacked by well-armed insurgents, who were, however, bravely repulsed by the Malay crew. In the morning Lieut. Colonel de Neve, commanding the forces in the West-Coast Residency, who had arrived at Sintang some time previously, embarked with a detachment on board of the gunboat, and proceeded up the river in quest of the enemy, with whom he came in contact, and completely routed at Soengi Nena. Colonel de Neve thereupon returned to Sintang, there to await reinforcements which had been ordered up from Pontianak, and which were hourly expected, in order with their aid to carry on operations on a more extensive scale. On their arrival he resolved to attack the enemy in his own strongholds. For this purpose two columns were formed, one of which marched against the enemy's entrenchments at Lobak Krandji, and the other against those at Selat. Both places were occupied with but little loss, but on the return sharp firing was heard towards Soengie Mau, on the banks o the Kajan river, where the reserve was stationed, and a detachment was sent on in advance, under the command of Captain de Leon, to lend assistance to the reserve, which was in all probability being attacked. Such was indeed the case, but the detachment taking the enemy, who seems to have been in force, in the rear, completely routed him, with the loss, however, of its gallant commander. On the 24th of May the troops returned per steamer to Sintang. The military Commandant has received orders to fortify himself at Sintang, and not to attempt further incursions into the enemy's territory before reinforcements arrive.

On the east coast of Borneo piracy has received a severe check at the hands of Lieutenant Bunnik, of H.N.M. steamer *de Berkel*, who has captured four piratical prows, together with the pirate chief Madjoe Soemi. According to the confession of the chief's brother, these prows had primarily belonged to a fleet of eleven vessels, six of which had been destroyed by a steamer near Labuan. This doubtless alludes to the feat of the *Rainbow*.

Mr. Assistant Resident Dahmen had penetrated as far as Upper Teweh. Former expeditions to those parts had hitherto been unsuccessful. Later news from Bandjermassin reports the death of this intrepid official a few days after the success of his expedition. H. M.'s steamship *Admiraal van Kinsbergen* had been sent to Montallet to fetch his body.

MALACCA STRAITS.

SINGAPORE.

The London mail of the 26th of May arrived on the 29th of June. Dates are now down to the 4th of July. The Governor was to leave for Malacca and Penang on the 5th, per *Pluto*. His Excellency laid the foundation-stone of the new Court House on the 4th. The mercantile failures continue to be the subject of discussion, and we understand that the result of Messrs. Almeida's estate will not be so favourable as stated in our last.

SHIPPING INTELLIGENCE.

ARRIVALS.

At HONG KONG.—From Liverpool: June 24, Horsa. From Sunderland: 25, Northland. From Newcastle: 13, Ramoline. From Newport: 15, Sailor's Home; 25, Ina. From Hartlepool: 21, Carausius. From Cardiff: 25, Carthage, Venus. From Bordeaux: Siam. From New York: 14, Dennis Horton.

At SINGAPORE.—From London: July 3, Prince Alfred. From Plymouth: Hoop. From Cardiff: H. G. Susanne. From Shields: Volunteer.

DEPARTURES.

From JAPAN.—For London: May 27, Twee Cornelissen; June 9, Patricia, and, 10, Merse.

From SHANGHAI.—For London: June 19, Sea King (str.). For Liverpool: 14, Ziba.

From FOO-CHOW.—For London: June 16, City of Aberdeen, and, 17, Yangtsze.

From HONG KONG.—For London: June 25, Kelso.

From SINGAPORE.—For London: June 24, Daniel Rankin; 29, Bonanza, and, July 1, Miss Nightingale.

From FOO-CHOW.—For London: June 4, Robin Hood, and 11, Min.

LOADING.

At JAPAN.—For London: Yokohama, Natal, Tien-tsin and Amoy. For Liverpool: Red Deer.

At FOO-CHOW.—For London: Gorilla, Dora, Croukbane, Childers, Ellen Rodgers, Holmsdale, Whinfell and Mercury.

At SINGAPORE.—For Liverpool: Invincible.

CASUALTIES.

HONG KONG.

The mail steamer Malta reports having passed the British barque Carausius, from Hartlepool to Hong Kong, on the 16th June, and on the same day she also saw a British barque, showing No. 3d d.p. 7,619, working to the southward. She experienced fine weather, with a light southerly breeze, up the China Sea.

PASSED STRAITS OF SUNDA.

FROM ENGLAND AND CONTINENT TO CHINA, &c.—June 9, Mountain Ash, London to Kanagawa; Falcon, Glasgow to Batavia; 11, Glenisla, Glasgow to Batavia; Louis, Cardiff to Hong Kong; 13 Volunteer, Shields to Singapore; 17, San Louis, London.

FROM CHINA, &c., TO ENGLAND AND CONTINENT.—June 11, Netherby, Foochow to London; 13, Henry Puddomsey, Singapore to Liverpool; 14, Glencoe, Hong Kong to Liverpool; 17, Benvoirlich, Shanghai to London; 23, Tartar, Singapore to London; Alavasa, Manila to London.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—August 6, at Falmouth, from Akyab, Manlius, Lawrence Brown; at Queenstown, from Rangoon, Alardus; from Maulmain, Agenoria; 8, at Hamburg, from Akyab, Betty, Ariel; at Texel, from Banjoewangie, Maria Catharina.

DEPARTURES.—August 8, from Liverpool for Singapore, Richard Cobden; 3, from Sunderland for Singapore, Fontenaye, Antrim.

SPOKEN.—4 Gezusters, Rotterdam to Batavia, June 30, 3 N., 27 W.; Lalla Rookh, for Shanghai, July 10, 10 N., 26 W.; Cosmopolitan (?) (Dutch ship), Batavia to Rotterdam, July 4, 11 N., 25 W.

LAID ON.—At Liverpool, for Batavia and Sourabaya, Hercules. At Glasgow, for Manila, Luzon (str.).

The Julie, Perin, from Iloilo to London, which put into Mauritius June 10, leaky, had her cargo completely damaged, and part of it had been sold, her mainmast was also rotten, and would be replaced.

REFORM IN THE ADMINISTRATION OF FRENCH COCHIN-CHINA.

To the Editor of the London and China Telegraph.

SIR,—I beg to offer a few remarks on the above subject alluded to in your last issue.

After a variety of attempts at colonisation, which have proved most disastrous to the country, the French appear to be on the eve of making a last experiment in Cochin-China.

The faith hitherto placed in admirals and midshipmen is now to devolve upon civilians of more or less experience, and it is to be hoped that some success will reward their efforts.

Of the last three Governors little can be said which would redound to the glory of their administration. The first is reported to have been well intentioned, though weak, but cannot be said to have had a fair trial, since he was removed before the country was pacified. The second introduced that peculiar morality which distinguished his career in Tahiti; and the third and present one has had to reap the tares his predecessor had sown.

The natural result is that the country is impoverished; every native who could get away has fled; and the new administration will, at any rate, have a clear field to commence operations on. That the country is capable of vast improvement is admitted by all who have visited it, and under a wise and prudent Government it would shortly recover its lost position, and prove a source of revenue instead of, as now, a heavy expense. It would, however, be as well if the new Governor were to visit British India and Java, and endeavour to profit by the experience of the two great nations which have so successfully ruled in the East. Faults would doubtless be found, but these could be avoided, and many good regulations adopted which would ensure success.

There is one stumbling-block which I take the liberty to point out. Care should be taken to organise the proper administration of what is held before fresh conquests increase the difficulties of the position. It might be well to remember the trite adage of "*Qui trop embrasse mal etreint.*"—Yours &c.,

VIATOR.

August 5, 1864.

CAMBODIAN AFFAIRS.

To the Editor of the London and China Telegraph.

SIR,—In reference to the valuable article upon Cambodian affairs, which appeared in your issue of the 2nd inst., I think it may be interesting to you to be informed of the sequel.

The present French mail has brought the news of the arrival of the French and Siamese representatives at Udong upon the 28th May, the coronation ceremonies of Phra Naradom being completed upon the 3rd June, under their joint auspices. The hostility of the nobles would seem to have ceased, as the country was generally in a peaceful condition.—I am, Sir, yours truly,

CAMBODIAN.

London, 8th August, 1864.

COLONEL GORDON.

(*The Times.*)

The part of a soldier of fortune is in these days very difficult to play with honour. Even in times more addicted to admiration of brute courage and more tolerant of the greed of plunder, the Free Lances and the Conquistadores were apt to degenerate into mere vulgar ruffians and to be abhorred as scourges of mankind. They lack the noble cause, and the motive of patriotism, and the obligation of duty, which alone can give respectability to deeds of bloodshed. What Voltaire calls "*l'art degorger son prochain*" is not to be encouraged except under severe limitations, and it is a salutary horror which mankind in general feel for the man who goes forth to slay his kind in a quarrel which is not his own. But if ever the actions of a soldier fighting in a foreign service ought to be viewed with indulgence and even with admiration, this exceptional tribute is due to Colonel Gordon, whose career as a Chinese officer has just been terminated by the disbanding of his force of disciplined Chinese, and by his own retirement, at the command of the British Government.

If Colonel Gordon was not fighting in the cause of his own country, he was risking his life and expending his energy in the general interests of humanity. His acts had the sanction of his own Government, and his efforts were directed to put down the most horrible system of massacre that has ever existed upon the earth. His operations were conducted in a territory where, in a radius of thirty miles of once closely-peopled country not a house had been left standing, except a little village where had congregated some thousands of inhabitants who clung to life although mere skeletons from want. As a specimen of the scenes which met him every moment in his onward marches he gives one which must make strong men

Digitized by Google

shudder. "As a specimen," he says, "one young girl lay dead with her hands tied behind her back, her breasts cut off, and her middle split up, while little children lay about in every direction with their throats cut." A man may justify to himself and to the world any efforts which may have a tendency to check the repetition of scenes like these; and as we read the account of this officer's deeds in the Blue-book just issued we are constrained to the belief that never did soldier of fortune deport himself with a nicer sense of military honour, with more gallantry against the resisting and with more mercy towards the vanquished, with more disinterested neglect of opportunities of personal advantage, or with more entire devotion to the objects and desires of his own Government, than this officer, who, after all his victories, has just laid down his sword. A history of operations among cities of uncouth names, and in provinces the geography of which is unknown except to special students, would be tedious and uninstructive. The result of Colonel Gordon's operations, however, is this:—He found the richest and most fertile districts of China in the hands of the most savage brigands. The silk districts were the scenes of their cruelty and riot, and the great historical cities of Hangchow and Soochow were rapidly following the fate of Nanking, and were becoming desolate ruins in their possession. Gordon has cut the rebellion in half, has recovered the great cities, has isolated and utterly discouraged the fragments of the brigand power, and has left the marauders nothing but a few tracts of devastated country and their stronghold at Nanking. All this he has effected, first by the power of his arms, and afterwards still more rapidly by the terror of his name. In his desperate adventures he was sometimes baffled, and the frequency with which he has been wounded shows how necessary it was for him to inspire his followers by his example as well as to lead them with military skill. With fewer scruples and less care for home opinions, men have carved out kingdoms and founded dynasties from opportunities less tempting than those which Colonel Gordon has neglected. He would probably have done much more than he has done, and would have added Nanking to his conquests, had he not been disgusted by the treachery of the Mandarin under whose orders he was placed. The principal portion of the collection of despatches just published is occupied by a history of the negotiations and proceedings at the capture of Soochow. The story is long since well-known in England. The public were sufficiently scandalised by the circumstance to need no recapitulation of the details. There can be no reasonable doubt that the Mandarin in command had obtained possession of the city of Soochow and the surrender of the rebel leaders upon solemn assurance of the personal safety of the prisoners, and by reason of the confidence which the name and high reputation of Colonel Gordon inspired. It is still more indisputable that as soon as that Mandarin got these chiefs in his power he managed to withdraw them from the protection of Colonel Gordon and to put them to death. This is the indignant complaint of Colonel Gordon, it is the report of General Brown, it is the despatch of Sir Frederick Bruce. The Mandarin himself avows the crime and accepts its responsibility. Colonel Gordon had the full approval of the Commander-in-Chief and of the British Minister when he declared that he could hold no communication with a man who had thus compromised him by his treachery and cruelty. At a very critical period he remained entirely inactive. The reasons which induced him ultimately to return to action are given in these papers, and as they were thought by General Brown and Sir Frederick Bruce of sufficient weight to overbalance the scruples suggested by the conduct of the Footai, we must hold that Colonel Gordon was right in his discretion, as he was certainly right in his motive, when he once more led his disciplined Chinese in the service of a master who had so grievously betrayed him. There is no doubt, upon the evidence before us, that his wish was to retire at once from his position, and he remained only at the desire of Sir Frederick Bruce, who feared that his followers would go over to the Taipings and exaggerate the existing confusion. Sir Frederick Bruce justifies in a despatch to Earl Russell the advice he then gave. He says, "I have confidence both in the rectitude of his motives and in the soundness of his judgment, and as he is the only person thoroughly acquainted with the position of affairs near Soochow, and with the character of the corps he commands, I thought it due to him to give him all the support in my power. I have also provided, as far as possible, against the recurrence of what took place at the capture of Soochow, and after what happened on that occasion Major Gordon will avoid the mistake he then made of taking part in the parleys with the insurgents without being made acquainted with the terms of surrender, and without being present to see that the terms are respected. It is indispensable that officers of character should remain at the head of these semi-disciplined Chinese corps until tranquillity is sufficiently restored, so as to allow of their being dissolved without danger. Otherwise not only would the results already achieved be sacrificed, but the prospect of the restoration of tranquillity would be indefinitely postponed. The magistrates, elders, and population of the pacified districts have united in entreating Major Gordon to continue in the command; and every person of humanity must feel anxious that they should not be exposed to a repetition of the sufferings they have endured since the insurgents appeared in the province."

It is right that an officer who has acted well under difficult circumstances should stand fully acquitted before his countrymen when he is retiring from the scene of his exploits. But we are by no means sorry that Colonel Gordon's career as an officer of the Governor of a Chinese province is at an end. We would not willingly be drawn into even a partial responsibility for the effects of what Sir Frederick calls Chinese ethics, and so long as an English officer in the Chinese service was leading a body of troops to the capture of successive cities, and was at the same time in close correspondence with the Commander-in-Chief of the British forces and with the British Minister, it would be in vain to deny that we are all in some measure liable to be implicated in any massacres that may be committed by our officer's Chinese masters. As the Chinese Government would not accept our aid on the only terms upon which we could offer it with any safety for our good name, we must leave these people to fight their own battles. It seems that some of Colonel Gordon's men have taken service with the authorities of Shanghai. Are these Treaty Ports already taking the position to which all things seem to point as their ultimate destiny? Are the Free Cities of the Extreme East already levying armies?

CHINESE EMIGRATION, &c.

The following is extracted from the report for 1864 of the Emigration Commissioners:—

"During the two seasons terminating in March last only two vessels have been chartered for the conveyance of Chinese emigrants to the West Indies. The first of these vessels, the *Ganges*, sailed at the close of the season of 1862-3 with 413 emigrants, of whom 293 were men, 100 women, and 20 children, and arrived in Demerara on June 29 last in admirable order, after a passage of 84 days. Besides five infants, there died on the voyage seven men and eight women, making together 20 deaths, or a mortality of 4.83 per cent. The other ship, the *Zouave*, sailed from Canton, on Dec. 21 last, with 337 men, 157 women, 16 boys, 2 girls, and 5 infants, equal to 503 statute adults. She arrived in British Guiana on Feb. 29, after a voyage of 70 days, having lost 10 by death, equal to a mortality of 1.93 per cent.

"With a view to diminish the expense of Chinese emigration, which has been the principal objection to it, the colonies of British Guiana and Trinidad have agreed to receive a certain number of emigrants each during the next three years. The number agreed upon is 2,000, of whom 1,250, or five-eighths, are to be received by British Guiana, and the remaining three-eighths, or 750, by Trinidad. It is hoped that by this arrangement the cost of the establishment in China will be materially reduced by being spread over a wider area, while the cost of shipping, which has hitherto been enhanced by the uncertainty of the demand, will likewise be lessened; and that Chinese emigrants may be landed in the West Indies at an expense not exceeding from £20 to £25 per statute adult. That sum, considering that they do not stipulate for a return passage, would not exceed the expense of the Indian immigrant. The conduct of the emigration is entrusted to Mr. Sampson, who was emigration agent at Canton under Mr. Austin, and who despatched the two vessels, the *Ganges* and *Zouave*, above alluded to, and it is intended for the present to draw the emigrants from the province of Kwantung."

"We have received information of only one land sale in Hong Kong in 1863; but in that case, on 12 lots sold at $363 annual rent, the premium realised was $6,490. These lots were put up to sale in consequence of the increased demand for land for the growth of English vegetables and garden purposes."

"In the month of November the Legislative Council of Labuan passed an ordinance to provide for the disposal of Crown lands in that colony. By this ordinance it is provided that land in the colony shall be classified as town, suburban, and country land; that it shall be let on leases of 999 years, which shall be sold by auction at an upset price, the bidding to be on a premium for the lease. The quitrents are to be paid annually in advance, and to be redeemable at 10 years' purchase, and redemption is made compulsory when by sub-division of an allotment the quitrent falls below $1 per annum. Lots of which the quitrent is in arrear for 12 months, or which remain uncultivated or unimproved for three years, are liable to forfeiture. All coal and minerals, with a right of entry to work them, are reserved to the Crown. This ordinance has, we believe, received Her Majesty's approval.

"The Labuan Company, whose operations were noticed in our report of last year, have recently applied for the grant of a lease of the coal mines in that colony. By the licence granted to the company in 1860 they obtained the exclusive right of searching and digging for coal in Labuan, with the promise of a lease for 21 years, provided in the year ending Dec. 25, 1862, they should raise not less than 15,000 tons of coal. This period was afterwards extended, under the circumstances stated in our report of last year, to Dec. 25, 1863. In January last the company applied for a lease. Accounts of the coal raised to Dec. 25 had not, of course, been at that time received, and there was reason to believe that when received they would show that the quantity fell somewhat short of the quantity stipulated in the agreement of June, 1860. Nevertheless, the Duke of Newcastle being of opinion that sufficient had been done to show the determination and ability of the company to work the mines, decided, in the interest of the public, to grant the lease, and instructed us to take the necessary steps for that purpose."

ADMIRALTY COURT.

THE "PALMERSTON" V. THE "MEDINA."—SALVAGE.

(Before Dr. Lushington.)

On the 13th February last the barque *Medina*, 357 tons register, from Yokohama, in Japan, with a general cargo, from London, when off the Admiralty Pier at Dover, her anchor caught the mooring of the guys of that part of the pier still in course of construction. The steamtug *Palmerston*, belonging to the Dover Harbour Board, towed her away from that position, for which service she now claimed compensation. The wind was stated as S.W. and by S., and it was represented that there was a nasty sea rolling in at the pier. It was alleged on the one side, and denied on the other, that the *Medina* and cargo were saved from total loss. A tender was made of £200 to the Salvors, which they rejected, the value of the property salved being £37,500.

The Court was assisted by Captain Redman and Captain Weller.

The Queen's Advocate and Mr. V. Lushington appeared for the salvors; Dr. Deane, Q C., and Mr. E. C. Clarkson for the owners.

The Court and Elder Brethren having retired for consultation, upon their return,

Dr. Lushington said: I am advised by the gentlemen with whose assistance I have been favoured that the *Medina* was in a considerable state of danger, and they are also of opinion that the tug was not in danger. Under these circumstances it remains for the Court to say whether the tender which has been made is sufficient or not, taking into account the large value of the property, £37,000. I do not think the Court ought to diminish the rate of salvage by reason of the supposed ownership of the *Palmerston*, for I apprehend a vessel performing duty, whatever it may be, whether she is harbour property or not, is entitled to be paid exactly upon the same footing as any other vessel performing a like duty. Looking at the whole, I am of opinion the tender is insufficient, and I shall give the sum of £500. Costs.

LONDON, MONDAY, AUGUST 8, 1864.

THE NEW ORDER IN COUNCIL FOR CHINA.

In our last number we printed an Order in Council passed at Windsor on the 9th of July, to which reference was made in the House of Commons by the Under Secretary for Foreign Affairs, when he informed hon. members that under its stipulations Major Gordon and other British subjects in the military service of the Emperor of China would have to resign their commissions in the Anglo-Chinese force. According to this Order in Council we do not see that any previous Order or Act of Parliament affecting the question has been rescinded. All that we find as the basis of the new Order is the expediency of explaining and amending the Hong Kong Ordinance of 1855, making it penal for any British subject "to assist either the existing Chinese Government, or any of the factions engaged," by personal enlistment in their service, or to supply them with munitions of war. But this Ordinance was superseded by the Order in Council which allowed British soldiers, sailors, and other subjects to enter the service of the Emperor of China (but not that of opposing factions), at the time of the formation of the Anglo-Chinese land and sea forces. As far as this order is concerned, it only affects the tenour of the one alluded to in Clause 1, wherein it states that no penal Act or Ordinance previously existing extends to any British subject "who may "have assisted, or who may hereafter assist, the Government "of the Emperor of China, by or under the *leave or licence* of "Her Majesty, or by or under the authority of any Order of "Her Majesty in Council, at any time heretofore made, or to "be hereafter made." Showing that should circumstances again arise when it would be conducive to the interests of British subjects, and the protection of their property in China, or the requirements of British policy in that empire, officers and men of the two services may again assist the Imperial Government, and new forces be raised under our auspices.

While these discretionary powers continue in abeyance with regard to British subjects holding, or who may hold, appointments in the Chinese service by licence of Her Majesty, this Order in Council considers it expedient "that further provi-"sions should be made to prevent the participation of British "subjects within the dominion of the Emperor of China in "acts of war or rebellion against the said Emperor." Herein the whole of the penal clauses and stringent regulations contained in the previous Acts of Parliament, Order in Council, and local ordinances, are not only enforced against such persons, but fresh penalties added, in deportation from the country; and should such offenders return, "they shall be liable to be "proceeded against and punished, and to be sent out of the "said dominions, and so from time to time," should they persist in returning. This clause is evidently designed to check the disgraceful traffic in articles contraband of war carried on by unscrupulous traders at Ningpo, Shanghai, and on the Yangtze River. Latterly, these speculators have found it a losing trade, as the power and means of the Taipings have declined. Still, it is just possible that the withdrawal of British commanders over the native disciplined forces may have the effect of renewing the rebel prospects, and by fresh depredations means may be secured to purchase munitions of war from illegitimate merchants, who import "umbrellas of the Enfield pattern," and *quasi* missionaries, who distribute tracts of "percussion-cap tendencies." In these cases, the New Order in Council will have a wholesome effect in crushing a disgraceful and demoralising traffic.

There is an erroneous impression abroad that the previous Acts, Ordinances, and Orders in Council referred to in this decree applied to Her Majesty's military and naval Commanders-in-Chief on the China station, engaged in the operations against the Taipings when they threatened British life and property at Shanghai, Ningpo, and other treaty ports, where our Consuls and fellow-subjects are located. This Order in Council in no way applies to the acts of Admiral Hope or Generals Staveley and Brown when they drove the Taipings, by force of arms, from the vicinity of our settlements; inasmuch as these were engagements against a common enemy, come to plunder and destroy. Perhaps the only occasion when British officers came under the stipulations of the Order in Council was when Captain Dew, of H.M.S. *Encounter*, proceeded, with a volunteer party, to the bombardment of Shao-shing, when Lieut. Tinling was unfortunately killed. But as that officer has received the rank of C.B. for his services in China, it is to be presumed that the Government has *condoned* his indiscretion on that occasion. At all events, he is now in England, so that hon. members of Parliament will have an opportunity of bringing him to book.

SINGAPORE GOVERNORSHIP.

The period has now arrived when the group of British Settlements in the Malacca Straits have attained their majority, and will leave the leading strings of the Indian administrations. As a foster mother that Government has long been neglectful of these external dependencies, which, in a great measure, has been the cause of their weakness and slow development. Now the transfer of their administration is resolved upon, and next session will see them under the direct control of the Colonial Office. These dependencies of a dependency will no longer have to submit to the neglect of a subsidiary executive, whose hands have been too often so full of home affairs of moment that they had neither time nor inclination to attend to those of exotic colonies, such as Singapore, Malacca, or Penang. At last justice is to be done, and they are to be ranked among the jewels that bedeck the Crown of Her Majesty's Colonial Empire, with power to appeal direct to the fountain-head of Government, free from the trammels and delays of the Indian Council. Under these circumstances it behoves the Secretary of State for Colonial Affairs to re-model the local Executive, and appoint a new Governor for Singapore, fully qualified for the onerous post before him, and armed with ample powers to carry out the administration of that colony and the neighbouring minor dependencies with a vigour and progress equal to that which distinguishes our Australian possessions. Hitherto the governors of Singapore have been almost exclusively military men, bred up in the stereotyped school of an Indian Durbar. With the exception of Sir Stamford Raffles, scarcely one of the many governors who have held office in the Straits Settlements has either shown the will or the way to raise them in the colonial scale of self-dependence. We have no desire to cast reflections upon the character of the several administrators of affairs at Singapore, since the time of Raffles, but it is well known that the educational and other institutions founded by him for the improvement of the intelligent natives have become effete for want of gubernatorial patronage; and a helping hand has rarely been put forth to develope the commercial resources of the magnificent port. Not only has there been much neglect, but a want of capacity, among the governors of Singapore, in fulfilling the duties of the office they have held; which continues to the present day. In this respect the British representative has been and is inferior to the stamp of men sent out by the Dutch Government to Java, or in more recent times by the French Government to Cochin-China. The proximity of these rising colonies is giving a further impetus to Singapore, as the central port by which communication is kept up for them with Europe to the west, and China on the east. The vast postal and commercial traffic passing through the harbour is alone daily forming it into one of our most important stations in the Far East, whether for the purposes of peace or war. It is, therefore, high time that a governor should be installed there to hold the reins of government with a firm hand, and to maintain the prestige of England among these settlements, commensurate with our position elsewhere. The day may be

Digitized by Google

not far distant when affairs of moment may transpire, involving diplomatic decision of the highest order, in communicating with the French Governor of Saigon; and it would be only a matter of political prudence to have a competent governor at the helm of affairs in our fine colony of Singapore. Siam appears to be alive to the importance of being represented in European capitals, having appointed M. D. K. Mason (lately returned from Bangkok) consul in London, and this gentleman's appointment has duly appeared in the *London Gazette*.

SIR F. BRUCE AND PRINCE KUNG.

The following important despatch has just been published :—

PEKING, JUNE 16, 1863.

Sir,—Your Imperial Highness will have received the note I had the honour to address you on the 9th instant, inclosing a memorandum of the substance of certain observations I had felt it my duty to make when I met your Imperial Highness on the 7th instant.

As regards the first of the two important subjects to which my observations related, the foreign policy of China, I shall add nothing to what I have already said, upon the danger which the empire will incur, should its Government fail promptly and completely to satisfy the representatives of other states who are awaiting its action. My present business is with the claims of my own Government.

I put first on the list the forcible exclusion of Her Majesty's consul from Chaothou, and the refusal of the authorities at Ningpo and Shanghai to refund transit duties surcharged to British subjects. I place these foremost because his Imperial Highness has fully admitted the justice of my representations regarding these, and has more than once promised that the wrong done should be set right.

But complaints are incessant from almost every port, of entire indifference on the part of the authorities to the provisions of the treaties affecting transit duties, passports, the free employment of Chinese, the acquisition of building sites, and the recovery of debts.

I do not deem it worth while to go more into detail, because there is no case before me in the catalogue of those still unsettled which could not have been disposed of without reference to the capital, and which could not now be disposed of in a few days, were the local authorities persuaded of the fact that the treaties form part of the law of the land, and that neglect or violation of their provisions will be denounced and punished as breaches of the law.

It was to inculcate upon the Provincial Government this proposition, so important to the peace of the empire in its external relations, that I urged your Imperial Highness many months ago to obtain a decree in the above terms, addressed to the local authorities throughout the empire. Your Imperial Highness assured me that a circular of instructions which you communicated to me would obtain the desired end, and as I was indifferent to the form, I insisted no further. But it is not too much to affirm that up to the present time the circular has produced no effect whatever. The grievances then unredressed remain unredressed still, and fresh grievances are constantly occurring. Indeed, at Hankow, the authorities deliberately violate the treaties in the matter of transit duties, and at Swatow they refuse to issue passports unless the words "for purposes of trade" be excluded, alleging that this departure from the letter of the treaty is in obedience to the express commands of the Tsung-li-ya-men (Foreign Board).

Under these circumstances I am driven to one of two conclusions. Either the Imperial Government is unwilling to use its influence to cause the treaties to be fairly carried out, or it has not the power to cause its orders to be obeyed. It then becomes my duty to bring these facts under the consideration of Her Majesty's Government as soon as possible, in order that it may decide on the propriety of discontinuing the moral and material aid hitherto afforded to the Chinese Government, and confine its efforts to the protection of its own interests in China. It will become impossible for me to allow officers to remain in the service of the Chinese Government, and if the Government is unable to afford us protection against the insurgents at any of the open ports, and we are consequently obliged to keep troops there, the revenues of the port must be applied to meet the cost of defence, and the payment of the indemnities and the present co-operation with the Chinese Government must cease.

I informed your Imperial Highness long since that such would be the case if the Chinese Government persisted, on the one hand, in unfriendly action, and on the other in refusing to adopt the improvements which the state of the empire render necessary; and I must state distinctly that I cannot authorise the employment of British officers, naval or military, except under the following conditions :—

1. That the Imperial Government take into its own hands the Customs revenues as a means of ensuring the regular payment of the force, in order that discipline may be preserved.

2. That these forces be directly under the Imperial Government, from which alone they are to receive their orders, and to which only they are to be responsible. They will thus act with the provincial authorities, but will not be under their control. It is for your Imperial Highness to decide whether you will make use of British officers. It is for me to point out the conditions on which alone their services are to be had.

I must request your Imperial Highness to give me an explicit answer on the propositions contained in this despatch at an early date.—I have, &c., (Signed) FREDERICK W. A. BRUCE.

PRINCE KUNG TO SIR F. BRUCE.

[Translation.]

The Prince of Kung makes a communication in reply.

The Prince is in receipt of the British minister's despatch of the 16th instant. The memorandum transmitted him on the 9th June, relating to the two important questions, of the policy of China towards foreign nations, and her administration of her finances and her army, his highness has perused, as also all other matters contained in the despatch under acknowledgment.

The Prince was considering a reply to the British minister's note of the 9th, when his Excellency's despatch arrived. With reference to the proposition on which it insists, that the treaty should rank with the law, the Prince has to observe that the principle that the treaty is identical with the laws of the Imperial Government, and that breach of treaty is the same thing as violation of the law, is the principle on which the Government of China proceeds, and that its only desire is that foreign nations should regard the treaty in the same light, as there would then, to the end of time, be peace between the native and the foreigner.

As regards the cases still undetermined in the provinces, the Prince hopes that the British minister will refer to the record, and inform him case by case of the particulars of each, and the ya-men will at once write to the provincial governments concerned, to hurry them with the cases enumerated.

The ya-men will, on its part, supply the British minister with a list of the cases still undecided by British authorities, and will request his excellency to send them orders to use equal expedition. Under these conditions neither side will have a pretext for complaint.

As regards improvements in military organisation in the forces, British and French, now co-operating against the rebels at Shanghae and Ningpo, there are foreign officers and troops not paid by China, and there are foreign officers engaged by China to command troops, and the arrangement under which there is such a variety of denominations as to render uniformity of system impossible, is without doubt a bad one. The despatch under acknowledgment observes that, while it rests entirely with the Prince to engage British officers or not to assist the Chinese Government, the authorisation to accept such engagement lies solely with the British minister (?).

This reasoning is perfectly fair, and the Prince, after giving the matter the fullest consideration, is of opinion that, in order to the prevention of confusion, it is his duty, before proceeding further, to lay down certain distinctions.

Where British troops are engaged in protecting the mercantile community at one of the ports, these being troops placed there by the British Government, which objects to their moving away from the port, the co-operation of such troops against any rebels that may approach the port rests entirely with the foreign government. These troops, not being in Chinese pay, nor subject to Chinese control, the Chinese Government has certainly no right to direct their movements, nor has it anything to say to their discipline.

This there can be no question about. But when the Chinese Government purchases vessels and guns, and appoints a high officer to take command of them, the foreign military officers whom it may engage to assist in the instruction of its forces, inasmuch as these are in the pay of the Government, cannot limit their services to action against the enemy only at the ports of trade. Their movements and the distribution of them must be entirely under the direction of the Chinese Government.

The decision of the question whether these officers shall be authorised to serve China must undoubtedly lie with the British Minister, and if his Excellency will not authorise their doing so there is an end of the matter; but if they be authorised to lend their aid, it will be for the Prince alone to decide under whose command they are to be, and from what source they are to be paid.

After this plain declaration of the merits of the question, there cannot be on either side any usurpation of the authority proper to the other, and this understanding arrived at, all the remaining points involved in that case can be settled by discussion.

It is the Prince's duty to reply, and he trusts that his Excellency, when he shall have duly considered the matter, will reply.

A necessary communication, &c.

SIR F. BRUCE TO PRINCE KUNG.

PEKING, JULY 2, 1863.

Sir,—I have received the reply of your Imperial Highness to my despatch of the 16th of June.

Your Imperial Highness states in explicit terms that the Government of China recognises the treaties as the law of the empire in its relations with foreigners, and that breaches of treaty are considered as violations of those laws. But the despatch of your Imperial Highness contains nothing to show that this principle will be carried out in practice. I stated instances at Hankow and Swatow in which the authorities, in spite of the remonstrances of Her Majesty's consuls, have deliberately set aside the letter of the treaty for no other object that to curtail the privileges of Her Majesty's subjects. Your Imperial Highness in your reply does not allude to these cases, nor do you inform me that any steps have been taken to remedy these grievances or to prevent a repetition of such conduct. I am simply requested to send in a list of the grievances complained of, and I am informed that the local authorities will be urged to settle them with speed. Such a proposal is entirely unsatisfactory, for what reason have I to suppose that the instructions now to be sent by your Imperial Highness will be attended to when I see that the orders which I am assured were given by your Imperial Highness for the redress of outrages such as that committed on Her Majesty's Consul at Chao-chow-foo, and for the repayment of surcharges at Shanghai and Hankow, have been disobeyed?

Moreover, I do not complain of particular acts only; I complain of the disregard generally shown to treaty obligations by the local authorities, and to the constant complaints I receive from the ports of the levy of excessive duties, and of the refusal to repay surcharges improperly levied, &c.

Some time ago I suggested to your Imperial Highness that in the latter class of cases, where the Foreign Commissioner of Custom differs in opinion from the Chinese authority, and considers that the lower rate of duty is the one justly due, or that a surcharge should be repaid, the opinion of the Foreign Commissioner should prevail until the question be decided at Peking. In such matters of detail it is evident that the Foreign Commissioner, whose sole duty it is to transact business of this kind, is far more likely to be right than the Chinese authority, who has many other duties to perform. Had your Imperial Highness adopted this suggestion, many of the lesser complaints would have been avoided.

With respect to the deliberate breach of treaty stipulations, of which I gave instances both at Hankow and Swatow, I have simply to observe, that as long as the Imperial Government refuses to proceed in the usual Chinese form against local officers for these breaches of law, the Govern-

Digitized by Google

ment becomes itself responsible for these acts by the impunity it accords to its subordinate agents. I feel convinced that if your Imperial Highness had obtained a decree in terms I suggested eighteen months ago, and [the provincial authorities had seen that it would be really enforced, the subsequent acts complained of would not have been committed.

My object since I have been at Peking has been to seek for redress through the Imperial Government, and to do away with the necessity of seeking redress by forcible demonstrations at the ports for violations of treaty. But it is evident that the reluctance of your Imperial Highness to enter frankly into this policy renders my efforts ineffectual, and will force ultimately Her Majesty's Government to adopt the former proceeding, which is inconsistent with friendly relations, and which has proved the source of disaster to China.

In the meantime I shall address a circular to the consuls at the different ports to bring all matters in dispute again before the notice of the local authorities, with a view to their speedy settlement. I shall be able to judge from the result how far the instructions given to them by your Imperial Highness are sufficient to induce them to act in accordance with the treaty.

As to the employment of foreign officers, I repeat that it is necessary for the security of China that the Imperial Government should undertake the question of military organisation, and not leave it to the provincial officers. For no officer of character will serve unless the terms on which he lends his services and his position are recognised by the Imperial Government. The system hitherto pursued at Chinkiang and Kiang-soo is full of danger to all who are interested in the tranquillity of China.—I have, &c., (Signed) Frederick W. A. Bruce.

JAPAN.

The following are the despatches referred to in Parliament, &c., recorded in our last issue :—

Head-quarters, Hong Kong, 30 May, 1864.

My Lord,—I have the honour to enclose a copy of a despatch from Sir Rutherford Alcock, requesting the remainder of Her Majesty's 2/20th Regiment, now at Hong Kong, to be sent on to Yokohama, with as little delay as possible, for service in Japan; and, as soon as transport can be provided by the navy, the troops will be despatched.

I have to add, I shall for the present detain the women and children at Hong Kong.

I beg also to forward a copy of Colonel Gordon's proceedings up to the latest date. I have, &c.,

(Signed) W. G. Brown,
Major-General commanding Her Britannic Majesty's troops in China.

The Right Honourable the Secretary of State for War,
War-office, London, S.W.

Her Majesty's Legation, Yokohama, 14 May, 1864.

Sir,—The present aspect of affairs in this country renders it expedient, in my opinion, that the remainder of the 20th Regiment, now at Hong Kong, should be sent here.

I have, therefore, requested Vice-Admiral Sir A. Kuper to place the means of transport at your disposal, and have now to beg that advantage may be taken of it to send the remaining portion with as little delay as possible.

I have called upon the Japanese Government to provide the necessary barrack accommodation, and I trust that it may be ready for them on their arrival. Barrack furniture, however, will be found, and if, as I understand, it has already been supplied to the regiment, I think it would be desirable that they should bring what they may require with them.

As regards tent equipage, my present object is to have the regiment quartered here for the protection of this settlement, in the event of the squadron being required to undertake operations at a distance.

But it is impossible to say, in view of future contingencies and the unsettled state of the country, whether the regiment, or a portion of it, may not also be required to enter into active operations away from this place. I have, &c.,

(Signed) Rutherford Alcock,
Her Majesty's Envoy Extraordinary, and Minister Plenipotentiary in Japan.

Major-General Brown, C.B., commanding Her Majesty's troops in China, Hong Kong.

RAILWAYS IN CHINA.

(RAILWAY NEWS.)

It is a remarkable fact that at this moment the condition of the remote empire of China is becoming as important and also as perplexing a question for English statesmen as that old standing difficulty—the condition of the sister isle of Ireland. The reason of this it is not difficult to discover. We have a large interest at stake in China. During the last ten or twelve years a vast commerce has been developed between Great Britain and the Celestial Empire, and year by year it is rapidly increasing. We get more tea and silk from the Chinese than we used to do, and they have begun to supply us with cotton into the bargain. On the other hand, the cottons of Manchester, the woollens of Leeds and Bradford, the cutlery of Sheffield, and the miscellaneous "toys" of the hardware village, Birmingham, are gradually finding their way into new markets throughout China. When the American trade suddenly fell off, and our merchants and manufacturers had to look about them for new sources of supply and demand, the China trade amply repaid the increased attention which was devoted to it, and a considerable rise is apparent both in our exports and imports to and from that quarter. Anything, therefore, that tends to promote the prosperity of that vast dominion over which the Brother of the Sun and Moon holds sway, must indirectly be a gain to Great Britain.

The extent of our mercantile transactions with China is all the more remarkable on account of the many and serious difficulties under which they are at present carried on. As is well known, we are confined mainly to the seaboard, with the exception of some points on the Yang-tze-Kiang; and the transport of goods to and from our stations is rendered costly and subject to vexatious delays by the primitive mode of transport on the backs of men. By means of the bamboo, resting on his shoulder, and bearing at each end a well-balanced chest, a porter can carry from a hundredweight to a hundredweight and-a-half; but the number of men required to take away or bring down a cargo, and the time consumed in the operation, constitute, perhaps, the least part of the evil. During the journey the goods are exposed to injury from the weather, from the carelessness of the porters, and from pillage of every kind. Highwaymen infest the roads, pirates lurk in the reeds by the river-side, ready to pounce out on the ricketty junk or unwieldy raft which they have marked as their prey. And escaping the clutches of the depredators whom the law denounces, although apparently powerless to put them down, the hapless merchants suffer heavier, because more systematic and inevitable, spoliation at the hands of the guardians of the law themselves—the wearers of crystal buttons and other emblems of Imperial authority. The great evil of the country, we are told, the incubus which weighs upon and bows down the people, which cripples their energies, paralyses their trade, and deprives them of the legitimate incentive to exertion, is the "squeezing," or black mail, not of the free-booters of the forest, but of the mandarins of the cities. Every city, almost every village, has its form of mandarin, and every pound of goods pays its proportionate quota *in transitu*. Moreover, the existing means of transport are utterly inadequate to the rapidly growing trade of the country; and the cost of repairing the Grand Canal, which is in a deplorably damaged condition, will be such as to occasion its being indefinitely postponed in the present exhausted state of the Imperial Exchequer. Under these circumstances, the introduction of railroads into China naturally suggests itself as a means of overcoming the difficulties which we have been pointing out. The railway would supply a rapid, safe, and economical communication between the emporiums in the interior and the ports of shipment. The goods would not be liable to damage, and the numerous stoppages would be avoided which give the mandarins so many opportunities of "squeezing." Goods would be carried, for instance, direct from Hankow and Canton or Shanghai, as the case might be, without being opened or disturbed on the way, and a single fixed duty would be payable at either end. Of the general benefits which the railway would confer on the country, we need scarcely stop to speak, for they are too obvious. Trade and industry would be stimulated, directly or indirectly; well-paid employment would be provided for thousands who are now almost starving for want of work; and food and other necessaries would be cheapened. Looking at the matter from the English point of view, we should be great gainers in procuring direct and speedy access to the sources of supply in the interior, and to the parts of the country where our productions are most in request—that is not in the warm South, where people want but little clothing, but in the North, where a cold climate secures an eager reception for our cottons and woollens.

Impressed with these convictions, Sir Macdonald Stephenson has lately paid a visit to China, and investigated on the spot the question of the possibility of introducing railways into that part of the world. The greater portion of the pamphlet which he has published on the subject since his return is filled with letters from the most eminent firms in Canton, Shanghai, and Hong Kong in favour of his views. They are all of one mind as to the advantages which the railway would confer on trade and industry; although some may doubt the extent to which the system can be carried, at any rate, in the meantime. Taking the map of China, Sir Macdonald Stephenson fixes upon Hankow as a central point, from which he proposes to have lines diverging east to Shanghai, about 650 miles; south to Canton and Hong Kong, 850 miles; north to Peking, 800 miles; and west to Soochow (on the Chinese frontier), and to India, about 1,600 miles. It is a magnificent scheme. Only fancy stepping into a first-class express at Calcutta and being whisked off to Peking or Hong Kong! It almost takes one's breath away. One can scarcely imagine the locomotive as an additional element in the quaint willow landscape which one naturally associates with the idea of Chinese scenery. And yet there is nothing impracticable in the plan. The general features of the country to be traversed by the railway offer no engineering difficulties worth mentioning.

The valley of the Yang-tsze secures an uninterrupted line of easy gradients from Hankow to Shanghai; to the south the valleys of the river Kow, or Hang, and Pe, running almost direct from Hankow to Canton, are separated only by the range of the Meiling mountains, in which both rivers take their rise, and over which the line can, it is said, be carried without having recourse to gradients or curves of a nature to require any special provision for engine power. It is only the novelty and vastness of the project which suggest difficulties; but Sir M. Stephenson is fortified by a powerful precedent in the case of India.

"Those," he says, "who can look back some twenty or twenty-five years, and recollect the active discouragement and passive obstructiveness encountered in Leadenhall-street and Cannon-row when I first undertook the introduction of railways into India, the prophetic assurance of inevitable failure; of insuperable obstacles of floods, white ants, and destructive influences of sun and damp; impossibility of maintenance; indisposition of the people to change former habits; and necessary high and prohibitory rates to cover the great cost; and who have watched the rapid extension of the system of Indian railways, and are aware of the active exertions which have been made to prepare for the future line of railway by Constantinople to India, will not be disposed to discredit the expectation that, within from twenty to twenty-five years, passengers and goods will be conveyed from London, through Europe and Asia by Constantinople and British India, to Canton and Peking."

Sir Macdonald, however, is too experienced and practical a man to imagine that a scheme of such magnitude can be started at once as a whole. While looking forward to the great system which will one day span Asia from end to end, he would be quite content at present to see a "commencement made on a very moderate scale, with the certainty that a short line once completed and at work other lines will be extended over the country with a degree of rapidity inconceivable to those who are unacquainted with the resources and means available in China." In this, as in so many other places, *c'est le premier pas qui coute*. The difficulty is to get the first few joints of rail laid. It is probable that at first

Digitized by Google

there might be some opposition on the part of the people to give up their land for the purpose, but that would soon resolve itself into a question of compensation. According to Sir Macdonald, a meeting of native merchants and others was held in Canton, who expressed themselves highly in favour of his plans, and signified their readiness to subscribe part of the capital. The common people, too, were disposed to approve the idea, and flocked to see the "good man who had come to give them a railway." On the other hand, it is clear that the men in power in China are prepared to offer any scheme of the kind determined opposition. The governor of Shanghai curtly refused to transmit to Peking the memorial of British merchants craving leave to make a short line from that port to Soochow, declaring that it would give foreigners an amount of influence which could not be tolerated, and although Prince Kung is said to be not unwilling to give the experiment a trial, the mandarins generally are dead against it. If the Imperial Government knew their own interest they would, of course, be eager to secure the means which the railway would give them of commanding the whole of their vast dominions in an effectual manner, and Sir M. Stephenson's proposals are very conciliatory. He is quite willing that the railways should be constructed for the Government upon their undertaking to pay interest at 12 per cent. per annum on the outlay, and that there should be an equal division with the Government of surplus profits above that percentage. The Customs revenue would afford ample security for the payment of the interest. If the promoters will, in the meantime, confine themselves to one or two short lines, such as between Shanghai and Soochow (60 miles), Canton and Fatshan (15 miles), or Canton and Hong Kong (90 miles), we shall not despair of seeing the Imperial Government grant a concession in a moment of confidence and good nature. The Fatshan line, which could be completed in fifteen months, would be a capital subject for the experiment, and when once the Chinese have had actual experience of the benefits of the railway, we should have no fear of the result.

LETTER FROM JAPAN.—Extract of a private letter, dated Yokohama, Japan, May 26, 1864.—"May in Japan seems to be the season for panics. Last year, about this time, if you recollect, letters spoke of a panic, and the same thing occurs again now. The two-sworded gentry are swaggering, insulting, and fiercer looking than usual—the Japanese money changers of note have been imprisoned, the governor is excited, and things are beginning again to look unpleasant. To satisfy, or rather allay, the feeling of alarm amongst the people on shore, the soldiers are loaded with ball cartridge. On the 23rd two old Japanese hulks, the representatives of Japan's fleet, moved from the proximity of the Fort of Kanagawa and sailed for Yeddo, in all probability to take station behind the forts there. This gave rise to a report that at midnight the fort and guns on the hill near the town were to open fire, and as you may imagine this considerably frightened the nervous among the dollar grinders, especially as it blew great guns all night. However, the forts and guns on the hill thought better of the matter, and all were allowed to sleep in peace. A few days before a startling paragraph appeared in a daily paper that some Daimio was marching on Yokohama with a large force, and might be expected. The prince in question was most likely smoking his pipe at home—at all events, he has not yet turned up. Politically matters are bad. Sir R. Alcock visited Yeddo and the Gorogio on the 16th; the result of the interview was not satisfactory. The French minister followed a few days after with the same result. The officers of the *Coromandel* during their day's stay at Yeddo counted over 100 guns mounted in the forts. It seems likely that if you do not consent quietly to leave this place and retire gracefully to the mantrap at Nagasaki, they will be foolish enough to try force. If a number of half-drunken, determined men were to make a night attack on the foreign settlement, and at the same time the guns (of the number of which we know very little) pitch into the ships and town, a good many of we poor devils ashore would come to grief, especially the ladies, of whom there are many fresh arrivals. Of course what would follow would be a severe retribution, and give the Buxton party a lot to talk about; but this would be no consolation to the unfortunates murdered. The Dutch join us in the Simonoseki affair; but if any attempt is made on Yokohama this Simonoseki affair would in all probability stand over. Messieurs les Japonais, you are too late. Last year we were almost at your mercy—now the tables are turned—and have the goodness to wait another month for 1,500 marines and soldiers, and we are safe, at least, against murder. The *Pelorus* arrived on the 15th from Hong Kong; the *Racehorse* sailed for Hakodadi on the 21st, with Mr. Consul Winchester; and the *Rattler* for Nagasaki, on the 25th to relieve the *Perseus*, which vessel goes to Shanghai to relieve the *Leopard*, ordered to Yokohama; the *Coquette* expected hourly from Shanghai. Acting Lieutenant Henry Morris (promoted at Kagosima), of *Racehorse*, was turned out of the service on the 17th for drunkenness. Several other courts-martial come off shortly, I regret to say, for the same offence. When the Japanese question comes again before the House of Commons I hope the 'give the country-up' party won't win. Next to England it is the finest place in the world, and nature was kinder to it than to England. In the hands of Englishmen it would, indeed, be a paradise. It would be a thousand pities to relinquish our footing in such a land—rich as it is in all that man could desire.

LIVERPOOL EMIGRATION RETURNS.—From the Government emigration returns for Liverpool for the month of July it appears that during that month 28 vessels sailed under the provisions of the Act, carrying 9,111 steerage and 371 cabin passengers; total, 9,482, or 1,482 less than in the corresponding period of 1863. Of the 28 vessels, 21 sailed for the United States, carrying 267 cabin and 7,512 steerage passengers. Of the latter 4,527 were Irish, 1,971 English, 675 foreigners, and 239 Scotch. For Canada there were four ships, with 421 steerage and 95 cabin passengers; for Victoria, two ships, with 735 steerage and 8 cabin passengers; and for Queensland, one vessel, with 443 steerage and one cabin passenger. Of ships sailing independently of the Act there were 20, of which 8 sailed for the United States with 500 passengers, two for Canada with 55 passengers, four to the West Indies with 29 passengers, two to South America with 84 passengers, to Africa one vessel with 25 passengers, and to New Brunswick one ship with five passengers. Total passengers sailing in short ships, 714.

AT the Grocers' Benevolent Society's meeting it was stated that persons were bidding very large sums of money for the London Tavern, and that very lately as much as £100,000 had been offered for it.

Mr. Sam Gray, late of the Oriental Bank and the British and American Exchange Bank, has been appointed manager of the British and Netherlands India Bank.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

JOAQUIM—On the 2nd July, at Mount Narcies, Tanjong Pagar, Singapore, Mrs. F. Joaquim, of a son.

MCDONALD—On the 31st May, at Yokohama, the wife of Wm. McDonald, Esq., of a daughter.

MARRIAGE.

BROWER—MANN.—On the 9th June, at the United States Legation, Yeddo, by the Rev. S. R. Brown, De Witt Clinton Brower, Esq., of New York, to Miss Jennie N. Mann, of Ramsgate, England.

RONEY—HOGARTH.—On the 8th August, at Christ Church, Herne Bay, Kent, by the Rev. W. L. Cartwright, and the Rev. H. Geary, Incumbent, Richard C. Roney, late of Hong Kong, China, son of the late James E. Roney, Esq., of Demerara, to Helen Isabella, youngest daughter of George Hogarth, Esq.

DEATHS.

ARMSTRONG—On the 9th June, at Hongque, Clara Elizabeth, infant daughter of Capt. P. B. Armstrong, str. *Fire Dart*, aged one year seven months.

HUTCHINGS—On the 10th June, at Shanghai, of cholera, Henry Hutchings, Esq., R.N., master commanding H.M.S. *Acorn*.

JAQUEMOT—On the 11th June, at Yokohama, James Alexander Louis, youngest son of J. M. Jaquemot, Esq., aged five years and six months.

KEITH—On the 17th June, at Whampoa, George Keith, foreman boilermaker to the Hong Kong and Whampoa Dock Company, aged 57 years.

PHILLIPS—On the 9th June, at the Astor-house, Shanghai, Isaac Carpenter Phillips of Ilfracombe, North Devon, aged 30 years.

BOARD OF TRADE RETURNS.

The Board of Trade returns for the month of June again present extraordinary totals, the declared value of our exportations having been £13,978,256, which is £2,706,999, or 24 per cent., in excess of those of the corresponding month of 1863: Compared with June, 1862, the increase has been to the unprecedented extent of 45 per cent., a fact which will account for the active employment of money and the maintenance of high rates of discount. Much of this augmentation, however, is due to the high prices of all the principal staples, the exports of cotton-yarn, for instance, showing an excess of 32 per cent. in value over those of 1863, and of only 17 per cent. in quantity; while in cotton goods the excess has been 24 per cent. in value, and only 4 per cent. in quantity. The present returns complete the half-year, and it appears that the value of our export trade for that period has been 26 per cent. above that of the first six months of 1863, and 36 per cent. above that of the preceding year.

The Exports to the countries and ports of the Far East, in regard to the articles distinctively enumerated, are returned as follows:—

Digitized by Google

China and Hong Kong.

	1862.	1863.	1864.
For the month ended 30th June.			
Cotton yarn	396,336 ..	333,682 ..	147,600 lbs.
Cotton manufactures ..	7,021,660 ..	4,826,623 ..	6,889,484 yds.
Worsted stuffs	656,059 ..	643,736 ..	1,373,069 ,,
Wool and worsted cloths	137,944 ..	138,296 ..	88,742 ,,
Lead	986 ..	1,554 ..	169 tons
Value for the six months ended 30th June.			
Cotton yarn	.. £151,701 ..	£70,893 ..	£114,032
Cotton manufactures ..	.. 925,011 ..	505,904 ..	1,022,244
Worsted stuffs	.. 186,868 ..	277,159 ..	417,255
Wool and worsted cloths	.. 144,999 ..	167,510 ..	140,674
Lead	.. 96,896 ..	183,837 ..	81,354

The Export of Cotton Manufactures to other quarters east of British India is shown by the following figures :—

	1862.	1863.	1864.
For the month ended 30th June.			
Singapore	3,735,684 ..	2,217,405 ..	2,210,763 yds.
Java	1,679,284 ..	1,208,499 ..	2,220,249 ,,
Philippine Islands ..	2,420,724 ..	1,911,654 ..	1,721,933 ,,
Value for the six months ended 30th June.			
Singapore	£391,033 ..	£224,961 ..	£479,502
Java	335,346 ..	128,942 ..	389,179
Philippine Islands ..	170,382 ..	123,046 ..	392,091

Of Cotton Yarn, 31,000 lbs. was exported to Singapore in June of this year, against 103,600 lbs. in June, 1863, and 120,800 lbs. in the same month of 1862; the value for the first six months of 1864 being returned at £61,803, against £68,033 in 1863, and £56,554 in the year preceding.

Imports.

Of Sugar, the quantity imported from Java and the Philippine Islands under the new duties, which came into force on the 16th April in the present year, is as follows, for the month ended 30th June :—3rd quality (not equal to Brown Clayed, but equal to Brown Muscovado), 87,525 cwts.; 4th quality (not equal to Brown Muscovado), 3,990 cwts. The value of the Unrefined Sugar imported from the same quarter during the five months ended the 31st May in the present year was :—3rd quality (not equal to Brown Clayed), £41,205; 3rd quality (not equal to Brown Clayed, but equal to Brown Muscovado), £11,911; 4th quality, £38,645.

The quantity of Hemp imported from the Philippine Islands in the month of June, 1864, was 15,894 cwts; and for the six months ended the 30th June, 74,228 cwts., against 168,831 cwt. in the same period of 1863, and 88,864 cwt. in the previous year. The value of the import of this article from the Philippine Islands for the five months ended the 31st May, for the year 1864, and two preceding years, is given as follows, placing the present year first :—£103,366, £153,851, £86,120.

Raw Cotton still continues to be brought in in unlooked-for quantities from the Far East. The imports from China given in these returns no doubt include the largest portion of that sent forward from Japan. The comparative quantities and values are as follows :—

	1862.	1863.	1864.
For the six months ended 30th June.			
Quantity	143 ..	110,469 ..	411,369 lbs.
For the five months ended 31st May.			
Value	£52 ..	£491,130 ..	£2,610,082

The Declared Value of British and Irish Produce and Manufactures exported from the United Kingdom to the quarters mentioned below, for the five months ending the 31st May in the present and two preceding years is stated to be as follows :—

	1862.	1863.	1864.
Singapore and the Eastern Straits	£544,633 ..	£436,371 ..	£676,988
Hong Kong	579,923 ..	455,389 ..	682,128
China (exclusive of Hong Kong)	1,056,154 ..	971,902 ..	1,252,166
Japan	— ..	41,437 ..	115,315
Netherlands India (Java, &c.) ..	441,360 ..	176,074 ..	427,594
Philippine Islands	184,762 ..	125,859 ..	372,330
Siam	— ..	1,374 ..	11,493
Cochin China, Camboja, and Tonquin	— ..	35,000 ..	—

Chisholm, Victory, Agra, Beloochee, Ferris, H. Puddemsey, and Bombay. At FALMOUTH: Sarah Jane and Hindostan. At BORDEAUX: Salares and Java. At NANTES: Suez. At NEW YORK: Ocean (Home, Gertrude, Caroline, Rudolf, Harzburg, and Reynard. At BOSTON: Ceylon, Aristides, Alexander, and Magnet.

From BATAVIA.—At FALMOUTH: Fredrika.

From PENANG.—At FALMOUTH: Schlosser. At CORK: Ceylon. At BORDEAUX.—Sophia.

FREIGHTS AND CHARTERS.

There is still a good disposition to charter homewards from the rice ports and Maulmain, and early vessels are still in request from Java. Outward freights remain very quiet, especially for large vesels, but high classed ships are now in demand to load on the berth for China, and one or two small vessels can be fixed out and home from Japan.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £37 10s. and £1. 15s. For Shanghai: £48 and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £27 and £1. 5s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

According to advices received from Pernambuco, the Gustav Adolph, from London for Macao, which put in there June 26 with master murdered, would proceed soon with new master (the mate).

The Philip von Marnix, from Rotterdam for Batavia, put into Rio Janeiro July 4, with masts split.

The Fung Suey, steamer, Gray, which left new York July 8 for Hong Kong, put back on July 20, for coals and to repair machinery.

The Twee Gezusters, Bergman, from Batavia for Rotterdam, put into the Mauritius on the 6th June, making 12 inches water per hour, having experienced heavy seas on May 29, in lat. 9 S., long. 76 E. According to last advices received she was in dry dock on July 6, being re-coppered.

The Julie, Perrin, from Iloilo for London, put into the Mauritius June 10, making a great deal of water, having experienced hard gales from May 29 to June 3, in 18 S., 88 E.

The Bengalen (Dut. brig), bound to Macassar, with a general cargo, was in collision previous to August 2 in the channel near Helvoet, and sustained considerable damage to rigging and bows.

At ST. HELENA.—July 2. Holanddia, Ruige, from Batavia, and sailed for Amsterdam; she had experienced a heavy gale off the Cape, June 13, when she lost sails, &c. June 30. Alexander, Dempster, from Kanagawa, and sailed for London. Fort William, Kennedy, from Shanghai, and sailed 1 July, for Devonport.

Off ST. HELENA.—June 30, Bristow (barque), from Hong Kong.

DOCKS.
PORT OF AMOY, CHINA.

AGENTS and Commanders are informed that the Dock Company's Establishmen's at the above Port afford every facility for REPAIRING, SPARRING, and RE-FITTING VESSELS of all sizes, and for CLEANSING and PAINTING Iron Ships, at moderate charges.

Their large Granite Dock, 286 feet long on the blocks, with 19 to 21 feet water in the entrance at spring tides, and fitted with Caissoon Gate and Steam Pumps, is in complete working order, and is well supplied with every description of materials.

EUROPEAN FOREMEN superintend the work in all departments.

Amoy, 1st January, 1864.

BOYVEAU LAFFECTEUR'S ROB,

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrotula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 13, RUE RICHER, PARIS.

Sold Retail—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich. Malta: Dr. Pirotti, Bugeja, Magri, and Rolando Esperanza. Alexandria: Bellamore, Galette, Perini. Bombay: Framjee Nesserwanjee and Co. Singapore: Martin and Little. Batavia Platon and Co. Macao: J. D. Freita.

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT AND PILLS.
—HEARTY AND HEALTHY.—The experience of thousands, both at home and abroad, has amply demonstrated the power possessed by these healing and purifying remedies of removing cutaneous eruptions, repairing ulcerations, and relieving fistulas and abscesses. These hidden evils frequently rob life of every comfort through the reluctance of the sufferer to expose his infirmity. Holloway's Ointment supersedes such dreaded publicity by placing within the reach of all plain instructions for curing themselves without any danger, and without the necessity of mentioning their malady to any one. The Ointment and Pills will likewise cure bad legs, scabby rashes, and those blemishes which arise from the abuse of mercury, and from the use of other deleterious drugs.

HONG KONG and WHAMPOA (to follow the Arab Steed), the splendid Dundee built clipper ship BENGAL, A 1 nine years; — tons register; H. P. BRUMELL, Commander; loading in the East India Docks.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

FOR SHANGHAI, to sail on the 10th August, the splendid new Aberdeen clipper ALEXANDRINA, A 1; 670 tons register; HUGH BAIRD, Commander; lying in the West India Docks. This beautiful ship was built expressly for the China trade, and has superior accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

SHANGHAI direct, last shipping day 16th inst., the splendid Aberdeen-built clipper ship CISSY, A 1 ten years, 649 tons register; now loading in the West India Docks. Has excellent accommodation for passengers.

TEMPERLEYS, CARTER, and DARKE, White Lion-court, Cornhill; HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill, E.C.

SINGAPORE Direct, with immediate despatch, the splendid fast-sailing clipper barque WEST, A 1 thirteen years, 409 tons per register, W. H. HAWKINS, Commander; loading in the St. Katharine's Dock. Has excellent accommodation for passengers.

For Freight or Passage apply to Messrs. RANGELL, WOOLLETT and Co., 1, Lime Street-square, E.C.; or to DOUGLAS and MILLS, 23, Billiter-street, E.C.

Has a large portion of her cargo engaged, and will meet with the usual quick despatch.

DIRECT for RANGOON, the beautiful British-built clipper ship COREA, A 1 nine years, 451 tons register; JAMES SMITH, Commander; St. Katharine Docks. This fine clipper will be found a very desirable vessel for shippers of fine goods.

For Freight or Passage apply to EDWARD HIGGIN and Co., 2, East India-avenue, Leadenhall-street, E.C.; or to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

Has the greater portion of her cargo engaged, and will meet with very quick dispatch.

DIRECT for BOMBAY, the beautiful clipper ship, LORD BROUGHAM, 3-3rds 1 1, 1,057 tons register, G. BANDALL, Commander; East India Docks. This fine vessel offers a first-rate opportunity to shippers desirous of despatch.

For Freight or Passage, apply to TOULMIN, LIVINGSTON and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

THE LONDON AND CHINA TELEGRAPH.

THE FIFTH Volume of this JOURNAL was completed on the 28th December, 1863. The Subscription for the three numbers per month is 30s. per annum, including Postage, and to the Export Supplement 12s. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

Subscriptions and Advertisements received abroad by the following Agents:—

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Ceylon, arrived August 13.—From Shanghai: Messrs. H. Cameron and A. H. Woodward, M. Regan, Dr. Lockhart. From Hong Kong: Mr. R. Hudden, Mr. Aguilar, Commander Wells, J. R. Lastras.

From Southampton per Ripon, expected to arrive 19th August: From Kanagawa, Mr. Aspinall and servant; from Shanghai, Messrs. Graham and Tredingham; from Hong Kong, Captain Thompson, Mr. Beelendorf, Mr. and Mrs. Lonzey; from Singapore, Messrs. Bauer, J. Dixon, and A. Baxter. To Gibraltar: From Hong Kong, Madame Molada, two children, and servant.

PASSENGERS OUTWARD.

Per P. and O. steamer Delta, August 20, from Southampton.—To Hong Kong: Mr. Galton, Mr. and Mrs. Adams, Miss. Brown. From Marseilles, August 28.—To Shanghai: Mr. J. A. Taylor. To Hong Kong: Mr. and Mrs. D. Crawford. From Suez.—To Singapore: Mr. and Mrs. Hermann.

Per P. and O. steamer, Sept. 4, from Marseilles.—To Shanghai (via Bombay): Mr. Wm. Jackson, Mr. J. Webster. To Penang (via Bombay): Mrs. Rodyk and infant.

Per P. and O. steamer, Sept. 4, from Southampton.—To Hong Kong: Miss Manuel, Miss Pagden, Mr. I. P. Mollison, Col. and Mrs. Gray, Miss P. Plumridge, Miss Longstaff, Mr. P. Bird. To Shanghai: Mr. E. Iveson, Rev. C. H. and Mrs. Butcher, Mr. F. Stokes, Miss Nelson.

Per P. and O. steamer, Sept. 28, from Marseilles.—To Singapore: Mr. P. C. Keake.

Per P. and O. steamer, Oct. 4, from Southampton.—To Hong Kong: Mr. and Mrs. Preston and infant. To Shanghai: Mrs. Jarvie. From Marseilles, Oct. 12.—To Singapore: Miss Cooke and servant. To Shanghai: Mr. Gordon and friend.

Per P. and O. steamer, Oct. 28, from Marseilles.—To Hong Kong: Mr. J. Tait. To Shanghai: Mr. A. Schultze. To Singapore: Mr. and Mrs. H. W. Wood and lady friend.

Per P. and O. steamer Delta, August 20, from Southampton.—To Hong Kong: Mr. Mitchell. To Shanghai: Mr. Monk. From Marseilles, August 20.—To Shanghai: Mr. Brown.

Per P. and O. steamer Massilia, September 4, from Southampton.—To Hong Kong: Mr. and Mrs. Adams. From Marseilles, September 12.—To Hong Kong: Mr. Marsh. To Shanghai: Mr. and Mrs. Coutts.

Per P. and O. steamer Ripon, Sept. 12, from Southampton.—To Singapore (via Bombay): Mr. J. Nagle.

Per P. and O. steamer, Sept. 28, from Marseilles.—To Singapore: Lieut. and Mrs. Barn.

Per P. and O. steamer, Oct. 4, from Southampton.—To Shanghai: Mr. Turnbull. From Marseilles, Oct. 12.—To Shanghai: Mr. Leonard, Mr. A. Schultze.

Per P. and O. steamer, Oct. 28, from Marseilles.—To Singapore: Messrs. W. and C. Degener.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

In our last issue, containing the intelligence by French mail, dates from hence were brought down to the 13th June. Our advices are now only two days later, viz., to the 15th June, and came to Shanghai by the P. and O. steamer *Cadis*. It appears that vessel discovered a rock on the Japan coast, while indulging in a short cut. The discovery being both accidental and sudden, the bow of the *Cadiz* was slightly indented by the shock, rendering it necessary, however, that she should be sent down to Hong Kong for repairs, where she now is.

The Japanese correspondent of the *Commercial News* reports that, on the 14th day of this moon, a retainer of Inangaki-no Kami, killed five of his comrades with the sword at the Prince's zashki in Yedo. Thereupon the murderer fled by the Tokaido westward. He was caught three days afterwards a little this side of the guard-house at Hakone, but not without much difficulty. It seems that twenty-five of Inangaki's armed retainers went in pursuit of the man, Tsmoriyama Funenoski, by name, but were afraid to attempt to arrest him, on account of his great strength, and skill in the use of the sword. He is said to be one of the few who can wield a sword in each hand at once. He has been the teacher of sword practice among his master's retainers, and the report is that the man has become so proud of his attainments in this line that it turned his head. His case will be a fit one, therefore, for the plea of insanity to be made at his trial, if such a thing is ever done in Japanese criminal courts. At any rate the twenty-five men did not feel able to arrest him, and called for the aid of thirty of the Prince of Oowara's men to assist them. These fifty-five men were put to their trumps, however, for it took them from 10 A.M. to 4 P.M. of the 17th day of this moon to secure the prisoner. He was then carried to Yedo, and handed over for trial. It is not very creditable to the valour of his captors that it took fifty-five men six hours to seize and bind one man. Perhaps, however, we ought not to be severe in our judgment upon them, for they were not at liberty to shoot or kill the man, but must carry him alive to Yedo for trial. But if this is the method of procedure in arresting murderers in Japan, it is no wonder that the Government is so unsuccessful in arresting culprits that are armed, such as Ronins. Every attempt at such an arrest must be a hand-to-hand fight with Japanese blades.

NAGASAKI.

Dates are to June 8.

A disgraceful assault has been committed on Captain Towers, of the *Water Lily*, by two of the employés of Messrs. Alt and Co. It appears that the captain had withdrawn his ship from the hands of that firm, and called at the office a few days subsequently to close his accounts. As he entered he saluted the two persons in question, Messrs. Kagemann and Bidwell, and immediately received a black eye from the former, and was then knocked down and kicked by both. Being summoned before the British Consul, Kagemann was fined $50, and Bidwell was dismissed for want of evidence. Not half-an-hour afterwards, as Captain Towers was passing in front of the Consulate, he was attacked by a public-house-keeper named Kettle, who struck him on the temple with the butt-end of his riding whip. The Consul witnessed the act as he was looking out of window, and ordered Kettle to be arrested. Mr. Lowder, one of the consular assistants, bailed the assailant for $600, and the affair was ultimately settled by Kettle writing an apology, based on a plea of drunkenness, which apology was to be published in the China and Japan papers. The assault was the more brutal that Mrs. Towers, who is in a delicate state of health, was walking with her husband at the time.

Digitized by Google

The settlement had enjoyed a short season of unwonted liveliness. On May 26 a theatrical entertainment was given on board H.M.S. *Perseus*. The pieces played were "Mary Le More," "Fair Rosamond," and "Sarah's Young Man." An excellent supper was provided, to which about sixty individuals sat down, including the Governor of Nagasaki, who appeared to appreciate this better, if possible, than the histrionic portion of the entertainment. His Excellency indeed displayed a singular liking for foreign chow-chow, eating sweets, salad, and meat, at one and the same time. It was nearly 1 A.M. when he left, and the remainder of the party broke up two hours later. Captain Kingston and the officers of the *Perseus* stand high in the regard of the residents, who expressed great regret at the prospect of her leaving as soon as the *Rattler* should have arrived from Yokohama. The regatta came off two days later with equal *éclat*. The chief credit for the excellent arrangements is again given to Captain Kingston, the chairman of the committee.

During the early part of May there had been a fair demand for tonnage, and vessels had met with quick despatch both for Hong Kong and Shanghai. At present, owing to the closure of the cotton market for the season, there is hardly any freight offering for Hong Kong.

HAKODADI.

Under date of the 18th May, a correspondent sends the following :—

The San Francisco and Amoor traders are daily expected. We have enjoyed fine weather of late, and the vegetation having assumed its spring dress, the appearance of the country is beautiful. The influx of several new settlers to this port has again revived the question of land. Hakodadi differs from the two other open ports of Japan, in that the foreign residents are few, and they are not collected on a "concession"—as the term is—but their residences are scattered about among those of the Japanese. The reason for this distribution of the barbarians amongst the Children of the Sun is that, when foreigners first came to this port, the native authorities were slow to appoint a location for them, though, after a time, an island was built and divided into ten small lots for the residents at that date. This island has been, however, from the first almost exclusively used for business premises, while the original, as well as later settlers, have their residences in such places as they have been able to obtain from private Japanese, the Consulates alone occupying any Government land. It has been the aim of successive governors to endeavour to bring all foreigners together on one location, but on account of the present island being situated in front of the best part of the town, from which only a shallow canal separates it, they are jealous of increasing the size of it, and have rather wished to get foreigners to move in a body to the low land of the isthmus, which is of comparatively small value. This is now however impossible, as the time and opportunity for getting all foreigners together is long past; and the only hope of preventing foreigners from becoming still more mixed up among the natives, is to grant a good sized extra location. Consequently, now that the demand for land is pressing, the Consuls have advocated a new concession, and to that end there have of late been numerous interviews with the Governor, meetings of Consuls, and calling together of their respective "subjects." But unfortunately for any and every proposal of a site, the Consuls now differ among themselves, while they have moreover been too extravagant in their demands, and up to the present date nothing has been decided upon, and the last meeting of Consuls and governors ended in a general blow up, with threats of reference to Yedo by two of the worthy representatives of the Western Powers. In the meantime, the unfortunate intending settlers, who have rested their hopes of obtaining land on consular influence, must wait. The Japanese officials have doubtless taken advantage of the want of union among the foreign representatives, and are highly gratified that all has ended in smoke. It does seem preposterous that, at an insignificant place like this, where a Consul's berth is a mere sinecure (with imprisonment), the land question cannot be speedily settled; it is to be hoped, therefore, that some "press" pressure may be brought to bear upon it.

CHINA.

PEKING.

The following items of information are from the Peking Gazettes :—

Li-san-ta-jen (Li Ho-chang) the hero of Taitsang, and of many other engagements, in all of which he has practically announced his belief that the better part of valour is discretion, has, in company with four others as distinguished as himself, been granted the distinction of the Yellow Jacket. This may be intended as a compliment to the Futai, or it may be the result of a judicious bribe, but under no circumstances could a worse selection have been made. The recipient of this honour has had many opportunities of displaying bravery, coolness, and determination, but whenever he has happened to find himself in danger or difficulty his senses have deserted him, and he has disappeared from the scene with most laudable celerity. An Imperial decree announces the elevation of Gordon to the rank of Ti t'u, a military command commensurate with the civil authority of a Tung t'u, or "Governor-General." The rank hitherto held by Gordon has been Tsung-ping, or "general." The Emperor has also conferred on Gordon a standard, or banner of honour, and a star somewhat answering to the English G.C.B. Ching has been nominated senior guardian of the Emperor. This is a posthumous honour, as news of his death had reached Peking before the date of the edict. The tributary Prince of Corea died last month, and his subjects have notified the fact to the Emperor, begging that his son may be recognised as his successor. His Majesty has acceded to their request, and has nominated the high officials Tsaopao and Wen-chien to proceed to the Corea and see that the young prince is duly enthroned.

SHANGHAI.

Dates are to the 22nd June, or two days later than per French mail, which arrived here on the 8th inst. Cholera, noticed in our last, has carried off many more victims, including the Spanish Consul, which will be found in our list of deaths.

The returns officers of the Custom-house at Shanghai have lately compiled a most important and interesting report of the cotton trade for the year ending May 31, 1864. The quickness with which this laborious undertaking has been completed calls for the highest praise, and we feel sure that the mercantile community will join us in awarding the need of indefatigable industry to the commissioner and the officers of the department.

Total Export of Cotton from Shanghai during the Year commencing June 1st, 1863, and ending May 31st, 1864.

To Great Britain (direct)	382,133.04	piculs.
„ Hong Kong	203,684.53	„
„ Coast Ports	61,133.55	„
„ India (direct)	15,291.00	„
„ America (direct)	1,728.63	„
„ Manila (direct)	148.35	„
„ Japan	347.00	„
Grand total	664,466.10	piculs.

Value of cotton exported from Shanghai from June 1, 1863, to May 31, 1864 inclusive, obtained by average monthly prices as declared by merchants, 12,805,494.10 Shanghai taels.

Reports have been circulated to the effect that Burgevine has returned to Shanghai, and intends to renew his connection with the rebels. Several circumstances tended to support the opinion that he had returned, but we, with the *China Herald*, have good reason to believe that there is no real foundation for the rumour. On the 19th June it was reported that H.I.C.M.'s steamer *Pluto* had been captured in the Yangtsze by rowdies in rebel pay. This has also been authoritatively denied.

A rumour was afloat that the Chung-chow garrison had gone over to the Taipings, and that the city was in the hands of the insurgents, but there seemed no good foundation for the rumour. Colonel Gordon had not left for England; indeed, it looks likely that he will be again permitted to lead the Imperialists should Shanghai be in danger of attack from the rebels.

The following are the Shanghai reports on the rebel movements from the *Daily News* :—

QUINSAN.—No events of importance have taken place at the front since the last mail. At the latter end of last month Li-Ai-dong issued a notification, announcing that Gordon's force was to be broken up, with the exception of 600 artillery who would remain attached to the Futai's forces, and 300 infantry who would remain under his own command at Quinsan, of which town he is to be commandant. The 28th of May was named as the day on which the remainder were to present themselves to give up their arms and accoutrements, and receive the balance of pay due to them. These arrangements were effectually carried out, and, with the above exceptions, the disciplined Chinese contingent, which has been mainly instrumental in recovering the province from the rebels, is now completely disbanded. The troops which remain embodied under Le-Ai-dong's command will have a new uniform and a new

Digitized by Google

banner. The uniform will be purple with red facings and a white circle on the breast, bearing the inscription Fu-piao—Futai's army; Chang-shen-chung—Ever victorious army,—the original name of Ward's force.

NANKING.—We learn through a Chinese source that on the 1st June, one of Tseng-Kuo-fan's brothers, who holds a command in the Imperial army outside Nanking, succeeded, after a protracted engagement, in capturing a rebel camp on the north of the city, outside the Kuang-yin gate, to which gate the rebels were chased, and more than four thousand killed. A vast amount of loot was taken, and many official seals were found.

HANKOW.

A correspondent writing from this port under date the 14th June, informs us that Yen Shu-seng, Futai of Hupeh, who has for a considerable time been deservedly unpopular, has at length been degraded. This result has been brought about by the complaints constantly made by the Viceroy Kuan Wen (a senior guardian of the Heir Apparent), relative to the Futai's corruptions and gross injustice. Li Han-chang, an An-huei man, at present Liehtai of Canton (said to be one of Li Futai's brothers) has been appointed to the post. The late Futai comes from the province of Szuchuan, was President of the Board of Censors, and Vice-President of the Board of War. The alarms spread as to the approach of rebels, whether Nien-fei or Chang Mao, have proved groundless. For at least a month back there have been no insurgent bands in the neighbourhood of Hankow. Success seems to follow the Imperial armies, for the rebels are being rapidly driven towards the North-West. The Chang Mao rebels are now said to be penetrating An-huei. The Chinese authorities have, we understand, refused to acknowledge Mr. Breck as American Consul, on the ground that Hankow is a place of too much importance to be entrusted to a merchant-consul. This action is stated to be the result of direct orders from the Regent. Over two hundred chops of tea have come down from the country, and of these nearly one hundred have left Hankow.

HONG KONG.

Dates are down to the morning of the 29th June, or three days later than per French mail. The mail of 17th May arrived out on the 26th June.

The 20th Regiment are leaving for Japan, in the chartered steamer *Chanticleer*, and it is believed that Sir R. Alcock will despatch a fleet to open the Straits of Simonoseki on their arrival.

The *Evening Mail* has the following items:—From the *Gazette* we notice the appointment of Mr. Dollman to be surgeon to the Convict establishment at Stonecutters' Island and Health Officer of Hong Kong. Dr. J. A. Yule has been appointed to the situation vacated by Mr. Dollman, viz., that of Superintendent of the Civil Hospital. The sale of land at Kowloon takes place on Monday, the 25th July, and following days.

The Queen's coronation was duly commemorated by the usual Royal salute of twenty-one guns.

The American steamer *Mo-Yune* reports that she left New York on the 7th of April, and arrived at the Cape de Verdes on the 21st; sailed again on the 28th, and arrived at Capetown on the 18th of May; sailed on the 21st, and arrived at Mauritius on the 31st; sailed on June 3, arrived in Singapore on the 19th, and left it again on the 22nd. During the passage from Capetown to Mauritius she encountered very heavy weather, which somewhat delayed her. She is destined for the Yang-tsze trade, and leaves for Shanghai in a few days.

On 22nd June the P. and O. Company launched from their factory and building-yard at West Point a steam tug-boat intended as a tender to their ships and for general service at this port. She is a pretty model, is about 90 tons burden, and with engines of 20-horse power (nominal). Her lines were sent out from England, and she has been built here under the superintendence of Mr. J. Stove, the foreman shipwright, to whom great credit is due for the manner in which she has been turned out. The launch was most successful, the little vessel taking to the water like a duck, being christened, as she went down the slip, the *Dragon*.

The necessities of the colony have led to a number of European convicts being turned out to work on the roads. The spectacle of these men in chains is novel to us foreigners, and delightful to the Chinese under our authority. It is worthy of remark that the idea of taking out European prisoners to work on the roads has been, up to this time, perfectly scouted, and it is also deserving of notice that the present turn-out of white men is quite voluntary, and in no way compulsory. Stanford, Rustomjee, and Co. are not prepared to deny that the gaol routine is somewhat irksome; and, although the daily average of "macadam" produced by either of these worthies is not very much, still the prospect of working in the open streets, and seeing once again the motley throng that frequents them, is not at all despised by the foreign inmates of the Victoria gaol. There is another advantage gained to the colony by turning these men out upon the roads—the Chinese are deeply impressed with our sense of even-handed justice.

CANTON.

The *Hong Kong Daily Press* has the following:—We learn on one hand that on the retirement of Mr. Consul Robertson from Canton, a Vice-consul will be nominated to the post. This step, of course, has been determined on because of the decadence of the port as a place of trade. On the other hand, we learn that the sum of forty thousand dollars has been ordered by the Foreign-office to be expended on the building of a consulate on the Shameen site. These two items of intelligence appear to us to clash to a certain extent, although there can be little doubt as to their correctness.

COCHIN-CHINA.

SAIGON.

The *Courrier de Saigon* of the 25th June contains a minute account of the coronation of the new King of Cambodia, on the 3rd of that month. There were present representatives on the part of the French Emperor and the King of Siam, and the Cambodian King did homage to both. The French envoy addressed the newly-crowned King as follows:—

"France holds out her powerful hand to kings and peoples who walk in the way of civilization and who seek what is right. If her intentions are for a moment misconceived, soon her noble word removes the obstacles and dissipates the error. The presence of the Siamese Ambassador at this Cambodian ceremony is a proof of this; this high personage has travelled in Europe; he has seen France, and he comprehends that, while recognising the former relations between Siam and Cambodia, we have the right to hold here the first place, as much by the force of arms as by the genius of our civilization. Such are the ideas of eminent men worthy of governing. Sire! place this crown on your head without fear; it will be secure there if you are loyal towards France. Let the King and chiefs recollect these words; the Admiral, the friend of this kingdom, charged me to speak them."

PHILIPPINES.

MANILA.

The following are the particulars regarding the fire at Manila noticed in our last:—

On the evening of the 6th June there was a severe thunderstorm. Several buildings were struck, including that in which the Government had stored leaf tobacco; this building, which was much lower than many of the surrounding houses, and built of stone, with tiled roof, took fire soon after being struck, and burst out in flames in many parts at the same time. Although a number of engines were soon on the spot, no efforts could avail to save the valuable property, and 86,000 quintals of leaf tobacco, valued at nearly $2,000,000, were totally destroyed. The fire continued smouldering for about ten days. In consequence of this calamity the auction announced for the 15th has been postponed until the required quantity of leaf tobacco can be brought forward, which will not be long. Only three days' notice of the sale will be given.

SIAM.

The Siamese steamer *Chow Phya*, Captain Orton, from Bangkok with dates to the 22nd June, anchored in Singapore roads on the 26th.

A female elephant of great whiteness and beauty had been captured, and the King was up at Ayuthia celebrating the event.

Captain Orton stated that before he left Bangkok intelligence had been received that a large powerfully armed Lorcha, in command, it is believed, of two Europeans, had been committing great devastations along the coast to the southward, large bodies of armed men being landed at many of the unprotected villages, and the property of the villagers given over to loot. Captain Bush, the harbour-master at Bangkok, had gone in a small steamer in search of the pirates.

BORNEO.

LABUAN.

The surveying steamer *Rifleman*, Captain Ward, was at

Digitized by Google

Labuan when the *Rainbow* left there, after a six weeks' surveying cruise. During that time the Vanguard, Prince of Wales, and Grainger shoals have been carefully surveyed, and a fresh shoal discovered between the Grainger and Prince of Wales bank, which has been christened the Alexandra (doubtless from the fact of its being well under the lee of the Prince of Wales).

The Vanguard Shoal is 40 miles long in a N.E. and S.W. direction, and from six to eight miles broad, with no danger upon it, seven fathoms being the least water found on it by the *Rifleman*. Its centre is in lat. 7.28 N., and 109.38 E. The Grainger Shoal is about four miles in extent, and has the shape of an ellipse, the major axis being four to five miles, the minor three miles. The centre of it is in lat. 7.48 N., and 110.29 E., the shoalest water on it being four fathoms; but in the N.E. monsoon the water would probably break upon it. The Alexandra Shoal is about the same size as the Grainger; shoalest water 3½ fathoms; lat. 8.1 N., long. 110.37 E. The Prince of Wales Shoal is 12 to 14 miles long, and 8 to 10 miles broad, its centre being in lat. 8.10 N., long. 110.32 E.

On the way to Labuan the Johnstone's reef was sighted, so that there can now be no doubt of its existence; from what could be seen of it, it appears to join the Kingston and Orleans shoals. The *Rifleman* had not coals enough left to enable a survey to be made of this reef, but soundings were obtained for about 12 miles of its length.

MALACCA STRAITS.

SINGAPORE.

Dates are to the 9th July. The *China*, which brought the present mail, left two days behind her time, only arriving at Singapore on the date above-named, owing to heavy weather in the China sea.

In commercial circles, a considerable amount of depression still exists, and a few more native traders have given way since our last report; but the amounts involved are not heavy, and we think it may be safely predicted that we have seen the worst of the present crisis.

The Governor left for Malacca and Penang on the 6th July, in the Government steamer *Pluto*, on his yearly circuit. His visit this year is somewhat late, owing, it is believed, to a desire to be in Singapore to receive the Second King of Siam, who has expressed his intention of visiting this place. It appears that the King had actually started, but that the steamer conveying himself and suite encountered somewhat heavy weather after leaving the river, and he thought it wiser to put back and wait for some time. The Governor will be about two months absent from Singapore, on his circuit through Penang and Malacca.

The change that had taken place in the weather, from extreme heat to rain accompanied by chill breezes, had produced considerable sickness, and there had been several cases of cholera of a severe type.

GOVERNMENT NOTICES.—The Government has been pleased to grant Mr. Richard Henry Wiseham, Chief Engineer, Straits Government steamer *Pluto*, leave of absence for twelve months, to visit Europe, on medical certificate; and Lieutenant H. Burn, late Indian navy, Master Attendant and Shipping Master at Singapore, leave of absence for four months, for the purpose of visiting Europe, on urgent private affairs. Mr. J. L. Kirby, to officiate as Master Attendant and Shipping Master at Singapore during the absence of Lieutenant H. Burn, or until further orders. Mr. John Cooper to be Auditor of the Accounts of the Municipal Fund at Singapore for the past year.

The foundation-stone of the new Court-house was laid on the 4th July by the Governor, in the presence of the Recorder, Resident Councillor, and a pretty large concourse of spectators.

The subject of the Dutch encroachments on the east coast of Sumatra is still being pressed on Her Majesty's Government, and a Memorandum on the subject has been drawn up and submitted to the different Government departments.

The following decision of Lieutenant Burn and Mr. Morris, second master of H.M.S. *Clown*, respecting the loss of the *Morning Star*, has been confirmed by the Governor:—"From the evidence produced before us, it appears that that vessel was wrecked on the Alceste Reef, at the north end of Pulo Leat Island, in the Gasper Straits, on the afternoon of the 29th of May, 1864. That, in our opinion, the vessel was lost through the imprudence of David Grant, the master, in hugging the reef too close, more especially as by his own statement the reef was not clearly discernible at the time. We therefore consider him deserving of censure, and do censure him accordingly."

The barque *Mary Lowry*, Capt. Chamberlaine, from Sydney 20th April, bound to the Mauritius, makes the following report:—

"Entered Torres Straits, by Raine Island at 10 A.M., on Thursday, the 5th May. On the 6th inst., sighted the wreck of the *Royal Stuart* of London, Capt. Cornwall, on Cockburn-reef, from New Zealand, bound to Colombo, seeking; rendered every assistance, and took off half the crew; the commander and other half remaining by the wreck, then quite safe, for another ship. Wednesday, 10th May: Off Booby islands, fine clear weather and light S.E. winds. Passengers and crew all well. Cargo, horses, &c., all well, too, and not a loss up to date."

Eighteen European seamen, belonging to the British ship *Rangoon*, charged with refusal of duty and desertion, were severally sentenced to ten weeks' imprisonment in the House of Correction with hard labour, by the Marine Magistrate, on the 29th of June; and his worship further decided that the men were to be sent on board when the vessel was ready for sea.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ADAMSON—On the 3rd August, at Rushton-park, Sussex, the wife of W. R. Adamson, Esq., late of Shanghai, of a daughter.

BOHSTEDT—On the 4th June, at Ningpo, Mrs. Julius Bohstedt, of a son.

CAMPBELL—On the 4th August, the wife of William Campbell, Esq., late of Singapore, of a son.

GASKELL—On the 11th August, at Montague-place, Hammersmith West, the wife of William Gaskell, Esq., late of Hong Kong, of a daughter.

MACKENZIE.—On the 30th July, at 69, Chepstow-place, Bayswater, the wife of Samuel Mackenzie, Esq., of a daughter.

SMITH—On the 5th August, at Harrow Weald-park, the wife of Robert Smith, Esq., of a daughter.

MARRIAGES.

BORLASE—CHADS.—On the 3rd Aug., at Farcham, Hants, by the Rev. William Borlase, vicar of Zennor, Cornwall, Capt. John Borlase, C.B., Royal Navy, to Jane Troughton, only daughter of William Chads, Esq., of Farcham.

MACLEAN—ABERNETHY.—On the 28th July, at St. Peter's, Isle of Thanet, by the Rev. C. F. Tarver, Chaplain to the Queen and H.R.H. the Prince of Wales, Henry, eldest son of Alexander Maclean, Esq., South Hampstead, to Marion, second daughter of James Abernethy, Esq., C.E., of Finchley, New Road, South Hampstead, and Whiteness Lodge, Kingsgate, Kent.

RONEY—HOGARTH.—On the 8th August, at Christ Church Herne Bay, Kent, by the Rev. W. L. Cartwright, and the Rev. H. Geary, Incumbent, Richard C. Roney, late of Hong Kong, China, son of the late James E. Roney, Esq., of Demerara, to Helen Isabella, youngest daughter of George Hogarth, Esq.

DEATHS.

BEIT—On the 25th July, at Rusena Villas, New-road, Hammersmith, John Nicholas Beit, Esq., late of Sydney, New South Wales, aged 74.

BRERETON—On the 27th July, at his residence, in the Albany, deeply regretted by all who knew him, Lieut.-General Sir William Brereton, K.C.B., K.H., Royal Artillery (engaged in the China war).

BRAUNE—On the 16th May, at H.B.M.'s Embassy, at Peking, aged 26, George Compigne Parker Braune, Esq., the only son of the Rev. George Martin Braune, vicar of Wistow, and of 8, Upper Hamilton-terrace, St. John's-wood.

COLLARD—On the 13th June, on board the Hercules, Hong Kong, George Collard, private H.M.'s 2nd bat. 20th Regt., aged 28 years.

DAVIES—On the 3rd August, at 5, Melbury-terrace, Dorset-square, Henry Tudor Davies, eldest son of the late Henry Tudor Davies, late of Shanghai, and grandson of the late Dr. Henry Davies, aged seven years.

DAY—On the 3rd August, at Portswood, near Southampton, wife of Capt. J. H. Day, of aged 33 years.

DENNIS—On the 5th August, at his residence, Rose-hill, Dorking, John Dennis, Esq., formerly Receiver-Gen. of Excise, aged 86.

DE FORTUNY—On the 18th June, at Shanghai, of cholera, Senor Don Eusebio de Fortuny, H.C.M.'s Consul of this port.

HEDERSTEDT—On the 26th July, William Hederstedt, Esq., aged 46, for many years in the P. and O. Company's service.

HALTON—On the 22nd June, on board the Hercules, Hong Hong, Patrick Halton, private H.M.'s 20th Regt., aged 24 years.

HARDIE—On the 19th June, at the Civil Hospital, Hong Kong, Wm. Hardie.

HUMPHRES—On the 28th June, at the General Hospital, Hong Kong, John Humphres, private H.M.'s 99th Regt., aged 24 years.

JUDSTRERY—On the 21st June, at Hong Kong, George Judstrery, sergeant H.M.'s 99th Regt., aged 23 years (drowned).

MACLACHLAN—On the 11th June, at Shanghai, Mr. Allan Maclachlan, aged 38 years.

MASON—On the 17th June, at Hong Kong, Louis Mason, seaman.

MCGLONE—On the 14th June, at the General Hospital, Hong Kong, C. A. McGlone, Sergeant Comt. Staff Corps, aged 27 years.

MILLER—On the 4th June, at Shanghai, of cholera, Emily Charlotte, the wife of Rowland Miller, Esq., of Moneymore, Ireland, aged 24 years.

PARKE—On the 29th May, at Shanghai, of cholera, seventeen days after landing, Henry, son of J. Parkinson Parke, Esq., Withnell Hall, Chorley, in his 23rd year.

PETERSON—On the 19 h June, at the Seamen's Hospital, Hong Kong, N. Peterson, late second mate of the Russian barque Triton.

STUBBS—On the 4th June, at Shanghai, of typhoid fever, Mr. Joseph Stubbs, of Plymouth, England, late in the house of Messrs. Wainwright and Co., aged 20 years.

SOMERVILLE—On the 17th June, at Hong Kong, William Somerville, Engineer Gas Works.

UPTON—On the 5th June, at Shanghai, W. C. Upton, late of Boston, United States, aged 26 years.

WESTON—On the 7th June, at Shanghai, Mr. Evan K. Weston, late of Dover, England, aged 24 years.

EXCHANGES ON LONDON.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The new Congous continue to be purchased and shipped off with spirit, the competition being excited by a demand for the Russian market. On the whole, the quality of the present season's teas may be considered as good as those of last season; any estimate of the extent of the crop must be founded on wild conjecture. The prospects for the coming crop of Green teas have slightly improved, yet still the probability is the supply will be deficient and dear as a matter of course.

CANTON.—There is little or no prospect of any new Congous coming to this market this season. A good demand still exists for fine Tyshaans. Scented Orange Pekoes are rather lower. Scented Capers maintain their value, Canton Greens tend down.

FOO-CHOW-FOO.—The transactions of the fortnight have been considerable, the competition for fine Kaisows having increased. Taking quality into consideration, fine teas are a little higher than the opening rates, whilst common and medium teas, owing to a demand for Australia, tend up. Souchongs have been taken to some extent at about last season's opening rates. Flowery Pekoes will be in small supply this season. Scented Teas have been exhibited in moderate quantity, and although defective in scent, have been pretty eagerly picked up. The settlements of the fortnight are thus reported:—Congous, 52,500 chests, at 6.50 to 11.50 tls. for dusty and broken leaf; 17 to 19 tls. for good common; 20 to 37.5 tls. for flavoury to very fine Kaisows. Souchong, 7,500 chests, at 27 to 45 tls. for good to finest. Oolong, 3,500 half-chests, at 20 to 30 tls. for good cargo to finest. Flowery Pekoe, a small lot of fine at 40 tls. Scented Teas, 4,000 to 5,000 boxes, at 29 to 40 tls. for middling to finest. The stock on the market consists of 18,000 chests Congou, 7,300 do. Souchong, 16,000 half-chests Oolong, 100 chests Flowery Pekoe, and 3,500 boxes Scented. The supply of Congou this season to date amounts to 147,000 chests, against 140,000 chests same period last season. The supply of Souchong has been 15,000 chests, against 20,000 chests.

SHANGHAI.—Black Teas: Several musters of Oopacks have been offered on the market, but as buyers have been unwilling to pay the equivalent to Hankow rates, no settlements have taken place. There is a general disposition to withhold all offers for the present, and sales could not be made to-day except at prices considerably under the cost of the teas. There are no finest chops for sale, and only a few fine, stock comprising chiefly medium grades, which at the rates demanded would lay down from 3d. to 4d. over London quotations. One chop of fine Hohow (mixed Kaisow kind) from Kiukiang is reported to have been settled at 36 tls., and 320 chests of old tea left in stock have been taken at 17 tls. for a flooring chop. Reshipments of Hankow purchases amount to 21,045 chests, and the stock is estimated at 12,300 chests. Two clippers and a steamer have sailed for London, and the French Mail takes 2,500 chests Overland at £14 per ton of 40 feet. Green Teas: The only settlement to report is that of a common Moyune chop at 38 tls., showing a decline of half a tael on previous rates. Stocks remain much as last stated, and holders seem unwilling to part with the few parcels of country teas under previous prices. Musters of the New Pingsueys are looked for in about ten days. Foreigners are said to have contracted largely in the country at very high rates, and best chops will cost about 42 tls. proportion laid down here. The crop is reported to be of superior quality, and the supply will probably be about one-fourth more than last season. Settlements for the fortnight 935 ½-chests Moyune at 38 taels. Reshipments 327 ½-chests. Fychow Stock 5,457 ½-chests. Total settlements and shipments: From 1st June o date, 1,262 ½-chests against 6,885 ½-chests last year.

HANKOW.—During the fortnight which has since elapsed, samples of very fine Oopacks have been exposed, fully as good as the best of last season. As the Russian merchants are in the market for these teas, there has arisen a smart competition, and these fine Oopacks have been taken at 38 to 42 taels to some extent, one chop fetching 45 taels. In the early part of the fortnight prices for all descriptions were fully maintained, but as supplies came in freely, the inferior qualities declined 2 to 3 taels, when purchases to some extent were made of Oonams at 27 to 33 taels and Oopacks, at 30 to 34 taels. The market has been pretty well cleared of Oopacks, the fine chops being still eagerly sought after. There are musters of nearly one hundred chops Congou on the market, nearly all Oonams, but as the quality naturally falls off to the advance of the season, rates must give way accordingly. The transactions of the fortnight comprise 120 chops of Oonams and Oopacks, whereof about 30 chops are contract teas. The range of rates has been from 27 to 45 taels. The steamer Sea King has sailed. The clipper Falcon is full. The Challenger is posted for the 18th, and the steamer Robert Lowe partly laden with cotton for the 23rd. The export to date has been 4¼ millions, against 5¾ millions, same period last season.

KEWKIANG.—Green Teas: There are none on the market yet. The weather has been usually cold and stormy, and has inflicted some injury on the coming crop. The extent can only be guessed at for the present. The rebels are said to have retired from the producing districts. Black Teas: The supply of the fortnight amounts to 18 chops, principally Ningchows, of which eleven are contract teas, one chop is reported settled at 35 taels, and three other chops are under shipment for Shanghai, on teamen's account.

YOKOHAMA.—We have again to report but few settlements in this staple, only 230 piculs of old tea and 70 piculs new have changed hands as about our quotations; these purchases have been principally for the American market. Stocks ordinary, 150 piculs—good ordinary, 100 piculs; common, 100 piculs; good common, 50 piculs; medium, 100 piculs; fine, none; finest, none; new medium, 150 piculs. Quotations are as follows:—Ordinary, $1 to $3; good ordinary, $4 to $6; common, $8 to $12; good common, $14 to $18; medium, $19 to $26; fine, $27 to $30; finest, none; new medium, $25 to $28.

RAW SILK.—SHANGHAI.—There having been no transactions since last report, we are unable to give quotations. During the fortnight about 1,200 bales of the new crop have arrived, but as the dealers have again paid high rates up country, they are demanding such extreme prices, that so far they have not succeeded in opening the market. All the Chinamen agree in their belief of a shorter supply this season than last, and if we may place any confidence in the native reports, the gathering of the first crop has yielded less than in the previous year. The second crop is the principal one, the result of which will probably be known about the time of the departure of next mail, and until this has been ascertained, it is impossible to form any reliable estimate of the total crop. The new silk appears rather superior to last season's in colour and quality, though fuller in size, and quite "foul" and "mixed." The Tsatlees are the least satisfactory, and seem to have suffered considerably by the disturbed condition of these particular districts through rebel interference. From Japan 405 bales have come forward, and by latest advices prices had declined there $5 to 10 per picul. The unsold stock was estimated at 800 bales, and the new crop expected about the end of the month. The total settlements from July 1, 1863, to date, amount to 38,000 bales, against 76,000 season 1861-62, and 85,000 season 1860-61. The falling off is alarming, and is undoubtedly attributable to the rebellion.

YOKOHAMA.—Arrivals for the week have been very scanty, and a few parcels have changed hands at about last rates; the character of the silk is, however, getting worse, and indicates the approach of the close of the season, there being scarcely any good parcels in stock. This latter we estimate under 200 bales.

DRUGS.—Cassia Lignea has further receded in value; settlements are reported to the extent of 900 piculs at $15. Stock 1,500 piculs. Cassia Buds: 40 piculs are on the market and are held at $54. China Galls: Settlements, 200 piculs at $13.25; stock, 200 piculs. Vermilion: $43 to 43½ per 50 catty box. Rhubarb: No stock; no supplies. Musk: a settlement of 90 catties very inferior quality is reported at $92; there are 120 catties still upon the market. Galangal: No settlements; the market has fallen 50 cents. The stock on the market is 500 piculs, held at $2.90 to 3.30. Anise Oil: Stock, 20 piculs, held at $155. Cassia Oil: None on the market.

CAMPHOR.—HONG KONG.—The supplies lately arrived from Formosa, about 1,500 piculs have all been disposed of at $19 per picul packed, and the market is bare again. New supplies to a limited extent are again expected.

RAW COTTON.

HONG KONG.—A good demand has sprung up since the receipt of advices by the London mails of 10th May, and a rise of $1.50 to $2 has been established. Japan is much inquired for, and sales have been made to some extent. The sales of the fortnight are reported at 10,000 bags China and 5,000 do. Japan—the stock being reduced to 20,000 bags. Four ships are at present loading with the article—two for London, and two for Liverpool. The closing quotations are: Japan $35½ to 36. Ningpo $32½ to 33½. Shanghai $31 to 33.

CANTON.—The sales of the fortnight comprise 3,000 bags Shanghai, 2,500 do. Ningpo, 1,900 do. Shanghai, and 1,500 do. Japan. The market has advanced nearly one mace per picul. The unsold stock in the packhouses consist of 3,700 bags Shanghai, 1,500 do. Ningpo, 900 do. Shangtung, and 800 do. Japan.

SHANGHAI.—Owing to favourable advices from the home markets some few transactions have taken place at slightly advanced rates, taels 20.50 to taels 21 having been paid for best Shanghai. There has been less inquiry within the last few days, and we quote, taels 20.50 for finest Shanghai and taels 19.50 to 20 for Hankow. Total export from 1st June 1863, to 31st May 1864, 88,595,480 lbs.

NINGPO.—The rate demanded is $32.30 per bale of 118 catties, which exporters refuse to give. About 1,000 bales have been shipped to Hong Kong during the fortnight.

YOKOHAMA.—The favourable advices from England which were brought by the last mail, has caused a better demand. Rates tend up, and may be quoted $26 a $26.50 per picul.

CHINA IMPORTS.

COTTON YARN.—Without change to notice in value, the amount of business transacted in this article has been upon a small scale, estimated at 65 bales, and 69 bales of damaged yarn have likewise been moved off by public auction. Grey Shirtings have met with a moderate amount of inquiry at about the rates previously current, and the sales reported in this colony during the fortnight amount to 10,000 pieces, exclusive of 950 pieces of damaged goods. From Foochow sales of 1,250 pieces 7 to 8 lbs. goods are reported at $4.85 to $5.50. White Shirtings: The settlements of these goods reported in the Hong Kong market amount to 5,500 pieces, and from Foochow a small sale of 250 pieces 64 reed is reported at $5.50 per piece. T-Cloths: Have been in but slight request, and the bulk of the sales effected consist of sea-damaged goods moved off by auction. 1,000 pieces sound have found buyers, and the purchases at public sale amount to 2,100 pieces. 3,000 pieces 6½ to 7 lbs. have been sold in Foochow at $3.70 to $3.95 per piece. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: Have continued without inquiry, and there are not any sales of these fabrics to mention. Damasks: Without sales. Chintzes: Have also been without enquiry during the fortnight. Handkerchiefs: The sales of these goods are confined to 950 dozens sold by auction.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths.—The demand manifested for woollen fabrics has been more considerable than for some time past, but the market is very flat, and there does not appear any immediate prospect of better prices being obtainable. The sales of Spanish Stripes are put at 780 pieces, in addition to which about 520 pieces of goods of inferior quality have been moved off by public sales. Long Ells remain at the quotations given in last report, but have found buyers in this colony to the extent of 1,250 pieces. 160 pieces of damaged goods have been also moved off by public sale. Camlets: Have been in moderate demand, and about 750 pieces have changed hands in this colony during the fortnight at about previous rates. Lastings: The sales of these goods reported since the date of last circular amount to 750 pieces. Blankets: Nothing doing.

Digitized by Google

METALS.—Iron, Flat, &c.: A material decline has been established in the value of almost all description of iron in this market during the past fortnight, and the total settlements effected since the date of last report are estimated at 2.650 piculs. Prices in Canton do not show any alteration, but purchases have been confined to a trifling transaction in small round rod. Lead remains as previously quoted in the Hong Kong market with sales of 650 piculs reported for the fortnight. In Canton the value of the article has given way about 5 cents, and 1,400 piculs have found buyers. Tin: 1,330 slabs have found buyers in Hong Kong. Tin Plates remain as previously quoted, with sales during the fortnight of 1,800 boxes. Steel: Without sales to notice.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—From London: June 8, Vigil; 15, Assyrian; 15, City of Quebec. From Newcastle: 7, Albis; 13, Belle. From Sunderland: 7, Northern Queen. From Cardiff: 11, Little Edith. From New York: 20, Horatio.

At FOO-CHOW.—None.

At HONG KONG.—From Sunderland: June 28, Bedford. From Cardiff: 12, Good Hope; 22, Venus. From Newcastle: 14, Ramolina. From Hartlepool: 21, Carausius. From Newport: 16, Sailors' Home. From New York: 11, Nabob; 15 Dennis Horton; 28, Mo-Yune (str.) and Otslif.

At MANILA.—From London: June 9, San Louis.

At SINGAPORE.—From London: July 3, Prince Alfred. From Liverpool: 7, Bogota. From Cardiff: June 22, Heros. July 3, H. E. Susanna; 8, Alblasserdam. From Plymouth: June 24, De Hoop. From Sunderland: July 6, Jane Woodburn. From Rotterdam: July 7, Lvoput.

At PENANG.—From London: June 19, Sunium.

DEPARTURES.

From JAPAN.—For London: June 10, Messe.

From SHANGHAI.—For London: June 14, Eliza Shaw. For Liverpool: 9, Warwick Castle; 10, Peerless; 11, Reigate; and 20, Esk.

From FOO-CHOW.—For London: June 11, Min; 15, Yangtsze; and 17, City of Aberdeen. For Liverpool: 14, Ziba.

From HONG KONG.—None.

From MANILA.—For London: June 17, Admiral de Winter. For Liverpool: 10, Sales. For Falmouth: 18, Achilles. For New York: 10, Nor' Wester.

From SINGAPORE.—For London: July 2, Bonanza and Miss Nightingale. For Liverpool: July 8, Invincible. For England: June 23, H.M.S. Vulcan; and 25, M.M.S. Ringdove. For Falmouth: 28, Daniel Rankin.

From PENANG.—For London: June 22, Salvador Packet and Bothwell Castle; 23, Sea Wave; 29, Zingra; and 30, Bristolian.

LOADING.

At JAPAN.—For London: Natal, Amoy, and Yokohama. For Liverpool: Red Deer, Swallow.

At HANKOW.—For London: Robert Lowe (St.), Challenger and Falcon.

At SHANGHAI.—For London: Brockham, Coulnakyle, Silver Eagle, Taeping, Fychow, Gresham, Highflyer, Pegasus, Southern Empire, White Adder, and Knight Templar. For Liverpool: Affghan, Hougoumont, and Surry. For New York: None.

At FOO CHOW.—For London: Dora, Childers, Whinfell, Holmsdale, Star of China, and Ellen Rodger (to sail on June 19).

At HONG KONG and CANTON.—For London: Glenaros, Chanticleer, Banian, Yeavering Belle, and Marlborough. For Liverpool: Edward Percy, Geologist, Chua-sze, Jessie Beazley, Lord Dalhousie, Zenobia, Princess Sommawathy. For New York: Roslin Castle.

At SINGAPORE.—For London: Rangoon, and Tweed. For Liverpool: Volunteer.

FREIGHTS AND CHARTERS.

JAPAN.—To London: Cotton and tea, £5. 10s. to £6. Silk, £6. 10s. to £7 per ton.

SHANGHAI.—The arrivals have been numerous, and the requirements for coasting and the northern ports being very limited, there is a large number of unemployed vessels in harbour, the rates are therefore low for what little is offering for the coast. There are several fine clipper ships on the berth for London at £4. 10s. to £5 per ton for tea, and £3 for cotton.

FOO-CHOW.—Rates have declined to £4 and £3. 10s.

HONG KONG AND CANTON.—There is a fair inquiry for vessels for coast as well as for home. The following from Geo. Holme's Circular shows the principal statements:—Chaa-Sze (556) and Jessie Beazley (500), for Liverpool at £3 15s. Yeavering Bell (493), for London £3. 15s. to £4. Lord Dalhousie (786), for Liverpool, £3. 10s. to £3. 15s. Zenobia (1,414), for Liverpool, £3. Canute (1,420), Foochow to London, at £2. 10s. Rutlandshire (Holio), to London, £3. 12s. 6d. for sugar, and £4. 15s. for hemp. To Bankok and back the rates are:—47½ to 45 per picul, and 25 to 30 cents extra if to the north. Manila to Liverpool, £3 for clayed, and £3. 15s. for unclayed sugar, £4. 10s. for hemp.

SINGAPORE.—Tonnage is in less demand. The Edith (460) loads at Padang for New York at £5. 5s. per ton. To London and Liverpool the rates for dead weight is £3, and measurement goods, £4.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—June 8, Mountain Ash, London to Kanagawa; 9, Falcon, and 11, Glenisla, Glasgow to Batavia; Louis, Cardiff to Hong Kong; 17, San Louis, London to Manila.

From CHINA, &c., to ENGLAND and CONTINENT.—June 11, Netherby, Foochow to London; 13, Harry Puddemsey, Singapore to Liverpool; 14, Glencoe, Hong Kong to Liverpool; 17, Benvoirlich, Shanghai to London; 23, Alvares, Manila to London; 26, Aunt Lizzie, Hong Kong to London.

CASUALTIES.

SHANGHAI.

The brig Thor was lost on the N.E. point of Lima Island. Two of the crew were drowned, the remainder were well treated by the natives.

HONG KONG.

The British brig Star of the Ocean reports having experienced light baffling winds until the 22nd June, when she encountered a very heavy gale. On April 6th, in lat. 40 E., long. 35 S., she spoke the British ship Lady M'Naughten, bound to Shanghai, 104 days out. She was leaking badly, and was very short of provisions; the latter was supplied by the brig, and before leaving Anjer they were again in company; the leak, which was in the bow, had been discovered and stopped, but they had been again short of provisions for some days. They were, however, again supplied by the brig, and the vessel was enabled to proceed. When off Cockatoo Island, on the 30th of May, she spoke the Spanish barque B K, from New York bound to Hong Kong, 108 days out.

The Bremen three-masted schooner Charlotte, which left Hong Kong three days since, has been obliged to put back, having been in collision with the Hamburg ship Araccan. She has carried away her bowsprit, and sustained considerable damage.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Aug. 10, off Falmouth, from Bassein, Isabella Borgund; at New York, from Shanghai, Mercara; July 9, at Callao, from Macao, Julian; Aug. 12, off Queenstown, from Rangoon, Cestrian.

DEPARTURES.—Aug. 7, from Sunderland, for Singapore, Antonia; 9, from Swansea, for Singapore, Exonian; 10, from Deal, for Padang, Isaac da Costa; for Samarang, Henrietta; for Sourabaya, California; for Batavia, Gebroeders; 11, from London, for Hong Kong, Annie Archbell; 13, from Liverpool, for Shanghai, Polmaise; 12, for the Cape and Hong Kong; Nancy Brysson; from London, for Shanghai, John Norman; from London, for Shanghai, Alexandrina; 11, from Cardiff, for Singapore, Amazone; from Shields, for China, Pei Ho.

VESSELS EXPECTED.

(Exclusive of this day's Advices.)

From JAPAN.—At LONDON: Meppel, Witness, Lady Ebrington, Twe Cornelissen, Patricia, and Merse, Harwood, W. W. Smith, Alexander, Ann Adamson, Abbotsford, and Anglo Indian At LIVERPOOL: Marion, and Vampyre. At FALMOUTH: Auld Reekie. At NEW YORK: Osborne.

From CHINA.—At LONDON: Ethel, Monarch, Belle, Benvoirlich, Sea King (str.), City of Aberdeen, Yang-tsze, Fiery Cross, Flying Spur, Serica, Min, Young Lochinvar, Belted Will, Robin Hood, P. J. F. Burchardt, Keepsake, Echo, Chandanagore, Rajah (str.), Volunteer, Aunt Lizzie, Holmesdale, Rifleman, Isabella Robinson, Zelia, Vimeira, Zarah, Lady Wharncliffe, Gloucester, Lorton Vale, Iceni, Netherby, Sarah Ralston, Wm. Thompson, Spirit of the North, Queen's Own, Ocean Queen, Theodore and Julie, Amelia, Magnus, Josephine, Glaramara, Sappho, Charles Davenport, Bahia, and Osborne House. At LIVERPOOL: Fort William, Advance, Simoda, Cyclone, Fanny, Berwickshire, Joshua Bates, Wm. Dawson, Lauderdale, Ziba, Glencoe, Neville, Cornelia, Inamhore, Express, Mayflower, Regina, Victory, Glencairn, Bristow, Henriette Cornelis, Victoria, Montgomery, Unrivalled, Glenlee, Helvellyn, Australia, Eliza Nicholson, and Ann Forster. At FALMOUTH: Divina, Panama, and Linda. For ENGLAND: H.M.S. Vulcan. At BORDEAUX: Johanna. At HAMBURG: Mecklenburg, and Gravina. At NEW YORK: Eva, Dorchester, Egean, Hermann, Regnago, St. Paul, Sophia, Luson, Anita, and Gleam.

From MANILA.—At LONDON: Alavesa and Cambodia. At LIVERPOOL: Bella Galega, Aureliana, Diadem, Trafalgar, Patriot King, Alicia Annie and Barinaga. At FALMOUTH: Der West, Canaan, and Albuera. At COWES: John Banfield. At QUEENSTOWN: Victoria Cross. At HAVRE: Nouvelle Antoinette. At NEW YORK: Tropic and George Peabody.

From SINGAPORE.—At 'LONDON: Oscar, Confidance," Pet, Polly, Daniel Rankin, Bonanza, Miss Nightingale, Eleanor, Eena, Couranto, Najade, Athelstan, Dewa Gungadhur, Dunkeld, Tartar, and Princess of Wales. At LIVERPOOL: Bella Gallega, C. C. Chisholm, Victory, Agra, Beloochee Ferris, H Puddemsey, and Bombay. At FALMOUTH: Sarah Jane and Hindustan. At BORDEAUX: Salares and Java. At NANTES: Suez. At NEW YORK: Ocean Home, Gertrude, Caroline, Rudolf, Harzburg, and Reynard. At BOSTON: Ceylon, Aristides, Alexander, and Magnet.

From BATAVIA.—At FALMOUTH: Fredrika.

From PENANG.—At FALMOUTH: Schlosser. At CORK: Ceylon. At BORDEAUX.—Sophia.

SHIPS OF WAR IN CHINA AND JAPAN.

At HONG KONG.—The British steamers Hesper and Manilla, the gunboats Drake, Forester, Haughty, Janus, Opossum, Snap, Watchful, and Woodcock, and the Spanish steamer A. Escano.

At CANTON.—The British gunboat Grasshopper, and the Spanish steamer Patino.

At SWATOW.—The British gunboat Flamer.

At AMOY.—The British gunboat Staunch.

At SHANGHAI. The British steamer Swallow, the gunboats Algerine, Cockchafer, Don, Slaney, and Starling, and the French steamers Dordogne, Kienchang, Semiramis, and Tancrede.

On YANG-TSE-KIANG.—The British gunboat Hardy.

At the NORTH.—The British steamer Osprey, the gunboats Insolent and Weazel, and the Spanish steamer Narvaez.

At JAPAN.—The British steamers Argus, Barrosa, Conqueror, Coquette,

Digitized by Google

Cormorand, Coromandel, Euryalus, Leopard, Pelorus, Perseus, Rattler, Racehorse, Scylla, and Tartar, the gunboats Bouncer, Firm, Havoc, and Kestrel, the French steamer Duplex, and the Dutch steamers Djambi and Medusa.

Mr. S. D. Sassoon, who has been for some time on a visit to this country and the Continent, accompanied by his brother, will, we understand, leave for Bombay early in October. He is at present staying at the Alexandra Hotel, Hyde Park.

Of the four vessels contracted to be built in New York for the Japanese one is nearly ready, but the laying down of the other three depends on a fall in the price of labour.

LITERATURE.

The Cruise of the Alabama and the Sumter; From the Private Journals and other Papers of Captain Semmes, C.S.N., and other Officers. Two vols. London: Saunders, Otley, and Co. —These volumes will be read with delight wherever adventure, discipline, courage, and a chivalrous sense of duty and humanity are held in honour. The character of Captain Semmes himself will stand out more brilliantly than ever. We cannot but sympathise with the brave officer, who, while complaining that he is "getting too old to relish the rough usage of the sea," skims over the wide ocean for months at a time in all weathers, and is on deck at all hours, in obedience to what he feels to be the imperative command of his country's need. All the while, in whatever part of the world he may be, each anniversary—the birth-day, the wedding-day or Christmas-day—recals to the wanderer the wife and children he has left at home. The song of a little bird has a charm that at once wafts the soul of this "rough pirate," as he has been represented, away from the sea to scenes endeared by affection. In the middle of the Atlantic he writes: —"On this fine balmy morning I enjoyed exceedingly the cheerful notes of our canary. This is a little prisoner made on board one of the whalers; and sometimes at early morning I fancy myself amid 'jessamine bowers,' inhaling the fragrance of flowers, and listening to the notes of the wild songsters so common in our dear Southern land." The world in general has no other notion of Semmes than of a buccaneer of modern times, who would have been as deeply stained with bloody deeds as his predecessors of the seventeenth century had he lived in their times. It has been forgotten that the American civil war found him a commander in the United States Navy, living at Washington; that his proclivities towards the South were so well-known, and his reputation as a naval officer so pre-eminent, that as early in the struggle as February, 1861, he was applied to by the Confederate Committee on Naval Affairs, and that it was not till he had formally resigned his commission in the Federal navy that he felt himself a free man to serve "his struggling country." The editor of the volumes thus indicates the

CHARACTER OF CAPTAIN SEMMES.

Our readers will see, by-and-by, from the quotations we shall make from the captain's log, that he is as little the hungry fire-eater, which many of his admirers suppose him to be, as he is the Black-Pirate of the New York Press. Captain Semmes is a native of Charles County, in Maryland, a state which has furnished numerous patriotic citizens to the South. Before accepting his new service he had taken an honourable farewell of his old. The Federals had no charge to bring against him before the day when he stepped on the deck of the then unknown and insignificant *Sumter* steam-vessel. What they may have said later is of no particular consequence; nor can it be thought to be greatly to the discredit of Captain Semmes that they have cried out loudly, and as men in pain.

We need not here sketch out the exploits of the *Sumter* and the *Alabama*—they are too recent, and made too much noise, for them to have slipped from the memory of our readers. The editor has done well to give us as much of the narrative as possible in his hero's own words. Wherever the former has had to connect portions of the Captain's Log by a digest of intervening events the task has been clearly and effectively discharged; and he seems never to have done this but when absolutely necessary, perceiving, with the good sense he evidently possesses, that it would be impossible to improve on the Log, with its entries written at the moment, the actions and scenes they recorded being still before the writer's eyes, or the latest impressed on his memory. We must confess we were unprepared for the heart-stirring treat that awaited us in the perusal of this "Cruise." The adventures succeed each other rapidly—they take place in such out of the way and hitherto unheard-of nooks and corners of the world—that the story combines a double excitement, rising to the highest pitch, in a fashion such as we scarcely remember to have met with before. One page burns with the gasping feverishness of a chase, or constrains you to hold the breath while listening to the details of some crafty *ruse* to elude or entrap the enemy; and then the next carries you off to a Juan Fernandez of an island, beautiful enough to set a modern Robinson Crusoe longing to take up his abode there. We are borne off on a delightful voyage of discovery and float away on a career of triumph at one and the same moment. The two volumes are a perfect romance of history, told with a freshness and simplicity that no romance ever yet achieved. The mystery of the way in which the *Alabama* got her supplies is unfolded by the account of her sojourn at certain small islets on the Spanish Main. The hope of getting a supply of fresh water, while cruising near Singapore, introduces us to a recent French annexation, where Captain Semmes "is quite surprised to learn that he had arrived in civilized waters." Some of those little touches of feeling that characterize the temperament of the man will be found in this account of

PULO CONDORE.

Friday, December 4th.—The harbour is picturesque, with mountains rising abruptly from the water to the height of 1,800 feet, clothed with dense verdure from water's edge to top, many of the trees being of large size. The soil is very rich, but there is little cultivated land, the mountain sides being too steep. The French have constructed two or three huts on the northern shore, and a couple of rude jetties as landing-places of loose stone. Landed on one of these to get sights for the chronometers. Found a Frenchman overseeing three or four Chinese seamen chopping wood and thatching a hut. The French make slaves, both here and on the mainland, of prisoners of war. The island is under the government of an Enseigne de Vaisseau. The commander of the junk is a midshipman, so that we have gotten among high dignitaries. Landed at noon at an inviting little sand-beach on the south shore, to get latitude —8 deg. 39 min. 10 sec. Found the ruined hut of a Frenchman, with his grave close by, and his name carved on the bark of a tree on the beach —a picturesque burial spot, amid eternal shades, with the lullaby of the ocean.

Saturday, December 5th.—Amused this morning watching some sedate old baboons sitting on the sand-beach opposite, and apparently observing the ship very attentively. Large numbers of these caricatures of humanity inhabit these islands. Yesterday, when a boat landed, great numbers of young ones were seen gambolling about; but one of the old ones having called out to them, they soon all disappeared in the thick wood. Returned the visit of the Frenchman. He is on board a miserable country craft, of about forty tons burthen. Sent a boat to the village on the east side to call on the governor, and see if we could get some fruit and vegetables. Boat returned at nightfall. The village is a mere military port. The native inhabitants, except a few prisoners, or slaves, having fled to the mountains, and no supplies were to be had. The governor's residence is a *thatched* hut, as are all the other houses, with no industry or taste displayed in their structure. A few patches of cultivation were visible—rice, fruit, and cotton—the latter looking rather unpromising. The destroyers of their rice were the monkeys. There are several varieties of fine large pigeons here, and in abundance. They are beautiful in feather, and fat. A common variety has a green back and golden tail. This must be a paradise for monkeys, so abundant is their food in the forests, almost every tree bearing a fruit or nut of some sort. These French officers had heard and believed that we sunk or burned every ship we took, *with all on board*, and received the paymaster rather coolly at first, but became quite cordial when they observed we were *Christians*, and did not commit this wholesale murder.

Sunday, December 6th.—Another lonely Sabbath-day—lonely, though in the midst of one hundred and fifty people. Away, away from home, by half the circumference of the globe! One of the most frequent and unpleasant of my experiences since I entered the China Sea is an *oppressive* sense of *great* distance from home, and the utter strangeness of everything around me, almost as though I had entered another planet.

Those who assisted in executing the wondrous feats performed by the *Alabama*, it might be supposed, were picked men. It is clear that England is unwittingly liable to the charge alleged against her by the Federals of having supplied their foe with both ship and crew. What may be effected out of a very unpromising material by a man endowed with the talent of command may be learnt from Captain Semmes' description, written on the 29th December, 1862, of the

CREW OF THE ALABAMA.

Another seaman got drunk to-day, and seized his bag to go on board the barque to return to England. Confined him in double irons. Many of my fellows, no doubt, thought they were shipping in a sort of privateer, where they would have a jolly good time and plenty of license. They have been wofully disappointed, for I have jerked them down with a strong hand, and now have a well-disciplined ship of war. Punishment *invariably* follows on the heels of the offence. It has taken me three or four months to accomplish this; but when it is considered that my little kingdom consisted of one hundred and ten of the most reckless from the groggeries Liverpool, this is not much.

LONDON, MONDAY, AUGUST 15, 1864.

GORDON'S RESIGNATION, AND THE DISBANDMENT OF THE ANGLO-CHINESE FORCE.

Gordon's campaign against the Taiping rebels closed with the capture of Chang-chow; and the gallant disciplined native corps, with its brave staff of foreign officers, have been disbanded, after an active service of fifteen months, that will compare with the most successful military achievements in China. From March, 1863, to June, 1864, the progress of this force through the province of Kiang-soo, under his command, was one series of successes against the strongholds and picked men of the enemy—who fought with the desperation of despair. With the exception of the reverse at Kintang, on every occasion they defeated the insurgents with comparatively small loss, and conquered eventually the whole country under their domination, thereby relieving the great foreign emporium of Shanghai from the dread of their presence. During that period fourteen of the chief cities in the province, beyond the thirty mile radius, were captured; and Kiang-soo, with its population of forty millions—less the decimation from the rebellion—is now restored to Imperial rule. But for the skill and prowess of Gordon, this canker-worm of rebellion would still have been eating into the vitals of the most fertile province in China, and continually threatening the existence of its commerce in which our merchants so largely participate. The restoration of this large territory to legitimate traffic is already giving a fresh impetus to foreign trade which was languishing latterly from the baneful effects of the insurrection. On these grounds alone Major Gordon is entitled to a substantial testimonial from the foreign as well as the native merchants of Shanghai, on his departure from the scene of his operations; and we very much mistake the high and liberal character of the firms of all nationalities at that flourishing port, if he is allowed to leave without a public recognition of his services to commerce.

But Gordon has had higher motives than even these to prompt him to action, in crushing this desolating rebellion. It is abundantly manifest in every stage of his campaign that he was actuated by feelings of humanity in prosecuting with such vigour, operations that would put an end to this awful strife on the part of hellish blasphemers, who, under the cloak of quasi-Christianity, waged war against the helpless, the innocent and the industrious. These motives are shadowed forth in the series of despatches from him, and just published among the parliamentary papers. Some of the details are so sickening, and the refinement of cruelty exercised by the Taiping hordes so dreadful, that it makes us shudder at the horrors of this strife, and execrate these fiends in human shape—from which condemnation their foreign sympathisers are not entirely free. It is true that to all intents and purposes, Gordon was an officer in the Chinese service, ostensibly fighting in the cause of a foreign Prince to whom he does not owe allegiance; and it is equally true that he did receive pay for these services in the manner that soldiers of fortune have done from time immemorial, and in all nations, fought their way in the field. But the exceptional circumstances under which he accepted the command, with the approval of the British general and Minister in China, without forfeiting his rank in the British army, all point to the fact that he never was incorporated in the Chinese service; while his subsequent condemnation of mandarin treachery, and his humane disposition towards the vanquished, show that he was ever actuated by the most honourable motives, which ignore the supposition of any venal influence prompting him to action. He witnessed the misery under which the land laboured; he saw in the disciplined forces the means to restore a better state of things, and, with confidence in his own capacity to command that force with military skill, he went forth to conquer or to succumb. After many "hair-breadth 'scapes," he has come forth not altogether scathless from the fight, having nobly battled and won in the cause of humanity and religion by inflicting a blow upon the hydra-headed monster of Taipingism, from which it is evident that its doom is sealed. For this is he entitled to the thanks of mankind; and we feel assured that the most rabid philo-Taiping cannot but grant him a due meed of praise for the protection he has given to the benighted followers of the Tien-wang who fell into his power. It must be very satisfactory to himself and friends to find that the Press of his native country have done him full justice, in spite of the croakings of certain self-constituted censors on Chinese affairs, and mendacious writers in the local journals. We flatter ourselves that we were among the first to point out the rare qualities of this young but skilful and experienced British officer, which has been recognized in such handsome terms by the greatest literary organ in the world — *The Times*.

Though an officer just verging on the younger side of the prime of life, Gordon's services in the British army range through the Crimean war to the capture of Peking. On every occasion where our troops were engaged he exhibited superior talents and activity as an officer of the Royal Engineers. He received his promotion as major just on the eve of his assuming the command of the Anglo-Chinese contingent. In doing so he was invested with the title of Tseoong-keoon, or General of an army. His predecessors in the force all assumed this native title, but Gordon preferred his rank and title as a major in Her Britannic Majesty's service to the highest degree the Emperor of China couldbestow upon him. His loyalty in this respect is only one of the fine qualities he has always displayed in his modesty and unselfishness as the *beau ideal* of a British officer. Nevertheless, it is worthy of remark that his gallant conduct has still further elicited the approbation and recognition of the Court of Peking, for we learn that in the *King Paou* or *Peking Gazette*, there is an Imperial decree bestowing upon him the title of Tsiay-to-o, the oldest title of a military Commander-in-Chief, which places him on a par with the Viceroy of the province, in mandarin rank. This added to the pecuniary awards for his services, shows how highly they have been appreciated by the Chinese Government, and reflects much credit on the liberality and justice of Prince Kung and the members of the Regency. So far Gordon has yielded up his command just in time, with all his honours thick upon him. In him the Emperor of China loses the best and bravest of foreigners who have ever espoused the Imperial cause in this dreadful civil war; and Her Majesty regains a brave and loyal soldier, experienced in the art of warfare, just come from one of its most sanguinary schools, wherein he has displayed all the genius of conception, and the skill to execute the plans of an accomplished general. It is to be hoped that these qualifications will be kept in view by his superior officers on his arrival at the Horse Guards, after so many years' absence on foreign service. We trust that they will not be unmindful of recommending him for further steps in the ladder of promotion. Under ordinary circumstances, had he been engaged in the arduous duties he has performed in regular service, nothing short of a colonelcy and a pair of golden spurs, with the accompanying title, would have been his reward. It is just possible that the first draught from the fountain of honour may be awaiting him on his return to England, and we may add C.B. to the name of G. C. Gordon.

THE EUPHRATES VALLEY RAILWAY.

After a lapse of several years, the route to India and the Far East, by way of Mesopotamia, from the Mediterranean to the Persian Gulf, down the valley of the Euphrates, is again brought prominently before the public, in a letter from Capt. Selby to Mr. Andrew, on the importance and necessity of establishing that line of route between England and her richest possessions. Three years ago the press of this country were

Digitized by Google

almost unanimous in advocating the importance of this route through the Turkish dominions, not only in a commercial, but a diplomatic and military point of view, as the most eligible for all purposes, and entitled to government support. It was proved by eminent engineers that if a line of railway was constructed to Bussorah, few engineering difficulties would be encountered; and a line of steamers from thence to Bombay *via* Kurrachee, the distance, compared with the Suez route, would be lessened fourteen hundred miles, and passengers could be conveyed from London to India in three weeks at the outside. Moreover it was shown that a considerable trade could be carried on between the western provinces of India and the eastern provinces of Turkey, so as to develope the resources of these regions, and spread the peaceful blessings of European civilisation among the semi-barbarous inhabitants. The maritime part of this grand project has been in operation for some time, under the management of an enterprising steam navigation company, who have so far succeeded in opening up the line from Bussorah to Bombay that Her Majesty's Government have, within the past year, granted a subsidy for the postal service, which goes far to make the undertaking one of profit. Having done so much for the sea and river portion of the route, it is to be hoped that the Government will no longer delay in aiding the opening up of the land section. Some time ago a large and influential deputation of noblemen and gentlemen interested in Indian affairs, solicited Lord Palmerston to take into consideration the advisability of the British Government granting pecuniary support to the Euphrates Valley Railway, which was favourably received, but on account of the then low state of the Indian finances, the matter was allowed to drop. Now, a period has arrived when the exchequer of these dominions was never in a more flourishing condition, and there is every probability that the Ministry would extend the subsidy already granted, so as to include the Euphrates Valley Railway Company, if represented by a second influential deputation.

This letter of Captain W. B. Selby is opportune, and places in a practical light the numerous advantages that would accrue if the railway was carried out. From his experience as a surveyor in Mesopotamia he shows by a recent examination of the country that the facilities for constructing the line are even more than was originally anticipated; while the Arab population would deem it a boon to their country, and hence there would be no fear of their throwing obstacles in the way of laying it down, as at one time was feared. On the contrary, from the statements of the British Consul at Diarbekir, contained in the letter, it would appear that if the work was undertaken by Englishmen, and not under Turkish auspices, there would be no lack of native navvies for the works, and when finished, it would remain unnjured, if the sheiks of the different tribes through whose districts it passed were treated with common courtesy and some small present, according to ancient custom. We refer our readers to the letter itself for further information connected with this important route; and we shall look forward with sanguine expectation to the success attending a second application for a Government subsidy, or sufficient public support to enable the directors to construct the line.

Lieut.-Col. John Neptune Sargent, C.B., 3rd Foot, formerly serving in China, having completed the qualifying service in the rank of Lieut.-Colonel, to be Colonel, under the provisions of the Royal warrant of the 14th of October, 1858.

The *Luzon*, built for Messrs. Ker, Bolton, and Co., by Messrs. A Stephen and Co., of Kelvinhaugh, has made a trial trip, in which she attained an average speed of eleven knots per hour. The *Luzon* is intended to trade between Manila and China.

The *Illustrated London News* of the 13th contains sketches from Japan.

Continental Intelligence.

HAMBURG.

(from our own correspondent.)

August 7.

The Treaty of Commerce between Prussia and Japan, which was signed by Count Eulneburg (now the Minister for the Home Department in Prussia) on the 24th January 1861, and ratified on the same day of this present year, has not yet been published, but the needful orders have now been given, and its publication may be shortly expected. The original text is in the German and Dutch languages. According to the stipulations contained in the treaty, the Tycoon of Japan binds himself to permit the establishment of a resident diplomatic agent of the King of Prussia at Jedo, as well as of Prussian Consuls in the opened ports of Hakodadi, Kanagawa, and Nagasaki. Prussian subjects are not to be allowed to penetrate more than ten Ri into the interior from Hakodadi and Kanagawa, but from Nagasaki they may go to any distance into the country. The Ri is 12,456 Prussian feet, and, consequently, equal to rather more than two English miles. The distance is to be reckoned from the Gojoschio, or Council-hall, in the above-named two ports. The Prussian Consuls in Japan are exempted from this restriction, and are at liberty to travel through the country in any direction they please.

The following gentlemen from the Far East have arrived in this city and been introduced by subscribers to the Commercial-rooms in the Exchange buildings:—Mr. G. A. Reme, from Singapore; Mr. George Schuvemann, from Shanghai; Mr. H. Ducheddo, from Hong Kong; Mr. G. Ventz, from Bombay; Mr. Gildermeister, from Japan; Mr. Ad. Koch, from Batavia; and Mr. O. Rheiner, from Singapore.

From St. Petersburg we learn that the *Gonets* steamer, placed at the disposal of the telegraph service on the Amoor, left Strelensk on the 29th of April last, and arrived on the 5th of May at Tchita. This is the first steamer that has gone up the course of the Ingoda as far as the last-named town.

The Russian *Gazette de la Bourse* contains the new postal regulations, by which letters to foreign countries may, in future, be prepaid by stamps, which was hitherto inadmissible. For this purpose, in addition to the three postage stamps (of 30, 20, and 10 copecks) now in use, new ones of 5, 3, and 1 copeck have been issued. The postage of a single letter from any part of Russia to China, Japan, Java, the Moluccs Islands, Borneo, Sumatra, and the Philippine Islands, is 65½ copecks.

COMMERCIAL.

Coffee.—The prospect of a near settlement of the long-pending Danish question, the improved advices from the markets in Holland, and the latest accounts from Rio, in conjunction with the continued large deliveries ex warehouse, combined to exercise a favourable influence on this market, and promote increased confidence. The remaining stock of washed Laguayra has been cleared off at a trifle above last week's currency, whilst St. Domingo is more in favour, and has been sent with considerable success to places where this description was hitherto unknown. East India sorts move off slowly at full prices. Java sells at from 8½ to 11 schillings banco per lb. Of Ceylon there is none in the market. The sales of the fortnight amounted to 23,000 bags, and the fresh supplies during the same period were 42,000 bags.

Sugar.—The market has been calm, and the raw article drooping, prices having receded 12 sch. bco. per 100 lbs. The dealings in refined goods were not extensive, amounting to 23,000 loaves, of which 8,000 of Hamburg steam-made Raffinade at 4½ sch. bco. per lb.

Rice.—This article continues in a firm position, but the transactions in cleaned have not been larger than usual. Four cargoes of rough have dropped in last week—the *Noordstern*, from Singapore and Bassein, with 2,000 bags, the *Zephyros*, from Rangoon, with 5,500 bags, and the *Ariel* and the *Betty*, with together 12,700 bags from Akyab. The cargo of the last-named vessels (with 7,000 bags) has already been disposed of by private contract.

Spices.—Cloves, mace, and nutmegs are again higher in value, with an animated demand and a rising market. No alteration in pepper or cassia lignea. Ginger firmly held, but with only limited sales.

Spelter.—Market quiet. The only sale reported was 1,000 centners for September delivery at 15 marks 10 sch. banco per centner. The stocks are very small as compared with the preceding years, being only 8,000 centners against 63,000 at the corresponding period of last year, 120,000 in 1862, and 76,000 in 1861.

Tin.—A moderate business has been done in Banca at 11¾ to 12 sch. banco per lb.

SHIPPING.

Departures.—July 26, St. Thomas, sailed from Cuxhaven to Hong Kong; 31, Antelope, ditto.

HOLLAND.

(from our own correspondent.)

Rotterdam, August 7.

At last the elections are finished. As I predicted in my preceding letter, Professor J. A. Jonckblaet obtained the majority at Winschoten, and Baron van Goltstein at Hoorn. It is impossible to deny that the defeat of Mr. W. T. Gevers Deynoot is a very considerable check for the Liberals. The struggle was very serious, and both parties spared no manœuvres to gain the day. At the first election at Hoorn, only 1,127 persons polled; at the second, 1,201; and now 1,725, of which Mr. van Goltstein obtained 878 votes. These numbers prove that all was done that could be done. As to Mr. Jonckblaet, he will have to choose between the post of Rector Magnificus at the University of Groningen and that of member of Parliament. It is impossible to be both at the same time.

Mr. Thorbecke has left the Hague for Dresden. Our Minister of Home Affairs will stay there with his family till the end of August, when the Session must be closed by him in the name of His Majesty. Mr. Transen van de Putte will

Digitized by Google

remain some time longer at Kissingen, where he is taking the waters. His state of health causes great anxiety to his friends, for they fear that he will be unable to continue at the head of the colonial department.

The Imperial Prince of Russia, the Archduke Nicolas, travelling incognito as Count du Nord, has arrived at Scheveningen. That beautiful bathing place is this year so crowded that several notabilities, as Baron Rothschild, M. Fould, &c., have attempted in vain to obtain apartments for the season.

You will remember that Mr. van der Maeson de Sombreff, when Minister of Foreign Affairs, abolished the embassy at Stockholm on economical grounds. The consequence of this measure, which was highly disapproved by the press, is that Baron von Wetterstedt, the Swedish Ambassador, will leave the Hague at the latter end of this month, and will not be replaced.

It is generally reported that the works for the canal from Amsterdam to the North Sea will be begun within a few weeks.

A correspondent at Batavia writes to the *Arnhemsche Courant* that the Governor-General of the East Indies, Mr. Sloet van der Beele, is about to ask for his retirement. Nothing is known about it here, and the rumour is accordingly contradicted.

A company is organising here to open regular steam-boat communication between Rotterdam and Batavia. The capital will be of 3,000,000f., and five first-class steamers will be built. The passage is to be done in sixty days at the outside. No Government subsidy is asked. All that is required is a guarantee that when the steamers arrive at Batavia, the Government will take care that there shall be always 400 tons of Government goods ready for the return cargo. The International Association for the promotion of social science will hold its annual meeting at Amsterdam in the palace of the King, from the 26th September till the 1st October. The public opinion is that the Palace of Industry, which will be opened on the 16th inst., with a grand musical festival, would have answered the purpose much better.

The Polytechnic School at Delft, for the instruction of civil officers for the East Indies, will be opened early in September. It is rumoured that Mr. van Bosse is about to replace Mr. Betz as Minister of the Finances.

There are many railway schemes now before the public. The concession for the railway from Nymeguen to the Prussian frontiers has been granted by the Government. Another will be asked for a line from Amsterdam, *via* Purmerend, Hoorn, Enkhuirez to Heenwarden, a route much shorter than that of the State railways. Several plans also are proposed for shortening the distance between Amsterdam and Rotterdam. The only question is, "Can the money be found?"

Don J. A. de Rascon arrived some days since at the Hague as Minister Plenipotentiary from Spain. Till now, Spain was represented at this Court by merely a resident Minister. It would seem that the relations between the two Governments are much more friendly than those of our bondholders with the financial department at Madrid.

COMMERCIAL.

Coffee.—Market calm. The N. T. C. will sell by auction on the 17th inst. 83,000 bags Java. Since our last report 2,500 b. greyish Java, ex Maarten van Rossum, were sold at 46½ c. Stock N. T. C. 354,800 b. private 40,300 bales.

Tea.—In public auction 560 chests Congou were sold at 100 to 140c., and 250 chests Souchong at 150 to 151c. The market is in a good condition. Stock, 13,300 ½ chests.

Sugar.—Market dull. Prices nominal. Java white, 40f. to 43f., grey, 38f. to 39f., low grey, 35f. to 37f., brown, 30f. to 34f.; Manila grey 34f. to 38f., brown, 30f. to 34f.; Mauritius 34f. to 38f., brown, 29f. to 33f. Stock N. T. C. 18,444 kran. Java.

Rice.—No affairs to report except 740 b. Java, ex Maarten van Rossum, at 8½f. and 7f. Stock, 69,500 b.

Spices.—Without transactions, in waiting for the great public sale of the N.T.C., when the whole stock will be offered, consisting of 1,410 casks nutmegs, 740 casks mace, 70 casks cloves, 1,378 fard. cinnamon. For cloves there was some demand; No. 3 is paid with 33c. to 33½c.; cinnamon, No. 2, 93c.; No. 4, 89c. to 91c. Pepper: No lots offered. Stock, 5,300 b.

Tobacco.—The market is very inactive; there are no sales of Java to report. A great deal of the stock, consisting of 9,982 b., will be sold by public auctions within a fortnight.

Cotton.—Some lots E. I. were sold for export. The prices are generally lower.

Metals.—Very quiet.

Indigo.—The market is in a very firm condition. 75 chests Java were sold at much higher prices.

Hides.—268 and 1,164 Padang cow, and 312 and 69 do. ox hides, ex *Padang Packet*, were sold at prices that did not transpire; likewise 800 Batavia ox. Stock, 28,584. From the 1st January till ult. July, 71,919 p. were imported.

Hemp.—Manila, 67f.

Vanilla.—Per public auction, 150 kilogrammes Bourbon were sold at 2½f. to 9½f. per ½ kilos.

Arak.—There is more inquiry for this article. Several parcels were sold, as 15 casks ex Prinses Amelie, 300 do. ex Marseille.

Money.—Easy. Bank discount 4½ per cent.; open market, 4½ per cent.; N. W. S., 2½ per cent 62½, 3 per cent 73½; 4 per cent. 97½. Handelmaatchappy 141. Ex London, 3 pm. 11.66f., short 11.89f.; Paris, 3 pm. 46.30f., short 47.10f.

READY TO SAIL.

At Brouwershaven.—Johanna Maria, for Batavia; Bengalen, for Macassar; Haamstede for Batavia; Hollandia, for Batavia.

At Texel.—California, for Sourabaya; Henriette, for Samarang; Goede Verwachting, for Batavia; Zaamstroom, for Batavia; Sindbad, for Sourabaya; Ortelius, for Batavia.

LOADING.

At Amsterdam.—For Kanagawa and Decima: Adriana Johanna, Yokohama, Engel, Maria. For Padang: Padang Packet. For Batavia: Ymuiden, Electra, Three Gerusters, Zeenimph. For Batavia and Samarang Quartet, Admiral de Ruyter. For Batavia and Sourabaya: Jan van Schaffelaar, Vrede, Henrietta Maria. For Samarang: Herman de Ruiter. For Sourabaya: Regina Maria, Nederland.

At Rotterdam.—For Batavia: Eva Johanna, Zuid Holland, Tonia. For Batavia and Sourabaya: Eersteling, Medea. For Batavia and Samarang: L. J. Enthoven. For Samarang: Van der Palm. For Sourabaya: Edourard Marie, Stad Dohhum. For Kanagawa: Niphon. For Padang: Lammina, Elizabeth, Maarten van Rossum. For Singapore: Maria Louisa Antoinetta, Jan van Galen. For Singapore and Hong: Singapore.

FREIGHTS.

The following quotations are from the Circular of Messrs. Fauchey and de Fletter, shipbrokers, Rotterdam:—

For Batavia: 15f. to 20f. For Batavia and Sourabaya: 15f. and 25f. For Batavia and Samarang: 15f. and 20f. For Samarang: Palm 20f. For Padang: 30f. to 35f.; all with 15 per cent. and per ton of 2,000 kilogrammes. For Kanagawa: Nipon, 60f. and 15 per cent For Singapore: 30s. to 40s. Hong Kong: 40s. to 50s., with 15 per cent. per 40 English feet.

PASSENGERS INWARD.

Per *Maarten van Rossum*, Capt. Gerrebrands, at Brouwershaven, from Batavia: Capts. E. I. Army, Backerus and Eichelberg, Dr. Broers, Mr. Hoesthoff, Capt. Kuipers and family, Mrs. Barnstein, and Miss Fristcorn.

Per *Æolus*, Capt. de Vries, at Brouwershaven, from Batavia: Mr. L. J. Stoll, and Miss Koenen.

Per *Argo*, Capt. Gesterkamp, at Amsterdam, from Batavia: Lieut. G. N. de Haan, and the Engineer Smit.

Per *Maria Anna*, Capt. van Monnom, at Brouwershaven, from Java: Mr. van Ronkel and family.

Per *Zeenimph*, Capt. van Roggen, at Nieuwe Diep, from Batavia: Mr. Brederode and family, Mr. Gerards and family, Mr. van Zutphen and family, Messrs. Elliot, and Miss van der Meulen.

Digitized by Google

Per *Johan Hendrik Ferdinand*, Capt. Lodewyks, at Brouwserhaven, from Batavia: Mr. E. Geluk and family, thirty soldiers.

Per *Maria Diederika*, Capt. van Marion, at Brouwershaven, from Padang: Mr. Kriesfeld and family, Mr. de Bruin and family, and Messrs. Mus, six soldiers.

Per *Java Packet*, Capt. Hellingman, at Nieuwe Diep, from Batavia: Mr. Mirandolle and family, Mr. Paauw and family, Mr. Daendels and family, Messrs. Rose, Verhulp, Kapfer, Mrs. Buyn, Mrs. van Hoevell, Miss Telles, Miss Coblyn, six soldiers.

Per *Dionysia Catharina*, Captain Jaski, at Amsterdam, from Banjoewangie; Major Pique and family, Mr. Van Bunge and family, the Engineer of the E. I. Railways, A. Catoite, four soldiers.

Per *Maria Adriana*, Capt. Van der Held, at Brouwershaven, from Batavia: Mr. Kam and family, Mrs. Brunner, Mr. Richter, nineteen soldiers.

Per *Susanna*, Capt. Vonck, at Brouwershaven, from Batavia: Baron Van Heerdz and family, Mrs. George, with four children, Van Gennep, Mr. Wetner.

Per *Ouderkerk aan den Amstel*, Capt. Swart, at Amsterdam from Batavia: Mr. Last and family, Mr. Helmers and family, Mr. Van Vryhoeff, the captains of the E. I. Infantry Bruggeman and Blasius, Mrs. Greeff, Mrs. Van Mienne, Miss Gude, Messrs. Duperon and Kollman, twelve soldiers.

PASSENGERS OUTWARD.

Per *Jacoba and Christina*, Captain Jaski, from Nieuwe Diep to Batavia: Mr. T. Hoog and family, Mr. L. Free and family, Mr. H. Ide and family, Mr. W. van dr Kaa, Mr. C. C. Bierhhuijs, and Miss W. C. Frappen.

Per *Cornelis Gips*, Captain Verhoeven, from Amsterdam to Batavia: Mr. J. Hes.

Per *Henriette*, Captain Visser, from Amsterdam to Samarang: Mr. H. F. Goudswaard, and family, Mr. P. Goudswaard.

Per *Johanna Elizabeth*, Captain Duinker, from Amsterdam to Batavia: Messrs. F. F. W. Boers, J. Dekker, F. L. Louis and family, Mrs. A. van Zanten and daughter, Miss A. M. van Dommeling.

Naval and Military.

The *Times'* reporter gives the following:—

The screw steam corvette Encounter, 14. Capt. Roderick Dew, C.B., was paid off at Devonport, by Admiral Superintendent T. M. C. Symonds, C.B. This ship was put in commission in September, 1859. On receipt of the despatches detailing the Peiho disaster, she, with with several others, was ordered to assist in the intended expedition against Peking. Capt. Dew was selected for the Encounter in consequence of his knowledge of China. On arrival, early in 1860, having convoyed to China the gunboats Snap and Bouncer, the Encounter was at once despatched as pioneer of the expedition. After the fall of the Taku Forts, Capt. Dew piloted the Carthage and the Grenada,, which had Lord Elgin and his Staff on boad, to Tien-tsin. On the subsequent advance of the army on Peking, he was selected by Sir James Hope to explore the river. In the last fight his gig's crew turned the flank of the Tartar cavalry, who attempted to cross the river. During the remainder of the campaign Capt. Dew commanded the flotilla of 400 boats on the upper waters of the Peiho. The Encounter was afterwards in Japan. Capt. Dew received the thanks of Earl Russell on the occasion of the English and French Ministers leaving and returning to Jeddo at the time of the murder of the United States' Secretary of Legation. As senior officer at Shanghai in 1861 he was again thanked by Earl Russell for the energy he displayed in protecting the property of the British merchants. In April, 1862, Capt. Dew was sent in command of an allied squadron to Ningpo, then occupied by 40,000 Taiping troops, who, emboldened by unexpected success, had amused themselves by firing not only into the foreign settlement, but on our ships of war in the river. In spite of efforts to keep the peace, a collision became inevitable, and on the occasion of an Imperial fleet of war junks coming up the river, our vessels were fired into, and a volley of musketry descended on the decks of the Encounter. The capture of Ningpo against such overwhelming odds was characterised by Sir James Hope as "the best thing ever done in China." The Encounter was ordered subsequently to clear the 30 mile radius of the Taipings, and Capt. Dew raised and drilled, with the Encounter's marines, a disciplined force of Chinese, commanded by Europeans. On the Encounter's arrival at Ningpo that great city was occupied solely by the Taipings; trade was completely at a standstill, and the whole country was given up to plunder. Order was re-established by the joint English and French expedition. An urgent request was made to Capt. Dew that he should take the military command of the province. Capt. Dew, Lieut. Davis, and Dr. Irwin are the only ward or gun-room officers who left England in and returned in the ship. Six officers and 34 men died from casualities or disease. The Encounter was detained a year by the troubled state of affairs in Japan.

COMMISSION ON GUNS TO CHINA.—MARSHALL v. BLAKELY.—This was an action by an agent for the sale of iron and steel guns against Captain Blakeley, the well-known inventor of improved ordnance, to recover the sum of £616, as commission at 15 per cent. on the sum of £4,112 for the sale of his guns. The defendant denied his liability. According to the case for the plaintiff, as stated by Mr. Bovill, he had had an order from Messrs. Leighton and Co., engaged in the China trade, for some iron guns and ammunition for the Chinese Government, and he had agreed with the defendant to transfer the order and any similar orders to him at the commission of 15 per cent., and he had obtained for him orders to the amount stated, of about £4,112, on which he claimed £616 as the stipulated commission. The plaintiff was examined in support of this case, and stated the particulars of the order which, he said, he had received from Leighton and Co., specifying the quantity and description of shot and shell required as ammunition, and the prices of each sort. The plaintiff's order ran thus:—Two 20-pounders, at £150, £300; four 12-pounders, at £95, £380; four 9-pounders, £75, £300; two 6-pounders, at £50, £100. This came to about £1,080. Then, the gun-carriages were to be at the same price, £1,080, which came to £2,160. Then the shell came to £848, which raised the amount to £3,008; and there was shot supplied to the amount of about £150, but this was deemed to be excluded from the contract for commission. The commission on this came to about £450. There was a dispute between the parties as to the difference between this amount and the amount on which commission was claimed, and that turned out to be the only point in dispute. From the statement of Mr. Lush, for the defence, it appeared that Mr. Bennett, the representative in this country of Leighton and Co., had given plaintiff an order for two guns, intending them to be Blakely guns, whereas he found on his applying to the defendant that they were not to be so, and he also found that the plaintiff charged higher than Captain Blakely—as, for instance, £165 for a 20-pounder, instead of £150, which was what Captain Blakely charged; and that in consequence of this Mr. Bennett insisted on the transfer of the order to Captain Blakely. It was true that there was to be a commission of 15 per cent. on the invoice price of the guns and (according to the letter of the plaintiff, which, however, Captain Blakely had not received) on the shot, but not upon the shell; and, according to the case for the defence, there was a difference as to some minor items; and the amount of the plaintiff's claim was reduced to £470. The plaintiff accordingly recovered a verdict to that amount.

BRITISH COLUMBIAN GOLD FIELDS.—The Shuswap district is now regarded as very promising. It is called the "poor man's diggings," being more lucrative than Cariboo for a poor man. The *British Columbian* states that with the rudest implements an industrious man can there average $5 a day, and can live upon $1. As a stock and farming country this is said to be unequalled in British Columbia. The same paper states that on the Frazer, five miles above Lytton, some thirty or forty Indians are engaged in mining, and making over 20 dollars a day to the hand. The red skins discovered a rich spot, and as soon as it became known to the Chinese they began to stake off claims, showing their licences as authority for their intrusion, and giving the aborigines to understand that they must leave. The latter entertain a supreme contempt for John Chinaman, and were about to resort to arms, but upon consideration they went to Judge Ball, got licences themselves, and have become free miners.

GENERAL IGNATIEF, director of the Asiatic Department in the Foreign-office at St. Petersburg, has been appointed Envoy-Extraordinary and Minister-Plenipotentiary at Constantinople.

Monetary and Commercial.

The directors of the Agra and Masterman's Bank (Limited) have declared a dividend at the rate of 10 per cent. per annum, together with a bonus of £2 per share, for the half-year ended 30th June last, payable on 18th inst., being together at the rate of 18 per cent. per annum.

The directors of the Bank of Hindustan, China, and Japan (Limited) have declared an *ad interim* dividend for the half-year, ending the 30th June, at the rate of 10 per cent. per annum, free of income-tax. A special meeting of the bank has been called for the 25th inst., to consider the terms of arrangement with the Imperial Bank of China, India, and Japan. It is also proposed to increase the capital of the company by the creation 20,000 new shares of £100 each at £6 per share premium, to be issued to the persons and upon the terms stated in this agreement with the Imperial Bank, particulars of which will be found in our advertising columns.

The council of the Liverpool Chamber of Commerce have agreed to recommend to the Government to establish a gold coinage for India to the extent of £3,000,000, the sovereign to be of the same weight and value as the English sovereign, and to be equal to 10 rupees.

At the meeting of the Mediterranean Extension Telegraph Company, the directors' report, which was adopted, stated that the aggregate revenue had slightly decreased as compared with the previous half-year, owing to the second interruption which had occurred on the Malta and Alexandria line. This line however, had been restored through the exertions of the lessees, and it is consequently expected that the traffic will steadily augment. A dividend at the rate of 8 per cent. per annum was declared on the preference shares, and 4s. per shares, or 4 per cent. per annum, on the original capital.

At the half-yearly meeting of the London and County Banking Company, the net profit for the six months was £109,501, making a total of £126,169, including £16,668 brought forward. A dividend of 6 per cent., and a bonus of 10 per cent., were declared for the half-year, both free of income-tax, being together at the rate of no less than 32 per cent. per annum. The balance to be carried forward is £21,726. The chairman, Mr. W. Champion Jones, congratulated the shareholders upon the unprecedentedly favourable character of the report, notwithstanding the competition of new banks. This bank acts as agents for the Central Bank of India and other Eastern banks.

Digitized by Google

The remaining portion of 12,500 shares of the authorised capital of the Scinde, Punjaub, and Delhi Bank Corporation (Limited), is now in course of being issued to the shareholders at £2 per share premium, in the proportion of one new to three old shares. The bank has five branches, and has been in operation in India about twelve months. Branches are to be opened in China.

The bills of Messrs. Newby, Carson, and Co., of this city, have been protested for non-payment. They were engaged chiefly in the Japan trade with the port of Nagasaki.

The following Circular has been issued :—

"It is with extreme regret we have to inform you that at present we find ourselves unable to meet our engagements. We have therefore placed our books in the hands of Messrs. Edwards and James, who will, at the earliest possible day, lay before our creditors a statement of our affairs, which we have reason to believe will not be unfavourable.—We are, your obedient servants, "Newby, Carson, and Co."

Mr. Sam Gray, late of the Oriental Bank and the British and American Exchange Bank, has been appointed Manager of the British and Netherlands India Bank, anounced in our last.

Messrs. Randolph, Elder, and Co. have in course of construction three composite screw steamers, each of 1,000 tons and 200-horse power, for the Netherlands India Steam Navigation Company. Further, Messrs. Randolph, Elder, and Co. have on hand a steam yacht of 200 tons for a club of gentlemen at Yokohama, Japan.

Mr. John Henry Etheridge, formerly of the Union Bank of Australia, and manager in London, since its commencement, of the London and South African Bank, has been appointed general manager in Liverpool of the Eastern Exchange Bank (Limited).

The amount of gold and silver bullion and specie imported from Egypt last year was £18,086, being an excess, as compared with the previous year, of £12,172. The amount exported in 1863 was 12¼ millions, or a decrease of £340,400 in respect to that shipped in 1862.

The biddings for £300,000 in bills on India took place at the Bank of England. The proportions allotted were, to Calcutta, £177,400, to Bombay £120,000, and to Madras £2,600. The *minimum* price was, as before, 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11⅝d. on Bombay. The applications within the limits amounted to £2,380,000. Tenders on Calcutta and Madras at 1s. 11⅞d. will receive about 32 per cent., on Bombay at 2s. 0⅛d., about 85 per cent. These were the highest prices tendered.

The Manchester Shipping Offices and Packing Company aims at the erection at Manchester of shippers' offices and warerooms of superior character, fitted with all the recent improvements, and the laying down of an extensive plant of first-class modern machinery to meet the demand for the rapid and prompt despatch of goods to foreign markets. The capital of the company is £100,000, in 10,000 shares of £10 each. Provisional arrangements have been made with Mr. Wilkinson, maker-up and packer, of Cross-street, Manchester, for the purchase of his extensive business and stock-in-trade.

EGYPTIAN IMPORTS AND EXPORTS.

The increased value of the merchandise imported into the United Kingdom from Egypt during the last three years is very remarkable. In 1861 the real value of the total imports was £8,398,493 ; in 1862 it rose to £12,225,392 ; and in 1863 it advanced to £16,495,581 ; the article which contributes most largely to this augmentation being raw cotton, of which the quantity brought into this country in the year 1861 amounted to 365,108 cwts. ; in 1862 to 526,897 cwts. ; and in 1863 to 835,289 cwts.

The most important items after cotton and silk are wheat, barley, beans, and maize ; flax, gums, goat's-hair, musk, opium, pearls, rags (for making paper), seeds of various kinds (including large quantities of cotton seed), senna, elephants' teeth, and sheep's wool. A considerable portion of this trade is derived from the transit of Indian and Chinese merchandise, *via* Egypt, to the United Kingdom. Reverting to the official accounts ten years back, we find that the imports from that country were valued at very little more than 3½ millions sterling, a sum scarcely equal to one-fifth of last year's transactions.

Our exports to Egypt of British and Irish manufactures during the last three years were valued in 1861 at £2,278,848, in 1862 at £2,405,982, and in 1863 at £4,416,240, these augmented figures being in a great measure due to cotton manufactures, so far as regards the year 1863. In the absence of detailed returns, which are not yet completed, for that year, a comparative statement is annexed of the chief articles shipped to Egypt in 1861 and 1862, their total values, as well as the respective increase or decrease thereon :—

	Years ended December 31. 1861.	1862.	Increase.	Decrease.
Apparel	£240,778	£236,700	—	£4,078
Books, printed	65,535	78,704	£13,169	—
Carriages	5,312	31,327	26,015	—
Coals	58,458	78,831	20,373	—
Copper	81,611	110,095	28,484	—
Cottons	878,424	731,039	—	147,085
Cotton yarn	48,384	53,000	4,616	—
Drugs	7,737	12,538	4,801	—
Hardware and cutlery ..	31,411	37,000	5,589	—
Iron	68,261	88,914	20,653	—
Linens	27,438	15,639	—	11,799
Machinery	71,570	134,394	62,824	—
Plate, watches, &c. ..	176,859	217,165	40,306	—
Silk manufactures ..	179,647	224,810	45,163	—
Stationery	34,929	40,242	5,913	—
Woollens	27,696	17,298	—	10,488
All other articles ..	275,698	298,376	22,678	—
Totals	£2,278,848	£2,405,982	£300,584 173,450	£173,450
Increase in 1862			£127,134	

Of foreign and colonial products shipped hence to Egypt, the annual value, during the last five years, gives an average of about £140,000. Cochineal, indigo, pepper, silk manufactures, and wine are the only articles of note exported.

The amount of bullion by the P. and O. Company's steamer *Poonah*, from Southampton, on the 4th inst., was :—In gold : To Alexandria, £60 ; to Galle, £3,000 ; to Madras, £1,479. In silver : To Alexandria, £100 ; to Madras, £20,000 ; to Penang, £8,950 ; to Singapore, £19,000 ; to Yokohama, £10,910 ; to Foo-chow-Foo, £650 ; to Shanghai, £945. Total, in gold, £4,539 ; in silver, £60,555.

ARTICLES OF IMPORT.

Tea.—The business done in our market for the past fortnight has been very limited ; the dulness prevalent at this season of the year being further increased by the rise of the Bank rate from 6 to 8 per cent., and prices generally have ruled in favour of buyers. In the low and broken leaf sorts of Congou there is no alteration, but fair quality with leaf up to good common is scarce, and some demand for shipping has raised the value ¼d. per lb., and 1s. 0½d. to 1s. 1d. per lb. are now the quotations. Fair to good flavory are difficult of sale at previous rates. Good to fine Kaisows are in limited demand, at prices more in favour of buyers. Common to fair up to good blackish leaf kinds are dull of sale at the reduction noticed in our last circular. Fine to finest kinds of Moning, Wopak, and Kaisow share the general dulness, and sales when made show a reduction in price. Tayshans have been in demand for shipping at previous prices. The late arrivals of the new-make Canton Congou are difficult of sale at the high rates asked. Oolong, Souchong, and Flowery Pekoe are without change. The finer sorts of Scented Orange Pekoe and Caper are in limited demand at previous prices. For the commoner kinds there is no inquiry. Uncoloured Japans remain without demand at previous nominal rates. Green Teas : The late arrivals from America have been freely offered, and a fair business done at full prices for Imperial and Gunpowder, and the finest sorts of Young Hyson, but the immediate wants of the trade being now supplied, there is difficulty in obtaining the previous rates ; common to good Young Hyson rule from 2d. to 1d. lb. per lower. Twankays are neglected, whilst Hysons are only in request at lower rates. Canton-made are without alteration. The public sales have been :—Indian Tea, 1,874 packages offered, of which 1,556 packages were sold at about previous rates ; and China Tea 13,411 packages, of which 8,633 were without reserve, and the quantity sold was 8,850.

Silk.—The Silk market shows evident signs of the effect of high prices. It may be that the unfortunate circumstances of the case as to probable supply both in Europe and from China and Japan fairly if not fully justify the range that prices have reached—still they are high, and transactions are proportionately small and spasmodic—no general business but occasional days of purchase, as if from time to time speculators were taking fresh courage or the apprehension of consumers as to the effect of short supply becoming more serious. The transactions of the last fortnight have been especially of this character, China silk in some cases scarcely "holding its own," while in Japan silk very full rates have been realized.

COTTON.—The market for East Indian has been very dull during the past fortnight. Of sales in London for the week ending the 4th, we note 330 bales China, 16½d. to 17½d., all faults, and 18½d. for fair; 170 bales Japan, 20½d. for good fair. For arrival, 425 bales China, 19d., May shipment, for guaranteed fair; 300 bales Japan, price not reported. From Liverpool the statement is that China continues to be out of favour with buyers, so that sales are limited, and prices have declined fully ¾d. per lb. Sales were effected on the 9th of China, 18½d. to 20½d.; Japan, 21½d. to 22½d.

SUGAR.—The market closed flatly last week, with a decline of from 6d. to 1s. per cwt. on the prices of the preceding week. About 17,500 bags Clayed Manila changed hands privately at 34s. to 35s. Privately 5,000 bags Clayed Manila sold at 34s.

COFFEE.—Extensive parcels of East India were brought forward yesterday, and at a decline of 6d. to 1s. per cwt. the bulk was disposed of. Plantation Ceylon, triage, went at 68s. 72s.; low to good middling, 77s. 6d. to 81s.; peaberry, 82s. 6d. to 86s.; native, good ordinary, 65s. to 66s. 6d. Mocha, bought in, long berry 95s.; common greenish, 86s.

RICE.—Chiefly in consequence of the fine weather for the corn harvest, this market has for the most part been extremely quiet since our last advice; Ballam has shared the greatest attention, and brought full rates, while soft grain kinds, have been purchased slowly, and are cheaper. The total sales landed are about 65,000 bags, low red cargo sort 8s. 1½d. to 8s. 4½d.; middling to fair Ballam, 8s. 9d. to 9s. 7½d., good 10s.; middling to good old Rangoon, 8s. 7½d. to 9s. 7½d.; and good Nakrenzie, 9s. 9d. to 10s. 200 tons pinky Madras have also been sold to arrive, at 10s. 3d., and two floating cargoes Nakrenzie, together 1,400 tons (some time back), at 10s. 1½d., open charters.

TAPIOCA.—The Penang brought to auction since the 9th ult., has been confined to 845 bags, which sold freely; low quality 1½d. to 2d., low middling to good middling, 2¼d. to 2½d., good white, 3¼d. per lb.

CAMPHOR.—There is still inquiry, but not any business has been reported, and our quotations, £4. 10s. to £5 per cwt., are rather nominal.

CASSIA LIGNEA.—Has brought rather more money, and 620 cases at auction mostly found buyers at 86s. to 92s. per cwt. for common second to middling first quality; and privately, good first pile has realised 94s. Buds: Of 31 cases at auction, a few were placed at our higher quotation of £15. 15s. for fine.

DRUGS.—Cubebs: Flat, and cheaper; and of 177 bags at auction, only one-fourth placed at £5 to £5. 2s. 6d. per cwt. for fair. Dragon's Blood: Quiet; 3 cases at auction retired. Galangal Root: Nothing of any consequence doing. Rhubarb: Dearer; but of 100 boxes at auction, a few only sold at 4s. 6d. per lb. for good ordinary round. Improved prices also offered privately.

GUMS.—Benjamin continues quiet; only 12 cases at auction, and those retired. Damer: Nothing of any interest doing. Some inquiry. Gamboge continues scarce and firm, only 5 cases at auction, and those withdrawn.

GUTTA PERCHA.—Not any business of consequence to report. Fine quality scarce, and inquired for. India Rubber remains very inactive, with scarcely any transactions. No auctions. There is some inquiry, but only at lower prices.

HEMP.—Manila: This market has remained dull and without any demand, upon previous terms: 678 bales offered at auction, but the bulk retired.

IVORY.—The Quarterly Sales will commence on the 17th inst.

JAPAN WAX.—Nothing of consequence doing.

OILS.—Anniseed: Our reduced quotation of 6s. 6d., at which there are free sellers, obtained in retail sales only. Cassia: Very quiet; of 28 cases at auction a few sold at our reduced quotation. Cinnamon: Steady; 1 case at auction sold at 1s. 4d. per oz. for inferior.

TOBACCO.—Manila: For export there has been some demand; supplies are on the way; the *Albuera* has sailed with 1,922 bales chiefly on English account. Manila Cheroots and Segars: Rather scarce, prices about the same. Japan: Good parcels sell readily. Java: More inquiry for better sorts. Quotations: Manila Cheroots and Segars, 7s. to 7s. 6d.; Leaf, 11d. to 3s. 6d.; Japan, 4d. to 7d.; Java, 6d. to 1s. 1d.

SAGO.—Prices are again 6d. per cwt. lower, and 1,372 boxes at auction mostly sold at 20s. 6d. to 21s. per cwt. for fair small. Flour: Continues quiet, and without business of importance.

SHELLAC.—Market for all descriptions, without exception, quiet, and with scarcely any demand upon previous terms. Button again 10s. per cwt. lower; of 417 cases at auction less than one-third sold—Orange at £7. 10s. per cwt.; Livery Orange £7; Button £8. 2s. 6d. to £9. 10s.; and Block £6. 15s.

SPICES.—Cinnamon: The quarterly sales having been unusually small, and competition very active, prices further advanced 3d. to 6d. per lb. 970 bales nearly all sold: 264 bales 1st at 1s. 10d. to 3s., with superior at 3s. 3d.; 490 bales 2nd 1s. 8d. to 2s. 4d.; 190 bales 3rd 1s. 5d. to 1s. 10d.; and 26 bales 4th and Jungle 1s. 2d. to 1s. 5d.; 139 bales Tellicherry sold at 1s. 3d. to 1s. 8d. for 3rd to 1st pile. Cloves: Nothing of any importance doing. No auctions. Mace: Firm; auctions confined to 38 cases Dutch, all retired. Nutmegs: Quiet, but without reduction in value: of 49 cases Penang at auction, a few only sold at 1s. to 1s. 1d. per lb. for inferior small. Pepper: Black has met with slightly increased inquiry; of 1,818 bags Singapore at auction, half sold at 3¼d. to 3⅝d. per lb., and of 459 bags Penang one-third sold at 3⅝d. Moderate business likewise done privately upon similar terms. White: This is still a quiet market, without business of consequence.

TERRA JAPONICA.—Cutch Pegue is fully 6d. per cwt. cheaper; and 2,277 bags Pegue at auction sold at 25s. to 25s. 9d. per cwt. for good, and 23s. 6d. to 23s. 9d. middling drossy. Gambier: Remains quiet, with very moderate business; no change in value on the spot, but the turn cheaper for arrival. 250 bales at auction retired.

MISCELLANEOUS.—Blacklead: Continues very quiet; and of 167 barrels at auction, half sold at 11s. per cwt. for middling lump, and 8s. 9d. to 9s. dust. Musk: A recent arrival, 20 caddies, offered at auction, and only very partially placed at 30s. per oz. for very good Tonquin; 5 tins Grain sold readily at 51s. to 51s. 6d. for fine, 40s. to 41s. dark and damp, and 28s. inferior false packed. Rattans: Bring previous value; and 6,151 barrels Singapore, 1,585 bundles Calcutta, and 857 bundles Penang at auction, sold at 3s. 7d. to 6s. 1d. per 100, with very low down to 2s. 5d. Sapanwood: Steady; 22 tons Siam at auction, sold at £10. 15s. per ton, and 4 tons Ceylon, oil damaged, at £5. 10s. to £7. 15s. Private transactions limited. Mother-o'-Pearl Shells: Nothing of consequence doing; some inquiry. Star Anniseeds: Quiet; of 24 boxes at auction, a few sold at the previous value of £6. 5s. per cwt. for mouldy. Sticklac, Siam: Some inquiry at the recent decline, at which there are few sellers. Tortoiseshell: Auctions confined to 4 cases Manila; only 2 cases sold at 15s. 6d. and 17s. per lb., being the previous value, which has also been obtained privately in small transactions. Turmeric: Nothing doing; 180 bags Java at auction retired. Vermilion: Firm; a few cases sold privately at higher prices; 30 boxes at auction retired.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £9. 10s.; hoops, £10. 10s.; sheets, single £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7. 5s. to £7. 10s.

STEEL.—Swedish keg, £16 to £17.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8½d. to 8¾d. per lb.

TIN.—104s. for block; 105s. for bar. Tin plates, best charcoal, I.C. 30s. per box.

LEAD, &c.—English pig, £20. 10s. to £20. 15s.; W.B., £22. 10s.; shot, patent, £23. 15s.; sheet, £21. 15s.; spelter, £24. 5s.; zinc, English sheet, £28; quicksilver, £8 to £8. 5s.

The following is from the circular of Messrs. French and Smith:—There has been considerable activity in some branches of the metal trade during the past month, and for some metals higher prices have been obtained. Iron: Scotch pig has been steady throughout the month, and but little variation in price. For Welsh manufactured iron the demand has continued good. In Staffordshire iron, since the reduction in price of £1 per ton, declared on the 14th ult., there has been more business. Copper: During the past month there was an active demand for this metal, and on the 15th ult., the English Smelters advanced their quotation £5 per ton, and even at these rates were not anxious for orders. There are many orders for India at a little under list prices, but the market is firm at present quotations. The price of Yellow Metal was advanced ¼d. per lb. on the 11th ult. Tin: In Foreign there have been large transactions, particularly in Straits, and the price now asked is 106s., both for Straits and Banca. In English tin the market was firm, and the smelters are not anxious to make sales, excepting in small quantities at the full nominal rates. Tin Plates: We have no improvement to report in tin plates. The quantity shipped to all parts for the past month was 75,000 boxes, against 115,000 in July, 1863. Spelter: The market was very stiff during a portion of the past month, the price, however, is now easier. The stock on the 30th ult. was 13,121 tons, against 5,041 tons, 31 July, 1863. Lead: There has been very little business in this metal. Quicksilver steady at £8 to arrive, and £8. 2s. 6d. to £8. 5s., on the spot.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

The Bank of Hindustan, China, and Japan (Limited).

NOTICE IS HEREBY GIVEN, that an EXTRAORDINARY MEETING of this Company will be held at the LONDON TAVERN, in the City of London, on THURSDAY, the 25th day of August current, at Twelve o'clock, and the business to be transacted will be the following:—

1. To consider terms of arrangement with the Imperial Bank of China, India, and Japan (Limited), and if approved, to affix the seal of the Company thereto, and authorise the Directors to carry same into effect.

2. To elect four of the Directors of the Imperial Bank of China, India, and Japan (Limited), as Directors of this Company.

3. To ratify and confirm a resolution of the Board increasing the capital of the Company, by the creation of 20,000 new shares of £100 each, at £6 per share premium to be issued to the persons and upon the terms stated in the above-mentioned agreement with the Imperial Bank of China, India, and Japan (Limited).

By order,
R. SWIRE TOMLIN, Secretary.

16, Cornhill, London, Aug. 8, 1864.

The Imperial Bank of China, India, and Japan (Limited).

NOTICE IS HEREBY GIVEN, that an EXTRAORDINARY GENERAL MEETING of the Shareholders of the Imperial Bank of China, India, and Japan (Limited), will be held at the LONDON TAVERN Bishopsgate-street, on THURSDAY, the 25th August inst., at Twelve o'clock precisely, when the agreement for amalgamation entered into with the Bank of Hindustan, China, and Japan (Limited), referred to in the Circular addressed to the Shareholders of this Bank on the 28th July last, will be submitted for approval, and resolutions to voluntarily wind up the Bank and appoint liquidators, will be proposed.

The following, in substance, are the terms of amalgamation:—

1st. 20,000 new shares, of £100 each, of the Bank of Hindustan, China, and Japan (Limited), to be issued to the holders of the 20,000 shares in this Bank.

2nd. Such shares to be issued at £6 per share premium.

3rd. £5 per share of the premium to be placed to the "reserve fund" of the united Banks, in addition to the amount already at the reserve of the Bank of Hindustan, China, and Japan (Limited), and also all further additions, by which the total reserve fund at the end of this year will, with the profits, probably amount to about £160,000.

4th. The remaining £1 per share of the premium will be applied to pay off preliminary expenses.

5th. A dividend of 10 per cent. per annum, free of income-tax, for the time the Bank has been in operation, to be paid to the shareholders of this Bank on exchanging certificates.

6th. Four Directors from this Bank to be nominated by and join the Board of the Bank of Hindustan, China, and Japan (Limited).

7th. The new shares now to be issued as above to rank on equal terms with all the previous issues of the Bank of Hindustan, China, and Japan (Limited), whether original or otherwise.

8th. The option of paying up to £25 per share under discount at 6 per cent. per annum is also reserved to the shareholders.

By order,
HENRY TURNER, General Manager.

No. 8, Walbrook, E.C., Aug. 10, 1864.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA. Incorporated by Royal Charter. Paid-up capital £634,000. Reserve Fund, £250,000.

The Bank negotiates and collects bills and grants drafts payable at Bombay, Calcutta, Madras, Colombo, Kandy, Singapore, Galle, Penang, Hong Kong, Shanghai, Yokohama, and Mauritius, issues letters of credit and circular notes for the use of travellers by the overland route, terms for which can be ascertained at the Head Office, in London.

The Bank will effect the purchase or sale of Indian securities, undertakes the safe custody of same, and the receipt of interest, dividends, pay, pensions, and other moneys, for remittance through the Bank or otherwise.

The Bank receives money on deposit, on which interest will be allowed according to the length of time deposited. Particulars as to rates can be ascertained at the Head Office, 52, Threadneedle-street, London.

Office hours 10 to 3; Saturdays, 10 to 2.

MESSRS. EVANS and Co., Merchants, Shanghia, beg hereby to give their friends and the public notice that the only person who can now lawfully pledge the credit of the firm is Mr. HENRY EVANS, whose authentic signature may be seen at the office of Messrs. Godwin and Son, Solicitors, Newbury, Berks.

BOYVEAU LAFFECTEUR'S ROB,

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot 12, RUE RICHER, PARIS.

Sold Retail—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Dantlowich. Malta: Dr. Pirotti, Bugeja, Magri, and Rolando Esperanza. Alexandria: Bellamore, Galette, Perini. Bombay: Framjee Nesserwanjee and Co. Singapore: Martin and Little. Batavia Platon and Co. Macao: J. D. Festa.

In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty, five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.
"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.
N.B.—Agents in India—Von Lintzgy, Lall Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon; Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S PILLS.—PROSTRATION OF STRENGTH.—When the system is weak and the nerves unstrung, disease is certain to present itself unless some purifying and strengthening means be resorted to to avert the threatening mischief. In such cases no treatment can equal that by these excellent Pills. No other plan can be pursued so well devised for ejecting all impurities from the blood, without straining or weakening the constitution. Holloway's Pills so fortify the stomach and regulate the liver that they raise the capability of digestion, and thus create new power. This is the reason why Holloway's Pills have gained their present popularity, and why they have been lauded throughout the globe as a "fresh source of life and strength."

Per P. and O. steamer, Sept. 20, from Southampton.—To Shanghai: Miss J. Provanst. To Hong Kong: Mr. Newton. To Singapore: Mr. Dunlop. From Marseilles, Sept. 28.—To Singapore: Mr. P. C. Keake, Lieut. and Mrs. Burn. To Shanghai: Mr. L. Russell.

Per P. and O. steamer, Oct. 4, from Southampton.—To Hong Kong: Mr. and Mrs. Preston and infant. To Shanghai: Mrs. Jarvie, Mr. Turnbull. From Marseilles, Oct 12.—To Singapore: Miss Cooke and servant. To Shanghai: Mr. Gordon and friend, Mr. Leonard, Mr. A. Schultze.

Per P. and O. steamer, Oct. 28, from Marseilles.—To Hong Kong: Mr. J. Tait. To Singapore: Mr. and Mrs. H. W. Wood and lady friend, Messrs. W. and C. Degener.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates hence bring our intelligence down to June 27. The mail from Europe of April 26 arrived by the *Nepaul* on June 18.

Mr. Consul Winchester had given publicity to a copy of the following letter from the Governor of Kanagawa, for the information of British residents:—

To Charles A. Winchester, Esq., H.B.M.'s Consul.

The troops under our command will patrol and march through the villages and places in the neighbourhood of this port for their protection against evil disposed persons, and our troops will be furnished with a flag as per annexed drawing.

I beg that you will be pleased to notify the above to your countrymen resident here, and likewise to the captains and commanders of the men-of-war now in port, to prevent any collision or other unpleasantness with our troops whilst they are marching on the roads.

Represented with respect the 19th day of the 5th month of the first year, Gonjee.

(Signed) HORI YEGA-NO KAMI.

The flag in question is described by the *Commercial News* as follows:—"The Guard have been supplied with a distinctive flag, the fertile imagination of the Herald's office of this country of the rising sun having produced the following device:—Large and red (plenty of red)—to wit! Two concentric circles, the inner spanned by a belt, the whole partially enclosed within a lunated figure, attached to the circumference of the exterior circle by another red line. Jolly Jack would hardly get into collision with such a scarecrow flaunting before him; and we should not fail to recognise the flag a long way off, for Japanese banners are partly framed, and continue outstreched. They do not wave and convolute like ours."

The contemporary just quoted continues to indulge in the alarmist tone which seems to have become habitual to him. He will have it that "a crisis is near at hand." We trust that when it occurs it will be as harmless and unnoticeable as the earthquakes he speaks of:—"Trifles are often significant; straws show which way the wind blows. The past week may be termed significant in this way from the visit of Deputies from the Gorojio at Yedo to the Foreign Representatives at this place. Various reasons are assigned for their visit, but mere conjecture is useless; we await patiently the course of events, but we believe that very shortly something will be known which will determine the direction of political action. Nothing actively prominent has distinguished the interval since our last issue. We have had more wet weather, and we perceive a contemporary notices two earthquakes, but these must have been slight shocks; we were not sensible of their occurrence."

The deputation mentioned, "traversing the streets to and fro in the heavy rain of Sunday last" (June 19), called on that day on the Minister from the United States, and on the morrow waited on the Ministers from England and France—which the *Commercial News* regards "as some proof that our recent views of there being something astir were in the main correct." It is difficult to tell from the mysterious and oracular tone adopted whether "the crisis" is to be a product of Japanese manipulation, or of an act of premeditated hostility on the part of the European Powers; for talking of "the direction of operations," the writer observes:—"The Su-o-na-da—or Inland Sea—has more supporters than the conjectures which point elsewhere.

Digitized by Google

To open that silent highway to the argosies of the world will, require a suitable fleet and adjuncts, for Yokohama must be taken care of too—there being several families, ladies and children; and if their male protectors, and the non-benedicts likewise, have to protect the place, why business, which under any circumstances would at such a time languish, would become perfectly stagnant. The necessary fleet is, however, gradually being made up; silently from one quarter or another ships drop in, and it is openly known that American, Dutch, and French men-of-war are looked for daily."

That the Tycoon, or any of his rival Daimios, would join a European attack on Tsiosiu, the *Commercial News* holds to be a misapprehension of the circumstances, remarking:—"Few things would more surprise us than such a combination of native and foreign forces to assault the territory of one of the most powerful princes of the empire, and we emphatically repudiate such visionary projects as entirely chimerical. We warn, at all events we advise, all foreigners not to listen to such creations of the brain: their hope and vantage ground lies in their troops and their gallant ships, the invincible spirit the indomitable courage of the West."

The Tycoon has returned to Yedo from a lengthened stay at Kioto. The steamers *Yangtze*, *Jinkee*, and *Cunda-morra* were in waiting for him at Uraga. The Tycoon's flag was on the *Yangtze*, and the *Jinkee* was deep with his luggage.

The steamer *Stork*, which had been lying in harbour for some time, had been sold to the Japanese for $70,000, and part of the money had been paid. There was a report that the *Elgin* also had been, or was to be, sold to them.

The *Semiramis*, French war-steamer, arrived on the 22nd June from Shanghai, having Admiral Jaures on board, and bringing a company of Fusiliers, part of the Infanterie de Marine, 300 strong, to relieve the Chasseurs d'Afrique, who left on the 18th in the French war-steamer *Dupleix* for Shanghai, *en route* for Mexico.

The *Japan Herald* believes that now the Tycoon has come back to Yedo, some movement may be anticipated; continuing —"We learn, however, one fact which appears of some significance, namely, that Tsiosiu or Choshiu, has quitted his sea shore residence—the city of Hangi in the province of Choshiu—and retired to Yama-goutchi, a stronghold in his adjoining province of Suwo, situated inland about five ri from the Tokaido, under a range of high forest hills, approachable by a small vessel from the Inland Sea. It is said that much difference still exists in the great Damio Council at Kioto as to the course to be pursued with Choshiu."

The Marines appear to be comfortably settling themselves down. We read—"On Saturday last (June 11) we visited the camp on the Bluff, to see how the gallant fellows were getting on under canvas after the heavy rain that fell on Friday night. We were delighted to find them all very jolly, and busy as bees putting their houses in order. Those who were off duty, and whose arrangements were somewhat matured, looked especially comfortable in their snug tents. We have never been in the gigantic model camp at Aldershott, but the admirable manner in which numbers are accommodated in small space was shown on the Bluff, where twelve soldiers, Anglo-Saxons, who do not possess the lithe suppleness of joint of squatting Orientals, were billeted in a small tent; apparently, too, with room to spare, for, when the orderly, obligingly placed at our service as guide, showed us the internal arrangements, the recumbent sons of Mars, with genuine English humour, invited us to walk in and take a chair. Already, amid the confusion and mud, we saw a flower bed or two in front of some tents, and other "oases." The orderly showed us the hospital tent, and we were happy to find only a few on the sick list—even those looking comfortable and convalescent. When everything is finished, the corps will be well located; better, indeed, than we are in the swamp below: and we only hope our gallant 20th, who have heretofore been barracked in our midst, though we shall be sorry at their departure for our own sakes, will soon share the pleasant places on the heights, in the commodious wooden structures being erected. There is one gentleman among us who has been constantly on the Bluff, rendering all the aid his experience and judgment could give. It is no light duty to remain all day in the sun, yet our worthy chaplain the Rev. M. B. Bailey, has sacrificed all personal considerations, and, as we saw him, bestirs himself in this, and, indeed, in most other public movements, for the general good."

A few cases of small pox, of a more or less serious character, had broken out on board vessels in harbour. The captain of one vessel, whose mate was seized with this scourge, wisely placed him on board a junk, which he sent to an anchorage outside the harbour.

Complaints are repeated of the conduct of the Chinese, of whom there is a steady influx, the *Nepaul* having brought an addition of twenty. "One of their fraternity assaulted a Japanese woman on Sunday last, in broad daylight, with the view, it is supposed, of abstracting a purse, or box, or bag containing money. The fellow was caught, and received a severe thrashing, and was then set at liberty, because there was no proper authority to punish him, the assault being beyond the limits of the foreign settlement. The Chinese must be compelled to register, or they must be subjected to heavy penalty."

HAKODADI.

H.M.S. *Racehorse* arrived at Yokohama on the 19th June from this port. The *Garland* had arrived at Hakodadi, and landed the Portuguese Consul, Mr. Chasse, and lady. The *Garland* had since been chartered by Mr. Marks (of the firm of Marks and Co., of Yokohama), for Port May (Russian dominion).

TIEN-TSIN.

A correspondent, under date June 24, writes:—

Business here is extremely dull, and mostly in the hands of the Chinese. The principal articles of import at present are white and brown sugar, black and brick tea, white, red, and yellow lead, and lead in pigs, tobacco, window glass, paper, and matches, and small quantities of opium, cottons and woollens, &c., &c.

Of exports the principal articles are raw cottons (of which upwards of 10,000 piculs have left this season), medicines, tobacco, soap or soda, dates, and small quantities of grain, white wax, wool, &c.

A large business was done here in imports the first two years. The troops being also here, a great many people of all classes were induced to settle; the troops leaving, the most of the storekeepers and others dependent on the troops also left. This season, two of our merchants have closed their hongs, and it is not unlikely that others may yet do so.

The British settlement here (as it is called, for the wording of our leases is of no value, as it turns out, and any foreigner may reside in it) is about two miles from the city of Tien-tsin, but the suburbs may be said to extend close to the settlement; its extent along the river is about 1,200 yards. The Bund road is on an average about 75 feet wide, and is piled the most of the length; the other roads are 40 feet wide, and all are raised 4 feet above the surrounding country, where as buildings are erected, the ground is raised 6 feet; this raising is on account of floods, to which the place is said to be subject at times. The width of our settlement is from 270 to 500 yards, the average being about 320 yards.

Steamers and sailing vessels drawing 11 feet can discharge their cargoes on the bund, by the aid of a stage. Jetties or piers are to be erected, and vessels will be able to lie alongside of them.

There are now 14 godowns, 4 dwelling houses, and several offices erected on the settlement, and nearly all the merchants reside there, although some of them still have offices in town. The place is very airy and healthy, and at a little expense could be improved much in appearance. The French have ground adjoining ours and nearer the city, and the Americans have purchased land below the British, but have no settlement, their Minister not approving of settlements. Neither French nor Americans have built on their ground, or improved it in any way.

Mr. T. T. Meadows leaves this in the gunboat *Osprey* for Newchwang. Mr. T. F. Wade, who is to act as *locum tenens* for Sir F. Bruce, arrived from Shanghai by this vessel. Sir Frederick proceeds *via* Shanghai to England in the merchant steamer *Nanzing*.

SHANGHAI.

The outward mails of May 10 arrived on June 25, per P. and O. steamer *Peking*, being 46 days from London. The dates are now down to July 4. From the following *resume* of the *North China Herald*, we presume that the scourge of cholera had abated:—

The weather has continued remarkably mild, the thermometer not registering higher than 81 deg. We have had a few wet days, but with these exceptions we have had nothing to complain of. An amateur burlesque company, which was started immediately after Mr. Black's concerts had closed, has enjoyed

Digitized by Google

an almost unprecedented share of public favour. On the first evening of its appearance the members played to an overflowing house, and their second performance was received in a manner no less flattering. The pieces represented were the farces "The Queer Subject" and "The Silent Woman," and the screaming burlesque "Ill Treated Il Trovatore." The latter proved a wonderful success, and at once established the reputation of the company. Cricket matches continue to occupy a portion of the attention of the foreign community, and have latterly been taken up with great spirit and enthusiasm by the Cricket Club and private elevens. The meeting of land renters, which had been adjourned from April 16, reassembled at the British Consulate on Wednesday, the 29th June; Sir Harry S. Parkes, K.C.B., in the chair.

The surveying expedition which started some time ago under the direction of Major Edwards, R.E., to report on the state of the sea wall on the north side of Hangchow bay, has returned to Shanghai. We, *Daily News*, do not know whether an official report of the proceedings and of the state of the wall will be published. Meanwhile, however, we may announce the following general results which have been arrived at. The wall or double bund extends from Haining to a spot about a quarter of a mile below Hangchow, and is designed to preserve the paddy fields, which lie somewhat low, from the influx of salt water. During the rebel occupation the wall was neglected, and in consequence has partially fallen into ruins. The injury already done to the crops is, however, not so great as was at first imagined. A space of about fifty square miles is flooded at each high tide, and is, of course, utterly unfit for cultivation, but beyond this, the slight admixture of brackish water has hardly any perceptible effect on the mass of fresh water in the creeks.

We (*Daily News*) have been favoured with the following account of the s.s *Illawarra*:—

The *Illawarra* left Shanghai on June 21st at 4.30 P.M., with the ebb tide, and passed Wusung at about 6.20 with a fresh breeze from the S.S.E. At 10 P.M. the Light Ship bore East, ship steering at the time S.E. by E. This course was steered until 11.30. From the Light Ship the soundings were 3, 4, 4½, and finally 6 fathoms, at which time the course was altered to S., the wind falling light. The captain was on deck occasionally during the night. At 2 P.M., on the 22nd June, a thick fog set in, and at about 4 the ship struck heavily, and filled rapidly forward and aft. The pumps were immediately manned, but with no result. A kedge was by the captain's orders run out on the starboard bow to heave the ship off. The captain thinking that the rock on which she struck was the East Seshan, ordered the quarter-boat to be lowered, and gave the chief officer directions to steer for the Ruggeds and endeavour to obtain assistance. Instead of going direct to the Ruggeds, the chief officer pulled round the island in the hope of finding a boat, and he was, accordingly, fortunate enough to come across an armed lorcha at anchor with convoy, belonging to one of the owners of the steamer. The lorcha at once bore up for the wreck, the captain having in the meanwhile gone ashore. As soon as the lorcha came up, her boats and the steamer's quarter-boat commenced to transport the passengers and their baggage to the lorcha. The captain was advised to send the passengers in the boats to Chinhai to obtain assistance, and to keep the lorcha with the Europeans in the neighbourhood of the wreck for protection against pirates. He, however, did not comply with this recommendation, but ordered both passengers and crew to go on board the lorcha and proceed to Chinhai. The wreck was abandoned at noon on the 22nd, the small arms and a few loose things being taken on board the lorcha, which arrived at Chinhai in the evening. The officers were received by Captain Orr on board the *Paou Shun*, while the captain proceeded to Ningpo, and returned next morning with H.M. gunboat *Staunch*. The *Staunch*, taking the lorcha in tow, proceeded to the wreck, which was found to have been in the meantime dismantled.

Our advices from Soochow extend to the 28th June. A few days previously four rebel spies had been discovered by the Mandarin Puan. On being examined they acknowledged that they were Taipings, but expressed their readiness to enter the Imperial service, and betray all the secrets of their former masters. They were admitted to an audience with the Futai, and were well received. Their report tallies very exactly with the rumours which have lately obtained ground as to the distress which prevails in the districts under the insurgent sway. Pan-tsze-ying, grandson of the mandarin Pan or Puan of Soochow celebrity, mentioned above, has been appointed one of the Vice-Presidents of the Board of Censors. This furnishes another instance of the favour showered on the officials who have in any way distinguished themselves during the campaign in this province. The Emperor has deputed two commissioners to wait on the Futai, and offer their services to him. One of these is a Manchou, named Shui-yu, holding the rank of Chi-chao, the other is a native of Yunan, named Kan-yuan, and is a Chi-hsien. Much dissatisfaction is felt at the want of confidence in his subordinates displayed by the Governor, and at the representations which he is reported to have forwarded to Peking with regard to the inefficiency of the local mandarins.

The following mercantile notices have appeared:—

Mr. Hans Peter Hanssen is admitted a partner in our firm.—Dent and Co.

The interest and responsibility of Mr. Duncan Fletcher in our firm ceased on June 30, 1864. Mr. Waldemar Schmidt, Mr. James Gilfillan, Mr. Alexander Downie, and Mr. Thomas Murdoch Drysdale, are this day admitted partners in our firm. Our firm now consists of Mr. Archibald Campbell, Mr. Waldemar Schmidt, Mr. James Gilfillan, Mr. Alexander Downie, and Mr. Thomas Murdoch Drysdale.—Fletcher and Co.

Mr. James Hanson Wright and Mr. William Strachan M'Lean, are this day admitted partners in our firm in China.—Dow and Co.

A dry dock on an extensive scale has been opened for the reception of ships on the Pootung side, opposite the Tun-kadoo Cathedral, and is, we believe, truly advertised as the largest dock in the East, the dimensions and depth of water being—

Length over all	380	feet.
,, on blocks	340	,,
Width at top	125	,,
,, in the bottom	50	,,
,, of dock entrance	75	,,
Depth of water at high-water neat tides	16	,,
,, ,, spring tides	21	,,

The first ship docked was the *Thomas Bell*.

HANKOW.

The following letter, of 25th June, is from the *Recorder*:—

The Imperial Customs removed into the Hong recently occupied by Messrs. Fletcher and Co., which is conveniently situated for trade. The *Robert Lowe* sailed yesterday, leaving the port bare of ships, except the walking beam steamers, which ply pretty regularly on the Yantsze river. The *Fusiyama* made a splendid run last trip, one of the quickest on record.

The rebels are at Yangloong, and the panic caused by their proximity to Hankow has subsided. Imports are dull of sale. Hankow produce is high, prices scarcely leaving a marginal profit.

NANKING.

The party which left Shanghai a short time ago for the purpose of reconnoitring the position around Nanking returned on the day of the issue of our last Overland Summary, and reports that the city is completely invested, with the exception of the river front, on two or three points of which the rebels have erected stockades. Mines have been driven to within a few yards of the walls, but there would seem to be an unwillingness to try the effect of an assault. The Imperialists are armed with gingals, but as their resources are so much greater than those of the rebels, they can afford to wait and effect by starvation what they cannot manage by hard fighting. Gordon subsequently went up to meet Tséng Kwo-fan, and was received with the utmost honour by the venerable chieftain.

NINGPO.

The *North China Herald* gives the following from Ningpo in reference to the French operations there. The Mandarins may indeed exclaim "Save us from our friends":—

We have received recent advices from Ningpo, by which we learn that the French have launched two out of the five gunboats which we some time ago announced as in process of construction. There can be little doubt that these vessels are designed to take the place of the defunct Sherard Osborn fleet. They are not, however, built with a view to lasting very long. The timber used is unseasoned, and the machinery is old, and has seen much service. They are heavily armed, each having two rifled 24-pounder pivot guns and four rifled 12-pounder broadside guns. The French have established a dockyard, which is now in excellent working order, a large number of European artizans being kept constantly employed.

A company of French soldiers is now stationed outside Ningpo, and the men, together with the sailors from the French gunboats, prove perfect pests to the Chinese shopkeepers. As

Digitized by Google

an example of this we may state that some few weeks ago some French sailors, having, by an outrage of unusual brutality, collected a large and excited mob, were in the act of forcing their way out of one of the gates, when they encountered the sentry. One of their number tried to wrest the musket from the sentry's hands. The man of course cried out for assistance, and one of his comrades running up, stabbed the Frenchman in the thigh. The drilled guard had by this time turned out, and the Frenchmen, not caring to encounter it, endeavoured to escape. Two of their number, one being the wounded man, were captured and brought before Colonel Cooke, who sent them to their vessel with a guard. During the course of the evening, after the gates were shut, an alarm was raised that the French were about to attack the city, and that a body of soldiers and sailors, under the command of a naval officer, was moving towards the south gate. Cooke, so soon as he heard of it, went to the gate, and there actually found a French officer with about forty Europeans, demanding admittance. This was of course refused, when an attempt was made to break in the gate. Meanwhile Cooke had turned out a couple of companies of the "green turbans," and gave the officer in command of the attacking party notice that the first man on the wall would be pushed back by a bayonet. It was then decided to attempt a part of the wall where ascent was more easy than at the gate. The French marched along outside the wall to this spot, Cooke and his men keeping pace with them on the inside. When, therefore, the French arrived, they found the top of the wall garnished by a chevaux de frise of sword bayonets, but not caring to attempt the storm, they apparently retired. At sunrise the gates were, as usual, opened, when the Frenchmen, who had evidently been upon the watch, made a dash, entered the south gate, took the guard prisoners, and seized all the muskets and sword bayonets upon which they could lay their hands. Cooke communicated with the French Consul, and enjoyed the privilege of a visit from two of the French officers, who had absolutely sufficient calm effrontery to declare that they did not believe any one of their men could have been guilty of an offence sufficient to justify his being wounded.

The affair was ultimately arranged amicably, but our readers may well imagine the state of the discipline which exists when, in the face of daily reports of the most unpardonable outrages committed by French soldiers and sailors, a French officer ignores the frequent remonstrances addressed to him and to the Consul. We have on different occasions animadverted on the eccentricities of the French both at Shanghai and at Ningpo —we have related how, at the latter place, amongst other exploits of the same character, a soldier has been seen to dance in a state of perfect nudity in the open streets; how another drunken miscreant lurching against a chair in which one of Cooke's officers was seated, took offence at the awkwardness of the coolies, and butchered one of them on the spot; how, on another occasion, a Frenchman, being caught in the act of thieving, was brought before the English officer in command, and there and then made a murderous assault upon him. But we need not multiply examples. Both foreign and native residents at Ningpo possess a stake in securing the tranquillity of the city and foreign settlement, and it is evidently impossible to effect this so long as licensed rowdies are permitted to roam unchecked through the neighbourhood. It cannot be too deeply regretted that our gallant allies, whose interest it doubtless is to impress the Chinese with an exalted idea of their forbearance and moderation, should elect to send condemned regiments to this country—regimen's, the men in which are lost to every principle of honour, and who can alone be adequately described as the scum of European ruffianism. It were, in truth, well did the French authorities represent to their Government that the enormous interests which the French nation possess in China are far more jeopardised by the atrocious conduct of the rabble soldiery, than they are advanced by the gallantry and courtesy of those holding high official positions.

The Franco-Chinese troops are still outside Hoochow, at a very considerable distance from the walls. No operations of importance have taken place since the departure of last mail. The Che-kiang officials have issued a notification calling on the natives of that province who were dispersed at the time of the rebel occupation, to return and again take up their abode in their former dwellings. Those who have suffered severely, and are not in a position to return without assistance, were invited to send their names to the Taotai's Yamen on any of the following days:—June 6th, 9th, 12th, 16th, 19th, 22nd, 26th, 29th and July 1st. To those who did so passages were promised to Ningpo or Hangchow, and thence they were to have been forwarded to their native villages.

FORMOSA.

A correspondent at Tamsuy, under date of June 25, forwards the following:—

"I have to report to you the loss of the British brig *Susan Douglas*, on the Island of Samasana, off the south-east coast of Formosa, on the 13th of March. She was bound from Hong Kong to Ningpo. All the people on board were saved, with the exception of the Chinese cook, and two or three Chinese females, who were drowned at the time of the wreck. The vessel became a perfect wreck. The survivors were treated kindly by some Chinese junkmen, and taken to Chinkongo, a Chinese settlement in Black Rock Bay, from whence the captain and chief mate started in a junk to Takow on the 17th April. They have, I learn, reached Takow safely, and sailed thence to Amoy.

"We only got intelligence of the wreck a few days ago; and the gunboat arriving opportunely at Tamsuy shortly after, went round, and succeeded in bringing away the rest of the survivors. One of the crew, a Sandwich Islander, had died; the rest, including the second mate, nnmbered six. These men are now in the hands of H.M.'s consul at Tamsuy. The junkmen at Black Rock Bay were liberally rewarded for their kindness and attention to the crew."

HONG KONG.

The mails of 26th May arrived out on the 6th July. The dates are now to the 12th. Sir Frederick W. A. Bruce, the Minister at Peking, had arrived from Peking, and is a passenger by the present mail on leave of absence. Mr. T. F. Wade, the Chinese Secretary, will conduct the affairs of the Embassy in the interim.

The *China Mail* thus refers to the labours of Sir Frederick Bruce:—

Sir. F. Bruce, who is now in Hong Kong *en route* for England by the mail leaving to-day, has so far completed his duties in the capital as to have left a friendly impression on the minds of the present Chinese Government with regard to England and foreign nations generally; not that the cordial co-operation of all the Western Ministers with Sir F. Bruce is due to the acknowledged abilities of the latter, but that he has so far obeyed the dictates of truth and reason as to have commended his views to the minds of the other Ministers resident in Peking. The task which Sir Frederick has had to perform has been one of a singularly difficult character. A man in his position had the fatal power in his hands of involving us in war—or of sowing the seeds of war, which is the same thing—with "a third of the human race." Instead of allowing his diplomacy to tend in this direction, he has, in common with his colleagues of other nations, established friendly relations with the governing powers. This was, so far, a difficult achievement, and the principal performer in the business deserves, at least, the return of having the fact placed upon record. The establishment of foreign legations at Peking has been a totally new experiment, and it may be safely affirmed that no one could foretell the result of such a venture four years ago, when it was made. There was a general feeling at the time that Sir Frederick Bruce was not the man to maintain creditable—not to say profitable—relations with the Chinese rulers. But, notwithstanding that his term of office has been marked by peculiar difficulties, it cannot be said with truth that he has managed English affairs otherwise than well. In order to do this he has had, as might have been expected, to encounter some amount of opposition, if the temporary ill feeling of different interests can be so designated. That he has been honest, straightforward, and intelligent there cannot be much doubt. Of errors in judgment he has occasionally been guilty, but it must not be forgotten that such are next to inseparable from an early diplomatic connexion with the Court of Peking. Sir F. Bruce's public despatches are probably the best means of estimating the amount and nature of the work he has had to do, and how he has done it. The civil troubles of the empire have formed a fresh and most serious addition to the labours entailed upon the English Minister; and though he has taken a different view with regard to the treatment of the insurrection that has been distressing China for the last twelve years from that taken by our military representatives out here, as well as by many influential merchants, he has alway been temperate in his opposition and ready to defer to the views of officers commanding the forces here, so long as they are prepared to accept the responsibility of their own courses of action. This was to a large extent necessary, for it is agreed upon all hands that China politics are not easily unravelled. Our own views on the matter have never changed, and we should have changed them at once had good reason appeared for so doing.

Mr. T. F. Wade, the acting Minister for England at Peking, is not likely, so far as we are aware, to disturb the policy pursued by his predecessor. That policy has simply been one of caution and watchfulness. It is as impossible with nations as it is with individuals to become friendly and familiar on a short acquaintance; nor in either case do sudden friendships prove of permanent value. We must sometimes be patient in diplomatic negotiation. To the mercantile mind adherence to engagements is not only—as it should be—a prime virtue, but the want of it is, properly enough, viewed as a leading offence against all the laws that regulate commercial intercourse between man and man, or between nation and nation. The ability of the Chinese Government to carry out strictly their engagements with us has been for years a matter of

Digitized by Google

discussion. The British policy has all along been to render the performance of those engagements as easy as possible to the Chinese, and this policy has been most ably and effectually carried out. The foreign collectorate of customs, for which the late Lord Elgin received the credit until a member of the Hong Kong Chamber of Commerce claimed and received it, was a first step towards cementing friendly and honourable relations between China and Western nations, and, in the ordinary nature of things, the foreign assistance lately rendered to the Imperialists ought to further the good feeling we are endeavouring to establish. Jealousy and suspicion, however, are inherent in the Chinese mind with regard to foreigners; and we need not be surprised at the fact; for are not many centuries of exclusiveness sufficient to account for it? We cannot, therefore, wonder if the progress of good relations and mutual favours be slow between the Chinese and foreigners; on the contrary, our chief cause of astonishment ought to be that they have made so much progress in so short a time. Further than recommending Sir F. Bruce or his acting successor to maintain a better understanding with the two Chambers of Commerce in China, and to give a little more consideration to mercantile interests, it is impossible to object to the careful course of policy he has so successfully pursued.

The interest of the past week has chiefly centred in the supreme and magistrate's courts, in the former of which the murder case of the man Browning was tried, and in the latter a newspaper libel case was brought forward. The case of Browning occupied two days in hearing, and the evidence is both interesting and instructive when considered in its connection with the verdict given on the occasion. Considerable dissatisfaction was expressed with the "Manslaughter" verdict given in, and the sentence of penal servitude for life which followed it; and a strong feeling existed that the evidence proved nothing beyond "Justifiable Homicide." Browning had in an affray killed two Portuguese in Japan. The details are given in the *China Mail*.

The case for libel was the Baron do Cercal (A. A. de Mello, of Macao) against the *Echo do Povo*. It appears that the defendant and Governor Amaral of Macao were sitting together drinking coffee in the drawing-room of the Governor's residence, when the Baron happened to call upon the latter. The Baron treated the Editor as a stranger, and, as Governor Amaral did not introduce them to each other, we should fancy the matter ought to have ended there; but the Editor adduces it as an example of the strong grounds he would have for writing against the Baron did he allow, as he never does, his private resentments to affect his public duties. The Editor, it seems, did not treat Baron do Cercal as a stranger, but saluted him instead, but without receiving a reply. The inference which the new Governor must have drawn from this was either that the Baron was an ill-bred man, or that his sentiments towards the Editor were not those of respect. The former is the *Echo's* theory, and his only grounds of resentment are that the Governor ran a risk of adopting the latter hypothesis. This case will be tried at the next session.

COCHIN-CHINA.

SAIGON.

We have the *Courier de Saigon* of the 10th by a late steamer. It is stated that more than 50,220 tons of white rice have been exported from Saigon during the first six months of 1864, being a much greater quantity than what was exported during the corresponding period last year, and even exceeding by 8,000 tons that of the year 1862. The stock of rice still on hand is near 20,000 tons, and there are also large quantities available in the interior over and above what is required for local use.

SIAM.

BANGKOK.

His Majesty the Second King of Siam has twice left Bangkok in one of his steamers for the purpose of visiting Singapore and Batavia, but he has as often been compelled to put back owing to severe sickness. His Majesty has, therefore, very reluctantly, for the present relinquished his intended voyage to foreign parts.

BORNEO.

SARAWAK.

The Singapore *Straits Times* contains a long communication from Captain Brooke Brooke, in which he brings various heavy charges against his uncle, Sir James Brooke. We shall return to this letter, and to the comments of the *Straits Times* thereon, in our next issue.

JAVA AND NETHERLANDS INDIA.

The Government has issued a most important resolution, permitting natives to join the Government schools for the purpose of learning the Dutch language. The Secretary-General advertises that, as the desire to acquire the Dutch language shows itself more and more amongst the natives, and as the knowledge of the same is a material assistance to their further civilisation and development, the Government has decided to assist, as much as possible, those natives who feel inclined to study that language. In the first place, the Government is desirous of encouraging the composition of books adapted to facilitate the study of the Dutch language by the native, and therefore offers a premium of one hundred guilders for every sheet of printing approved of. Medals are also offered. The Government appoints judges for the approbation of the works sent in, which latter then become the property of the State.

The Director of Cultures has been allowed a two-years' leave of absence on account of illness, and the Assistant Resident of Tangerang, the scene of the late disturbance, has been discharged and put on half-pay. It is reported that Admiral May will return to Europe in the course of the present year. The *Locomotief* is informed that the Government, being dissatisfied with the late military operations of Lieutenant-Colonel de Neve, at Pontianak, intends recalling that officer from his post.

Cholera continues to rage in several of the most populous towns, and the number of deaths latterly has been above the usual average. Stringent measures have been taken to prevent its extension; but it is difficult to make the natives understand that they should be careful in their diet.

H.M.'s steamship *Apeldoorn* left Riouw on the 25th June for a cruize in the China Sea.

Notice is given to mariners that an iron beacon has been placed on Karrang Peorak, the northernmost of the Ostrich rocks, in the Straits of Sunda, and one on Karrang Bezaar, the southernmost of said rocks.

SOURABAYA.—The British schooner *Edmund*, Capt. Coleman, with coffee and rice from Bally for Singapore, struck on a reef off the island of Ra-as, near Madura, but was got off by Mr. Olie's steamtug *Eersteling*, and towed into Sourabaya.

MOLUCCAS.—During the inspection trip of the Assistant Resident to the Aroe and Key islands in the month of April, a letter was handed him by the orangkaja of Oedjir, one of the Aroe islands, and which was picked up in the month of March, in a bottle, on the west coast of the island of Wassir. The letter, the writing of which was nearly obliterated, contained the following:—

"Barque *Hastings*, 420 tons, C. M. Thompson, master, from Colombo to London, April 16th, 1862. Off the south end of Ceylon, India. All well. To know the set of currents."

MALACCA STRAITS.

SINGAPORE.

Our dates come down to the 21st July. The London mail of the 10th June arrived on the 14th July by the steamer *Singapore*. The French mail, with dates from London to the 17th June, came in late on the night of the 19th July. There is no occurrence of a political nature in our present advices demanding a record.

The British brig *Louisa* has been destroyed by pirates, only four survivors escaping to tell the following dreadful tale of slaughter and torture. We copy from *The Straits Times* of July 16:—

This morning, by the *Chow Phya*, four persons arrived from the ill-fated brig *Louisa*, Captain James Ross, of this port—viz., the gunner and his wife, the Chinese cook, and a Chinese passenger, who suppose themselves to be the sole survivors of the crew of the unfortunate vessel. The vessel left Hong Kong on the 18th May, 1864, and on the 30th was becalmed off the coast of Hainan, but not in sight of land, when she was attacked by what the gunner supposed to have been a Macao or Canton junk, heavily armed. The *Louisa* kept her off by constant firing of her bow gun until it became so much heated that it burst the breechings and fell overboard. The vessel was then at the mercy of the junk, which, having got under the brig's stern, fired shot and shell into her cabin window for some time. The pirates then boarded, on which most of the crew of Malays, headed by the Serang, threw some spars overboard, jumped after them and swam away from the vessel. The mate was killed; the captain was shot in the thigh and dropped on the deck; and the gunner, though wonded in the breast by a musket ball, managed to throw the captain into the cabin, where he remained about two hours. The pirates in the meantime ransacked the vessel's cargo, of which they took about one-half. They then dragged the captain on deck, cut the mate's dead body in half, cut off one of the captain's hands, and commenced torturing him by cutting off his toes, to make him declare whether there was money on board the vessel or not. They at the same time threatened the life of the gunner and his wife, who, seeing this, threw his wife and child overboard, and jumped after them with a board. Captain Ross threw himself after them, and swam away from the vessel, the captain's son, a boy about ten years old, being taken on board the junk. The Chinese cook says, however, the pirates afterwards quarrelled among themselves about him, tied his hands, and threw him into the sea. After four hours, Captain Ross, being exhausted with loss of blood, sank. The gunner's child sank on

Digitized by Google

leaving the vessel. As near as the gunner can tell, about ten o'clock at night he saw a vessel, which proved to be the *Young Greek*, and which he hailed. She hove to, lowered a boat, and picked up the gunner and his wife. The *Louisa* at this time was on fire about two miles to leeward. The *Young Greek* lay to till morning, then sent a boat to the brig, which was at this time burnt to the water's edge, and took off the Chinese cook and passenger, who were in the water hanging to the anchor. Nothing was seen of any others of the crew, and the vessel proceeded to Bangkok. The gunner states that the captain and mate fought with great determination, and but for the unfortunate accident to their gun, he thinks they would have beaten the junk off. Had it not been for the *Young Greek* heaving in sight, the *Louisa* would have added another to the list of missing vessels in the China sea—for which, not unfrequently, typhoons are held responsible.

The *Louisa* was attacked and set on fire in lat. 17 deg. 20 min. N.; long. 110 deg. 40 min. E., being nearly 400 miles from Hong Kong.

The steamer *Dumbarton*, which left the Clyde 23rd April, arrived out on the 6th July, and left for Hong Kong on the 8th for, Messrs. Gibb, Livingston, and Co. The American steamer *Oriflamme*, from New York 16th April, arrived on the 15th of July, *en route* to Hong Kong. The Prussian frigate *Gazelle* arrived from Hong Kong on the 16th.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

MARSHALL—On the 24th June, at Singapore, the wife of Capt. J. G. Marshall, Royal Artillery, of a daughter.

OPPERT—On the 30th June, at Shanghai, Mrs. E. Oppert, of a daughter, stillborn.

SCOTT—On the 19th July, at Hurricane Cottage, Singapore, the wife of R. W. Scott, Esq., prematurely, of a daughter.

WOODWARD—On the 19th May, on board H.M.'s Hospital Ship Hercules, Hong Kong Harbour, the wife of G. P. M. Woodward, Esq., M.D., Surgeon 2nd Batt. 20th Regt., of a daughter.

MARRIAGES.

BROWER—MANN.—On the 9th June, at the American Legation, Jeddo, Japan, by the Rev. R. S. Brown, De Witt Clinton Brower, Esq., of Yokohama and New York, to Jane Nias, second daughter of the late James Mann, Esq., of Peckham-rye.

BURN—WINBOLT.—On the 24th Aug., at Sandridge, St. Alban's, by the Rev. J. Burn Murdoch, assisted by the Rev. R. Holt and the Rev. H. Todd, Lieut. Henry Burn, H.M.'s late Indian Navy, Master Attendant, Singapore, to Louisa, elder daughter of the Rev. T. H. Winbolt. No cards.

BURGOYNE—WALKER.—On the 25th Aug., at St. James's Church, Westbourne-terrace, by the Rev. Edward Meredyth, Captain Burgoyne, R.N., &c., only son of General Sir John Fox Burgoyne, Bart., to Evelyn Laura, daughter of Rear-Admiral Sir Baldwin Wake Walker, Bart.

BAKER—ADAMS.—On the 2nd July, at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, Samuel Wright Baker, to Emily Caroline Adams, of Isle of Thanet, Kent.

GARDNER—MORGAN.—On the 30th June, at Trinity Church, Shanghai, Frederic Edwin Gardner, Commander Wild Dayrell, to Jane Morgan, of East Grimstead, Sussex.

REME—CRASEMANN.—On the 30th July, at Hamburg, G. Adolph Reme, Esq., of Singapore, to Sophie, daughter of C. A. Crasemann, Esq., of Hamburg.

DEATHS.

ALT—On board the mail steamer Calabar, on his voyage from Cape Coast Castle, having been exchanged from the 1st W.I. Regt. to the 98th, Balser Alt, in his 21st year, youngest son of the late Lieut. D. Alt, of the 63rd Regt.

AXEN—At Seaman's Hospital, Hong Kong, on the 26th June, Jurgen Axen, seaman, Danish brig Roska.

BERTRAND—At Hong Kong, on the 3rd July, Alice Sophie Eliza, infant daughter of C. Bertrand, Messageries Impériales Company, aged 9 months and 2 days.

BOULDEN—At Hong Kong, on the 2nd July, William Boulden, chief officer British ship Caracius, of cholera spasmodica.

BURGY—At Suez, on the 22nd May, Mr. E. H. Burgy, of the firm of Smith, Archer, and Co.

BOWEN—At Hong Kong, on the 30th June, Frederick Bowen, clerk, Victoria Jail.

CRAWFORD—On the 21st July last, at Havannah, after a few days' illness, Joseph Tucker Crawford, Esq., C.B., H.M.'s Consul-General in the Island of Cuba.

DIXSON—At Hong Kong, on the 6th July, Jane, wife of William Dixson, police sergeant.

FITZGERALD—At the Civil Hospital, Hong Kong, on the 1st July, Oscar Fitzgerald, of cholera, cook of the British ship Caracius.

GARRETT—At the Civil Hospital, Hong Kong, on the 1st July, J. Garrett, destitute seaman.

GIRXENSON—At the Seaman's Hospital, Hong Kong, on the 4th July, Thomas Girxenson, seaman.

HUMPHREYS—At the General Hospital, Hong Kong, on the 28th June, John Humphreys, private, H.M. 90 h Regiment, aged 21 years (cholera).

JOHNSTON—On the 21st June, at Yokohama, Wm. Johnston, Esq., late of Hong Kong, aged 50 years.

MACCARTHY—On the 14th August, at Spa, Belgium, Charles Tustin MacCarthy, Knt., Governor of Ceylon, aged 53.

NIXON—At the General Hospital, Hong Kong, on the 28th June, private, H.M. 99th Regiment, aged 27 years (cholera).

STAFATO—At the Seaman's Hospital, Hong Kong, on the 5th July, Sprio Stafato, seaman, ex Britain's Pride.

VROOMAN—At Canton on the 29th June, Henry, only son of the Rev. D. Vrooman aged 10 years 6 months.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—The sales of the fortnight are reported as under:—Congou: Tyshan, 450 half-chests and 2,000 boxes at 24 to 33 taels for fine to finest imitation Kaysows. Scented Orange Pekoe: 6,000 boxes at 22½ to 40 taels for medium to superfine. Scented Caper: 5,000 boxes at 22 to 28 taels for medium to very fine. Canton Greens: 6,000 boxes Gunpowder at 22½ to 26½ taels for good to fine.

MACAO.—Tyshans: Arrivals of the third crop leaf are expected in the course of next fortnight; of the second crop, 2,329 bales have come down, making up 20,071 bales, equal to about 12,000 piculs, for the season to date; contract deliveries for the fortnight are only 790 half-chests Congou, and 337 boxes Souchong; of the better kind, there have been no sales on the market. The *Banian* is shortly expected from Whampoa to take in about 150 tons for London now ready for shipment; the stock of both better and common leaf is large, but teamen are firm in their demands of 24 to 26 taels for the former, while common Tyshans remain quite neglected.

AMOY.—The market was opened on the 14th by the settlement of two small chops of Congou of very inferior quality at $16 to $17. Buying became general shortly afterwards at very full rates, which have been gradually advancing up to the present time. Congou: Settlements are 13,500 ½-chests and 246 boxes at prices ranging from $16 to $21 for ordinary but middling kinds, and $21½ to $27½ for interior flavory to good flavory kinds. The few chops of really good quality have commanded extreme rates, and latest purchases are $2 higher than could have been obtained a fortnight since. Oolong: The high cost of true Ningyongs in the country has caused extravagant rates to be demanded, which in a few cases have been conceded—settlements reported are only 552 ½-chests and 420 boxes at $27 to $30 for fully fair to good cargo: one chop in small boxes has fetched $32. In addition to the above, nearly 2,000 ½-chests have been arranged for privately on similar terms. Plain Ordinary Pekoe: 195 ½-chests of common quality have fetched $13½ to $14.

FOOCHOW.—The transactions during the fortnight in Congous for the English market have been on a moderate scale owing to the small quantity on offer, the supplies of the first crop being almost exhausted. Latterly, purchases for the English market have nearly ceased, owing to heavy rains and consequent floods. For Australia a large business in Congous has been transacted, at an advance of 5 mace to one tael for common to medium. The second crop is coming forward freely, prices asked being 6 to 8 taels above offers. In Souchong a decline of 3 taels has induced extensive purchases. Oolongs have declined about 2 taels.

SHANGHAI.—Black Teas:—On the 23rd June a chop of good Ooonam Congou was settled at taels 32.5.0. Since that time 13 chops or 7,351 chests of Woopack, Oonam and Ningchow have found buyers at rates from taels 4.0.0. to 8.0.0 per picul, under the prices paid in Hankow for the same and similar Teas. The tendency of prices from the opening has been downward as exchange on London rose, and to even a greater extent, owing to the uncertainty as to what point exchange may ultimately reach. The settlements reported give quotations about as under:—Fine to finest Woopak Congou taels 34.0.0 to 39.5.0. Good to fine Woopak and Ningchow Congous, taels 31.0.0 to 35.0.0. Middling to good Oonam Congous, taels 28.0.0 to 32.5.0. Fair to middling blackish leaf Congous, taels 21.0.0 to 26.0.0. The last settlement of good Oonam at taels 29.0.0 established a decline of tls. 3.0.0 to 3.5.0 in that description. The demand for Tea has been very languid for the period of the season, as a general impression existed that rates asked were too high for safety. Latterly, however, as holders gave way in their demands, there has been a somewhat better inquiry, and the market closes firm. Green Teas: Have attracted no attention. The news of additional duty in New York, and the high rate of exchange here, have prevented all inquiry. Some new Pingsuey Teas have arrived, and one chop has been re-shipped on owner's account. Very high prices are demanded for those in stock, of which the quality is good.

HANKOW.—Sales during the fortnight are 89 chops at the following prices:—Oopacks and Cheongsowkyes, good to fine, 30 to 34 taels; medium to good, at 27 to 29; fair medium, at 23 to 26; Ningchows, fine to finest, 32 to 35; good to fine 26 to 28; Oonams and Leylings, fine to finest, 22 to 26; medium to good, 18 to 21.

KEWKIANG.—Green Tea: Late advices from the interior state that the picking of the leaf was going on, but that rates had materially advanced. Black Teas: The settlements of the fortnight had been 7 chops good to fine Ningchows, at 30 to 35½ taels. The teamen had become easier sellers, and a lower grade of rates was expected; most of the Congous which arrived being shipped off at once to Shanghai. Stock on the market 7 chops Ningchow, and 4 do. Hohow.

YOKOHAMA.—The new teas continue to come in very slowly and in small quantities, those of medium kinds; the teamen persisting in their demands for rates ranging from $4 to $6 in advance of the corresponding time last season—and that for inferior qualities but little business is reported. Settlements 300 piculs old and about 800 piculs new. Stock of new 240 piculs of medium class, of old 360 piculs. No fine or finest.

RAW SILK.—SHANGHAI.—The market was opened on the 1st July, and about 1,000 bales have been settled, at the following prices:—Tsatlee, No. 1 Tls. 390 to 405 per picul; do. No. 2 Tls. 370 to 385 per picul, do. No. 3, Tls. 350 to 365 per picul; do. No. 4 and inferior, Tls. 320 to 345 per picul; and for market No. 1 Kahing Taysaams, Tls. 300 per picul. The bulk of the settlements have been taken from Tsatlees, of medium to inferior quality only one really good chop having been reported as sold. The latest advices from the interior are favourable for the coming second crop, which has not yet been all gathered; it is said to be superior in quality and a larger yield than last season. The prices are said to be declining and the Chinamen now up country are acting most cautiously; so that it is not improbable a further reduction will take place in quotations there.

DRUGS.—Cassia Lignea: Sales, 250 piculs at $15.25 to 15.40; stock, 800 piculs. Cassia Buds: Sales, 20 piculs at $56; no stock. Cassia Oil: Sales, 5 piculs at $212; stock, 8 piculs. Anise Oil: No sales;

Digitized by Google

stock, 30 piculs, held at $155. Star Aniseed: Sales, 200 piculs at $18 to 18.50; stock, 200 piculs. Galangal Root: Sales, 500 piculs at $1.80 to 2; stock, 6,000 piculs. Gall Nuts: No sales; stock, 50 piculs held at 12.50 to 13. China Galls: Sale on native account at $13.

RAW COTTON.

HONG KONG.—A good demand has prevailed during the fortnight and prices advanced 50 cents. Since the arrival of the London mail of 26th May, the demand has however abated and this advance has been lost. Stocks being light, the market closes tolerably firm at the following quotations:—Shanghai $31 to 33, Ningpo $33 to 34, Japan $35½ to 36. The sales of the fortnight are estimated at 12,000 bags and the stock at 15,000.

SHANGHAI.—Quotations at which settlements have been made range from tls. 19.50 to tls. 21.50 per picul. Chefoo cotton is the most in demand, the colour being superior to any other description of Chinese cotton, and though not better, equal to the best. The parcels of this cotton which have come forward are of course small, and sought for by speculators. With regard to the market here for the coming season, advices on all hands speak of a very large yield; far more than the usual quantity having been planted, and the weather has been most favourable. This will no doubt affect prices here somewhat, and it is very likely that supplies will be forced on the market as early as possible. If we are to judge of the crop planted this year in the cotton districts, by an increased quantity planted around Shanghai, it is not unlikely to nearly double that of last year. We have heard that the Chinese Executive are using all the coercive measures in their power to cause the natives to send their Tea, Silk, and other produce to the utmost limits of the Grand Canal, viz., to Hangchow, not a treaty port, with the view of squeezing the greatest amount of custom's posts or octroi duties. Should this be the case nearly all the produce of the district will undoubtedly find its way to Shanghai, but burthened with increased duties. We get the information from Chinese sources, and therefore are unable to say what amount of reliance is to be placed thereon. It is further said that the mandarins, in furtherance of the above project, are using every endeavour to depress immediate trade on the spot with foreigners, who would not of course despatch their property by any other than the most expeditious and cheap route. Whether there is any truth in the report many readers will by experience know better than we do, but of course such proceedings are in direct contradiction to the spirit of the treaty, and could hardly fail to be soon set right by the interference of the foreign Ministers.

TIEN-TSIN.—The supply appears to be inexhaustible, but transactions are kept very secret.

YOKOHAMA.—The demand for the staple continues as last reported. The moderate supplies arriving are still of medium and inferior classes, and prices somewhat stiffening. The exports this season have been 72,600 bales, against 10,000 same time last season.

CHINA IMPORTS.

COTTON YARN.—There is not any material change to notice in the value of yarns, and the transactions of the past fortnight are limited to 100 bales Nos. 16 to 24, reported as purchased at $230 per bale. Some 20 bales have likewise been moved off by auction. Grey shirtings have met with a moderate amount of inquiry during the past fortnight, and prices remain at about the rates previously current; the sales reported in this colony amount to 9,450 prices, in addition to which some 3,000 have been moved off by public sale. The sales effected in Foochow are put at 1,800 pieces—lbs. 7.4 to 8.10 taken at $5 to $5.55 per piece. White Shirtings: Settlements of these goods to the extent of about 4,000 pieces have been effected in the Hong Kong market, while from Foochow a small sale of 300 pieces, 64, reed at $6 is reported. T-Cloths: These goods have again been in but slight request, and the transactions of the fortnight are limited to 2,500 pieces; and 1,500 pieces of damaged goods moved off by public sale. A sale of 500 pieces 6 lb. goods is reported is from Foochow at $3.60. White Spotted Shirtings, Dyed do., Brocades White and Coloured: These goods have met with better inquiry in this market, and have been moved off more freely during the past fortnight than for some time past. Prices remain without alteration, and the sales reported are 750 pieces of white spotted, 500 pieces of dyed do., and 1,000 pieces of coloured brocades. Damasks: Without sales. Chintzes: There have not been any sales in this colony, but in Foochow some 300 pieces have changed hands. Handkerchiefs: A small sale of 120 dozen has been reported.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: A fair amount of business has been transacted during the past fortnight in some descriptions of woollen goods, but none of the above-mentioned kinds have met with sales. Long Ells must generally be quoted slightly below the prices of the previous fortnight, the amount of business transacted has, however, been upon a larger scale than for some time past, and the sales in this colony are estimated at 3,000 pieces. In Canton about 300 pieces have changed hands. Camlets: Without alteration to notice in value have found buyers in Hong Kong to the extent of 350 pieces. Lastings: The same remarks apply to these fabrics, which have been placed to the extent of 400 pieces without change in the quotations. Blankets: 350 pairs have changed hands.

METALS.—Iron, Flat, &c.: The value of the various descriptions of iron enumerated does not show any great alteration when compared with the quotations given in last report, but the article remains at present quite uninquired for in this colony; while in Canton, where sales are restricted to about 4,000 piculs of all kinds, a slight decline in most qualities may be noted. Lead: The value of lead in Hong Kong remains as quoted under date of 27th ultimo, with sales for the fortnight of 1,400 piculs. In Canton, where 1,700 piculs have changed hands, an advance of about 5 cents per picul has been established. Tin: 250 slabs purchased in Hong Kong. Tin Plates remain as previously quoted, with sales in Hong Kong of 200 boxes. Steel: Nothing doing

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN—From London: June 23, Kwang Foong; and from Amsterdam: Aletta Augusta. From New York: 19, Baron Kellner.

At SHANGHAI.—From London: June 22, Sparrow; July 2, Yaratilda and Solent. From Newcastle: 1, Elizabeth. From New York: June 30, Leopold and General Ward (str.) from Boston.

At FOO-CHOW.—None.

At HONG KONG.—From London: June 28, Robin. From England: July 10, Maggie Lauder (str.). From Sunderland: June 28, Bedford. From Cardiff: July 2, Louis.

At SINGAPORE.—From London: July 9, Blue Jacket; and 15, Panic. From Liverpool: 17, Glendower; and 18, William Connell. From Sunderland: 8, Margaret Wilkie; and 17, Wye. From Cardiff: 9, Patriot; 12, Ione; and 16, Hammersmith. From Newcastle: 15, Procymatia. From Glasgow: 17, Falcon. From Hamburg: 17, Therese. From New York: 15, Oriflamme (str.).

At BATAVIA.—From London: Copernicus. From Liverpool: Tigris. From Glasgow: Glenisla and Falcon.

DEPARTURES.

From JAPAN.—For London: June 23, Red Deer.

From HANKOW. June 24, Robert Lowe (st.), for London.

From SHANGHAI.—None.

From FOOCHOW.—For London: June 19, Ellen Rodger; 24, Dora July 1, Whinfell.

From HONG KONG and CANTON.—For Liverpool: June 30, Geologist, and July 2, Edward Percy.

From MACAO.—For London: June 25, Glenaros.

From SINGAPORE.—For Liverpool: July 9, Invincible.

From HONG KONG.—For London: July 11, Marlborough. For New York: July 11, Manderin.

LOADING.

At JAPAN.—For London: Natal, Amoy, Vigil, Jane Isabella, Yokohama, and Ann Maria.

At HANKOW.—For London: Stirlingshire.

At SHANGHAI.—For London: Silver Eagle, Fychow, Gresham, Highflyer, Pegasus, White Adder, and Knight Templar. For Liverpool: Affghan, Brockham, Southern Empire, Sea Snake, Thomas Bell, and Hougoumont.

At FOOCHOW.—For London: Star of China, Dartmouth, Childers, Canute, Red Riding Hood, Bride of the Seas, Cumberland and Holmsdale. For New York: Benefactress.

At AMOY.—For London: Willy.

At HONG KONG AND CANTON.—For London: Adriatic, Cathay, Ben Lomond, Chanticleer, Yeavering Bell, Banian. For Liverpool: Chaa Sze, Everest, General Windham, Lord Dalhousie, Zenobia, Princess Somawty. For New York: Roslin Castle.

AT SINGAPORE.—For London: Rangoon, Tweed, and Prince Alfred. For Liverpool: Volunteer, and C. H. Soule.

AT BATAVIA.—For Rotterdam: Burg Hoffman, Balder, Cesar, Sjofroken, Vijt Vriendez, Nation's Hope, Joseph Willem, and d'Elmina. For Amsterdam: Druses, Twedingen, Koophandel, Affiance, Bosphorus. For Channel:—Ajax, and Cruizer. For New York: Commodore.

AT PENANG.—For London: Empress, Sunium, Marengo.

FREIGHTS AND CHARTERS.

JAPAN.—To London: Cotton £4. 10s. to £5; Tea £5. 10s.; Silk £6 nominal, per ton of 50 cubic feet.

SHANGHAI.—Freights both for coast and home charters are on the decline, with a large number of unemployed vessels in harbour. The rates, which also are nominal are:—To London per clipper vessels, Tea £4. For Liverpool, the Affghan, Hougoumont, and Sea Snake are fully engaged at £3. 10s. The Essex was circulated at £2.

FOOCHOW.—To London: £3. 10s. per ton 50 cubic feet.

HONG KONG AND CANTON.—Considering the large amount of tonnage in the harbour, a fair amount of business has been done. The following, from George Holmes's circular, will show the principal transactions:—Adriatic (302) to London, at £3. 12s. 6d.; Willie (204) Amoy to London, £1,100 in full, and General Windham (794) to Liverpool, at £2. 10s. To Bangkok and back, 40 to 50 cents per picul. To Ningpo, 20 cents, and Shanghai, 25 cents per picul.

MANILA.—To United Kingdom: £3. 10s. Sugar, and £4. 10s. light freight.

SINGAPORE.—In consequence of larger arrivals rates have declined to £2. 10s. and £2. 15s. for dead weight, and £3. 15s. measurement to London and Liverpool.

BATAVIA.—To Europe: Notwithstanding the arrival of several vessels seeking, the rates remain high, viz., £4. 17s. 6d. to £5. 2s. per ton.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT, to CHINA, &c.—June 25, Tigris, from Liverpool to Batavia; 26, Prince Alfred, London to Singapore; Jose Maria, Liverpool to Manila; 27, Ousuri, Newcastle, for orders; Harkaway, Sunderland to Hong Kong; Patna, Liverpool to Shanghai; Beemah, London to Shanghai; Maria Augusta, Copenhagen to Amoor; Aldasserdam, Cardiff to Singapore; and Loopait, Rotterdam to Singapore; 28, Queen of the East, London to Shanghai; Verbena, Liverpool to Hong Kong; 26, Beatrice, Cardiff to Hong Kong; Cœur de Lion, Shields to Shanghai; Quick, Cardiff to Hong Kong; Laura, Hamburg to Hong Kong; July 2, Slaney, Sunderland to Shanghai; 3, Trafalgar, Sunderland to Hong Kong; Maravi, Liverpool to Shanghai; 6, Perle, Bordeaux to Saigon; Delhi, London to Shanghai; Truro, Liverpool to Shanghai; 10, Palawan, Sunderland to Singapore; Milton, Liverpool to Hong Kong; Wye, Sunderland to Singapore; 11, Johanne, Copenhagen to Amoor; Hermelin, Glasgow to Hong Kong; W. Connell, Liverpool to Shanghai; and Cornelia Adolphine, Flushing to Batavia.

From UNITED STATES to CHINA, &c.—June 24, White Eagle, New York to Hong Kong; July 7, Cleiro Babwijan, from New York to Shanghai.

Digitized by Google

From China, &c., to England and Continent.—June 29, Novelle Antoinette, from Manila to Havre; July 1, War Hawk, Bangkok to St. Thomas; 4, Seric, Foochow to London; Petronella, Bantaw to Amsterdam; 10, Esperanza, Singapore to Europe, and Patriot King, Manilla to Liverpool.

From China, &c., to United States.—July 4, Ocean Home, Singapore to New York; and 9, Tropic, Manila to New York.

COMMERCIAL POSTSCRIPT.

Arrivals not Included in the Tables.—Aug. 25, at London, from Rangoon, Amity; at Falmouth, from Akyab, Zeepaard, Pride of the Ganges; off Falmouth, from Akyab, Julia; 21, at Bremen, from Bassein, Isabella; 25, off Queenstown, from Akyab, Hypatia; 24, at Brouwershaven, from Banjoewangie, Hendrika; at New York, from Singapore, Renaud; 27, at Queenstown, from Akyab, Hippolyta; at Falmouth, from Akyab, Amelia Ghering; from Batavia, Annie Forster; 29, off Liverpool, from Akyab, Beloochee.

Departures.—Aug. 22, from Shields, for Shanghai, Vanguard; 20, from Newcastle, for Hong Kong, Orion; 23, from Shields, for Batavia, Anna and Elizabeth; 23, from Sunderland, for Hong Kong, Camoens.

Spoken.—Samoda, from China, and Diadem, from Manila, by the Bulwark, arrived at St. Helena; Bittern (?), Batavia to Amsterdam, off the Cape of Good Hope; Abrel Jaab (?), Manila to Liverpool, June 13, 35 S., 23 E.; Johanna, Batavia to Amsterdam, 36 S., 35 E.; Ternate, Padang to New York, July 8, 7 N., 29 W.; Hollander, Amsterdam to Japan, August 24, 49 N., 7 W.; Minerva (Norw. barque), Newcastle to Shanghai, June 4, 20 N., 25 W.; Boij (Dutch ship), Amsterdam to Padang, June 9, 8 N., 23 W.; Six Sixters, Amsterdam to Batavia, 53 days out, 3 N., 25 W.; Anglo Saxon, London to Sarawak, June 30, 22 S., 27 W.; Goethe (Hamb. barque), Boston to Hong Kong, July 8, 1 S., 26 W.; Ionia, Rotterdam to Batavia, August 18, 49 N., 6 W.; Eddystone (Amer. ship), Borneo to Liverpool, 50 days out, 28 S., 41 E.; St. Jean (Fr. ship), from Cheribon, July 14, off St. Helena.

Laid on.—At Glasgow, for Batavia and Singapore, Scotland; at Liverpool, for Shanghai, Nonpareil.

At St. Helena.—July 28, Rajah (str.), Hutchinson, from Shanghai and Batavia, and left, July 29, for London; 29, Willem Hendrik, Dutch, Beckering, from Batavia, for Rotterdam; 3, Chieftain, Borlase, from Sarawak, and sailed, 5, for London; 26, Herman, Koppelman, from Amoy, and sailed, 27, for New York; 6, Victory, Moon, from Singapore; June 30, Fort William, from Shanghai, and sailed, July 1, for Liverpool; Alexander, Dempster, from Kanagawa, and sailed for London July —; Express, from Shanghai; 14, Queen's Own, Rhymas, from Macoa, and sailed, 15, for London; 15, Rattler, Montechiaro, from Sumatra, and sailed for Gibraltar; 17, Isabella Barber, from Manila; 22, Eleanor, Silk, from Singapore, and sailed, 23, for London; 3, Ferdinand and Louis, Nolting, from Batavia, and sailed, 4, for Rotterdam; 8, Java, Changeur, from Singapore, and sailed, 9, for Bordeaux; 8, Meppel, v. Dam, from Yokohama, and sailed for London; 14, Dordrecht, Loos, from Batavia, and sailed, 15, for Dordt; 16, Australie, Lucas, from Batavia, and sailed, 18, for Amsterdam; 17, Koning Williem III., Kelion, from Padang, and sailed, 18, for Rotterdam; 18, Johanna, Marsan, from Hong Kong, and sailed for Bordeaux: Hindostan, from Singapore; 19, Rena, Butcher, from Singapore, and sailed for London; Levant, Smith, from Padang, &c., and sailed for New York; J. C. Schotel, Groot, from Batavia, and sailed, 20, for Rotterdam; 25, Pollux, Cruys, from Batavia, and sailed, 27, for Amsterdam.

Off St. Helena.—July 4, Willem Daniel (Dut. barq.), from Batavia; 15, Maria Elisa (Dut. ship), from Batavia, for Amsterdam.

Off Ascension.—July 9, Christina, from Batavia, for Amsterdam; 23, Vrouw Johanna, from Hong Kong, for Bordeaux; Muscongus, from Batavia, for Holland.

At Simon's Bay.—June 18, Monge, from Shanghai, and left, 27, for Brest; July 13, H.M.S. Adventure, from Plymouth, for China.

Casualties.—St. Helena, July 26.—The Kiandra, v. Kuffeller, from Passaroeang to Amsterdam, which put in here leaky 18th July, had also lost bulwarks, split sails and rudderhead, and apparently started cutwater, &c. She has been surveyed and recommended to be lightened for further examination. The Eunice, Lewis, from Colombo to London, which put in here 3rd July, and preceeded on the 5th, took on board part of the cargo of the Teide, Becards, from Manila to Liverpool. The Yaratilda, from London, reported as lost in the China Sea, arrived at Shanghai 2nd July.

THE DISTRIBUTION OF THE ARMY.

(From the *Army and Navy Gazette.*)

The arrangements for the reliefs for 1864 have now been concluded. The regiments for India have sailed. Shipping is taken up for the two battalions yet to be despatched on foreign service, and when the 86th has reached Gibraltar, the 1st battalion 10th the Cape, the 2nd battalion 10th Bengal, the 2nd battalion 9th and 2nd battalion 11th China, and the 67th and 99th the Cape, all foreign movements will have been completed until the middle of 1865. As great interest exists respecting the future destinations of regiments, and as many questions are put to us by officers and their relatives upon the subject, we have endeavoured to sketch out for our readers with as much care as possible a statement of the position for service of every regiment of cavalry and battalion of infantry of the Line, with a probable anticipation of its future movements as regards home and foreign service. In this latter respect there must be much uncertainty, and the fulfilment of our expectations depends on circumstances which may any day be upset. Premising this by way of caution, we proceed to state what is likely to occur in the absence of disturbing causes.

In the cavalry the probable changes between home and India are these:—

The 18th Hussars, now on passage to Madras, relieving the 17th Lancers.

The 16th Lancers proceed to Madras in 1865, relieving the 1st Dragoon Guards.

The 3rd Hussars proceed to Bombay in 1866, relieving the 6th Dragoons.

The 15th Hussars proceed to Bengal in 1867, relieving the 2nd Dragoon Guards.

The 4th Hussars proceed to Bombay in 1868, relieving the 3rd Dragoon Guards.

The 13th Hussars proceed to Bengal in 1869, relieving the 7th Hussars.

The 11th Hussars proceed to Bengal in 1870, relieving the 7th Dragoon Guards.

The 10th Hussars proceed to Bengal in 1871, relieving the 19th Hussars.

The 9th Lancers proceed to Bengal in 1872, relieving the 20th Hussars.

The 14th Hussars proceed to Bengal in 1873, relieving the 21st Hussars.

The 12th Lancers proceed to Bengal in 1874, relieving the 5th Lancers.

The 6th Dragoon Guards proceed to Madras in 1875, relieving the 18th Hussars.

The 8th Hussars, just returned from India, are the last for service. The 4th and 5th Dragoon Guards, the Royal Dragoons, and the Scots Greys are not intended for ordinary service abroad, and, like the Household Cavalry, their departure from England will only take place in the event of European war, or other exceptional circumstances.

Regarding the infantry reliefs, we shall first speak of battalions in India.

The 48th, 71st Light Infantry, 52nd Light Infantry, 81st, which went abroad in 1853, and the 28th in February, 1854, are now under orders for home, the relieving regiments being on their passage out to take their place. They may be expected in this country between March and June of next year.

The other battalions in India stand as follows for relief, and their return may be expected in the early part of the year set against each of them respectively:—

The 89th, 27th, 66th, 44th, and 72nd Highlanders in 1866.

The 54th, 56th, 1st battalion 18th Royal Irish, 80th, and 1st battalion 20th in 1867.

The 98th, 51st Light Infantry, 84th, 94th, and 2nd battalion Rifle Brigade in 1868.

The 42nd Highlanders, 35th, 46th, 91st Highlanders, and 33rd in 1869.

The 90th Light Infantry, 82nd, 1st battalion 4th, 1st battalion 23rd Fusiliers, and 93rd Highlanders in 1870.

The 77th, 95th, 88th, 1st battalion 7th Fusiliers, and 1st battalion 1st Royals in 1871.

The 1st battalion 19th, 79th Highlanders, 38th, 97th, and 3rd battalion Rifle Brigade in 1872.

The 3rd battalion 60th Rifles, and the 101st, 102nd, 103rd, and 104th in 1873.

The 105th, 106th, 107th, 108th, and 109th in 1874.

The 2nd battalion 21st Fusiliers, 36th, 2nd battalion 19th, 55th, and 76th in 1875.

The 2nd battalion 10th, 1st battalion 11th, 2nd battalion 12th, 58th, and 45th in 1876.

The regiments now employed in New Zealand went on foreign service as follows:—The 65th in May, 1846; the 70th in January, 1849; the 43rd Light Infantry in October, 1851; the 68th Light Infantry in December, 1857; the 40th in July, 1852; the 57th in February, 1853; the 1st battalion 12th in July, 1854; the 50th in June, 1857; the 2nd battalion 14th in September, 1860; and the 2nd battalion 18th Royal Irish in April, 1863. The period at which these battalions may be relieved depends upon the progress of the war. Should it be brought to a termination all will be at once brought home, except the 50th, 2nd battalion 14th, and 2nd battalion 18th. Although the 68th has only been abroad since 1857, it is well entitled to relief, from the fact that it was sent out to India after being at home but a few months from foreign service. In fact, it was like the 43rd—under orders for England when the increased demands of the New Zealand war compelled the authorities to divert it from Rangoon on that service.

On the North American station the 1st battalion 17th and the 63rd will come home next year, they having gone abroad in April and July, 1854, respectively. The 1st battalion 25th went out in 1858, and as it had not then enjoyed its full term of home service, it is likely to return before its full ten years. The other battalions in British North America went out almost at the same time, at the end of 1861, and each may expect to remain seven years more abroad, either on its present station, or, should political events and colonial arrangements permit the further reduction of the regular troops in Canada, in some other garrison abroad—the West Indies or Mediterranean, probably. The following is the order in which they stand to return home after the 1st battalion 17th and 63rd:—4th battalion 60th Rifles, 30th, 47th, 1st battalion Rifle Brigade, 1st battalion 16th, 1st battalion 15th, 2nd battalion 17th, and 2nd battalion 16th.

The 67th and 99th in China are about to proceed thence to the Cape. They are in all fairness due an early relief, for, although they only left England for India in 1858, they were sent out in less than two years of the time that they returned, the former from the West Indies, and the latter after a very long period of service in Australia. Both will probably be brought home in about two or three years. The 2nd battalion 20th, also upon the China station, only went out last year, and its relief cannot be expected before 1873.

At the Cape the 2nd battalion 5th Fusiliers would probably be relieved in 1868; the 2nd battalion 11th is under orders for China. It is very uncertain where it will complete its foreign service, but it is about due back in England in 1871. The 96th only went out last year, and has nine years' service before it. The 2nd battalion 10th is ordered on to India from which it can hardly be expected to return for ten years, although it has already been four years on foreign service. The 1st battalion of the same regiment sails from Ireland next week, and takes its place at the Cape.

At the Mauritius the 2nd battalion 13th Light Infantry went abroad in February, 1859, and the 2nd battalion 24th in March, 1860. These may be expected home, therefore, in 1869 and 1870 respectively.

Digitized by Google

In Ceylon the 2nd battalion 25th went abroad last year, and will doubtless remain from home until 1873.

In the West Indies the 2nd battalion 3rd Buffs and the 2nd battalion 6th would probably return home in 1868; but the 2nd battalion 2nd Queen's, at Bermuda, will precede them, having embarked for foreign service a little earlier—namely, in February, 1858.

The regiments now in the Mediterranean would stand for return home in the following order, were their ten years exactly completed:—2nd battalion 7th Fusiliers in May, 1868; 4th battalion Rifle Brigade in August, 1868; 2nd battalion 8th in September, 1868; 2nd battalion 9th in October, 1868; 2nd battalion 15th in November, 1868; 2nd battalion 23rd Fusiliers in February, 1869; 100th in May, 1869; 2nd battalion 22nd in May, 1869; 2nd battalion 4th in May, 1869; 1st battalion 9th in January, 1870; and 1st battalion 22nd in May, 1870. No doubt the time when they will return to England will be nearly that which we mention, but it is not likely that all these regiments will complete their service in the Mediterranean. The 2nd battalion 9th is already ordered to China, two or three more will probably go to North America next year, and one or two are tolerably certain to be sent to the West Indies and the Cape for a couple of years' service before their return to England.

We have thus alluded to the prospects of every battalion in the army on the foreign establishment. We shall now specify those at home in the order in which they stand for service, together with the date at which they last returned from abroad, and the station from which they arrived:—

1st Batt 10th, July, 1859, India.
86th, Aug., '59, India.
32nd Light Infantry, Aug., '59, India.
84th, Sept., '59, India.
78th Highlanders, Sept., '59, India.
29th, Sept., '59, India.
26th, Oct., '59, Bermuda.
41st, April, '60, Jamaica.
49th, May, '60, Barbadoes.
1st Batt. 60th Rifles, Aug., '60, India.
53rd, Aug., '60, India.
1st Batt., 8th, Sept., '60, India.
61st Sept., '60, India.
1st Batt., 3rd Buffs, April, '61, China.
2nd Batt. 1st Royals, April, '61, China.
2nd Batt., 2nd Queen's, May, '61, China.
1st Batt. 2 Queen's, May, '61, China.
87th Fusiliers, May, '61, China.
1st Batt. 5th Fusiliers, July, '61, India.
37th, July, '61, India.
1st Batt., 24th, Aug., '61, India.
73rd, Aug., '61, India.
64th, Aug., '61, India.
59th, Dec., '61, Cape.
2nd Batt. 60th, Feb., '62, China.
83rd, May, '62, India.
1st Batt. 6th, May, '62, India.
75th, June, '62, India.
92nd Highlanders, May, '63, India.
85th Light Infantry, June, '63, Cape.
31st, Nov., '63, China.
1st Batt. 13th Light Infantry, April, '64, India.
1st Batt, 14th, May, '64, Jamaica.
69th, May, '64, India.
74th, July, '64, India.
62nd, July, '64, Canada.
1st Batt. 21st, Aug., '64, Barbadoes.
39th, Aug., '64, Bermuda.

The 1st Battalion 10th is on the eve of departure for the Cape, and in a few days the 86th will leave for Gibraltar. With regard to the others, we can only speak by way of speculation, basing our remarks, however, upon a close consideration of the circumstances generally guiding such movements. If a strictly symmetrical arrangement were observed, every one of these battalions would go out in the fifth year after the date which we put as that of its return home. But as all this depends upon the claims to relief of regiments abroad, and upon many variable causes, irregularity must sometimes occur. Thus for the next three or four years there will be but few claims to relief beyond the five regiments regularly required for India. As we have shown, all the Canadian regiments but two have a long time to serve abroad; those at the Cape and Mauritius will not be brought home immediately, those in the Mediterranean are in the same position, those in New Zealand which ought to be brought home will not be relieved from England, three battalions being the future establishment of the Australian colonies, including New Zealand. Thus the principal destination of the corps now in England would be India. But it so happens that a large proportion of the regiments at present at the head of the list to go abroad returned last from India, after long and arduous service there, and the authorities naturally are not inclined to send them back to the same station after so short an interval, if it can be avoided. The 32nd, 84th, 78th, and 29th are in this position; and it is somewhat difficult to distribute them equitably, having a strict regard for the roster. So far as 1865 is concerned, however, the following scheme would appear to accomplish what is desirable in this respect:—

The 32nd Light Infantry to Malta, replacing the 2nd Battalion 7th Fusiliers to Canada, vice the 1st Battalion 17th to England.

The 84th to Malta, vice the 4th Battalion Rifle Brigade to Canada, vice the 63rd home.

The 78th Highlanders to Malta, relieving the 2nd Battalion 8th to Ceylon, vice the 2nd Battalion 25th to Bengal, vice the 89th home.

The 29th to Gibraltar, vice the 2nd Battalion 15th to the Cape, vice the 96th to Bengal, vice the 27th home.

The 26th to Madras relieving the 66th; the 41st to Bombay, relieving the 44th; and the 49th to Bombay, relieving the 72nd Highlanders.

By this arrangement every corps would embark strictly in its turn, and all the reliefs would be effected without sending any corps to the station from which it last returned. We should add that this scheme is not official, but it seems so just, and to provide so fairly for all interests, that it is not unlikely to be carried out in its main features. The precise destination of any battalion at home is a matter of great uncertainty, but the period at which each will leave the United Kingdom for its next tour of duty abroad may be fairly calculated at five years from the date of its last return, as indicated above.

Murder of the Captain of the "Gustave Adolphe" for China.—At the Southampton Police-court, before the Mayor, Mr. G. H. Brinton, and other magistrates, a German seaman, named Adolph Bjornsen, about 35 years old, was charged with wilfully murdering the captain of the barque *Gustave Adolphe*, an English registered vessel, on the high seas, on the 21st June last. It appeared, from the evidence of the first mate, Mr. Peterson, that the ship left London on the 7th of May for China. When they were within about five days' sail of Pernambuco, the first mate was in his cabin—the time being 9.30 P.M.—when he heard a noise proceeding from the captain's cabin. He immediately went there, and found the prisoner in the cabin with the captain. As soon as the prisoner saw him, he raised a pistol and fired, but the shot missed him. He then went again on deck, the prisoner following him, having still a double-barrelled revolver in his hand. Shortly afterwards the captain came on deck and asked where the second mate was (meaning the prisoner), and whether he had not been secured? Prisoner was standing near at the time, and he turned round and deliberately shot the captain through the head. The captain fell, and after lingering for about half-an-hour, died. The prisoner in the meantime had betaken himself to the captain's cabin, where he remained for a considerable time, the crew being unable to get at him as he had obtained possession of all the firearms. He afterwards came on deck heavily armed, and proceeded to lower the lifeboat, into which he got, and at once started from the ship. It was then about half-past two in the morning. Shots were fired at him, but it was exceedingly dark at the time, and they did not take effect. As soon as the day dawned, all eyes were strained in order to discover, if possible, some trace of the prisoner, and the boat was discerned in the distance. The vessel went immediately in pursuit, and came up with him about ten o'clock. Shots were fired at the prisoner's boat, which was completely riddled; and when it was in a sinking state, the jolly boat belonging to the ship, and manned at the time by six of the crew, was sent to seize the prisoner, who was placed in irons as soon as secured, and conveyed to the vessel, where he remained in confinement until Pernambuco was reached. He was then arraigned before a naval court, where depositions were taken, and the English consul directed his removal to this country. It was stated that no disagreement had taken place between the captain and the prisoner. The prisoner was committed for trial at the sessions.

The Governor of Ceylon.—We have to record the death of Sir Charles Tustan M'Carthy, Governor of Ceylon, which took place on the 14th inst. at the Spa, Belgium, to which place he was on a visit for the benefit of his health. The deceased, who was the son of the late Mr. Denis M'Carthy, of Cork, was born in 1820, and was married in 1848 to Sophia Brunel, eldest daughter of Sir Benjamin Hawes, K.C.B., Under Secretary of State for War. In 1856 he was nominated by Lord John Russell, who was at that time Colonial Secretary, to the office of Colonial Secretary in Ceylon, and in the following year received the order of knighthood. In 1860 he was appointed by the Duke of Newcastle, who was then Colonial Secretary, to the post of Governor and Commander-in-Chief and Vice-Admiral of Ceylon, which he held up to the time of his death. The nomination to the governorship falls to Mr. Cardwell, the Secretary of State for the Colonies. Sir Charles entered the public service as superintendent of one of the smallest of our West Indian dependencies, and in that insignificant sphere gave evidence of the rare capacity that can handle the least and the gravest matters with equal accuracy and adroitness, and which, though capable of the largest inductions, is not indifferent to the lightest details. On returning home on leave of absence from his post, he attracted the attention of the heads of his department, and was soon transferred to more serious and responsible duties. Thence, solely by the due appreciation of his powers and their exercise, he rose to the important and lucrative Government now vacated by his decease. Short as was his enjoyment of wealth and dignity, it is something to have shown that the tastes and accomplishment of letters are not irreconcilable with the careful discharge of official functions and the wise management of the concerns of State, and that our institutions permit such a man as Sir Charles M'Carthy to compete successfully with the discreet mediocrities of intellect, and the superiorities of birth and fortune.

Telegraph Across British North America.—The Hudson's Bay Company lately appointed the Arctic explorer, Dr. Rae, to visit the country between Red River and the Pacific Coast, to select the proper line for the telegraph. That gentleman reached Fort Garry about a month ago, and is now far on his way across the plains of the Saskatchewan; and we are now enabled to make the further announcement that seventy-seven tons of the wire, nearly half the quantity required, have arrived in Montreal, and the balance will be here very shortly. The wire is to be forwarded at once by the Grand Trunk Railway Company to Sarnia, and by steamboat to the head of Lake Superior, whence it will be transported during the next winter to Fort Garry or the Red River, at which place the whole of the wire, instruments, insulators, &c., will be collected by the beginning of spring. The poles will be cut and got ready during the winter, as soon as the fine weather of next spring sets in active operations will be commenced, and by the close of the year 1865 there is every reason to expect that telegraphic communication will be in operation from Fort Garry to the shores of the Pacific. The telegraphic system of the United States is now in operation to within about 400 miles of Fort Garry. This gap will certainly be at once filled, and the messages can pass from any part of Canada to British Columbia. Will not Canada be prepared to complete the communication between Fort Garry and Montreal by the Ottawa Valley, so as to have an unbroken line of telegraph stretching from the Atlantic to the Pacific through British territory? This active prosecution of the Pacific telegraph by the Hudson's Bay Company is the best evidence of their intention to inaugurate a new policy in their affairs. The progress of the telegraph with the company's posts every forty or fifty miles will be the surest means of opening up the country, and directing to the fertile territories of the Saskatchewan, the Assiniboine, and the Red River a tide of settlement and population which will ultimately complete the chain of British colonies from one ocean to the other.

Through Siberia to Peking.—A gentleman who proceeded from London to Peking through Siberia—a route often described in our columns during the past three years—has forwarded an account to *The Times* in which he concludes as follows:—"I left the town of Shaching early on the morning of the 26th, halted at midday at Too-moo, and stopped for the night at Chatavu, a fort on the inner or ancient Great Wall of China. This place is at the foot of a formidable mountain range, the pass over which, 17 miles in length, occupied the half of the following day. The mountain scenery was the grandest I had yet seen in the course of my journey, the road passing among rugged and precipitous crags. In the

Digitized by Google

evening we arrived at the village of Sha-ho, and about noon the following day we reached Peking. The last day's journey was through a sandy plain, over which the dust rose in clouds. It gave great inconvenience to travellers proceeding northwards, but none to me, as my back was turned towards the wind. I found that the last steamer from Taku for that season had just left, and the river was expected daily to be frozen up. I had not seen a drop of rain for more than six weeks, the weather, although cold, having been most agreeable. Thus ended what I believe to have been the first journey made by an Englishman from London to Peking by the Siberian route. I hope next season to hear that my example has been followed by many of my countrymen."

Naval and Military.

The official trial of the new steam-tender, constructed on the double-screw principle, which has been built for the iron frigate Achilles, took place in Chatham harbour, under the superintendence of the officials connected with the dockyard. It was highly satisfactory, and showed the immense advantages possessed by vessels fitted with twin screws as compared with those driven by the single propeller. The little steamer tested is in all respects similar to the tender recently constructed for the Bombay, 67, 400-horse power, Capt. Colin A. Campbell, flagship of Rear-Admiral the Hon. C. G. J. B. Elliott, C.B., and fitted with engines by Messrs. Penn and Co. She is exactly 42 ft. in length and 11 ft. in breadth, or, in other words, is of the dimensions of an ordinary man of-war's launch. From a vessel of this kind she only differs in being fitted with a portable steam-engine for driving her screws. Her machinery, which has been constructed by Messrs. Maudslay, Sons, and Field, is nominally of 3 horse power, but being on the high-pressure principle, and capable of being worked up to 100 lb. to the square inch, her power can be increased to that of 26 horses. Each screw is driven by means of its own independent shafting, which thus enables either propeller to be worked either ahead or astern. The screws are four-bladed, and are set at a pitch of 3 ft. 4½ in. The diameter of each screw shaft is 2 in., and the length 18 ft. There are four cylinders, each of 4 in. in diameter, and the length of the stroke is 6 in. The total weight of the engines, with 9 cwt. 29 lb. of water in the boilers, is 4 tons 7 cwt., or about one-third less than those of the engines of the tender built for the Bombay.

The Amethyst, 26, attached to the sailing reserve squadron in Chatham harbour, has been lent by the Admiralty to the Atlantic Telegraph Company, to be used in shipping the Atlantic cable on board the Great Eastern.

The Prince de Joinville, accompanied by the Duke of Montpensier and the Count de Paris, and attended by Capt. Ch. Pigeard, Naval Attaché to the Imperial French Embassy in London, and by the tutor of the Count de Paris, arrived about one P.M. on Thursday from London at the Admiralty-house, Portsmouth dockyard, the residence of the Port Admiral and Naval Commander-in-Chief, Vice-Admiral Sir Michael Seymour, G.C.B. They shortly afterwards, accompanied by Sir Michael Seymour, embarked in the Admiral's barge at the King's Stairs landing-place, and were conveyed on board Her Majesty's gunnery ship Excellent, Captain Astley Cooper Key, C.B. The Prince and party remained upwards of an hour on board the Excellent, and witnessed some very interesting firing from the different descriptions of ordnance forming her armament, and that of her tender, the Illustrious, ranging from the 10½-inch 12-ton gun downwards. From the Excellent Sir Michael Seymour conveyed his visitors on board the turret-ship Royal Sovereign, where they were received by the senior-lieutenant, in the absence of Captain Sherard Osborn, C.B. The turrets and their guns, with the general arrangements of the ship on deck and below, were examined with great apparent interest.

The Channel fleet will sail from Spithead this day, for a cruise between Portland and the Lizard. This arrangement, it will be seen, differs somewhat from that stated to have been made previously, which sent the fleet from Spithead for Leith Roads, with the supposed intention of its escorting the Prince and Princess of Wales to within sight of the Cattegat on the occasion of their forthcoming voyage to Copenhagen and the Baltic.

Major-General Sir Robert Walpole, K.C.B., who has recently assumed the command of the forces in the Chatham district, held his first review of the troops quartered at Chatham garrison on Saturday afternoon.

Continental Intelligence

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, AUGUST 25.

The news that was brought here by the last mail from Batavia has not given much satisfaction to our Government and the Liberal press, who applauded so excessively when the States-General approved the Bill presented by the Minister for the Colonial Department, and by which it was proposed to fix the estimates of India by the Legislature. They thought it the most salutary measure that ever could be taken, while the Opposition press, in many slashing articles, predicted that this was the first step that would lead to the self-government of our Indies. I hope that the dark-coloured suppositions of the Java press will prove to have been written without due deliberation, and that they will be contradicted by the decisive attitude of the States-General when the Indian debates are opened.

The deplorable contention between the followers of the modern and orthodox religious principles has brought also discord between the members of the Netherlands Missionary Society. In the last annual meeting that was held here, some of them insisted that the adherents of different opinions should be tolerated. They thought this desirable and necessary because the society, in that way only, could bear rich fruits in future. On the other side, it was desired that the meeting should say positively its opinion relative to the second article of the statutes (the biblical basis), because they suppose that two contradictory principles could not co-operate to the same purpose. The dissension already influences prejudicially the activity and the financial state of the society.

The meeting decided by 63 against 35 votes, that every one ought to be free to co-operate with the society, and denied also that the orthodox professed the principles of Dr. Zaalberg, Reville, Pierson, &c. It is very explicable that all the orthodox members of the direction retired, and it is probable that the Netherlands Missionary Society will be, within a little time, an ultra-liberal institution; but I do not believe that this will prove to be favourable to the propagation of christianity among the heathen.

The Ministerial papers contradict the rumour that the indisposition of Mr. Fransen van de Putte is dangerous. Within a few days he will be able to return from Kissingen to the Hague.

His Majesty left the Hague for his seat "het Loo," where he will stay some weeks.

Mr. Abram van Ryckevorsel, ex-member of the first Chamber of the States-General, died here suddenly.

It is rumoured that a concession is asked of the Governor-General of India, to organise a tug service for the coasts of our East Indian possessions.

Mr. Jonckbloet has sent in his resignation as Professor at the University at Groningen. It is said that he will be replaced by Dr. van Vloten.

A Russian squadron of six to seven ships will within a few some days enter the harbour of Nieuwe Diep.

A detachment of supplementary troops, of 100 soldiers, under the command of Captain J. W. Benschop, returning to duty from leave of absence to this country, and accompanied by the First Lieuts. J. W. E. Schadee van der Does and A. Backer, will leave the recruiting depot at Harderwyk, to embark on the 30th on board the *Argo*, Captain J. Ankringa, for Batavia.

The following two first-class vessels have been chartered by the Trading Company to convey produce from Java, under the usual conditions, to the undermentioned ports:—*China*, Captain A. F. A. Horner, for Amsterdam; *Zuid-Holland*, Captain K. D. Breuning, for Amsterdam.

His Majesty has superseded, at their own requests, Capt. S. Faber Huys, commander of H.M. frigate *Adolf Hertog van Nessau*, with a pension of 1,800f.; and Major of the E.I.A., K. F. van Langen.

His Majesty has been pleased to appoint Capt. O. A. Uhlenbeck, Commander to the *Adolf Hertog van Nassau*; Lieut. J. L. Klynsma to the guardship at Willemsoord, and Lieut. G. J. W. Hoogwinkel to the guardship at Hellevoet.

His Majesty has approved the appointment of Mr. A. Volz as Consul for Baden, at Batavia.

His Majesty's screw-steamer *Coehoorn* is ready to sail for Batavia.

COMMERCIAL.

COFFEE.—The market was very inanimated, waiting for the public sales of the N.T.C. on the 17th July; prices generally ½ to 1c. lower. Since our last report the following lots were sold:—2,000 b. Java, ex West Cappelle at 42¼ to 43c., ca. 540 and 270 b. Java ex Maarten van Rossum at different prices; 1,800 b. triage ex Alida at 32 to 43½c.; 1,600 b. Java ex Dionysia Catharina at 41c., and 1,500 b. do. ex H. Vincent van Paulo at 41½c.

TEA.—Market steady, but without transactions. The stock is very small.

SUGAR.—Raw: Market flat, sellers are not much inclined to operate. Refined: A fair business was done at somewhat lower prices.

RICE.—The market was rather more active. 740 b. Java ex Maarten van Rossum were sold at 8¼f.; 3,725 b. ditto ex ditto, at 8f., 7 and 6f.; 2,078 b. ditto ex Nancy, at 5⅝f.

SPICES.—Without transactions. Cinnamon: With more demand.

BANCA TIN.—1,000 bl. were sold at 61⅜f.; 250 do. at 61¼f.

COTTON.—East Indian with more demand at higher prices.

JAVA TOBACCO.—There are no transactions to report. The market is very dull. Stock 9,982b. Java.

INDIGO.—Steady, prices unaltered.

RATTANS.—With much inquiry; 642b. ex Drie Gerzusters, and 2,860b. ex Alida were sold.

DRUGS.—The different lots Gum Benzoin, imported from Padang, were sold; prices are kept secret.

JUTE.—East India is in demand at 56f.

HIDES.—2,468 p. Padang cow, ex Loopuyt, were sold at prices that did not transpire.

MONEY—Easy. Bank discount 4½ per cent., open market 4¼ per cent., N.W.S. 3½ per cent., 62½; 3 per cent. 73½; 4 per cent 97 3-16, ex London, 3 months 11.68¼f., short 11.94f.; Paris, 3 months 46.30, short 47.10f.

Francke.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, AUGUST 25.

In addition to the text of the treaty between Prussia and Japan—of which I sent you in my last letter an analysis of the contents—the official *Staats Anzeiger*, of Berlin, now publishes the "regulations for carrying on the trade of the Prussians in Japan," referred to in Articles 7 and 10 of the treaty as forming an integral part of the same. They are very voluminous, and similar to those in force with other countries.

The Prussian official *Staats-Anzeiger* publishes the text of the "Treaty of Amity, Navigation, and Trade between Prussia and Japan," signed on the 24th of January, 1861, at Jeddo, by Count von Eulenburg and the Japanese Plenipotentiaries, Muragaki-Awadsi-no-Kami, Takemoto Dsusio-no-Kami, and Kurokawa Satsiu.

Art. 1 states that there shall always be peace and goodwill between the high contracting parties, their heirs and successors, and their respective subjects.

Art. 2 grants Prussia the right to have a resident diplomatic agent at Jeddo, and a consul-general, both of whom shall be at liberty to move about freely in all parts of the Japanese Empire. Consuls may also be appointed in the ports already open or that may in future be opened to foreign trade.

Art. 3 stipulates that the towns and ports of Hakodade, Kanagawa, and Nagasaki shall be opened to Prussian subjects for the purposes of trade from and on the day in which the treaty comes into operation. They may establish themselves permanently at those places, purchase houses, rent lands, and build dwelling-houses and warehouses, but no fortresses or other works of defence, and the competent local Japanese authorities shall have the right from time to time to inspect such buildings whilst in course of construction, alteration, or repair. On the other hand, the natives are prohibited from erecting any obstructive works, or to prevent the Prussians having free access and egress to their dwellings and warehouses. Prussian subjects acquire the right to move freely from Kanagawa to the river Logo, which falls into the Bay of Jeddo, between Kawasaki and Sinagawa, and in all other directions to a distance of ten ri; and from Hakodade in any direction to a like distance of ten ri,—the ri being computed to be 12,456 Prussian feet, or 4,275 English yards, or 3,910 metres. From Nagasaki they may go into the interior of the country to any distance they like.

Art. 4 reserves to the Prussians the full exercise of their religion and religious ceremonies, for which purpose they may erect their own churches and other places of worship.

Art. 5. All differences between Prussians with respect to person or property are to be decided by their own duly constituted authorities. Complaints or claims made by Prussians against natives are to be settled by the Japanese authorities. If a native refuses to pay to a Prussian his just debts, or fraudulently conceals himself to avoid payment, the competent Japanese authorities are bound to pursue him and bring him to justice, and *vice versa*; but neither the Prussian nor Japanese authorities become answerable for the payment of debts contracted by the subjects of either nation.

Art. 6. Prussian subjects accused of crimes committed towards natives or the subjects of any other power are to be tried by Prussian Consular Tribunals and according to the Prussian laws. And Japanese natives accused of crimes towards Prussian subjects shall be tried by their own tribunals and according to the laws of Japan.

Art. 7. All claims for fines and confiscation of property for alleged contravention of the trade regulations appended to this treaty shall be tried before the Prussian Consular Tribunals, and all such fines and confiscations are to be delivered over to the Government of Japan.

Art. 8. Prussian subjects are at liberty to import from Prussia and other countries all goods and merchandise not prohibited by the laws, sell them in Japan, or re-export them on payment only of the duties stipulated in the tariff appended to this treaty. They are also free to purchase from or sell to native merchants direct, and without any intervention on the part of the Japanese officials. All Japanese have the right to purchase goods and commodities from the Prussians, and may keep them, consume them, or sell them again.

Art. 9. Prussian subjects have the right to take natives into their pay and employment.

Art. 10. Provides for the due execution of the trade regulations that form an integral part of the treaty.

Art. 11. Reserves to the Government of Japan the right to take measures to prevent smuggling.

Art. 12. Stipulates that on the arrival of a Prussian trading vessel off one of the open ports the captain may require the use of a pilot, and in like manner when he sails, all the duties and port charges having been previously paid.

Art. 13. Prussian subjects, on paying the duty on goods and merchandise imported by them, are at liberty to require from the Custom-house authorities a certificate of such payment, which shall enable them to trans-ship the same goods to any other open port in Japan without having to pay the duty a second time.

Art. 14. All goods and merchandise imported by Prussian subjects, and on which duty has been paid, may be sent to any other part of Japan without the payment of any other duties, transit-dues, or other charges.

Art. 15. All foreign coined money shall have free circulation in Japan, and shall pass for as much as a similar weight of Japanese money of the same kind. In the mercantile intercourse between Prussians and Japanese either native or Prussian money may be taken in payment. Coin of all descriptions, with the exception of Japanese copper coins and foreign uncoined gold and silver, may be freely exported from Japan.

Art. 16. If the Japanese Custom-house authorities consider the valuations for duty put upon the goods by the Prussian importers too low, they may make their own valuation, and offer to take the goods at that price, which shall in that case be paid for in cash without discount. Should the importers refuse, they are bound to pay duty according to the valuation of the Custom-house officials.

Art. 17. Should a Prussian vessel be wrecked or stranded on the coast of the Empire of Japan, or obliged to seek shelter in any port within the territory belonging to the Tycoon, the native local authorities are bound to render the distressed ship every assistance in their power; the persons on board shall be treated with kindness, and, if required, be supplied with the means of proceeding to the residence of the nearest Prussian Consul.

Art. 18. Provisions and stores of all descriptions for the use of Prussians ship of war may be landed without payment of duty at Kanagawa, Hakodade, and Nagasaki, and warehoused under the care of Prussian officials. Should, however, such provisions or stores be sold to natives or foreigners they are liable to the payment of duty.

Art. 19 stipulates expressly that from and after the day that the treaty comes into operation, the Prussian subject shall enjoy all rights, privileges, and immunities already granted, or that may in future be granted, by the Tycoon of Japan to the subjects of any other nation.

Art. 20. It is agreed that the high contracting parties on the 1st of July, 1872, may propose such alterations or improvements in the treaty as experience may make desirable, one year's previous notice being given of the intention to make fresh proposals on either side.

Art. 21. All official communications from Prussian diplomatic agents or consular authorities to Japanese officials shall be written in the German language; but in order to facilitate intercourse it is provided that during five years from the day the treaty comes into operation such communications shall be accompanied by a translation either in the Dutch or Japanese languages.

Art. 22. The present treaty is made in quadruple in the German, Japanese, and Dutch languages, the Dutch text to be considered the original one.

Art. 23 stipulates that the treaty shall come into operation on the 1st of January, 1863.

The treaty was ratified and the ratifications exchanged at Jeddo on the 21st of January, 1864.

COMMERCIAL.

COFFEE.—The advices from Rio are more favourable than were expected. In spite of the large supplies of the new crop arriving daily in that city, the stocks were reduced by 20,000 bags, owing to the great excess of shipments, whilst the prices had fallen only 100 reis. The result of the Dutch sale is also considered satisfactory here, and gives evidence that the prices in this market have been in exact proportion to the value of Java in Holland. All these circumstances have had the effect of making the prices of all descriptions of coffee exceedingly firm, and in some instances even a shade higher. Purchasers have come forward pretty freely since the departure of the last mail, and bought to the extent of 23,000 bags. Arrivals of the week 16,000 bags.

SUGAR.—The raw article has recovered from the downward tendency it maintained for the last fortnight, and though prices are not higher, the market is firm, and more confidence is felt in the article. The sales comprised 500 chests of Havana, and a few hundred bags of East India. In the refined market there was also a better feeling, and 12,000 loaves were disposed of at the full currency of last week, the business done being exclusively in the higher qualities, inferior descriptions being scarce and, therefore, held for comparatively more money.

RICE.—On the whole this market has been calm, though previous prices are fully supported. Neither in clean nor rough grain have the dealings been above the average amount.

SPICES.—Cassia Lignea is firm, and looking up, but the transactions were only to a moderate extent. Nutmegs and cloves continue in request at last week's advance. Cassia Flores is a trifle lower. Ginger firm. In Pepper and Pimento no alteration to notice.

SPELTER.—Greater activity prevails, and a better feeling exists. Higher prices are paid, and the sales of the week were 20,000 centners, the last price paid being 16 marks and 5 sch. Banco.

SHIPPING.

SAILED.—Marie Wilhelmine, for Hong Kong and Singapore; Antelope, for Hong Kong.

LOADING.—For Singapore and China: Marie Lucie, Turandot. For Singapore: Nordstern. For Macassar and Hong Kong: Chetoo. For Hong Kong and Macao: Ino, Leopold. For Calcutta: Tellus.

LONDON, MONDAY, AUGUST 29, 1864.

OUR PROSPECTS IN JAPAN.

There was once a certain rigid cardinal who did not approve of babies being suckled on the fasting days of the Church. The rule he wished to enforce was not one likely to suit the rising generation, or their mothers. No doubt he attempted to show that it was a wise law, and in accordance with the principles of the Romish faith; no doubt he argued very logically in its favour, and proved to demonstration its fitness and propriety. But the infants loudly protested against his theory, and the mothers found it inexpedient, so there was an end of the matter. The story will serve to point a moral as regards British relations with Japan. The politician writing in his study may endeavour to prove the expediency and justice of a certain course of action; he may show that it would be in accordance with the law of nations, and with the principles which actuate us in our intercourse with European countries; he may aver that the contrary course is unworthy of Englishmen, and in direct contradiction to the political belief we are so anxious to maintain upon the Continent. The simple answer to these and similar remarks is, that however wise and good they may be in themselves, they have no meaning whatever when directed towards Japan. Englishmen in that country must be protected —British rights must be maintained. This is of the first importance, and not until these great ends are achieved, can we afford to talk about international law. Doubtless, at the first blush of the matter, it may appear unseemly that Earl Russell should interfere to prevent the Japanese from raising batteries on their own soil—that two years since he should have proposed mounting cannon on the site of the new Legation building, although an article of the treaty expressly states that "no fortification or place of military strength shall be erected;" and that, according to the last advices, we are not only landing additional troops in the country, but have requested the Government of the Tycoon to provide for them the necessary barrack accommodation. It is certain we could not act in this way towards any European Power, and that we evince a greater respect for the feelings of nations who are blessed with Christian civilisation, and large armies. But it would be absurd, and, indeed, impossible, to show the same consideration for a semi-civilised and wholly Pagan people like the Japanese. No sooner had Sir Rutherford Alcock returned to Japan than he was warned, as he had been so often warned before, that if he proceeded to Yedo he would run the risk of assassination. He went thither, nevertheless, but not without a military escort, and was back at Yokohama two days afterwards. There, too, danger is said to be threatening him, and foreigners generally, from a body of *ronins*, who, doubtless with some ill intent, have quartered themselves in the neighbourhood of the place. The *Japan Herald* states that a feeling of uneasiness prevails; "clouds portending showers are seen in the horizon;" and the arrival of the *Conqueror*, with its battalion of Royal Marines, seems not only to have enlivened Yokohama, but to have relieved the anxieties of its European inhabitants.

Her Majesty's Minister, in his despatch to Major-General Brown, dated Yokohama, May 14, speaks of "future contingencies," and observes that it is impossible to say whether th regiment, or a portion of it, may not be required to enter into active operations away from that place. Couple this with the intelligence that three Dutch men-of-war were daily expected, and the probability, to which we recently alluded, is increased, that Sir Rutherford Alcock proposes to open up the Inland Sea, which has been closed against us by the Prince of Thiosiu. To this enterprise, be it remembered, the Dutch have a far stronger incentive than any which can call us to action. They have to revenge the unprovoked attack on the *Medusa* and the slaughter of a countryman, and to show, as we did recently in the case of Mr. Richardson, that so foul an act must be followed by severe retribution. To punish Thiosiu and his retainers for their treachery may be the duty of Holland, and by Holland let it be accomplished. It is her work, and not ours; and although it may prove of great importance to clear the Straits of Shimonoseki at the same time, it is highly questionable whether it is England's duty to expend blood and treasure on such an enterprise. It is true that the Government of the Tycoon may be glad of our assistance. They will not be averse in this instance to make use of our force; but they are far too knowing, and, indeed, too well-read, not to be aware that the aid of the European in the East generally terminates, more or less, in the subjection of those to whom he has rendered assistance. Our relations with Japan are in the interests of peace, for we are in that country as merchants, and in no other capacity. Sir Rutherford Alcock is aware that his countrymen at home and in Japan are not desirous to promote commerce through the sword. He knows that if commerce cannot be increased by peaceful means Englishmen are contented to bide their time; he knows that the plea for any acts of warfare must be strong indeed to carry with it the assent of the country; and he doubtless recollects the reprimand of Earl Russell more than four years ago, when he was new to the post of British Minister in Japan, and had threatened war without sufficient justification. For these reasons we may hope that the British troops now in Japan will not be called upon to test their metal with the braves of the Prince Thiosiu. To be capable of defending ourselves against an unprovoked attack, it is perhaps well that we should have a British battalion at Yokohama; but since neither the men nor their officers are fond of inglorious sloth, we cannot help fearing lest a speedy opportunity should be found for calling them into action. The peril is one which civilians are too apt to overlook when they ask for the protection of a naval or military force. We know that this has brought on more than half our troubles in China. It is inexperienced and idle to expect that red coats and blue jackets can long remain satisfied with "smoking, reading, and spinning yarns." We hope, therefore, to hear shortly of the retirement of some of this force from Japan, and at the same time we trust it has accomplished by its presence alone the ends which Sir Rutherford had in view.

A TRIP TO HOLLAND.

At this season, when the cares of business are laid aside for the time being, and everybody who can betakes himself to the seaside or to the continent, it is satisfactory for us islanders to have a new route opened for the mainland of Europe, and no doubt equally so to our continental neighbours who wish to visit the "tight little island" whose "institutions are steeped in brine." Such have we found that by way of Harwich and Rotterdam, recently carried out by the enterprising directors and managers of the Great Eastern Railway Company. The sea portion of this route is performed by two new steamboats, of light draught, and accommodation for passengers, something after the American style, so that tourists may enjoy a "sniff of the briny" on a spacious poop deck that commands an elevated prospect. The only drawback to this part of the locomotion is its being done at night, and in defiance of "time and tide," on the shallow waters of "Hollowland;" so that the boat rarely meets the exact hour when she can cross the Brielle bar, and the eight hours' sea voyage is lengthened into ten or twelve. This, however, we understand the company will obviate for the future by instituting a tidal service on the 1st September. This accomplished, the passenger from London will find himself in Rotterdam in thirteen hours. At present the company advertise to effect this, but it can only be done two or three times a month, when all things are favourable. It is a pity that at the commencement of the new route the company professed to perform the voyage at the minimum time, as an hour or two more is of small consequence to holiday *voyageurs;* at least, we thought so when it w

Digitized by Google

accomplished in fifteen by way of Hellevoetsluis. Now, here is the point where the Dutchmen of enterprise should aid the company in carry out the through line to Rotterdam by some better means of transit than the old canal system. Why not have a railway and terminus on the other side, where the steamers could arrive and depart at any time independent of the tide, as at Harwich. We are of opinion that such a sea route and railway would be most profitable, and be a grand link in the chain that should unite Holland with England, in political as well as commercial union, in pleasure as well as business. The fact is, hitherto few Englishmen ever think of taking a trip to Holland for pleasure; and we confess that we were agreeably surprised at all the pleasant places and kindly faces we saw in his Netherlands Majesty's dominions. To the tourist who has "done" France, Germany, Switzerland, and Italy, we would say try Holland, and you will find in it a "spirit of travel" as distinct and refreshing as the national beverage is from cognac and wine.

At the same time that we saw much we admired as characteristic of a free and industrious people, there were many things that showed the sluggishness of the Dutch mind. The whole system of conveyances, from the wheelbarrow to the nobleman's carriage, is behind the age. Such old lumbering hackney coaches are not to be found in any other civilised country; and with the most level roads in the world they have the slowest diligence traffic. The only exception to this is the tramway from the Hague to Scheveningen, where excellent omnibuses are drawn by fine strong horses. But on inquiry we found that these belong to an English company, and the horses and drivers are of London celebrity. Then the hotels are not up to the day. There at Rotterdam, what is called one of the best hotels in the town is a rickety old house, dirty in its apartments, dear in its table, and boorish in its attendance. This was all very well in the days when these places of accommodation were frequented chiefly by skippers and traders in cattle, butter, and cheese; but the tourist, with his wife or lady friends, expect something more congenial in their travels; and we were glad to learn that new hotels were being opened on a better scale, not only in Rotterdam but Amsterdam, where also there is room for improvement in all that provides for the comfort and convenience of strangers visiting the capital of the Netherlands.

Among the wants to the English traveller was the exceeding difficulty of getting a perusal of a newspaper in his own language, or even a respectable "broadsheet" in any tongue. At Amsterdam there are twenty issues from the press of what are dignified by the name of newspapers, but the best of them in our eyes looked a "miserable rag." On inquiry we found that there was a heavy duty upon these journals regulated by dimensions, which had the effect of dwarfing their proportions. Every copy must be stamped, as well as all foreign journals, under heavy penalties. Some idea of the amount levied may be gathered from the fact that the stamp duty on *The Times* is 18 cents. or nearly fourpence English. This amounts virtually to a prohibition on foreign newspapers, and is a tax upon knowledge in the country. It is rather anomalous that a highly educated and liberty-loving nation like Holland should levy such a heavy tax on this medium of intelligence, which it is evident isolates to a great extent the minds of the people, as their peculiar geographical position has isolated them from neighbouring nations. Holland for the Hollanders is thus extended even to the press, and protection afforded to local newspapers that must have the effect of contracting the ideas of the people at large. It is time that these things were reformed, and it was with much gratification we learned that next session in Parliament a Bill would be brought in to abolish the old Act.

FRANCE AND JAPAN.

When Napoleon desired to inflame the ardour of his troops in Egypt, he told them that the ancient world was looking down upon them from the Pyramids. Do the representatives of British force and civilisation in Japan require to be told how France watches them from her Imperial elevation? Or are their plans so well arranged, their action so determined, their forces so complete, that they can afford, like Wellington, to risk a Waterloo, having a safe retreat, and a second battle-ground provided?

But however the case may be, it can do no harm to watch and to listen to what our friends in Paris say about our present position in Japan. The arrival in Japan of the British reinforcements, set down here at 2,500 strong, is, of course, duly announced, and the intended attack on the fortifications of Simonosaki is taken for granted. If the British Admiral should succeed in obtaining possession of these works, "as he hopes to do," say the Imperial journalists, "the English troops will occupy them, and there found an establishment destined, in a few years, to acquire a great importance." The Strait of Simonosaki is described as occupying an admirable position in a rich and fertile country; and its strategic position is considered as being of the highest importance. "Its possession would assure to the English the domination of Japan. These are facts that Europe should not be left ignorant of." The English Admiral, it is said, further expects 2,000 more infantry, and this circumstance sufficiently indicates the policy of the British Government, which is to make another Gibraltar in Japan. They could not have selected a better position for their operations. The Tycoon, it is said, understands the object perfectly well, but, as he is powerless to prevent it, and as the Prince of Nagato is his personal enemy, he lets the English proceed, who, in this case, are about to attack a Prince hostile to Europeans and to all foreigners.

Elsewhere we are told that the Dutch and American Consuls are acting in concert with Sir Rutherford Alcock, and we now hear that, such being the case, "the Minister of France in Japan has not hesitated to give them his *moral aid*." These facts and suggestions are not in harmony with each other. Of England is about to create another Gibraltar in the Straits of Japan, if her force is sufficient to promise a fair chance of success, if the authority of the British Government is likely to replace that of the Daimio of the district, and if the dawn of English domination is about to break upon Japan, how is it that France stands by with folded arms and seems determined to have no finger in the pie? And if she thus avoids burning powder on the occasion, why does she tender us her moral support? There is a riddle somewhere! Is it that France believes the English force in the Japan waters insufficient for the object in view, or is it that the French representative, having little else but moral support to offer, will not play second fiddle—will not bark without being able to bite if occasion offers? Is it that something more than moral support is on its way from France or from Cochin-China? Is it that the arrangements made with the Japanese Ambassadors who have just quitted France are so perfectly satisfactory that Louis Napoleon can calmly await the possibility of England building up her Japanese Gibraltar? Or, lastly, is it that France is a complete convert to Exeter-hall, and does she intend to convert her sword into a ploughshare, or to dissolve it in some diplomatic medium? It must be confessed that the attitude of our ally in this matter is rather difficult of comprehension; but let us hope that the British force is strong enough to do all that is required without assistance from anyone, and that the understanding amongst all the European Powers in Japan is clear and honest.

The Japanese Ambassadors, it appears, took very kindly to French eating and drinking, and have taken back with them six Parisian cooks of great talent—regular *Cordons Bleus*, as the phrase goes here—and a complete kitchen battery, as a collection of pots and pans is called in this capital of barracks and restaurants. The chief cook, the Vattel of this French Embassy to Japan, is said to have been seduced from his throne in one of the Embassy kitchens here by the offer of "a magnificent salary and emoluments."

SILK AND SILKWORMS' EGGS.

There has been much activity exhibited of late in France respecting the supply of silk and of the eggs of the silkworm; but, in spite of the considerable imports of both from China and elsewhere, it is evident that this important commerce does not progress to the extent desired. The *Annales du Commerce*, a publication of authority, says, that certain French silk cultivators had the intention of going to Independent Tartary for silkworms' eggs at the commencement of the present year, but were deterred by the warning of the Department of Commerce, which represented to them the dangers which Europeans ran in Bokhara, where even Russian subjects themselves are not always safe. The parties in question were recommended in preference by the department to try Persia, and the following information has been published on the subject. Silkworms are bred in five provinces of Persia—Meshed, Yezd, Cachan, the Mazenderan, and the Ghilan. The quality of the silk is very unequal; that of the Ghilan is the best: next comes that of Meshed and Yezd, while that of Cachan and of the Mazenderan

Digitized by Google

again is very inferior. The Persian silkworms are said to be managed in the simplest possible manner, and the inference is that they are far more hardy than those bred in the South of France. The silk produced in Ghilan is said to amount to about 450,000 lbs. per annum, and that of Yezd to about 50,000 lbs. The produce of the other districts is doubtfult The yield in the Ghilan is increasing every year, and is expected to become very important indeed. One Swiss and three or four Greek houses are said to have made a great deal of money out of their commerce with that quarter. The *Annales du Commerce* says that the trade in silkworms' eggs is yet but little developed, and it is difficult to account for the neglect into which it has fallen, in spite of many successful experiments that have been made. Many private merchants have started from Constantinople to proceed to Persia, and purchase silkworms' eggs, but on arriving at Tiflis they have generally met with so much discouragement that they have given up the project and returned home. The idea in France is, that it was not the fear of any danger to themselves that turned them back, but the tricks of certain speculators, who were unwilling to see rivals in the market.

From all this it appears that silk and silkworms' eggs are much wanted in France, and that the efforts of the last few years to increase the supply have not been very successful. It is true that the transport of the eggs is beset with certain difficulties; scientific knowledge must be brought to bear upon the packing of the seed or eggs, and on protecting them from the effects of changes in temperature: but none of these affect the import of the silk itself. Perhaps the mercantile community of England will find a way out of all these difficulties; it is a great pity that the looms of Lyons and other places should ask for the raw material of their manufacture in vain.

COCHIN-CHINA.

The following is from a Paris paper:—

Private letters from Saigon to the 30th June announce a fact of great importance. Commandant Aubaret, the French Consul at Bangkok, left on the 15th of that month for Hué, charged to carry out with the Emperor Tu-Duc the arrangements determined on when he left Paris; but a vessel sent to sea after him with his recall revoked his mission. We are assured that the arrangements the Commandant was about to carry out had, as their object, the restitution to the Annamite Government, under certain conditions, of a part of the territory conquered by France, but that the idea has been abandoned, and that France will retain the provinces possessed by her in Lower Cochin-China.

Messrs. Holderness and Chilton launched two vessels built upon Mr. Henry Jordan's plan of longitudinal iron framework with diagonal wooden planking. They are of 500 tons, builders' measurement, intended for the China trade, and have been built for Messrs. Trautman and Co., of Shanghai.

A further shipment of ten-cent silver pieces will be made to Hong Kong, of the value of £7,500, in about a week.

Literature.

Life in Java, with Sketches of the Javanese; by William Barrington d'Almeida. Two Vols. London: Hurst and Blackett.—In his Preface the author complains that previous writers have failed in communicating any adequate idea either of the appearance of the island of Java or of the life of its inhabitants. This deficiency he has endeavoured to supply; and if the void is not perfectly filled up, he has at least produced a work of very great interest, replete with descriptions of scenery, interviews with the native princes, curious notices of the superstitions of the Javanese, and embracing also many of their legendary and traditional histories. The volumes begin with "The traveller's arrival at Batavia from Singapore," and the first two chapters are devoted to the hospitality he met with there, which enables him to lay before us a graphic picture of "Dutch life in the East," with its alternations of lounging, smoking, sleeping and driving. Thence he steams along the coast to Samarang and Sourabaya, returning overland through the very centre of the island, traversing nearly its entire length, up to Buitenzorg. Apart from such accidents as naturally occur in a journey through a country where the roads are not macadamized to a mail-coach nicety, the postal arrangements in Java are so good that the excursion has of itself no incidents by flood or field that deeply arouse our interest. Mrs. d'Almeida accompanied her husband throughout, sharing what mishaps there were, and the occasional uncertainty of a dinner or bed, with excellent spirit and good humour. Strange to say, considering the route contemplated, the author informs us that he was ignorant of the Dutch language—a point, however, not of so much importance, as he spoke Malay readily, and the rulers of Java, with characteristic caution, are, it seems, very shy of teaching their subjects the language they themselves use. In his own case a knowledge of French sufficed to carry him on. Without some proficiency in that language, he says, travelling in Java would be very difficult, as few Dutch gentlemen in the interior understand English, though the greater number speak French fluently. The Dutch authorities appear, and with good reason, to have entertained no jealousy of introducing Mr. d'Almeida to the various native Regents, who are for the most part descendants of the old Javanese Royal houses. One point which strikes the reader as very singular is, that at these interviews some of the female portions of the Regent's or Prince's family generally formed part of the company—a practice utterly opposed to our notions of Mahometan and Oriental ideas of propriety. We know so little of the way in which His Netherlands Majesty deals with the once powerful sovereigns of his vast Indian possessions that we cannot extract anything from these volumes of greater novelty than a sketch of their general position as portrayed in that of

THE PRESENT EMPEROR OF JAVA.

The Susuhunan, whose person is held sacred by his subjects, dwells in the Kraton, which I subsequently visited. The Dutch give him the title of Kaiser, and to Englishmen in the East he is known as the Emperor of Java. In fact, both he and his neighbour are spoken of as independent Princes; but all who visit the Vorsten Landen must know well that the movements of these two Sovereigns are as rigorously guarded as those of the dissolute ex-King of Oude at Calcutta. The only real independence they now possess is in the management of their own affairs of state, and the power of letting the lands under their dominion to Europeans or Chinamen for cultivation, without enforcing the third of the produce from them. The Susuhunan and the Princes who hold landed property have cavalry and infantry of their own—a kind of landwehr or militia, subject to regulation, discipline, and equipment like that of the Dutch army; each regiment having besides those officers appointed by the Princes themselves a Dutch major, captain, and ensign. So far as we could see and learn, these native sovereigns are perfectly content with their position. The titles, rank, and orders which from time to time the King of Holland confers upon them are regarded as marks of honour, which they receive with gratification. They are, however, given to petty jealousies and rivalries among themselves, and probably, if left to their own guidance might prove the truth of the saying that "he may take who has the power, and he may keep who can." . . . Simple and inexperienced as are the habits of the old Susuhunan, his exchequer has been so low of late that he has been constrained in many instances to borrow. In fact, matters had arrived at such a pitch before I left, that the tradespeople would neither sell nor give credit for anything demanded by the members of the Imperial court without a written order from the Resident. The Susuhunan generally drives through the Kraton once or twice every day in a shabby yellow car, the shape of a boat, with poles at the four corners supporting a leathern canopy. His ministers, and not unfrequently his daughters and grandchildren, accompany him, apparently more content in this simple turn-out than in his grand state-carriages, phætons, or broughams, of which he has no less than *one hundred and fifty*. He is so much a state prisoner that he cannot drive beyond the Kraton without acquainting the Resident with his intention, and reporting on his return the places he has been to.

A little further on we are treated to a striking anecdote that impresses one with a wonderful idea of

THE ASTUTE POLICY OF THE DUTCH.

Between the seventh station and Djokdja we passed Gavan, the country retreat of the Sultan, which, until six years ago, was the annual place of interview between him and his elder brother the Susuhunan. They came in great pomp and state, and, following an old-established custom, the younger Sovereign sat on the ground, and after a short preliminary ceremonial had been gone through, approached the throne without his sandals, knelt, and paid homage or "hormaht" to the object of adoration. As these interviews drew a large number of people together, the Dutch thought it expedient to discontinue them; but in order to reconcile the Sultan to this, they represented to him that so long as a prince rendered homage to another, neither he nor his subjects could be considered by Europeans truly independent. On the next occasion the ceremony was discontinued. On the day appointed the Susuhunan was surprised to find the Sultan, contrary to all precedent, dressed in military uniform, and seated on a chair next to his throne, from which he neither seemed inclined to move, nor indicated the slightest intention of repeating what he now regarded as most humiliating to one of his dignity. Although the superior Prince at first felt insulted before the eyes of his people, he soon wisely reconciled himself to the necessary change, and entered into conversation with those near him as if nothing to trouble him had occurred. The friendly meetings of the two Sovereigns, what had been looked forward to each year by the subjects as a day of rejoicing and pleasure, were thus brought to an end.

Mr. d'Almeida must have a penchant for visiting volcanoes, for his narrative contains accounts of a series of ascents embracing almost every one throughout the whole mountain range

Digitized by Google

of central Java. His introductions to the native princes put him in the way of seeing and even obtaining things that were rare to the Javanese themselves; so that at Bandong the whole population, chiefs and all, surrounded his carriage to see the two white turtles obtained from a tank in a deserted kraton of one of the old Sultans, where alone they are to be found, and are held in great veneration. Our traveller misses, too, no opportunity of inspecting the wondrous ruins of the shrines and images of the Buddhist faith with which the interior abounds. In connection with such an excursion he drops a hint which may come serviceably to the knowledge of those residents at St. Helena who have been literally eaten out of house and home by the pest mentioned. On his way to the Temple of Solomanglain, he says:—

Our path now lay between wild trees and shrubs. One of these, the Jarah, has a berry from which the natives extract a mynha or oil. This oil is used medicinally, and is also rubbed over the woodwork of houses, for the purpose of protecting it from the destructive White Ants, to which its strong scent acts as a powerful resistant.

We must dismiss the volumes with our hearty praise for the simple unadorned style in which Mr. d'Almeida tells us the strange scenes and stories he saw and heard. The book possesses all the charm of light pleasant reading, combined with an amount of novel information such as we seldom find in unison.

Mémoires sur La Chine: Histoire; par le Comte D'Escayrac de Lauture. Paris: Librairie du Magasin Pittoresque.—In April last we noticed the first section of this deeply interesting work, which, it will be remembered, was intended as an introduction to the entire volume. By a graphic description of the campaign of Peking, and of the author's own adventures when treacherously taken prisoner by the Chinese, the reader learnt that the pages before him were the production of a man who had himself visited the distant countries treated of, and had qualified himself for his travels by a long and severe study of their language and literature. In the former *brochure* the Count de Lauture's opinions on the future of China, and on the policy of France in reference thereto, were clearly and convincingly stated, under the title of "The Chinese Question;" and they possessed a piquancy and truth that could not but engage the public favour and attention for the subsequent instalments of the "Mémoires." This second portion is dedicated to "History," and the manner in which the Count treats his theme will be seen by the titles of the various chapters, which are as follows:—Preliminary Notice; Historical Elements; Chronology; Ancient Period; Middle; Modern; Ancient Monies; History of the Soil. As to the way in which the author has acquitted himself of the task he undertook, we need only say that he has thoroughly carried out the spirit that dictated the concluding lines of his Preliminary Notice—

I shall not enter into endless details that may be found elsewhere, and which present little interest. History is not a catalogue; the further it advances the more it gets rid of useless baggage. No man would now care to know who was the nurse of Hecuba. Even the history of the Romans, according to the profound thinking of Mommsen, becomes almost impersonal. Let us look behind the Royal trappings in which Time loves to muffle himself for the life of the peoples and the law of that life: the only true and only useful history—that alone worthy of our meditation, which is a portion of philosophy and the hand-light of policy.

Count de Lauture is no believer in the long series of civilisation and settled government so often claimed for the Chinese. "It seems to me," he says, "that the most ancient States of which we have any knowledge were founded about twenty-five centuries before our era, and that whatever may be the antiquity of man, civilisation does not reckon more than forty-five centuries at this very day. There is nothing to induce the belief that the Chinese monarchy counts more days than those of Chaldæa or Egypt. If, indeed, we take for demonstrated the alleged absence of the astronomical proofs so long alleged, we shall be brought to regard the foundation of the Chinese State as posterior to that of the two others." China, in fact, like every other country, has its prehistoric period, and the error or humbug has been in receiving or boasting as authentic a long list of monarchs, who rest on no better foundation than the descent of King Lud from Brutus of Troy, or that of Francis I. from Priam. Count de Lauture is a scholar, a philosopher, and a satirist, as the following pithy observations will show:—

Half of the histories current in the world are no truer; only, criticism has not yet passed sentence on them. Our own days have beheld the History of Egypt by Ouranios spring up out of a long oblivion, and the learned world was near giving credit to that pretended monument of the past. It may be that the books found in China were, like that, but a year and a-half old when discovered. Under the head of hypothesis a further range is taken. Priam is left behind. We have done with the Trojans—our business is with the Aryans. We know where they lived, how they were divided; and their route to India and to Europe is traced step by step, after a much clearer fashion than the itinerary of pious Æneas, or that of wise Ulysses in search of the Isle of the Blessed. And thus does science amuse herself, knowing that Voltaire is dead.

The truth is, says our author, the most ancient document as to Chinese history is a book entitled "Shoo-king," written or compiled by Confucius, which book is nearly contemporaneous with Herodotus, four centuries younger than the Iliad, and ten centuries younger than the Bible. When this work is found treating of events fifteen centuries prior to its date, little reliance can be placed on it, for the Chinese historians relate that three centuries before our era all the sacred books were destroyed, so that not even one single copy remained entire; that one alone, more or less defective, was discovered hidden in a wall, and was rendered complete from the recollection of an old man who knew the book by heart.

We must not dismiss this portion of the "Mémoires sur La Chine" without noting that it is illustrated by numerous engraved chronological scales, which enable the reader to compare the Chinese era of each dynasty with that of Europe; and also by a number of small maps, showing the extent of the empire and the provinces into which it was divided at every important epoch in its history. There are also engravings of the coinage of certain of the Emperors, a fac-simile of Mantchoo life after a Chinese picture, and a remarkable portrait of the celebrated Emperor Kang-shi (died A.D. 1723), whose handsome, open, and intelligent physiognomy, observes M. de Lauture, in no degree recalls the ridiculous assemblage of features designated as the Tartar type. Altogether, the author must be congratulated on the way in which he has completed this second portion of his labours, and the public will have, we are certain, reason to rejoice, at the termination of the whole, in the possession of a volume full of the instructive and the curious, as distinguished from the odd and the extravagant, sufficiently minute in every detail, and yet avoiding even the suspicion of tediousness.

OUR TRADE WITH JAPAN.

The following is the report of Mr. Consul Winchester from Yokohama for the year 1863:—

In 1862 there was an increase of 35 ships, of 15,609 tons, and in 1863 an increase of 48 ships, of 17,746 tons.

There was an increase under the American flag of—Entries, 5 ships, and 3,341 tons; of clearances, 9 ships, of 4,256 tons in 1863 over 1862.

The Dutch entries give the same number of vessels, and an increase of 162 tons for 1863. The clearances show an increase of 6 vessels, and 1,482 tons.

The French entries and clearances in 1863 are augmented by 3 ships, of 1,492 tons.

The Prussian shipping was represented in 1862 by [illegible] tons, the treaty commerce of that Power having only commenced on the 1st January, 1863.

The Russian flag is the only one which gives a decrease for 1863, viz., 1 vessel of 260 tons.

The principal feature of interest in the shipping is the increase in the direct British trade, represented in 1863 by 6 entries and 15 clearances, against 2 entries and 6 clearances in 1862. This increase has been the result of the rapid growth of the cotton trade, and will continue so long as the inducements to export that important staple exist as at present. This advance can hardly, therefore, be expected to be permanent.

The imports, valued at §1,595,170, give England four-fifths of the whole, and exports in fully the same proportion.

The total value of the trade in goods reaches the very considerable figure of £3,449,649. The following statement marks the balance of trade between Japan and foreign countries:—

Import side in 1863.

Imports	£811,146
Sale of British Steamers	175.000
Peking gold bars	225,351
Balance in silver bullion and dollars, and munitions of war	1,427,006
	£2,638,503

Export side in 1863.

Exports	£2,638,503

Leaving a balance of trade in favour of Japan of £1,652,357 paid for in gold and silver bullion and dollars, and munitions of war.

The coincidence of the early months of 1863, with the terminal half of the largest commercial season ever known in Japan has most perceptibly contributed to leave the year much in advance of those which preceded it. In spite of the falling off witnessed in the later months, the figures show on every item—shipping, exports, and imports—a notable increase.

That this should have been the case during a period in which Japan was convulsed by political disturbances, and the very existence of foreign commerce was keenly disputed between the principal parties who rule the country, is in itself a fact calculated to excite both astonishment and satisfaction. The crisis through which we have passed, including the menace of foreign, and the actual occurrence of civil war, would in many countries have sufficed to check trade altogether for the time. Here, however, we have found, as in China, though under different conditions, that hostilities or strife existing in one district do not immediately affect relations of commerce with the rest of the country.

Digitized by Google

It could not be doubted by any one who during last summer contemplated the scene around him, that foreign commerce had struck deep roots, and was acquiring influence, when, from day to day, under the contingency—which must have appeared to the Japaneses almost menace—of an attack from the most powerful squadron ever seen in these seas, he witnessed advantage taken of every pause hurriedly to conclude large and important transactions. So considerable was the number and importance of these, up to the end of July, as to lead to the conclusion that the agents of the Princes, entrusted with the sale of the produce of their districts, took a keen advantage of the pressure we were bringing to bear on the Tycoon's party, to bring forward large stocks for sale under arrangements far more liberal than those usually enforced by the Government. Hence, when the pressure was removed, the determined efforts of the Government to prevent the conveyance of silk to Yokohama through any other channel than the established guilds at Yedo. It resolved to make a stand to levy the old, or rather increased, rates on this and other valuable staples, conscious that if the authority to do so slipped through its fingers, the principal source of its profits in the foreign trade was gone. To effect this the artifices usual to Japanese policy were called into play.

The Princes of the non-silk-producing districts were informed that the restrictions were imposed with a view to keep down the price of the fibre from which the garments of the privileged classes are fabricated, while at the same time they were encouraged to share in the exceptional profits disclosed by the sudden expansion in the export of cotton, an article grown in almost every district. Those who have most narrowly watched the progress of our intercourse with this country have long suspected that much of the antagonism to foreign countries, attributed by the Tycoon to the semi-independent Princes, was factitious rather than real; that foreign trade as between the two parties was a struggle—on the Tycoon's side, to open the door leading to the outer world, of which he was lucky enough in his representative capacity, according to the traditions and established institutions of Japan, to possess the key, at the highest price—on the side of the Daimios, to get cheaply through the carrier, and part with as little as possible of their profits. The statements of Satsuma's agent, both to Colonel Neale and others with whom they entertained business proposals, as well as other facts which have cropped up incidentally, leave no doubt that such is the true state of affairs.

I advert to some of those briefly. The detention and turning back of raw silk landed at Yokohama from seaward, the demand from the Gorogio that Japanese should be prohibited from shipping in or taking passages in foreign vessels, the almost instant effect of the statement in Colonel Neale despatch that there was nothing in the treaties prohibitive of direct commercial relations with the Princes, the credibly reported storage at Osaca of 15,000 packages of silk, so fine in quality that it cannot be worked profitably in the native looms. But while I am of opinion that the influence the Tycoonate is *at present* exerted to restrict for its own profit the trade which the Daimios for theirs are anxious to enlarge, I am desirous that it should not be supposed that I am insensible to the general value of the controlling influence exercised by the Tycoonate. Without it we could assuredly find the difficulties arising out of the antagonism of the individual feudal chiefs—if not insuperable, perplexing and entangling to a degree which past experience hardly enables us to realize.

Here, in the immediate neighbourhood of the Tycoon's military capital, we are not in the most favourable position for exercising the maximum of influence on the conflicting interests concerned in commerce. The imposition of such restrictions is easy enough at the seat of the Power [illegible] the feudal chiefs have only appeared to do homage; while at Osaca, the natural emporium of the whole country from its central position, where commerce has acquired traditionary rights, the Government of the Tycoon would hesitate to infringe the rights of the Daimios to bring forward their produce.

With all these discouragements, heightened by the general conservative impression which gives a colour to Japanese thought, even while it fails to influence the acts of men of power and authority, namely, that, after all, Japan was happier in its seclusion, as being less exposed to danger, the wonder is that the progress of trade has been so great. An instructive illustration of these comments will be found in a document published in the *Japan Commercial News* of the 9th inst., entitled "Views and Opinions of Matzdaira Shirugaka," the retired Prince of Etzizen, who has long been known to us as one of the most prudent and enlightened supporters of foreign intercourse in Japan. The occurrences of the past year, by the lessons which they must have taught, are likely to favour the spread of such opinions. The increase of shipping is partly due to speculative causes connected with the sale of steam vessels to the Government and Princes, and partly to the increased trade in an article so bulky as cotton. The following are the rates at which vessels have found employment:—Freights to London have varied from £4 to £7 sterling per ton according to the description of goods, the charges on cotton, tea, and silk, representing an ascending scale between these limits. The freights to Hong Kong have varied from $6 to $9 per ton, and to Shanghai from $3 to $6. These are rates which must have afforded good remunerative employment to shipping in general. Before dismissing the subject of shipping it may be remarked that the port, from the anchorage being on the lee side of an extensive bay, during the greater part of the year does not present the same facilities for the repair of shipping as Nagasaki. It is proposed to supply this defect by a floating dock, for which purpose a company is proposed to be formed. The Import Tables show a steady increase in all articles, with the exception of metals. The taste for articles of foreign manufacture is no doubt gradually strengthening. The large export of cotton is not unlikely to be attended with an increase hereafter in the supply of cotton fabrics from Europe. On the whole, this side of the account, though not exhibited, or perhaps susceptible of the rapid advances made in exports, may be considered as satisfactory. The steam vessels sold during the year may be fairly included among the imports, as also the very considerable sums which have been expended in the purchase of guns, firearms, and munitions of war. The ships bought have been merchant steam vessels, two of them known in this quarter of the world as models for speed. None of them, however, can be considered as capable of effective adaptation to warlike purposes.

The following are the names of the steamers sold in 1863:—

	Tons.
Shanghai	412
Leemin	181
City of Hankow	241
Lyeemoon	369
Yangtze	345

It is impossible to obtain any accurate account of the value of arms and warlike stores, it being an object with the Government to throw a veil over such transactions. That it was considerable there can be little doubt, for it is a principal object of ambition, both with the Tycoon and Princes, to increase their means of offence and defence.

Raw Silk.—The amount exported in 1863 exceeds that of the previous year by 3,937 piculs. Had the trade in this article not been checked during the latter six months by the interference of Government, there can be little doubt but that the increase would have been much more considerable. The commercial season, which dates from July, 1863, shows a diminished export, up to this time, of nearly 3,000 bales, against the same dates of the previous season. The only remark made as to the new silk was that it bore signs of having been reeled off less carefully than in former years—a fact which was not without reason ascribed to the desire to hurry forward produce, consequent on the high prices it then commanded. Some parcels of "ova" have been shipped under special permits from the Custom-house, in accordance with a promise given by the first European Embassy, but the prohibition against the shipment of cocoons still continues in force. It seems to be the general opinion that a very considerable portion of the raw silk supply (and the finest in quality) of the season, intended for the foreigner purchaser, still remains in store ready to be brought forward when the obstacles presented by the restrictive action of the Government are surmounted.

Tea.—The export of tea in 1862 was 41,245 piculs, in 1863, 45,098. The latter sum represents in round numbers 6,013,067 lbs. avoirdupois. Recently considerable facilities have been given for the preparation of tea for the foreign market in the abandonment of the claim for duties on certain imported articles employed in its firing and packing. A fair narrative of the tea and silk market, since the commencement of the present season, is contained in a commercial article in the *Japan Herald* of the 12th inst.

Cotton.—The most remarkable feature in the exports, however, is the sudden development of the trade in cotton, which, from 4,616 piculs in 1862, reached in the past year 46,697 piculs. Such a fact is alone sufficient to prove that the Japanese are quite alive to the advantages of foreign trade. Up to the day on which I write, the export continues to increase, the first two months of the year 1864 exhibiting an export of at least 30,000 piculs. No dependence can, however, be placed on the permanence of trade in this article, stimulated as it has been by the enormous value which the blockade of the Southern States has produced. Still the rapidity with which so considerable a quantity of a staple largely used by the people for their own garments has been brought to market, is in itself no mean proof of the wonderful fertility and resources of the country. I have no doubt an impulse has been given to cotton cultivation all over Japan, which will bear its fruit in future seasons, when the present inducements to export have ceased—in cheapening the dress of the poorer classes, and thus proving a permanent benefit to the country.

Before closing this part of my subject it is satisfactory to state that at the commencement of the current Japanese year, some fruit, though tardy, appeared as the result of the first mission to Europe in the reduction of duties on wines, glass ware, fancy articles, iron, &c., &c. The promise made by the envoys that the produce of the Daimios should come freely to market remains unfulfilled. Its accomplishment must be looked for rather as a result of the general strengthening of the commercial element than of any special engagement. The tariff is so moderate, and administered with so much liberality, as to leave little to be desired in the way of change, so far as principle is concerned. I should be glad to see the duties on imports limited to the one rate of 5 per cent., as is the case with exports. At the same time, in the interests of our own trade, it should be admitted that the Japanese are entitled to the full amount of duty authorized by the tariff.

The rate of exchange has been tolerably steady, considering the unsettled condition of political affairs, ranging from 4s. 10d. to 5s. 4d., and giving an average of about 5s. for the sight value of the dollar over the whole year. On the subject of the Japanese currency, as affecting and affected by the foreign trade, the relative rate between ichibus and dollars has remained, at Yokohama, pretty closely at what I have been led to believe is the natural level due to the preference, which, in a country like Japan, a preferred currency will secure. The extreme limits have been $100, $230, $250; but the general average has been from $236 to $242. This I consider to be mainly due to the large circulation of native coin involved in the presence of the large foreign squadron at anchor in the bay.

During the year 1863 the number of residents was very considerably increased. Four or five additional firms have commenced business, numerous large and comfortable houses have been built, and the locality known as the swamp is being rapidly covered with tenements of a humbler and less expensive character. An hospital was opened in April which has been eminently useful both to naval and merchant shipping and to other classes of the community. This excellent institution was commenced as an experiment, under the superintendence of my Prussian colleague as chairman, aided by Mr. E. Loureiro and Mr. Flowers, the Portuguese and British Vice-consuls, and has been almost self-supporting. The Japanese have with great liberality consented to find a lot for a permanent building in the neighbourhood of the Dutch Consulate-General, a promise to which they have doubtless been led by the kindness and attention shown to many Japanese who have received medical treatment in the establishment. Much of the success of the hospital is due to the skill and attention of the medical attendant, Mr. Jenkins, formerly the surgeon of our Legation. The year 1863 witnessed the opening of the British Episcopal Church, the first Protestant place of worship in this quarter of Japan. There has been a considerable increase in the number of permanent residents, who now amount to be about 300 foreigners of all nations (soldiers not included). Of this number 140 are subjects of Her Majesty, about 80 Americans, 40 Dutch, and the rest Prussians, French, Por-

Digitized by Google

tuguese, and Swiss. There are about thirty-two commercial firms of the higher class, divided as follows:—

English	16
American	5
Prussian	5
Dutch	4
French	2
	—32

There are five large store-keepers, and two provisioning establishments, and, I regret to say, too many spirit shops and taverns. The increase in the population of Yokohama must have been very considerable during the past year, which has been one of all but uninterrupted building. These works have attracted numerous artizans belonging to the trades connected with building. The presence of a large squadron afloat, manned by 2,000 men, and of the numerous French and English guards, varying in strength from 300 to 500 men, have led to a most appreciable and marked rise in the cost of living. From being one of the cheapest places in the East, it has become only second to Shanghai in expensiveness. The supply of cattle attainable in a country not pastoral is becoming exhausted. The animals are procurable only at rates increasing every month, and are lean and ill-fed. Poultry and game have, under the increased demand, doubled in price. Oil, sugar, rice, and other articles have been influenced by the usual relations of a brisk demand and limited supply. This scarcity is, let us hope, not permanent, as the prices obtained are likely to stimulate both breeding and production.

The extension of the settlement has been accompanied by some of the disputes and difficulties incidental to sudden increase in centres of population not effectively met by police arrangements. I have throughout been anxious to encourage the residents to take the lead in such matters, being conscious that the necessity for such steps must be first recognized by the community, before any useful action can be initiated from above. This stage has at last been reached, and a committee has been formed to superintend the disbursement of a voluntary assessment. I hope this body may prove the germ of an effective municipal council.

The following memorandum of the ground rentals paid for the year 1862 gives the latest division yet attainable of real property between the subjects of the several treaty Powers:—

English		$10,255 40
American	$2,843 08	
Dutch	2,549 81	
French	1,736 19	
Prussian	422 91	
		7,551 99
		$17,807 89

The rise in the value of real estate was very great during the year 1863, in spite of all the elements of political trouble which manifested themselves. House rents doubled, and lots without buildings—when situated in favourable quarters—were sold for about $8,000. Even in those parts of the concession least suited to commercial purposes, building lots have commanded an average premium of $3,000.

The lapse of years has not been without its effects in improving the tone and standing of the foreign community. The pioneers of foreign trade, whose notions of commercial enterprise were moulded on the glorious times which witnessed the export of cobangs, have [illegible] to enjoy elsewhere any remnant of their strangely won gains, and though there is still a plentiful amount of irritation and discontent—the sure heritage of such a sacred thirst for gold as the events of 1859 and 1860 created—it manifests itself in less offensive forms.

Yokohama, January, 1864.

The following is the report from Mr. Consul Vyse, Hakodadi, for 1863:—

Shipping and Navigation.—To insure the safety of foreign shipping, when entering and leaving this bay, it is most essential that a survey of the harbour of Hakodate should be made, which, up to the present time, does not exist, and the buoys correctly placed upon the two or three dangerous banks, which are the cause of frequent disasters, owing to the locality being imperfectly known to master mariners, as well as the current setting a ship very often right on to them. The formation of the land at the entrance of the harbour is well adopted for a lighthouse, which is also most necessary, could the Japanese Government be induced to erect one, materials for which they already possess, having received them some short time past from the Russian Government. During the greater part of the year the arrivals of foreign ships at this port are but few, attributed to the inclemency of the climate, the violence of the winds, the thickness of the weather, and the force of the currents. It is with a view of obviating these impediments that I have to bring to your favourable consideration the expediency of opening another port on the west coast of the island of Niphon, in order that vessels may avoid passing through the dangerous Straits of Tsugar. There is a Government dockyard at this port, but no operations are carried on except in repairing two small schooners, but certainly nothing that can come under the category of shipbuilding.

Trade and Commerce.—The principal exports are seaweed, timber, potatoes, tobacco, awabe, deerskin, deers' horns, fish oil, and, occasionally, a few bales of silk. Copper, of which there must be an abundance, is a monopoly of the Government, and no native merchant is permitted to sell it. The quality is remarkably fine, but the price placed upon it by Government, viz., 48 dollars per picul, renders it impossible for the foreign merchant to invest, inasmuch as the best English copper could be brought to this port for 28 dollars per picul, and then leave a very handsome profit.

The aforesaid articles are, for the most part, adapted only for the China markets, with the exception, perhaps, of a little tobacco and oil, which have been exported to Europe. Silk and tea would be brought to this port from the Island of Niphon, but the passage across to Yesso is too dangerous for junks to attempt, and the duty imposed by the Government for its importation to Hakodate renders it unprofitable for the buyer as well as the seller; the result of which is the grower will not risk his produce, although, owing to the disturbed state of Japan, he knows he is unable to arrive at Yokohama with his silk. Several instances have lately occurred in which silk, from the Princes of Nambu and Shendai, destined for that port was stopped on the road, and has now been offered for sale here provided the foreigner will send his own vessel to Niphon to take delivery of the same. Again, another reason why I would respectfully request you to bring the question to the notice of Her Majesty's Government—viz., the expediency of opening another port on the west coast of the Island of Niphon. I am further led to believe the commercial relations of this port, blended with the political incidents and scenes of outage during the past year throughout Japan, have tended to engender a feeling of discouragement respecting the supposed want of success which has attended the trade carried on here by foreigners. The monopolies encouraged by the Government, and carried out, certainly, to some extent, by the Custom-house officials, have doubtless favoured these impressions. I have deemed it, therefore, very desirable to arrive at a positive knowledge of the exact position of British and foreign trade in general at this port during the past year. And with this view I issued a circular calling for the expression of opinion on the part of British merchants established here in respect to the actual condition of trade. This circular, of which a copy is also inclosed, has been responded to by letters from two out of the three British resident merchants. I have the honour to call your attention to the considerable diminution in the imports, which are quite insignificant. There is a small increase in the exports over the corresponding return of the year 1862.

The general character of complaints set forth in the merchants' letters relate to currency, credit, non-fulfilment of contracts, and the interference of the Custom-house with the free action of trade. The internal trade of the island of Yesso, however, is not very extensive, and a variety of regulations are in force, the object of which is to protect and encourage home industry. The prices of goods are not enhanced by imports of any kind, and communication between the great markets and all parts of the empire by numerous coasting vessels. Accounts are also published, from time to time, of the general state of trade and agriculture, and of the prices current for the chief articles of traffic at the trading towns of Yedo, Miaco, Osaca, Simonosaki, Sanga, Kokoura, Nagasaki, Tosa, and Matsmai.

An edict, published in 1637, and still in force, makes it a capital offence for the natives of Yesso to travel into other countries, and their seamen, even when accidentally cast on foreign shores, are, on their return, subjected to a rigorous examination, and sometimes tedious imprisonment, to purify them from the supposed pollution contracted abroad; and I have reason to believe that this law does not confine itself to Yesso only, but applies to the whole of Japan. The laws of Hakodadi are severe, vindictive, and sanguinary. Fines are seldom imposed; banishment to the mines, imprisonment, torture, death by decapitation, poison, and impaling on a cross, are the ordinary penalties of crime, the shades of which are little distinguished. It frequently happens, also, that the Courts visit with punishment not only the delinquents themselves, but their relatives and dependents, and even strangers who have accidentally been spectators of their crimes. The prisons are gloomy and horrid abodes, containing places for torture and private executions, besides numerous cells for solitary confinement. The police is extremely strict for the maintenance of order, the punishment of delinquents, and the registration of births, deaths, and marriages.

Agriculture.—The information that I am able to furnish is but little. [illegible] displayed in this line. The [illegible] prevents any great enterprise being with other parts of Japan, is very limited, buckwheat, hay, turnips, carrots, and onions being the chief productions. Rice is not able to be cultivated on account of the severity of the climate.

Population and Industries.—There is one lead mine in my district, at a distance of 12 miles from Hakodadi, but, from the imperfect manner in which it is worked, the Japanese Government lose more than they gain, half of what is dug up being washed away when undergoing the process of purification. The labourers of this establishment are, as I am informed, convicts. There are one or two foundries in the town, where they have made, during the past year, it is reported, about fifty pieces of brass ordnance, consisting chiefly of twelve-inch mortars; shells are likewise cast at the same foundry in large numbers. The principal occupations during the few summer months in this climate, of the natives, is felling timber to be converted into charcoal, besides that of fishing and collecting sea-weed. The population of Hakodate is exceedingly variable, the town having so rapidly increased that it is almost impossible to arrive at any correct estimation.

Public Works.—None, with the exception of two forts, plans of which I have the honour to enclose. The larger one of the two has been, I am told, in course of construction for the last three or four years, and is now far from completion. In the centre is a large building destined to be the future residence of the Governor. The smaller fort is situated at the entrance of the harbour, and is being completed under the supervision and direction of a Russian naval officer, attached to the Consulate. This fort, when finished, will mount twenty-four guns, which were presented to the Japanese by the Russian Government, once the armament of the Russian frigate *Diana*, lost some years past off Simoda.

General Remarks.—The interference of the Tycoon Government with regard to foreign trade is too apparent at this port, from the fact that no Japanese can enter Hakodadi, or have commercial intercourse with any foreigner, without the permission sought and obtained from the officials, who take note of any goods he may bring, or any business he transacts, and then claim an exorbitant per centage or squeeze, which is not only in the greatest possible degree detrimental to trade, but the severest check possible to its fair and natural development; but such is the fear of the lower classes for the officials, that they dare not come forward as witnesses to prove this, though the fact is well known to the residents here. The following is an instance:—M. Gaertner, representative of a Prussian firm called Messrs. Kniffles and Co., entered into a contract to purchase silk from some Namba merchants, who had come over to Hakodadi for the purpose of trade. The terms of the contract were 5,000 Mexican dollars in advance; but as security for this sum advanced, should the contract not be fulfilled, M. Gaertner required two Hakodadi merchants to enter into bonds for that amount, which was accordingly done by giving

Digitized by Google

him a lien on their property. The contract was then taken to the Custom-house and shown to the officials, who became indignant that it had been made without their interference. One officer, named Shirotoru, sent for the merchants in question, and informed them that unless they gave him 1,000 cobangs, he would stop the contract and report them to the Governor for having given a foreigner security upon their land and houses, which, he said, was a disgrace for any Japanese to have done. Some other facts have lately come under my notice which convinced me that many of the reports spread about the generality of Daimios being inveterately opposed to foreigners are erroneous, and are set on foot by the Government for the express purpose of preventing any possible intercourse with them, and guarding the more jealously the monopoly of foreign trade which the Tycoon enjoys, to the detriment of these independent Princes, who are most anxious to have a share in it, and which would be immeasurably increased were it thrown open to all alike. The agent of one of these Princes came, not many months ago, to Hakodadi, and stated that his master was anxious to trade with foreigners, but did not know how he could manage to communicate with them, as, if the Government officials were to know anything about it, he would get into trouble—notwithstanding an officer himself of high rank, with considerable powers from his Prince who sent him; he was, therefore, at last compelled to leave Hakodadi without having fulfilled his mission. These instances are, of themselves, sufficient to show how extremely jealous the Tycoon Government is of foreigners coming in contact with any of the independent princes, and their only motive can be to keep for their own benefit the monopoly they at present enjoy. I do not feel at liberty to mention the names of any of those from whom I have learnt these facts, as by so doing I might cause trouble to them; but were it necessary, I might go on enumerating many more instances where the interference of the Government is prejudicial to the natural development of trade. I might also touch upon many other points not only to prove the continual interference of Government with trade, but also to show that they are ever ready with some plausible excuse to evade carrying out their part of the agreement, whilst foreigners are obliged to carry out theirs to the letter, which quite proves that their system is a bad one, and one which can never benefit commerce.

Hakodadi, Jan. 1, 1864.

MR. CONSUL VYSE TO MESSRS. PORTER, DENIS, AND BLAKISTON, OF HAKODADI.

BRITISH CONSULATE, HAKODADI, Jan. 1, 1864.

Gentlemen,—I have the honour to communicate with you, as members of the British mercantile community established at this port, for the purpose of eliciting the expression of your views in writing, respecting the workings of foreign trade at present conducted under the surveillance of the Japanese Government, and especially under that of the Custom-house authorities. The object of this inquiry on my part is to ascertain the real situation of British trade as derived from the practical experience of those most immediately and personally interested. It is not so essential to seek information respecting the extent or growth of the commercial operations, as this is derivable from the ship's manifests; but I am anxious to be exactly and correctly informed as to whether any other port on the west coast of Japan could be advantageously opened, and the name of the same; also as to the real obstructions and restrictions, or other measures directly detrimental to the permanent interests of commerce to which merchants are now subjected here, or difficulties removed, during the last twelve months, and what direct or indirect obstructions, if any, have been additionally imposed during the same period. Such observations as you may deem it necessary to make upon these points will, for obvious reasons, be more practically useful to me, while dealing with them in proportion as you are enabled to accompany your statements with facts which cannot fairly be questioned by the local authorities, although proof may be difficult of attainment.—I have, &c., (Signed) F. HOWARD VYSE, Consul.

The replies of Messrs. Porter, Denis, and Gaertner furnish the information requested. None from Capt. Blakiston.

The following is the list of Exports in vessels of all nations:—

There is no report from Nagasaki. What is H.B.M.'s Consul doing there? The China reports are not given; so we must conclude they are all behind.

OUR IMPORTS.

The Commissioners of Customs inform us that the imports of the year 1863 exhibit a certain feature which is entirely without precedent. Taking the principal articles imported—fourteen in number—they observe that eleven of these were imported in quantities greater than were received in the year preceding. Again, if we look not to the gross imports, but to the imports destined exclusively for home consumption, we learn that in eight of the principal articles a rise has been established, while in three only is there a fall. But, if these are remarkable facts as thus stated, they will become still more remarkable when stated otherwise, for the exceptions in reality are scarcely exceptions at all, and increase has been the rule throughout. Consumption and demand were actually greater in the case of almost every article, only it happened that in the case of corn and flour we produced such large quantities at home that we were less in need of contributions from abroad.

The "principal articles" purchased by Great Britain from foreign States may be classed under two heads—raw materials for manufacturing purposes, and provisions in aid of our own supplies. Some of these materials and some of these provisions are exotics, and could not be produced at home, such as cotton and tea; others, such as timber and corn, arrive in addition to our native produce. As enumerated by the Commissioners these articles stand as follows:—Cotton, coffee, hemp, provisions, spirits, sugar, tea, tobacco, wine, and wool. In all these the imports have been on an increased scale. That cotton should have arrived in larger quantities last year is but natural, considering the prices which were offered and the exertions which were made to procure supplies from all quarters of the globe. The actual result was a supply equivalent, as far as bulk went, to about six-sevenths of the old supply from America, but considerably inferior in quality. With this demand, too, we may connect the arrivals of hemp—an item in which jute is included—and of wool; but it is rather curious that flax and silk, which might have been expected to obey the same conditions, were in less request. It is true enough that as the cotton supply increased and the trade revived there would be less pressure on its substitutes, and less need, for instance, of silk and flax than there was at first. But by this rule the imports of hemp and wool should also have fallen off, whereas the contrary was the case, and perhaps, therefore, the conjecture of the Commissioners that the very large receipts of flax and silk in 1862 had glutted the markets may be accepted as probable.

In the imports designed for use at home, eight important articles have been taken in larger quantities, and three only in smaller—these exceptions themselves admitting of easy explanation, as we shall presently see. Cocoa, currants, raisins, tea, sugar, spirits, tobacco, and wine have all been in greater demand than before; for corn, flour, and coffee the demand was less. But foreign corn and flour were only dispensed with because we had such an abundance at home, while the decline in coffee may be very reasonably attributed to the increased consumption of tea following on the reduction of duty. Perhaps this leaves something still unaccounted for, but that decrease, such as it is, is literally all the decrease which really occurred. We did not retain for our own use in 1863 quite so much coffee as in 1862, though we actually imported a great deal more. Upon the whole, therefore, when the returns of the year are explained and appreciated, the result is more extraordinary than it appeared to be at first. Our imports may not only be said to have declined in fewer cases than [illegible] almost be thought not to have declined at all.

The Commissioners draw one or two curious inferences from the figures before them. From the cotton returns they argue that the blockade of the Confederate ports, however imperfect it may still remain, must certainly have been maintained with greater strictness and efficiency in 1863 than in 1862; although, on the other hand, it is evident that all the attempts of the Federals—and they have been very energetic—to obtain possession of the cotton crops, and re-establish the trade with Europe, have totally failed. It was on a mission of this kind that General Banks endured his disastrous defeat in Louisiana, and the anxiety shown by the Federals to open the navigation of the Mississippi arose from the same desire. Nothing, however, has been done. The direct supply of cotton from America was insignificant, the bulk of such as reached us at all having been brought through the blockade. From the tea returns it appears that we now supply both America and Russia with that important article. We bring it from China, and then re-export it; so that either the overland trade between China and Russia must have decreased, or else the consumption of tea must have increased so far as to leave room for both modes of supply. In tobacco a large rise in the imports from Maryland shows that the Federal Government, in the midst of its troubles, has found time for the cultivation of this important staple in a state which they have steadily held against the feelings of its population and the successive invasions of the Confederates.

More immediately important, however, than any of these deductions is the evidence collected by the Commissioners of what is termed the "elasticity" of the national revenue, or, in other words, of the rate at which the increased consumption of a cheapened article will replace the income lost by the reduction of the tax upon it. In the years 1860, 1861, 1862, and 1863 remissions of Customs' duties were made to the extent in the aggregate of £4,335,051. This amount of money therefore should, in the absence of any compensating influence, have been lost to the public revenue. But the loss actually experienced, as proved by the accounts, was only £1,486,687; so that the balance of £2,848,364 was restored by the mere increase of consumption. Of the average reductions of about £1,000,000 a year, fully £700,000 came back again, a "highly satisfactory conclusion," as the Commissioners observe. Nothing could be more desirable than to ascertain the exact point to which this principle could be successfully carried.

We derive from these Customs, or from the toll we take of imported articles, one-third of our whole revenue, that is to say, about £24,000,000. Of this large sum, tea, sugar, tobacco, and alcoholic drinks contribute £20,000,000 in not very unequal proportions, the three former articles yielding somewhat over £5,000,000 each, and the latter somewhat less than £4,000,000. The Commissioners, therefore, look with natural solicitude to the returns on these items, and in each case the imports are rising. It is only, however, in the case of wine and spirits that we find much comment offered on the results. The increase in the importation of spirits applies solely to brandy and gin; rum has fallen off, as, indeed, has

Digitized by Google

sugar of West Indian growth, so that the trade of the islands does not seem to be improving. Of the course of the wine trade we have already spoken, and the conclusions of the Commissioners entirely confirm the views which we expressed some time ago. It is evident that the habits which were introduced by the Treaty with Portugal a century and a half ago remain stamped upon us still. That treaty, much to the annoyance of Englishmen of those days, banished claret and established port. The result was that wine came to be regarded less asa beverage than as a strong drink, and so it is considered now. A "glass" of wine is taken as a stimulant, and as it must often be indifferent, and indifferent sherry is less intolerable than indifferent port, sherry, or what passes for it, carries the day against the world. The wines of Madeira and Sicily, being full-bodied "white wines," are also rising in favour, and the Capegrowers, we learn, so far from being disheartend by the loss of protection, appear to have determined on a fresh struggle." Thus the end of a measure designed to promote the consumption of light wines has been to establish the predominance of a strong wine in the public taste, and to make that wine, notwithstanding all reductions of duty, considerably dearer than it was before.

ENGLISH SHRUBS IN THE FAR EAST.

(To the Editor of the *London and China Telegraph.*)

SIR,—The acclimatisation in tropical countries of English trees and plants has hitherto been delayed, if not prevented, by the difficulty of sending those plants and trees in such a manner as to secure their vitality and yet prevent their growing in the course of the long voyage they have to make.

The question of safe transportation is a question of packing. The means generally resorted to for sending plants to and from the East is the Wardcan case, which may answer well for valuable plants of small growth, but being constructed partly of glass, since the plants require light, it cannot be carried in the hold of a steamer, but must be kept on the deck, where it is in the way, and where, in spite of the greatest precautions, it is liable to breakage. Captains consequently object to Wardean cases, and, if taken at all, a high rate of freight is fixed.

In case of breakage, the cost of the case, the plants and the freight, are lost, and also, for that season at least, the opportunity.

Some time since, I designed a wooden case of peculiar construction, lined with zinc and felt, to ensure an equal temperature sufficiently high to maintain the vitality of the trees, and low enough to keep them from growing.

My idea was skilfully executed by Mr. John Waterer, of the American Nursery, Bagshot, Surrey, and the Peninsular and Oriental Steam Navigation Company, who felt the liveliest interest in the success of the experiment, most handsomely contributed their part by conveying the first case, free of charge, to Shanghai. This experimental case was treated exactly like merchandise, and bore no distinguishing mark for special care, and, by accident, at one of the stations of the Company, missed being transhipped, and was therefore some weeks longer than necessary *en route*, which is not at all to be regretted.

The experiment proved eminently successful. All my fruit trees, 30 in number, reached Shanghai, and by latest reports all are thriving most satisfactorily.

Having resided in the East and felt the want of our English fruit, I determined to try this experiment, and its success enables me to recommend the plan to all who take an interest in the acclimatisation of our fruit and forest trees. I may add, Mr. John Waterer informs me that he can deliver at Southampton similar cases of, say 30, worked fruit trees of the best sorts, including peaches, nectarines, pears, apples, plums, cherries, gooseberries, and currants, and, in fact, any other fruit tree or rose trees that may be required from this country, for £6 per case.

To facilitate the introduction of fruit trees, and other plants by this means, the Peninsular and Oriental Steam Navigation Company have made arrangements for the conveyance of these cases at a uniform rate of freight of £4 each to Shanghai, Calcutta, Bombay, and Yokohama.

I would advise any one ordering them to send home a clear address, and also make arrangements with an agent at the port of arrival that the case may be immediately forwarded to its destination, to prevent its being unnecessarily left exposed to the rays of the sun.—Yours, &c.,

28, Pall Mall. THOS. CHRISTY, JUNR.

Monetary and Commercial.

A meeting was held on the 25th, for the purpose of confirming the arrangements made by the directors of the Imperial Bank of China for amalgamating with the Bank of Hindustan, the terms of which were announced in our last issue. The chairman, Mr. J. Mackrill Smith, moved the adoption of the agreement, pointing out the advantages that would accrue from it to the shareholders, placing them in a position to be in the immediate receipt of a share of 10 per cent. dividend. Mr. Green strongly opposed the resolution, and moved as an amendment that the consideration of this subject be postponed. The general feeling of the shareholders present being adverse to postponement or delay, Mr. Green withdrew his amendment, and the terms of agreement were sanctioned and agreed to. It appears that Mr. Green held one share! A resolution was also passed assenting to the voluntary winding-up of the bank, and appointing liquidators for the purpose.

The biddings for 30,00,000 (£300,000) rupees in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, 17,95,000 rupees; to Bombay, 12,00,000 rupees; and to Madras, 5,000 rupees. The minimum price was, as before, 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. per rupee on Bombay. The applications within the limits amounted to 228 lacs (£2,280,000). Tenders on Calcutta and Madras at 2s. will receive about 51 per cent.; on Bombay at 2s. 0¼d., about 61 per cent, These were the highest prices tendered. On the last occasion the applications within the limits amounted to the large total of £2,380,000 or £100,000 more than before.

The French mail steamer *Tampico*, which arrived at St. Nazaire from Mexico, has brought only about £2,000 in specie. It appears that, owing to excessive rain, the roads in Mexico had become almost impassable, and the *conducta*, with about £800,000 in specie, did not, therefore, reach Vera Cruz in time to catch the *Tampico*. Intelligence has now been received, however, of the arrival of this large amount at Vera Cruz, and it is expected to come forward by the next English packet, due at Southampton towards the end of the month. The aggregate in gold and silver by this opportunity may exceed £1,000,000 sterling.

The amount of bullion by the P. and O. Company's steamer *Delta*, from Southampton on the 20th inst. was, in gold to Mauritius, £45,000; to Madras, £1,905. In silver, to Calcutta, £10,000; to Singapore, £2,500; to Hong Kong, £163; to Shanghai, £900; to King George's Sound, £200. Total in gold, £46,905; in silver, £13,763.

ARTICLES OF IMPORT.

TEA.—The Tea market, since our last advices, has undergone no change, and the little business transacted has been chiefly in tea offered at the late public sales, at which an unusually large proportion were finest Kaisow and Moning, the former fetching 2s, 2d. to 2s. 3d. per lb., and the latter 1s. 11d. to 2s. 2d., amongst which were a portion of the finest chops of last season. The four chops new season's black leaf—Teen-wo, Teen-Heong, Cheong-Fat, and Ming-Sing—which reached this per overland route, only about 150 chests have been sold at 3s. to 3s. 1d. per lb., and we understand that the balance are unsaleable except at 4d. to 5d. per lb. discount on these prices. In the new Kaisows no sales have transpired. In red leaf there is some business doing, in Kaisow kinds, at 1s. 3d. to 1s. 7d. per lb. for export; and there is inquiry for common black leaf at 1s. to 1s. 0½d. per lb., but little offering under 1s. 1d.; in other grades there is no change to notice. In Scented Tea, Canton Orange Pekoe of medium to fine quality is wanted; Caper of good common to medium quality is in more request with only a small supply on offer; Foo-chow make of Pekoe and Caper is without change, fine and finest will come to a bare market. Green: There have been further arrivals from New York, which have been placed on the market, and where sales have been made they have been in favour of the buyers. At the sale of China growth commencing on 16th inst., 29,000 packages were offered of which 12,700 sold; of India growth on 24th inst., 2,629 packages passed, 2,504 sold.

Digitized by Google

COTTON.—The market has been dull for some days. In London 1,400 bales were disposed of yesterday, including 1,000 at public sale. Low Surat, 10¼d. to 1s. 2d.; China, damaged and all faults, 10d. to 1s. 3½d. At Liverpool yesterday, a fair inquiry, but very little business done. Sales, 3,000 bales; of which 300 American, 28½d. to 30d.; 400 Egyptian, 27¾d. to 33d.; 2,230 Surat, 16d. to 25½d.; Madras, 20d.; Bengal, &c., 17d. to 17½d.; China, 18½ to 22d.

SILK.—There has been a good demand for silk during the fortnight, but business has been somewhat curtailed by the scarcity of available stock, while consumers show hesitation in paying the high rates demanded by importers. Tsatlees have been rather more inquired after during the last week, on account of their relative cheapness as compared with Japans. Deliveries from the 1st to the 24th inclusive: China, 2,488 bales; Japan, 1,550 bales; total, 3,988 bales. China: Tsatlees, No. 1, 25s. 6d. to 26s.; Taysaam, No. 1, 22s. 6d. Japan, Mibash, No. 1, 26s. to 27s.

SUGAR.—An active demand prevailed since our last for some days, stimulated principally by advices of higher rates in France, consequent on unfavourable reports of the Beetroot crop, and an improvement took place of, on the average, 1s. per cwt., and in some instances 1s. 6d.; but the same spirit was not exhibited at public sales as on the private market. On Wednesday the market was less animated, at barely previous rates.

COFFEE.—At the close of last week there was more disposition to buy, and prices advanced 6d. on those of the previous seven days. On the 19th, 310 casks, 84 barrels and 78 bags Plantation Ceylon, in public sale, were taken freely at fully the above advance. 60 cases pale Neilgherry sold from 70s. to 70s. 6d. 400 bags fine fine ordinary washed Rio brought 75s. 6d. to 77s. 6d.

RICE.—4,900 bags Bengal offered by public sale have all been taken, bold pearly white at 13s., fair Ballam 10s. to 10s. 6d., pearly red 9s. to 9s. 6d., and common cargo 8s. to 8s. 6d.

CAMPHOR.—Quiet, apparently owing to a little increase of the supply, and no buyers at the moment except at a reduction of 5s. per cwt. 250 boxes at auction retired.

CASSIA LIGNEA.—Recent importations, 1,376 chests, brought to auction, and 1,200 sold at 87s. to 93s. per cwt. for 2nd to 1st pile, and 84s. to 87s. broken. Buds: Cheaper, and in very partial request; of 100 boxes at auction very few sold at £14. 10s. per cwt. for good.

DRUGS.—Cubebs: Flat; and 152 bags at auction, all retired. Dragon's Blood: Very quiet; of 12 cases at auction, one-third sold at £5 per cwt. for middling lump. Galangal Root: Very dull, and of 72 bags at auction very few sold at 19s. per cwt. Rhubarb: Good and fine inquired for at fully previous value, but ordinary and middling neglected: and of 55 chests at auction three-fourths sold at 3s. 6d. to 3s. 7d. per lb. for ordinary round and flat, being 4d. cheaper.

GUMS.—Benjamin: Steady; and of 34 cases Sumatra at auction half sold at £12. 10s. to £12. 12s. 6d. per cwt. for false packed 2nd quality and £6. 5s. fair 3rd. Damer: More enquiry, especially for good quality of 124 packages at auction, a small portion sold at 44s. per cwt. fai picked. Gamboge: Continues scarce and firm; only 8 cases at auction; 2 cases sold at £11 per cwt. for good pipe.

GUTTA PERCHA.—Market very unsettled, and much lower prices accepted; of 21 tons at auction a small portion sold at 1s. 7d. per lb. for fair.

INDIA RUBBER.—Very Quiet; 35 bags Batavia at auction retired. 84 cases Assam retired.—Market very dull, with little demand: of 3,887 bales at auction a very small proportion sold—Lupez at £44. 5s. per ton, and good roping at £34.

HIDES AND HORNS.—On the 18th, 1,078 Batavia buffalo hides offered and sold—best yellow, 6½d. per lb.; best heavy, 6½d. per lb.; seconds, 5½d. per lb.; light, 6d. per lb.: 831 Singapore buffalo hides sold as above. No business in horns to report.

JAPAN WAX.—100 cases good saucer sold on the 24th at 64s. to 68s.

OILS.—Anniseed: Flat and lower; of 30 cases at auction, half sold at 6s. 4d. to 6s. 5d. per lb., but subsequently our reduced quotations accepted, and only in small parcels. Cassia: Very dull, 10 cases at auction retired; a few cases sold at the lower quotations. Cinnamon: Steady, but quiet, 3 cases at auction retired.

SAGO.—Prices are again 6d. per cwt. lower, and 4,172 boxes at auction mostly sold at 19s. to 21s. 6d. per cwt. for middling to fine small, and 20s. 6d. to 21s. good medium. Flour: Steady; and of 2,849 bags at auction, one-third sold at 16s. per cwt. for good.

SHELLAC.—Rates show a further reduction of 5s. to 7s. 6d. per cwt., without exception, and Button even at a greater reduction is almost unsaleable; of 1,972 packages at auction, less than one-third sold; Orange at £7 to £7. 15s.; Liver, £6. 2s. 6d. to £6. 10s.; Ruby, £7; good Garnet, £6. 5s. to £6. 7s. 6d.; Native, £6. 10s. to £6. 12s. 6d.; Button, £7. 10s. to £9; and Block, £6. 10s. to £6. 12s. 6d.

SPICES.—Cloves: Penang rather dearer, and 58 cases sold at auction at 1s. 1¾d. to 1s. 2½d. per lb.; Zanzibar firm, and of 347 bags offered, a small portion sold at 4¼d. to 4¼d. Mace: Firm, and the better kinds of ready sale; of 21 cases Penang, and 17 cases Cochin at auction, three-fourths sold at 1s. 6d. to 1s. 10d. per lb. for middling to fair palish, and 9d. to 1s. 3d. low to fair reddish. Nutmegs: Are rather cheaper, except the fine bold; and 68 cases Penang, 63 cases Cochin, and 30 packages Batavia at auction, mostly sold at 2s. 9d. to 3s. 9d. per lb. for middling mixed to very good bold, and 1s. to 1s. 9d. inferior small to fair medium. Pepper (Black): Singapore is slightly, and Penang ⅛d. per lb. cheaper; of 7,198 bags of the former at auction, half sold at 3½d. to 3¾d. per lb., and of 7,659 bags of the latter at auction, half sold at 3½d. to 3¾d. per lb., with Trang at 3¼d. to 3¼d. Of 1,526 bags Batavia, two-thirds sold at 3¼d. per lb. White: ¼d. per lb. cheaper, and of 1,287 bags Singapore at auction, half sold at 5¼d. to 5¼d. per lb. for middling to fair.

TERRA JAPONICA.—Cutch, Pegue: Is fully 1s. per cwt. cheaper, and of 4,492 bags Pegue at auction, half sold at 24s. to 24s. 6d. per cwt. for good. Gambier: Is also lower, and very quiet; 1,330 bales at auction sold at 25s. 3d. per cwt. for good block, and 30s. cubes.

MISCELLANEOUS.—Blacklead: Continues very quiet, and lump is much cheaper; of 1,318 barrels at auction only one-third found buyers at 12s. 6d. to 15s. per cwt. for fair to good lump; and 6s. 9d. to 9s. dust. Galls: Quiet, without business of consequence. Japan cheaper; 752 boxes just landed sold at auction at 62s. 6d. to 65s. per cwt. for good. Musk: Small sales of fine Tonquin at 30s. per oz. Rattans: Scarcely maintain the former value, and 3,946 bundles Batavia sold at auction at 4s. 4d. to 7s. 4d. per 100. Sapanwood: Very firm; 18 tons Batavia sold at auction at £10 to £11. 10s., and 7 tons Ceylon at £8. 7s. 6d. to £9. 7s. 6d. per ton. Mother o'Pearl Shells: At auction 139 cases Manila were all retired. Star Aniseeds: Cheaper; and of 280 cases at auction, three-fourths sold at £5. 17s. 6d. to £6 per cwt. for good, and £5. 7s. 6d. to £5. 10s. mouldy. Sticklac, Siam: Steady; and of 298 cases at auction, three-fourths sold at 52s. 6d. to 53s. 6d. per cwt. for good bold. Tortoise-shell: Auctions have included 9 cases Singapore; 4 cases sold at 14s. to 15s. middling, in sorts, and 11s. 6d. to 12s. inferior; 14 cases Manila, 4 cases hoof sold at 17s.; 2 cases Sydney sold at 15s. 6d. to 16s. 6d.; 1 case Penang sold at 10s., and 2 cases Batavia, 1 sold at 16s. per lb.; prices being very firm for the moderate proportion placed. Vermilion: Some inquiry, but no business doing.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £9. 10s.; hoops, £10. 10s.; sheets, single £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7. 5s.

STEEL.—Swedish keg, £16 to £17.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8½d. to 8¾d. per lb.

TIN.—104s. for block; 105s. for bar. Tin plates, best charcoal, I.C. 30s. per box.

LEAD, &c.—English pig, £20. 5s. to £20. 10s.; W.B., £22. 10s.; shot, patent, £23. 15s.; sheet, £21. 15s.; spelter, £24. 15s.; zinc, English sheet, £28; quicksilver, £8.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

	Gold.	Silver.

FREIGHTS AND CHARTERS.

Berth freights still remain without much animation both from London and the outports. Homeward charters have been fixed from the rice ports, also for teak from Maulmain, but the rates are now somewhat lower. There is more demand for tonnage from China, as it is expected that the shipments of cotton from Shanghai during the next few months will be very large.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Penang: [illegible] measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £36 to £37 and £1. 15s. For Shanghai: £50 and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £27 and £1. 1s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the conveyance of a quantity of Government stores (eighteen tons heavy shot in boxes, and three tons light measurement), from the River Thames to Hong Kong.

CASUALTIES.

The Philip van Marnix, V. Ruyven, from Rotterdam for Batavia which put into Rio Janeiro, July 4, with masts split, reports that on June 11, in lat. 5 N., lon. 26 W., she was caught in a squall, which carried away her topmasts, &c., and broke mainmast and chain plates; on the 28th she encountered a heavy gale, and on the 2nd July was taken into Rio Janeiro by a steamer. The master hoped to have the damage repaired in twelve days.

The Cornucopia, Legresley, which arrived at Lynn, July 26, from Marseilles, took eight half-chests tea, marked E. E. and Co., from the derelict ship Childe Harold, from Shanghai to Liverpool, on the — April, in lat. 37 N., lon. 16 W.

The Arab, from Liverpool for Singapore, put into Rio Janeiro July 22, leaky, and with part of cargo thrown overboard.

The grounding of the Netherby on the Pescadores has been reported at Lloyd's, also that the Lady McNaghten, from London to Shanghai, had been spoken near Anjer, leaky, and short of provisions.

At St. Vincent, C. V., July 18, Labourdonnais, steamer, from Marseilles for Hong Kong.

Intelligence has been received here of the total loss of the Yaratilda, from London to Shanghai, in the China seas, but this has been contradicted by a telegram from Liverpool.

The Egmont, Morgan, which sailed from London 4th August for Shanghai put back to Plymouth on the 24th August.

At TABLE BAY.—July 6: Rajah (steamer), from Shanghai and Batavia (with damage to hatching about the screw), and left 13th for London.

At ALGOA BAY.—July 1: Advance, from Shanghai.

At SIMON'S BAY.—July 1: Whirlwind, Hughes, from Manila for St. Thomas, with damage to rudder, having experienced heavy weather. June 30: Antonia Terry, Lucas, from New York for Hong Kong with damage to bulwarks, and loss of some sails, having met with heavy weather.

BANK OF HINDUSTAN, CHINA, AND JAPAN.

NOTICE IS HEREBY GIVEN, that the BANK OF HINDUSTAN, CHINA, and JAPAN (Limited), has REMOVED from 16, Cornhill, to No. 1, Bank-buildings, Lothbury.

By order,
R. SWIRE TOMLIN, Secretary.

1, Bank-buildings, Aug. 24, 1864.

THE BANK OF HINDUSTAN, CHINA' and JAPAN (Limited).

NOTICE IS HEREBY GIVEN, that an EXTRAORDINARY GENERAL MEETING of the Company will be held at the Banking-house of the Company, No. 1, Bank-buildings, Lothbury, in the City of London, on MONDAY, the 12th day of September next, at One o'clock, p.m., and the business to be transacted will be to Confirm certain Resolutions passed by the Company in Extraordinary General Meeting on the 25th day of August, 1864, of which the following are copies:—

1. It was Resolved—"That the agreement dated the 24th day of August, 1864, between this Company of the first part, and the Imperial Bank of China, India, and Japan (Limited) of the other part, be approved, and the Directors be authorised to affix the seal of the Company to the same, and do all things necessary to carry it into effect."

2. It was Resolved—"That the capital of the Company be increased by the creation of 20,000 new shares of £100 each, to be issued at £6 per share premium to the persons and upon the terms stated in the before-mentioned agreement, and that the resolution of the Board to the above effect be ratified and confirmed."

3. Resolved—"That the Directors be authorised to add four Directors to their present Board, to be selected by them from the existing Board of the Imperial Bank of China, India, and Japan (Limited)."

Dated this 25th day of August, 1864.

By order,
R. SWIRE TOMLIN, Secretary.

1, Bank-buildings, Lothbury, London.

A. SHORTREDE & CO.

Hong Kong, Jan. 1, 1864.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY and the ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM. — A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect [illegible] and with the least.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable an convenient Hair Brush ever invented. Letters Pate Granted Nov. 6, 1852.

Merchants and Shipper supplied on liberal terms.
12, THREE KINGS COURT, LOMBARD-STREET, LONDON.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three King-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. Messrs. JNO. GOSNELL and Co have been appointed Perfumers to H.R.H. the Princess of Wales.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danillo, wich. Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay: Franjee Nesserwanjee and Co. Singapore: Martin and Little Batavia: L. Platon and Co. Macao: J. D. Freita.

J. C. and J. FIELD,

ORIGINAL MANUFACTURERS (IN ENGLAND) OF

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

N.B.—Agents in India—Von Lintzgy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon; Esperance, Bombay; Times office, Malta, price half a dollar or one rupee. Patients in India and the Colonies can be successfully treated by letter, by enclosing the consultation fee of £1, and medicines forwarded with secrecy and despatch. Consultations daily from 10 to 3 and 6 to 8.

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S PILLS FOR ALL AGES.—Such testimony to the merits of this medicine as that contained in a letter lately received from a lady by Professor Holloway should be impressed on all aged sufferers. "What induced me principally to apply to you was that my mother, who is over eighty years of age, found very great benefit from the use of your remedies." The value of such disinterested evidence is enhanced by the consideration that medicine usually fails to give any relief at such an advanced period of life. Holloway's Pills are both safe and certain in their action on the stomach, liver, kidneys, bowels, and skin. They act without violence, and do not irritate the nerves or shock the system.

Bangkok	Costa Rica ...	W.I.D.	With des.

For Freight or Passage, apply to KILLICK, MARTIN and Co., 28, Nicholas-lane, Lombard-street, E.C.

To sail 29th September, for

COLOMBO direct, the beautiful ship PALMERSTON, A 1 fifteen years, 834 tons register; lying in the West India Dock. This vessel is well known, and will be found a most desirable opportunity for shippers of fine goods.

Apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, E.C.

To sail 12th September.

FOR COLOMBO and COCHIN, The beautiful British built clipper ship JULIA AUGUSTA, A 1, 9 years, 419 tons register, W. B. HOPPER, Commander, London Docks. This fine vessel is well known in the Ceylon Trade, and will be found a very desirable opportunity for shippers desirous of quick despatch.

For freight or passage apply to TOULMIN, LIVINGSTON and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

COLOMBO Direct.—The following clippers are now loading in the West India Docks, and will have quick despatch:—

CORSAIR'S BRIDE, A 1 13 years, continued A 1 eight years.

Both these vessels are regular traders, well known for speed and the excellent condition in which they discharge their cargoes.

For freight or passage apply to SUART and SIMPSON, 9, Clement's-lane, Lombard-street, E.C.

HONG KONG and WHAMPOA, first ship, the splendid new clipper-ship ARAB STEED, A 1 ten years, 634 tons register, H. F. WALKER, Commander; loading in the East India Docks. This beautiful vessel, built by Messrs. W. Pile Hay and Co., is confidently recommended to shippers.

For Freight or Passage apply to DEVITT and MOORE, 9, Billiter-street; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

HONG KONG and WHAMPOA (to follow the Arab Steed), the splendid Dundee built clipper ship BENGAL, A 1 nine years; — tons register; H. P. BRUMELL, Commander; loading in the East India Docks.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

SINGAPORE Direct.—Notice to Shippers.—The splendid fast-sailing clipper barque WEST, A 1 thirteen years, 409 tons per register; is now rapidly loading in the St. Katharine's Dock, and will shortly be despatched.

For Freight or Passage apply to Messrs RANGELL, WOOLLETT, and Co., 1, Lime Street-square, E.C.; or to DOUGLAS and MILLS, 28, Billiter-street, E.C.

Has the greater portion of her cargo engaged, and will sail 15th September.

DIRECT for BOMBAY, the beautiful clipper ship, LORD BROUGHAM, 3-3rds 1 1, 1,057 tons register, G. BANDALL, Commander; East India Docks. This fine vessel offers a first-rate opportunity to shippers desirous of despatch.

For Freight or Passage, apply to TOULMIN, LIVINGSTON and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

SHANGHAI direct (first ship).—Notice.—The celebrated A 1 Aberdeen-built clipper CISSY will receive goods in the West India Docks till Thursday next, when everything intended for shipment must be down and cleared.

TEMPERLEYS, CARTER, and DARKE, White Lion-court, Cornhill; HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill, E.C.

FIRST SHIP for YOKOHAMA and KANAGAWA, the splendid new clipper MACEDON, A 1 thirteen years; 496 tons register; WILLIAM SUMMERFIELD, Commander; lying in the St. Katharine Docks. This beautiful ship has just completed her first voyage from Japan.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

NAGASAKI (Japan) Direct.—To sail immediately, having nearly the whole of her cargo engaged, the splendid clipper ship MILBROOK, A 1, 398 tons register, J. BARRON, Commander; loading in the St. Katharine Docks. This ship has just completed a voyage to and from Nagasaki, making unusual quick passage, and delivering her cargoes in excellent condition. Has good accommodation for passengers.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

We have received no journals direct from Yokohama by the present mail; but we have intelligence from thence to the 30th June, brought to Shanghai by the *Elgin* steamer. Our news is therefore only three days later than that which appeared in the *London and China Telegraph* of the 29th ult.

Nothing of a political nature had occurred requiring record. A soldier of the 20th Foot, named Thomas Bambury, had been tried in the Consular Court for an assault on a Japanese on the 18th June, with intent to slay or do some grievous bodily injury. The facts deposed to were as follows:—

The prisoner, who had been absent from barracks the previous night, had, on the day charged in the indictment, been disporting himself in a state of intoxication about the village, and had been sitting in Denkitchi's house. He spoke to Denkitchi and took hold of him by his coat, and thrust at him with his open hand; Denkitchi then ran away, and was closely pursued by the prisoner with a huge threshing mallet—*i.e.*, a large wooden-headed instrument, the head of which was about eighteen inches in circumference, with a handle about four feet long. Not overtaking him, the prisoner threw this formidable instrument at Denkitchi, and striking him with it, brought him to the ground. He then took up the same weapon, and going up to the prostrate man, struck him a violent blow on the back. He was then surrounded by the villagers and secured with ropes. The Japanese lying in one spot and the soldier in another, having been seen by a little boy who was riding out that way, he rode in towards town and reported it to the first he met. The report soon spread, and Lieut. Barkley, of the *Havock*, and Lieut. Goldsmith, adjutant of the 20th, and others, went to the spot, and found the two men lying as described. A piquet was sent for, and the prisoner brought into town, the foreigners standing by the wounded man until the Japanese officers came up.

The prisoner made no defence, merely saying he was drunk at the time. In the course of the evidence it appeared that the character of the prisoner in his regiment was but very indifferent.

The prisoner was found guilty of an aggravated assault with intent to do a grievous bodily injury; and, restricting the charge to that extent, he was sentenced to six months' imprisonment with hard labour.

Dr. Hyde, the surgeon of the 20th, had pronounced Denkitchi out of danger, and with no indication of internal lesion. The *Japan Herald* observes on the incident:—"No one can read the above account, slight as it is, of this brutal assault without a feeling of horror and indignation, and of sympathy with the unfortunate object of it—an inoffensive Japanese fisherman. We would be very glad to hear that the men of the 20th had stepped forward and evinced their sympathy by contributing each a trifle towards a sum to reimburse the family of the poor fisherman for the loss of their usual means of support. As the man is reported by Dr. Hyde to have suffered but slight injuries, he will probably be able soon to resume his occupation; and therefore a very trifle would suffice for this purpose—not only good in itself, but highly useful perhaps in respect to the position of esteem in which we all desire to be held amongst the industrious and kind-hearted villagers whom we frequently encounter in our rambles in the neighbourhood."

NAGASAKI.

By the arrival of the Spanish war-steamer *Narvaez* at Hong Kong, we have advices from this port to as late a date as the 15th July. General Brown and Sir Rutherford Alcock were both at Nagasaki at that date, on their way to the Straits of Simonoseki. It is clear, therefore, that the resolution to open the passage of the Inland Sea to foreign vessels has been definitively taken. As we hear of no fleet or land force accompanying these high officials, it is very possible that whilst General Brown may embrace the opportunity of reconnoitring what may prove to be the scene of future hostile operations, Sir Rutherford will endeavour to settle whatever points are in dispute by direct negotiation with Tsiosiu, the powerful Daimio who at present stands opposed to the free navigation of the Inland Sea by foreign vessels, and whose fortresses have been the sole impedimet to their making use of it.

Prior advices, to the 26th June, state that Her Majesty's ships *Rattler* and *Swallow*, and gunboat *Dove*, were then in port. The British barques *Celicia* and *Assyria* were also there, the former loading for Hong Kong, and the latter for Shanghai. The *Delaware*, American barque, was taking in cargo for Chefoo. The British brig *Clairmore* was discharging part of a general cargo from Hamburg, the rest to be discharged at Kanagawa.

Digitized by Google

The *Swallow* and *Dove* were about to proceed to survey, or complete the survey of, the Cazen (?) Straits. One of the Dutch men-of-war in harbour would leave for Kanagawa as soon as the weather permitted. A Dutch barque had arrived from Singapore, with stores for the Dutch fleet. In addition, there were two Japanese steamers and one barque in the harbour.

CHINA.

PEKING.

The following notifications are from the *Peking Gazette* of the 3rd and 16th June:—Li Hung-chang reports the help that was obtained from a god, and requests that a commemorative tablet may be erected. Such is the substance of his despatch.

The Imperial army in Keangsoo having surrounded the city of Chang-chow, floods of rain descended both by night and by day, and rendered it all but impossible to fire the guns. But the Governor reverentially addressing Kuan-ti, and begging his aid, the sun immediately appeared, and at the moment of attacking the city the wind veered round as an answer to the prayer. Guns, muskets, and other fire-arms were suddenly endowed with a force which they had not possessed before. Thus was Chang-chow-fu taken without delay.

Li Hung-chang further states that he has made careful enquiries as to Chang-chow-fu, and has discovered that it was in the tenth year of the Emperor whose style was Hienfeng, the fourth month and the sixth day between twelve and two o'clock that the city was taken by the rebels, while it was recaptured on the sixth day of the fourth month of this year, and at the same hour.

We have considered the above despatch, and are, in truth, much moved by it. We order the doctors of the southern library respectfully to write an inscription for a tablet to be transmitted to Li Hung-chang, who will reverently place it in the temple of Kuan-ti at Chang-chow. We also present ten sticks of Thibetan incense to the shrine to mark our gratitude to the Divinity.

Formerly, on account of Gordon having acted as leader of our Imperial forces against the enemy, and having assisted to take Chang-chow, we issued an Edict, expressing our will that he should be elevated to the honorary rank of Ti-t'u, and should be presented from ourself with a banner and a medal to mark our appreciation of his services. Li Hung-chang now reports that the "ever victorious army" which Gordon used to lead has been disbanded in the most satisfactory manner, and he begs us to heap further distinction on Gordon's head. Such is the substance of his despatch. Since the spring of last year Gordon has headed the "ever victorious army," and aided the ordinary Imperial forces in the subjugation of Fushan, the relief of Chang-shu-hsien, the capture of Taitsang-chou, Quinsan-hsien, Wu-kong-hsien, and, at last (towards the close of the year) the provincial city of Soochow. Then again he this year captured Yih-shing-hsien and Li-yang-hsien, while he compelled the retreat of the rebels at Yang-shai. He finally captured Chang-chow-fu, thus continually heaping meritorious acts one upon another. Moreover, he has, in the most satisfactory and peaceful manner, completed the disbandment of the disciplined army. There was no uncertainty (or vacillation) about Gordon's services; he was ever inspired with that bravery and strategic talent which enabled him to prove so formidable. He was also intimately acquainted with the relations existing between China and other Powers. It is therefore most necessary for us to mark our approval. Gordon is therefore presented with the Yellow Jacket, and a short peacock's feather. He is also presented with the official robes and paraphernalia belonging to the rank Ti-t'u. Thus will our favour be manifested to him.

Respect this.

SHANGHAI.

The dates by the present mail are down to the morning of Sunday the 17th July. The leading item of news is the typhoon. The heat appears to have been excessive, but we find no complaints of cholera in our files. The American citizens celebrated the 4th July with great *éclat*, accompanied with a pyrotechnic display.

The following account of a severe typhoon is from the *North China Herald* of July 16:—

THE RECENT TYPHOON.

Judging from the experience of Wednesday night, Shanghai must in future be considered liable to an infliction from which it has hitherto been deemed exempt. A gale blew from 9.30 P.M. on that evening, to 4.30 A.M. on Thursday morning, which presented every characteristic of a cyclone, both in the violence of the wind and its circular motion; commencing from about S.E., and working gradually round to N.W. before it exhausted its strength; heavy rain falling during a great part of the night. We have been favoured with the following series of barometrical observations taken in the settlement during the progress of the storm, from which it will be seen that the glass fell slowly from the commencement of the gale till daylight; after this the force of the wind abated, and the weather became gradually calm.

9.30 P.M. 29.80.	3.00 A.M. 29.18
1.50 A.M. 29.48.	3.15 A.M. 29.07
2.00 A.M. 29.38.	4.50 A.M. 29.05
2.35 A.M. 29.25.	6.00 A.M. 29.50

Up to 8 P.M. on Wednesday evening there had been no indication of the coming storm, the barometer stood at 29.80, and the night was calm and clear. Between 9.30 and 10, heavy rain set in, accompanied by gusts from the south-east, while the barometer commenced to fall rapidly. The wind increased in force until a quarter past three in the morning, when it suddenly lulled to almost a calm. This is to be accounted for by the centre of the cyclone passing over the settlement at the time. The calm lasted for about five minutes, when with redoubled force the wind came from the south-west, the barometer at the same time standing at 29.07, and the Board of Trade sympiesometer registering 28.80. From this time, however, the wind gradually fell, veering round to the north-west, while the barometer rose to 29.50. The storm seems to have been travelling towards the north-east, making it exceedingly dangerous for vessels off the coast or on their way between Shanghai and Ningpo. Land-locked as the course is, they had little chance of lying to and braving the storm. Fears were entertained for the safety of the *Whampoa*, *Kiangse*, and *Fire Dart*, the first two of which left Shanghai on Wednesday, and the latter was due here on Thursday. The *Fire Dart*, however, came in on Thursday afternoon, having ridden out the gale at Chin-hai. We have been favoured with the following account of the progress of the gale, by a gentleman who was on board her when she anchored for shelter. The storm commenced about 8.30 P.M., the glass rapidly falling, and gradually increased until, at 2.30 A.M., it reached its greatest force, having in the meantime veered round from E.S.E. to W. The barometer had meanwhile fallen to 28.60, the lowest point noted. About half an hour after the *Fire Dart* had anchored, the *Emperor*, which had left Ningpo some time before her, put back. After the wind had veered to the westward, several junks drifted past the steamers, and went heavily ashore. At about 3 A.M. the wind commenced to moderate, while the glass rose steadily, and at 5 A.M. the weather seemed sufficiently settled to admit of the vessel again getting under way. When she rounded the point the scene presented was truly horrible, the water being literally covered with wreck, which prevented her from making her way by the usual course. A Hankow raft had been split in halves, one portion embracing the right shore, while the other was tossing against the left bank. The work-sheds built on Messrs. Collyer and Lambert's property had been blown down.

The *Whampoa* rode out the gale at anchor, ten miles inside the lightship, with eighty fathoms of cable out. Her boats were washed away, and her main steampipe broken by the violence of her working.

The damage done to the foreign shipping in the harbour was very trifling. H.M.S. *Acorn* and *Perseus*, owing to having been somewhat slackly moored, grazed one another, but no injury was suffered by either. Naturally enough, most of the foreign vessels dragged more or less; the steamer *Argus* was literally blown up on the bank of the river, and a portion of the roof of the *Berwick Walls*, hospital-ship, was neatly removed. But the British barque *Teresa* alone suffered damage of any importance; her bowsprit, jib-boom, fore-top, top gallant, and royal masts, with yards and rigging, were taken over the side by the American ship *Ruthven*. On the whole, the injury to foreign property afloat was not by any means so great as might have been expected. The loss of life and property amongst the native boats was very serious. The eccentric position of several cargo-boats, and the number of *sam-pans* lying bottom up on the bund, showed that the small craft had not escaped disaster. A large boat opposite the Custom House was thrown high and dry broadside on to the bund; and a little further on, a second was lying completely across a stone jetty, while others had gone foul of the piles of the Soochow-bridge. The *sam-pans* appear to have been blown into a heap and to have pounded each other; while several house-boats came to condign grief.

It is known that at least three large chops, together with several smaller boats, were destroyed; while we have received reports to the effect that two hundred lives and some

Digitized by Google

100,000 taels worth of property were lost by the foundering of native boats and junks, many of which were full of cargo, and crowded with sailors and passengers. Amongst the casualties ashore, we may mention the overthrow of the look-outs at the Ningpo Joss House, and at No. 10 Redoubt. The latter observatory was smashed to pieces and deposited in the Defence Creek. A chimney in Nanking Road was blown down, and a block of houses lately erected in the Maloo completely overset, many others being more or less damaged. The iron godowns on Messrs. Dent and Co.'s wharf and on Messrs. Hall and Holtz's property at Pootung were blown down. In Hongque, part of a block of Chinese houses in course of erection on the lately reclaimed waste ground at the top of Broadway, immediately behind the Astor House, was blown over and is now a mass of ruins.

At the police station in Hongque a wall, one brick thick, in the sergeant's office, fell down, a window which had been built into it remaining, curiously enough, unbroken. On the bund several trees were torn up by the roots, fences blown down, and the bunding itself much injured in several places. Throughout the settlements generally, glass, venetians, sunblinds, and roofs suffered very considerably. The bunding was damaged, boats were stranded on two jetties, injuring one of them (that running out from the Hangchow road), while the remarkable height of the tide, overflowing the banks of the river, contributed its share to the general work of destruction. The most serious results were, however, felt at Woosung, where the beacons set up for the guidance of ships entering and leaving the port were blown down. Steps were, of course, immediately taken to secure their rapid replacement. Our reporter has sent us the following interesting account of the effects produced at Woosung by the gale.

WOOSUNG.

The typhoon has committed fearful destruction in this neighbourhood. The wind commenced to increase gradually after 8 P.M., and by 11 P.M. it had risen to a perfect gale, with a deluging rain. The scene amongst the junks must have been something dreadful, but as night had shrouded the sufferers in darkness we are compelled to pass them over and leave them to their fate. Cries for help occasionally came across the water as the flood made, and huge dark masses could be seen through the darkness rushing on to utter destruction. By 3 A.M. it blew a perfect hurricane, the howling of the wind being almost deafening, and the spray blinding. As we stood on the jetty watching the progress of the storm, every now and again we could indistinctly hear a death-cry uttered during the struggles of some doomed victim. Suddenly we heard a fearful crash close behind, which not a little startled us, but we soon discovered that it was only one of the side walls of Messrs. Remi, Schmidt, and Co.'s godowns that had fallen. The river by this time had swollen considerably, and the black masses became more numerous. Streaks of light were at last visible in the eastern horizon. The country people now began to assemble and move about in groups, straining their eyes for plunder. To watch them was, however, more easily wished than done.

One large boat, which had been engaged landing bricks during the previous day, suddenly came to grief, and the yulow and many of the boards were washed over Messrs. Jardine, Matheson, and Co.'s newly-made jetty. A little boy and his father were the only persons belonging to the boat, and they were saving all they could of the wreck. The little boy was in the act of dragging along the yulow when he was seized by one of the ruffianly plunderers. The child called for help: it was now fortunately grey dawn, and when assistance did come he was in the act of being thrown overboard. The wretch had certainly greased himself for the occasion, as he slipped through our fingers like an eel. [At 4 A.M. it was still blowing heavily; the wind had by this time veered round to the N.W., but began to show signs of abating. At 4.30 it moderated; it was now light, but what a sight the river presented! Junks of every description, some with their masts only above water, others bottom up, some on their beam ends, others scarcely visible, with small craft and sampans innumerable floating up at the rate of six miles an hour. Two large junks were crushed against the jetty at the village. A huge pig found its way into the hands of some of the French sailors, and was immediately put to the knife. The marks outside the Woosung village were blown down, and the beacons on the bar creek levelled—the outside or southernmost one being completely blown away. A lull in the gale now occurred for about half an hour, when it came on terrifically from the N.W. and N.W. by W., drawing out of the ground the 8-foot stakes to which the flag-staff is stayed, while the river became one complete mass of foam. Fortunately this only lasted for about an hour, when it again moderated, and the weather has since remained calm.

The Hamburg barque *Elise* reports that on the morning of the 14th, the small fore-and-aft schooner *Rebecca*, bound outwards, foundered close to her, about four miles above the wreck of the *Ocean Mail*. All hands reached the shore with the exception of the captain's wife and child, who were lost by the upsetting of the boat. The British barque *Syrian*, which was entering the river on her return voyage from Nagasaki, was seen lying high and dry, with her back broken, below the Kintoan beacon. No foreigners were seen either on board or in the neighbourhood, and it is to be feared, therefore, that the captain and crew were compelled to desert her and that their boats were swamped. The *J. T. Wright* has also been wrecked on Lan-shan crossing; the crew were saved by the *Huquong*.

An expedition which left Soochow to complete the subjugation of the southern portion of the province has succeeded in capturing the city of Chang-shing, situated between Yih-shing and Hoo-chow.

From the Che-keang province we learn that the apprehensions felt as to the effect of the destruction of the sea wall on the north side of Hangchow bay have proved well founded, although naturally somewhat exaggerated. At present at each tide a space of about fifty square miles is covered by salt water, and is, of course, thus rendered utterly unfit for cultivation. It is supposed that Hangchow is about fifteen feet higher than Shanghai, hence the brackishness noticed in the water of some of the creeks running into the Wong-poo. The Chinese estimate that a sum of three millions of taels will be necessary in order to restore the wall to its former state, and even then that an annual expenditure of three hundred thousand taels will be rendered necessary. The members of the surveying expedition sent down from Shanghai to report on the wall, state that to construct an adequate barrier, an outlay of five millions of taels would be requisite, but in this case fifty thousand taels would amply suffice for annual repairs.

A correspondent at Hankow reports that a Chinaman was, on the 20th June, shot by Dr. Rice, a medical man lately established at that point. It would seem that a crowd had collected in front of Rice's residence to watch the performances usual at the Dragon feast, which was going on at the time. Some of the crowd were forced into the house, and Rice, to frighten them or to compel their departure, fired off three chambers of his revolver, which he states he believed was loaded with powder only. A Chinaman was, however, shot through the heart, and Rice has been tried, convicted, and sentenced to a fine of five hundred dollars, and deportation.

The third regular meeting of the North China Branch of the Royal Asiatic Society was held on the 6th July, at the Shanghai Library, Sir Harry S. Parkes, K.C.B., president, in the chair. Present:—Dr. Henderson, V.P., Dr. Lamprey, 67th Regiment, Messrs. T. Hanbury, Morris, Gould, Andrews, Gundry, Alabaster, Jamieson, Anderson, Lieut. Wood, and Captain Drummond, 2nd Belooch Regiment, Messrs. Cull, Thorne, Gamble, Marston, &c., &c.

The following mercantile notices have appeared:—

We have established a branch of our firm in Yokohama under the style of Shaw, Cull and Co., the partners being James Cull, China; Charles Shaw and Co., Liverpool.—Shaw Brothers and Co., Shanghai, 4th July.

We have established ourselves at this port as Merchants and Commission Agents under the style and firm of Strachan and Thomas.—W. M. Strachan, T. Thomas. Yokohama, 1st July, 1864.

We have established ourselves at this place, as Public Silk Inspectors and General Commission Merchants, under the style and firm of Maertens, Latham, and Co.—Aug. H. Maertens, Thos. Stanley Latham.

TRIAL OF THE "TSATLEE" ROWDIES.—THE QUEEN V. KAVANAGH AND MACLEAN.

The prisoners were arraigned on two separate charges, 1st for having, in company with other persons, boarded the *Tsatlee*, assaulted the master, and carried off the vessel; 2nd, with having attempted to deliver her to the rebels, in violation of the neutrality ordinance of 17th January, 1855.

The prisoners pleaded Not Guilty.

Mr. Robinson, who appeared for the defence, objected that

Digitized by Google

the prosecutor ought to elect on what charge the prisoner should be tried.

The Court over-ruled the objection, at the same time promising to take it into consideration as the case proceeded.

Mr. Eames having briefly stated the case for the prosecution, called

Archibald Coomb Lowell, who stated: I was in command of the *Tsatlee* in March last. I recollect the night of the 7th of that month. I was asleep in my berth, when I was awakened by feeling my hands grasped, and, starting up, saw three men in my cabin. I only know the name of one of them. The man who held my hands said that if I kept quiet there would be no harm done. I saw the mate run out of the after-door, and at the same time heard a noise on deck, and the engine working. I was detained in my room till morning. I was several times asked to join the captors, and offered an equal share if I would do so. They said if I would not they would let me go in the morning. After daybreak I repeatedly asked them to release me and the mate, but they each time refused, telling me to hold on a little longer till we had passed the Imperial lines. Shortly after we came to some stockades, and some Europeans on the bank hailed the steamer. I attempted to go on deck, but was prevented. They ran by the stockades, but came to a barrier, which they could not get across; and I then told them that, if they would give me up command of the steamer, I would do the best I could for them when they got back to Shanghai. Whilst they were debating, Captain Curtis was hailing them from the bank. Having taken command, I answered the hail, and went back to the spot where he was standing, and made fast to a gunboat. Shortly afterwards General Ching sent for me, and I went to him. In reply to his question as to what I was doing there, I told him I had come on an excursion. I was allowed to return to the steamer, but was again sent for about half-an-hour later, and questioned as to how I came up, and who were the men I had with me. I asked him to give me a guard to go on board; I told him that they had stolen the steamer and had compelled me to accompany them. He sent the guard, and at my request took the captors out of the vessel. I then asked to be allowed to take the steamer away; but he refused, though he gave me a letter to the Futai asking his will on the subject. The Futai also refused, but allowed me to come down to Shanghai, where I gave my testimony before the United States Consul.

George Murray, the chief mate of the *Tsatlee*, and Stanley Bennett, a captain in the Imperial service, were here examined, and corroborated the above statement in its main points.

Ly-chee stated as follows through the medium of an interpreter: I am a sailor on board the steamer *Tsatlee*. I remember the day was Monday. I don't recollect the date. On Monday morning was anchored off Customs. Came up to tow vessels, and anchored at the Hongque wharf. Three sailors, three stokers, and one cook were on board. The cook asked leave to go on shore. The captain and mate told the men not to keep watch. The cook went on shore, leaving six men on board. We all went to sleep, and then heard a noise; we started up and found the hatches locked. We all slept beneath the hatch. At 7 o'clock (in the morning) the hatch was opened, and we were called up to carry a bag of coals to the engine room. The vessel was steaming at the time. We came to Kahingfoo, near Soochow. The captain went to speak to an Imperial officer there. The steamer was fastened to Ching's stockades; this was between 4½ and 5 o'clock. I carried one bag of coals; six of us went into the engine-room. Nobody was there but the head engineer. I see him in court. The captain or mate did not tell me to do anything at Kahing. After carrying the coals to the engine-room we went below again. We were not told to do so. There were eight persons on deck. The noise by which we were awakened was the noise of the wheels and the engine. I did not hear anyone speak. I am certain we were all below. I had been ten or twelve days in the boat. Some of the strangers gave orders, but I don't know which. No orders were given to me. I heard none given to the others. I was ordered in Chinese by one of the foreigners to carry coals from the after-cabin to the engine-room. We were below at the time. The coal was stowed under the dining table The captain does not understand Chinese. I did not see the person who spoke. I got up and saw that it was not a Chinaman. The engineer never gave orders in Chinese. None of us were ill-treated that night or the following day. The steamer went to Soochow some ten days before. I was taken to General Ching's at nine o'clock in the morning. Nobody tied me up nor threatened to cut my head off. Nobody else was taken to General Ching. A black man took me to General Ching. I had seen this black man before, when he took me at nine o'clock in the evening to General Ching's stockades. I was keeping watch when taken by the black man, and was asked by General Ching whether I knew any particulars of the occurrences on board while under hatches. I told the black man nothing. On hearing the noise at the hatch we stayed for one hour huddled together, being frightened. At twelve o'clock at night we found it shut. I never knew the hatch shut in that way before. The hatch being fastened and hearing the steamer going ahead was the cause of our fear. I heard of no one being tied up at Kahing,

Alum, one of the stokers on board the *Tsatlee*, was next examined:—The steamer used to get up steam at six or seven o'clock and go to Woosung to tow up ships. On Monday (March 7) we went up at one and came back at about four o'clock, and anchored at Hongque wharf. In the evening I was told that the fires were not wanted, but that a little fire should be kept. The men finished work at five o'clock, had chow-chow, and went to bed at eight o'clock. On hearing a noise caused by the engine and the wheels they awoke and tried to get up, but found the hatch shut. They could not get out till daylight, when they were called up in Chinese. They were never called up in Chinese before. There was no Chinaman on board except themselves. They were sent to the engine room to make up the fire. A foreigner sent them to the engine-room. It was neither the captain nor mate. I went into the engine-room: There was the engineer and a foreigner whom I did not know in the engine-room at the time. I do not know either of the three prisoners now in the court. I now recognise the engineer. The engineer told me to put on 60-lbs. of steam. The steamer then went to Kahing-fu. I did not go on shore there. I came back to Shanghai in the steamer.

M. KING, a policeman, stated:—I arrested a man named Kavanagh on the 26th June. He offered resistance, by flinging himself on the ground and throwing mud. This happened not far from the American Consulate. I know he was intoxicated. He said he was an American. He, besides throwing mud, tried to strike me on the head with a handcuff.

Mr. Eames closed the case for the prosecution by an able address. He first referred briefly to the disturbed state of affairs in Shanghai; and urged that their increased importance of late rendered it necessary to exercise double vigilance. He hoped that there were no questions which at first seemed doubtful, that had not been cleared up satisfactorily. After briefly recapitulating the particulars of the case, he added that if the prisoners were not convicted of robbery, which he could not imagine possible, they must be still liable for larceny. Kavanagh was the most guilty of the prisoners; his conduct had been very peculiar on different occasions. The testimony of the crew was also to a great extent against him, as had been satisfactorily shown. In fact, it seemed quite evident that there was a sympathy and understanding between the men that came on board the steamer and the prisoner. It was quite evident that the captain was not a man of ordinary nerve, otherwise he would not have acted in such a quiet way as he did when held by his assailants. He did not doubt that the case for the prosecution had been proved beyond a question.

Mr. Robinson then made a few remarks for the defence. He considered the case for the prosecution one totally unsupported, the evidence being quite contradictory. The prisoners were not guilty of robbery. They were at a great disadvantage, not being in a position to call witnesses for their own defence. He would ask two things, that the cardinal principles of English law might be attended to—that, until a man be proved guilty, he is virtually innocent; and, secondly, he would ask for that justice which it is the prerogative of every Englishman to claim. He must bear testimony to the fairness with which Mr. Eames had conducted the case. It was impossible to understand the captain's conduct. There must have been watches in all the ships around, and assistance could easily have been procured. His anxiety afterwards to have the men arrested was merely moonshine. He had volunteered falsehoods on different occasions, and consequently his testimony could not be relied on. On the part of the prisoners he thanked the Court for the patience they had displayed, and had no doubt that their decision would be favourable.

JUDGMENT.—The Court find that the steamer *Tsatlee* was

Digitized by Google

feloniously and violently stolen, taken, and carried away from this port of Shanghai on the night of the 7th of March ; that this robbery was committed with the foreknowledge and active participation of Kavanagh, and also with the participation in a less degree of Dyas and Maclean. The Court accordingly sentence Kavanagh to twelve months' imprisonment, and Dyas and Maclean to nine months' imprisonment, in H.B.M.'s Consular gaol.

TIEN-TSIN.

The following regulations have been published by the Municipal Council :—At a general meeting of the land renters held at H.B.M's Consulate, on the 1st of June, 1864, the following scale of wharfage dues was agreed upon, and will be levied from and after Wednesday, the 15th of June, 1864, on all merchandise imported or exported, passing into or through the British settlement at Tszechulin. These dues will be collected quarterly.

RATES ON IMPORTS AND EXPORTS.

Cotton piece goods	2	cts. per	50 pcs.
Woollens	1	„	packge.
Cotton mixtures	2	„	„
Velvets, velveteens	½	„	piece
Silk piece goods	3	„	packge.
Nankins	1	„	100 pcs.
Raw cotton, wool, camel's hair	2	„	bale
Cotton yarn	2	„	„
Raw silk	5	„	„
Opium	10	„	chest.
Metals	1	„	picul.
Coals	3	„	ton.
Chinese medicines, fruit, and other Chinese goods	2	„	packge.
Paper	1	„	10 „
Tobacco, window glass	½	„	packge.
Seaweed, rice, sugar, rattans, sandal and other woods, oil, grain and pulse	½	„	picul.
Tea	1	„	„
Timber and planks	2	„	10 feet cubic.
Bricks	2	„	1,000.
Cattle	10	„	head.
Copper cash	1	„	picul.
Stores	2	„	packge.
Personal luggage free	free.		
All unenumerated goods	2	„	packge.

All vessels mooring alongside the Bund at the British settlement Tszechulin shall pay a mooring charge of 5 candareens per register ton.

By order, JOHN HANNA, Hony. Secy., M.C.

HONG KONG.

Dates are down to the morning of Saturday, the 23rd July. The English mail of the 10th June arrived out on the 22nd July. We have a file of the *Evening Mail*, but the items of news are scanty. We make the following extracts :—

The British ship *Euphrates* reports having left Sydney for Hong Kong on the 7th of April, with 79 Chinese passengers. During the latter part of May they revolted, obtaining possession of the boarding pikes, and attempting to murder the captain. A few days after they made another attempt to murder the carpenter and boatswain. Captain Cowen then had them battened down in the 'tween decks, and put into Koepang, a Dutch settlement on Timor Island, where they were handed over to the civil authorities for conveyance by steamer to Singapore to be tried. The attacks were evidently premeditated, as a number of loaded revolvers were found stowed away among the coals.

The British steamer *Dumbarton* reports that she left Glasgow on April 23rd. On the 29th, in lat. 37.34 N., long. 16.23 W., the cross-head guide block set fast, which forced her to put into Madeira to repair. She had to make for that port with only one engine, but arrived on 1st of May ; and having completed repairs, she sailed again on the 4th. Her various stages were made as follows :—Arrived at St. Vincent May 9th, sailed on May 12th ; arrived in Table Bay (Capetown) May 31st, sailed June 2nd for Simon's Bay, where she arrived the same day ; left for Singapore June 8th, arrived there on July 6th ; sailed for Hong Kong July 9th, at 4 P.M., and arrived in the harbour at 8 A.M. this morning, having made the passage in 82 days, including stoppages. She steams fast, and only consumes from 15 to 18 tons of coal a day. During the passage she has had moderate weather, with the exception of the last three days, when it blew very hard, with a heavy sea. She saw the *Trafalgar*, of Sunderland, bound to Hong Kong, outside.

We hear that the contract for the building of the Post-office has been given to a gentleman hailing from the United States. As contracts are generally given to Chinamen, and always actually executed by them, we may safely enough take the liberty of being astonished at this change in the practice that has hitherto prevailed. The contractor in such a case as the present must always be a middle-man, and he can only get a profit by sub-letting the contract, or by some process of nigger-driving with which he is acquainted. In a few weeks the old Post-office will be among the things that were, and a new and larger edifice will rise upon its site. The new building has been planned by the Surveyor-General, and comprises every convenience for accommodating the public and facilitating the duties of the Post-office employés.

SIAM.

BANGKOK.

A Bangkok correspondent writes to the *Java Times* on the 20th June :—

The *Chow Phya* left this last on the 30th ult. for Singapore, taking amongst her passengers H.B.M. Consul Sir Robert Schomburg, whose probable departure was previously referred to, and who left amidst many tokens of the respect borne him by the European as well as native community here. On the passage of the *Chow Phya* down the river, flag after flag of consulates and vessels were lowered in parting salute. Many of the principal residents of Bangkok accompanied the steamer part of the way to the bar, and a sumptuous collation was provided by the Chinese owner of the steamer in honour of the occasion. A few days before Sir Robert's departure he had the satisfaction of ratifying the new Russian treaty.

His Majesty the First King of Siam forwarded by this opportunity, in charge of H.B.M. Consul, an autograph letter to Her Majesty Queen Victoria, the same being conveyed on board the *Chow Phya* by H.S.M.'s steam yacht *Ocean Goddess*, under the customary salute of twenty-one guns and the usual Siamese honours.

Some days ago the calm repose of the Siamese dignitaries was disturbed by the announcement that another and a beautiful specimen of the White Elephant (a superstitious sign of prosperity to the country) had been secured up country, and kings, lords, and commons were compelled to pack up on a hurried visit (we are not informed whether the "gone-on-business-will-be-back-in-a-few-days" card was visible on any of the Government offices) to the noble animal, pronounced by one and all to be an exceedingly fine one. Preparations on a grand scale are making for the state entry of same into the capital. His Majesty the First King is expected back to-day.

The Siamese steamer *Illustrious Conqueror* went down the river on the 14th for a cruise outside in the gulf, in search of a lorcha commanded by a Maltese gent, reported by some Chinese junks as having committed sundry piracies, and as this is very probably true, we hope soon to hear that a stop has been put to such misdeeds.

On the 1st proximo we learn that an English newspaper is to be printed and produced here. This will be a great boon, provided management of same is conducted in a proper manner, due allowance being made for any little scandal (though in such a small community it will be difficult to have any) and private feeling. Could some articles be provided in the Siamese language and character, doubtless many of the nobles and people would patronise it, anxious as they always are to be informed on European matters. A copy of first issue will be duly forwarded to you, though as we have no "*Tweede kamer*," no such slashing articles as your contemporaries in Java can furnish you with, anent such subjects as "schutterijen" and "Batig saldo," must be looked for.

Trade remains brisk, as many vessels are arriving from day to day to load for China. Rice has again advanced a little. Tonnage plentiful. Last rates 50 cts. all round to Hong Kong for rice. Exchange on Hong Kong, 5 per cent. discount 30 d/st. ; on Singapore, 1 per cent. discount 10 d/st. ; on England, 2/11 p tical 6 m/st.

JAVA AND NETHERLANDS INDIA.

Our dates are to the 26th July. The European mails of 10th June reached Batavia on the 18th July, and those of the 17th arrived on the afternoon of the 23rd July.

The British brig *Alicia Annie*, belonging to Liverpool, Wm. Kirby, master, from Manila for London, with a cargo of sugar, hemp, and sapanwood, has put into Batavia to repair damages, having been in collision, at 1 A.M. on the 22nd of June, with a vessel unknown, in lat. 2 deg. 54 min. N., long. 108 deg. 26 min. E. The captain reports that, after the vessels got clear of each other, the stranger bore away without offering the least explanation, though the blame was entirely on his side.

The *Javasche Courant* reports the loss of the Oldenburg ship *Australia* on one of the Kangean Islands. The ship was plundered by pirates, notwithstanding the strenuous efforts of the crew to save both her and cargo. The steam tug *Eersteling* has been sent to her assistance.

The British ship *Wolverene*, from Adelaide, has brought a cargo of Australian horses and sheep.

A correspondent, signing himself "T. M.," writes as follows to the *Locomotief*, on "the cultivation of silk in Java :"—

The introduction of a new branch of industry is not without its difficulties, more especially when, as is generally the case, public opinion characterises such as needless waste of money, time, and trouble. Never have worse results been foretold than in the case of the attempts now made to introduce the culture of silkworms. Remembering the scant success which had attended former attempts, people were led to regard the hope of a future production of silk on the island as a fallacy. The difference between the former and present attempts was lost sight of. Was the Siam silkworm known in former years? Was the cultivation of the *Bombyx Cynthia* and *Bombyx Arrindia* thought of? Was any effort made to utilise the many varieties of the Java silkworm? These questions may, I believe, be all answered in the negative; for, if I mistake not, all trials were made with the Chinese and European *Bombyx mori* only.

The last attempts on the contrary were made with the tame silkworm of Siam, and with several varieties of what is known as "wild silkworms." The cultivation of the tame and wild species differs greatly; most of the trials were made with the first.

It is generally known that the Siam silkworm was brought over to Buitenzorg by Mr. J. E. Teysman, Honorary Inspector of Cultures, in 1862. The first results were made public; not so those latterly obtained. In the commencement of 1863, Mr. Teysman showed me the small establishment for the culture of silkworms which he had just erected. It consisted of two small buildings, constructed of bamboos, the sides worked in the Kepang pattern, with roofs of atap. The surrounding grounds (some two and-a-half to three bahoes) were planted with mulberry trees (*Morus indica*), and in the immediate vicinity was the dwelling of the Cochin-Chinaman André Locas, who, with his household, had the care of the worms. Everything was simple, and arranged in the Chinese fashion. One of the erections served for the development of the worms, the other for the winding and for the preparation of the cocoons. The whole establishment, inclusive of the plantation, I computed to have cost *f.* 400; and at the end of one year Mr. Teysman had the satisfaction of being able to bring to market 80 lb. (Amsterdam weight) wound, and 89 lb. of floss silk, which were sold on the 24th December last at Batavia for the sum of *f.* 400. This year's yield will be still greater, for now, after a lapse of six months, 50 lbs. (Amst.) of wound, and much more floss silk, have been offered for sale.

But not only at Buitenzorg were favourable results obtained; at Samarang too, and at Malang, the trials were attended with success. The degeneration of the worms which was so much feared is nowhere visible; the cocoons have, on the contrary, increased in size since the worms have been carefully tended. The quality, too, of the silk is better. The first musters sent to Europe were taxed at *f.* 10 to *f.* 12 per kilo; the Buitenzorg silk fetched, at the auction alluded to, the average of *f.* 14¾, whilst a muster lately sent to Europe was valued in France at *f.* 22 per half-kilo. I believe that the facts here spoken of are so many reasons for asserting that a lucrative culture of the silkworm is not wholly imaginative. Mr. L. Weber says, on the subject, in the introduction to his *Handleiding voor eenige kultures op Java* (Handbook of Cultures in Java), "that the culture of the silkworm will in time be a means of existence for the European as well as for the Malay, as will certainly be experienced by those who apply themselves to it; from the results which I myself have obtained, I do not hesitate to recommend its extension, and am convinced that the aid of our rulers may be reckoned upon."

Government, which lost such heavy sums with former attempts, is, we are informed upon good authority, endeavouring to introduce the culture of the Siamese silkworm on a large scale, the inducement to do so being the fortunate results which have attended the late trials. Already the planting of mulberry trees in the residency Krawang has been commenced. Private industry, too, should devote more of its attention to the subject. Not that it is necessary to erect extensive and costly establishments; it is sufficient if many small and inexpensive ones be founded; favourable results will then lead to extension. The trials with the so-called "wild silkworms" are not yet so far advanced. Although several trials on a small scale have been successful, the varieties of the worm are so numerous as to make it difficult to decide as to the best. Of the known varieties of the wild silkworm, not less than ten sorts might be used for spinning purposes in Java. In other tropical countries, as Surinam (Dutch Guyana), the Argentine Republic (la Plata?), and in Brazil, the *Bombyx Cynthia* and *Arrindia* have already been introduced; but Java herself has many silk-spinners, which are found in a wild state, and perhaps one or other of these deserves the preference above the two just named.

MALACCA STRAITS.

SINGAPORE.

The dates are down to the 30th of July. The ex-Sultan of Lingga, who has caused us some trouble, is dead. The weather has been very hot, dry, and dusty. There are no items of news to be gathered from the *Singapore Free Press* of the 28th, which is the only paper we have.

The following items reach us from Bombay :—

"A sanguinary affray between a number of Chinese coolies, imported into Bombay by W. Nicol and Co., and a number of townspeople, took place in Bombay on the 5th of August, when two men were killed and a number of persons were seriously injured.

"A corps of Muzbee Sikhs is to be raised and officered for service at Singapore in guarding the convicts there.

"The *Ta-pang-Nyo*, a screw steamer of 527 tons burthen, commanded by Captain Grindle, has made the passage from England to Bombay in 51 days and 4 hours, being the quickest passage on record. The vessel proceeds to China, where she is owned."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTH.

NIESEN—At Rhio, on 22nd July, Mrs. C. A. Niesen, of a son.

MARRIAGE.

PRICE—PATRIDGE.—On the 13th July, at the British Consulate, Ningpo, J. F. Price, of the firm of Price and Co., at that port, to Helen Jessie, eldest daughter of the late Andrew S. Patridge, of Madras.

DEATHS.

BOSWELL—At Shanghai, on the 8th July, of cholera, U. R. Boswell, of the Footai's service, Soochow Arsenal.

CRUMPTON—At Shanghai, on the 6th July, of cholera, William Crumpton, in the employ of Nicholas Stubldt.

FISHER—At Shanghai, on the 6th July, of cholera, on board the Floating Hospital, Richard Fisher, Runner for the Sailors' Home.

JACKSON—At Ningpo, on the 5th July, James Cole Jackson, B.A., B.Sc., and B.LL. Born at Kingston, Jamaica.

MADDEN—At Shanghai, on the 12th July, at the Hospital, Richard Owen Lloyd Madden, Lieutenant of H.M.S. Osprey, aged 23 years.

OLIVER—At Shanghai, on the 7th July, of cholera, J. Oliver, assistant to Messrs. Grumel and Chausse, photographers.

THOMSON—At Shanghai, on the 9th July, at the Victoria Hotel, George Thomson, mercantile clerk, of heat apoplexy.

WILDE—At Shanghai, on the 4th July, of cholera, Napoleon Wilde, master of the steamer Nora Crcina.

WOODRUFF—At Shanghai, on the 16th July, Samuel C. Woodruff, of Southampton, Long Island, U.S.A., aged 53 years.

SHIPPING INTELLIGENCE.

ARRIVALS.

AT SHANGHAI.—From London: July 2, Yaratilda and Solent; 6, Lady McNaughten. From Liverpool: 4, Madagascar. From Sunderland: 2, Royal Mint; 5, Comus. From Dartmouth: 3, Prince Kung (steamer). From Bristol: J. Stanton, Jun. From New York: June 30, Leopondine, Baner; and, July 3, Moyone (steamer).

AT HONG KONG.—From London: July 15, Lord Raglan. From Liverpool, 16, Verbena. From Glasgow: 16, Dumbarton (steamer). From Sunderland: 18, Trafalgar and Aboyne. From Shields: 18, Carisbrook. From Cardiff: 19, Quick and Beatrice; 20, Ocean. From Newcastle: 20, Orion. From New York: 12, Promise (steamer); 15, White Eagle.

AT SINGAPORE.—From Newcastle: July 24, Eddystone.

DEPARTURES.

From SHANGHAI.—For London: July 1, Taeping; 8, Pegasus and Robert Lowe (str.), Silver Eagle and White Adder; 11, Highflyer; and 12, Fychow. For Liverpool: 4, Surry; 8, Affghan.

From HONG KONG.—For London: July 13, Marlborough. For Liverpool: 14, Jessie Beazley. For New York: 15, Cornelia.

From SINGAPORE.—None.

LOADING.

At SHANGHAI—For London: Assyrian, Caractacus, Castle Howard, City of Quebec, Essex, Gresham Knight Templar, Shakespeare, and Southern Cross. For Liverpool: Brockham, Hougoumont, Sea Snake, Southern Empire, Thomas Bell and City of Quebec.

At FOOCHOW.—For London: Canute, Childers, Dartmouth, Holmsdale, Red Riding Hood, Star of China.

At HONG KONG.—For London: Adriatic, Benlomond, Cathaya, Coulnakyle and Yeavering Bell. For Liverpool: Chaa-sze, Delhi, General Windham and Lord Dalhousie.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—July 2, Stanley, Sunderland to Shanghai; Marave, Liverpool to Shanghai; 6th, Perle, Bordeaux to Saigon; Delhi, London to Shanghai; 7th, Fluro, Liverpool to Singapore; 10th, William Cundall, Liverpool to Singapore; Palawan, Sunderland to Hong Kong; and Milton, Liverpool to Hong Kong.

From UNITED STATES to CHINA, &c.—July 7th, Cleiro Babioyan, New York to Shanghai.

From CHINA, &c. to ENGLAND and CONTINENT.—July 4th, Cerica, Foochow to London; Petronella, Bantam to Amsterdam; 10th, Esperanza, Singapore to Europe; Patriot King, Manila to Liverpool; 14th, Scawfell, Canton to London; 17, Invincible, Singapore to Liverpool; Chanaral, Sarawak to London; and 18th, Dewa Gungadhur, Singapore to London.

From CHINA, &c. to UNITED STATES.—July 4th, Ocean Home, Singapore to New York; and 9th, Trofrie, Manila to New York.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Sept. 1, at Havre, from Rangoon, Verena Collet; Aug. 23, at New York, from Foo-chow-Foo, Eva; from Shanghai, Egean; Sept. 3, at Deal, from Batavia, Baltimore; 2, at Falmouth, from Maulmain, Clontarf; from Akyab, Dagmar; 3, off Falmouth, from Akyab, Louis Henry; at Liverpool, from Rangoon, Uncowah; from Akyab, Exodus; 2, at Queenstown, from Akyab, Fanny Buck; 1, at Brouwershaven, from Batavia, Francina Wilhelmina, Dordrecht; from Tjilatjap, Jacob; 2, at Falmouth, from Rangoon, Skane; 4, Union, Wildflower; 2, from Akyab, Anna Decatur, Brandon; from Bassein, J. L. Baker; 4, from Maulmain, Salween; from Akyab, Herbert; at Deal, from Singapore, Hindoostan; from Rangoon, Agra; 5, at London, from Shanghai, Rajah (str.); 2, off Falmouth, from Iloilo, P. C. Kinch; 2, at Scilly, from Manila, John Banfield; 4, at Liverpool, from Shanghai, Express; Aug. 27, at Bordeaux, from Singapore, Java; Sept. 4, at Falmouth, from Akyab, Kooria Mooria; 5, at Falmouth, from Bassein, Norwegian; from Akyab, Southern Chief; at Queenstown, from Akyab, Solo; 3, at Bremen, from Rangoon, Matador; 5, at Liverpool, from Akyab, Eddystone; from Rangoon, W. C. Libbey; 6, at Deal, from China, Ethel; at London, from Kanagawa, Meppel.

DEPARTURES.—September 2, from Liverpool, for Hong Kong, London; 1, from Shields, for China, Daybreak; August 31, from Sunderland, for Shanghai, Appelina; July 26, from Rio Janeiro for Batavia, Philip V. Marnix; August 1, from Bahia, for Singapore, Johore, (str.); September 3, from London, for Shanghai, Cissy; 2, from Shields, for Singapore, Britannia; 3, from Liverpool, for Hong Kong, Albertina (late Agamemnon), for Singapore; for Singapore, Veloz; 2, from Shields, for Shanghai, Adelina.

SPOKEN.—Maria and Elizabeth, Rotterdam to Batavia, June 29, 18 S., 31 W.; Pak Wan, London to Hong Kong, July 30, 5 S., 33 W.; Spirit of the North, Shanghai to London, August 18, 44 N., 26 W.; Glasgow (str.), Clyde to Manila, August 14, 47 N., 14 W.; Insulaneren, Cardiff to Singapore, July 30, 10 N., 25 W.; Koophandel, Batavia to Rotterdam, July 31, 11 N., 24 W.; Doesborgh, Batavia to Amsterdam, August 17, 24 N., 32 W.; Theodore Dill, Batavia to Rotterdam, July 22, 18 S., 3 W.; John Ripon, Sunderland to Singapore, July 22, 3 N., 22 W.; Ranee, Liverpool to Singapore, August 8, 14 N., 24 W.; Queensberry, Liverpool to Shanghai, August 1, 11 N., 26 W.; Twilight, Liverpool to Shanghai, July 28, 5 N., 23 W.; Catharine, Batavia to Amsterdam, August 13, 30 N., 38 W.; Conubia (?), Fr. barque, Saigon to Marseilles, August 11, 36 N., 12 W.; No. 7,840 3rd d.p., from Macao, August 6, 22 N., 34 W.; Baron (?), Batavia to Dordt, July 14, 17 S., 5 E.; Madura, Java to Amsterdam, July 29, 10 N., 27 W.

CASUALTIES.—The Arab, from Liverpool to Singapore, which put into Rio Janeiro 22nd July, leaky, and with part of cargo thrown overboard, has been surveyed and recommended to be discharged.

The Coulnakyle, from London to Shanghai, has had to put into Hong Kong, in distress.

At St. Vincent.—July 27: Fire Queen, (st), Johnson, from New York, and left 5th August for China. July 23: Glengyle, (st.), O'Sullivan, sailed for China.

At Mauritius.—July 6: Amanda Petit, from Singapore; 15, H.M.S. Vulcan, Strode, from Hong Kong, sailed 19th for Portsmouth, with troops. August 1: H.M.S. Adventure, from Plymouth, for China July 25: Malta, Duncan, from Singapore; 23, Meander, Harvey, from Singapore; 16, Corea, (st.), from Southampton for Japan.

The London & China Telegraph.

LONDON, TUESDAY, SEPT. 6, 1864.

THROUGH SIBERIA TO CHINA.

In our last issue we noticed a communication in *The Times*, describing a journey from London to Peking. The writer stated that he believed he was the first traveller over the route from London. The following letter has appeared on the subject in *The Times*:—

Sir,—In *The Times* of Friday, the 26th inst., I observe a communication "From a Correspondent," a traveller to China through Siberia. Although generally pretty correct in the information given, yet there are some mistakes which I desire to point out.

Having been engaged in gold-digging operations for upwards of ten years in Eastern Siberia, I am perfectly acquainted with all parts of the country, and have travelled from west to east and from south to north for thousands of miles (in fact, few, if any, have travelled there so much) in the Wilderness (there called *Tàïga*, a Tounguss word, meaning uninhabited part) on horseback, in rude palanquins slung between two horses, with reindeer in exploring expeditions, down the Lena in post boats, with bells tinkling attached to the oars (a distinctive appurtenance to all post boats on Siberian rivers), and on the Angara from its outlet in the Baikal to its confluence with the Enisey, a distance of 1,800 versts (or 1,200 miles English), down its 78 falls and rapids (never done before by any foreigner or European, except by a very few Russian Government officials, for topographical purposes), this latter journey undertaken on an exploring expedition, not alone for gold seeking, but more for a scientific purpose, combined with commercial enterprise. On all these journeys, except the latter, I was accompanied by my wife, an English lady, who, although during all her married life in very weak health, went through all the fatigue most heroically. In 1862, at the end of July, we left Krasnojarsk, and proceeded through Irkutsk to Kiakhta, over Mongolia to Peking, where we arrived at the end of October same year. We were hospitably received by Sir Frederick Bruce, at whose residence we stopped some days, and then proceeded with an escort over Tanchow, further to Shanghai, next spring returning to Peking, where we remained till August; thence again to Shanghai; and in October, 1863, left for England round the Cape. The journey through Mongolia and China was undertaken to mark out the route of a proposed telegraph line, projected by Mr. J. Reuter, of London (solely at his expense), and to procure the permission of the Chinese Government for establishing this line from the southern ports of China over Peking, through Mongolia, and in Siberia to join the Russian telegraph, a permission unfortunately refused by the Chinese Government, although the proposal was backed by the representatives of the principal foreign Powers at Peking. After this, you will perceive I have some right to a knowledge of the route.

Your correspondent mentions that from Perm a post cart is given from every station to the next gratis; for every station long or short, whether a half-covered cart (kibitka) or uncovered, you have to pay 12 copecks (about 8d.), and cheap enough. A tarantass (a very comfortable travelling equipage) you either purchase for about £12 to £15 English money, or engage one for the whole route of a contractor, and have only to pay besides for the greasing of the wheels, a mere trifle.

General Korsakoff (not Karzakoff) introduced me at Irkutsk in his own house to the Commissary of the frontier, M. Pfaffius. The latter gentleman, a Pole, with the greatest kindness wrote to Kiakhta to have two of the Chinese carts he had bought of M. and Madame Bourboulon and Madame Baluzeque, as they then became perfectly useless to that party, accommodated for our use, and this was done in a most comfortable and convenient manner, combined even with elegance, for which I paid about £18 sterling, and resold them at Kalgana for about £7. He, however, returned to Kiakhta before our departure thence, and was kind enough personally to superintend our starting for Mongolia and China. At that time there was a Governor there, M. Despot-Zinovitch, originally, I was informed, a Polish exile, a most polished and perfect gentleman, speaking many foreign languages, who, by directions from General Korsakoff, furnished us with a Bouriat Cossack as interpreter through Mongolia as far as Peking. Now, how your correspondent could imagine he was the first Englishman who went that route, one year or more later, or how Mr. Pfaffius could have told him so, as he writes, I cannot imagine.

At Yurga we stopped at the Russian Consulate three days, a courier having been sent forward by Colonel Babarikin, the Russian Consul-General there, to whom I was also introduced by General Korsakoff at Irkutsk, to have his house prepared for our reception. Major Shishmareff, the Vice-Consul, speaking no other language but Tuss, Mongol, and Chinese, most likely could not communicate sufficiently with your correspondent to make him aware of not being the first. I must undoubtedly claim for myself, and most particularly for my wife, the merit of the enterprise of being the first English persons who crossed the desert of Gobi, &c., from Siberia to Peking, none but Russians attached to the mission at Peking having crossed before. Mr. Grant, the first Englishman, from Peking to Siberia; and Mesdames Bourboulon and Baluzeque, the first ladies—these all arriving the beginning of July (O. S.), 1862, at Krasnojarsk, where we met them. We left the end of the same month. Another mistake.—The pass over the Kingan Mountains dividing Mongolia from China proper is not 5,400 ft. above the level of the sea, but above the level of the plain below, the table land of Mongolia and desert of Gobi being from 12,000 to 14,000 feet above the level of the sea. A much more dangerous and precipitous passage is within 20 or 25 miles of Peking (about 150 miles further), descending altogether from the mountains. I travelled with a passport from Lord Napier, our Ambassador at St. Petersburg, and only had the passport for conveniency, and through the politeness of the Governor, Monsieur Zinovitch, translated into Mongol and Chinese, and at his desire the Chinese authorities at Mac-Matchi sent forward couriers to insure our reception and kind treatment at all Chinese stations and towns, as he considered that our being the first foreigners going that route we might meet with difficulties from the Chinese mandarins, and even not be allowed to proceed. Further, all the English gentlemen who returned from China over that route in 1863 did so by my advice and from my directions. Some of them are now here, and can testify to the same.

Should you deem this communication worthy of a place in your valuable paper I should feel much obliged.

I am, Sir, yours obediently,

Wall Cottage, Twickenham, Aug. 29. EDWIN E. BISHOP.

The following letter from Mr. Howell has also been published:—

Sir,—In Mr. Bishop's letter of the 29th of August, published in *The Times* this morning, he alludes to "the English gentlemen who returned from China over the Mongolian route in 1863," and states that in doing so "they were guided by his advice and directions." He further claims the honour, which undoubtedly belongs to him, of being the first Englishman who made the overland journey from St. Petersburg to Peking. Being one of the party alluded to, I have great pleasure in corroborating Mr. Bishop's statements, and in acknowledging the full and accurate information he gave me while organising the expedition upon all points connected with our journey. His perfect knowledge of the Russian language and intimate acquaintance with the whole of Eastern Siberia made him a fitting pioneer of this route to China, and his experiences being quite fresh when I consulted him, in January, 1863, I found his information perfectly correct in every particular.

I strongly recommend all travellers from Peking to Kiachta to make their arrangements for crossing the desert at Tungchow, a short distance from the capital and the great station from which the tea-caravans are despatched for Siberia. They can appoint a day of meeting at Kalgan, the frontier town, and proceed thither from Peking in mule litters, stopping a day at Champing-Chow to visit the Ming Tombs, which are objects of the highest interest, and reconnoitring the wonderful remains in the Nan-kow Pass, terminating at the village of Cha-tou. They should so arrange as to have two or three days at Kalgan, to explore the monasteries in the neighbourhood, and especially the Great Wall of China, which runs through the town and over the mountains on both sides of it. We were detained there three weeks by the difficulty of getting camels, which, after all, we were forced to purchase at exorbitant prices, instead of hiring them, which we could have done at Tung-chow. The customary rate of hire is from 12 to 15 taels per camel; whereas we were forced to pay 45 taels a head for the camels, two of which were lost on the journey, the other eight realised three taels a head at Kiachta. On one occasion our whole train of camels bolted during a night stage in the middle of the desert, and we had the greatest difficulty in tracking them; our tents, provisions, and bedding were strewn in all directions on the plain, and it cost us eight days, in addition to much hard work and anxiety, to recover our beasts and their sadly diminished burdens.

Mr. Bishop seems to me to err in correcting your correspondent on the subject of the height of the Kingan-pass. By the kindness of Brigadier-General Stavely I was furnished with the valuable sketch of the route from Peking to Kiachta, published by the Topographical Department of the War-office (without a copy of which I recommend no one to start on this journey), and in this sketch the height of the pass is given at 5,400 ft., agreeably to your correspondent's statement. Mr. Bishop gives the height at 12,000 ft. to 14,000 ft. above the sea-level, which, for several well-known and sufficient reasons connected with the physical conformation of this part of Asia, I apprehend is a mistake.

I am, Sir, your very obedient servant,

The Hurst, West Moulsey, Sept. 1. W. G. HOWELL.

Naval and Military.

The 1st company of Royal Engineers has received orders to undergo a course of field-work instruction and sapping and mining at head-quarters, Chatham, previously to embarking for colonial service. The 1st company, now stationed at Devonport, will be relieved by the 8th company of Royal Engineers, now on passage home from China, and shortly expected to arrive at the Royal Engineer establishment, Chatham.

On Saturday, the 27th August, the Royal Sovereign turret ship, Captain Sherard Osborn, C.B., started from Portsmouth for Portland on her first cruize since her conversion to a turret ship. The dockyard mechanics were at work on board the ship in Portsmouth harbour at 1 P.M., but at 6 P.M. the ship was rid of them and steaming out of the harbour. That night she anchored in the Solent. On Sunday morning the anchor was weighed, and [with three boilers out of her six, working at the lowest

Digitized by Google

grade of expansion, the ship steamed through the Needles against a fresh breeze, making 5.4 knots. The same day she anchored in Portland Roads, and remained at anchor till Tuesday morning, the interval being occupied in clearing up ship and setting matters straight. On Tuesday morning steam was got up in two boilers, the anchor weighed, and the Royal Sovereign steamed about the bay between Portland Roads and Weymouth, her crew being exercised in bringing the ship to anchor and weighing again under different circumstances. During Tuesday night it blew very heavy from about S.W., and continued to do so the following day. On Wednesday morning steam was got up in four boilers, two-thirds power, and the ship was taken outside, and off the Race made a good eight knots against a strong wind and a heavy head sea. Captain Osborn then took the ship into the Race, and when fairly in the midst of the roughest water put her broadside to it and let her roll and tumble about as she pleased in order to test her turrets in as conclusive a manner as possible. The vessel rolled quickly 11 deg. to leeward and 10 deg. to windward, and under these circumstances the turrets and guns were manned, and the former revolved and the latter run in and out as would have been the case in action with an enemy in the same position and under the same conditions. It was found that the turrets were perfectly manageable, and the guns could be handled with the same ease as in smooth water, excepting, of course, that a little more care was required from the men in working them. The ship being still kept in her rolling position the guns in the turrets were next trained nearly fore and aft, the winch handles let go and breaks slacked up, and turrets and guns left to themselves, the ship rolling in an arc of 21 degrees. As, however, everything remained immovable, and it was found that the men could take hold of the winch handles and set the turret revolving, or leave them as they pleased, without leaving any check upon the turret's movement, this was deemed both by Capt. Osborn and Capt. Coles quite sufficiently conclusive of the turrets' steadiness and working under as almost unfavourable conditions as could be met with, except in a gale of wind. The guns were secured, and the Sovereign returned to her anchorage in Portland Roads, where, as she lies at anchor, she has the look of a monster gunboat, and as a gunboat simply has she been handled by Capt. Osborn since leaving Portsmouth harbour. In steaming through the Solent on Saturday the Royal Sovereign's steering gear from the pilot-house forward answered admirably, and the vessel answered every movement of her rudder as quickly as a wherry could have done.

The history of the celebrated rams El Tousson and El Monassir is well known, and their future career, under the names of the Scorpion and the Wyvern, will also be watched with interest, the greater because of their former history. Both are now national property. On the 8th ult. they were placed in the hands of Messrs. Laird Brothers, their builders, for completion. They had suffered some injury from their long exposure in the open river, but Messrs. Laird used great despatch, and on Tuesday the Scorpion took the builders' trial trip. The Wyvern will follow in a few weeks. The following description of the vessels (sister ships) and their armament will be interesting:—Each has length on water-line, 224 ft.; beam, 42 ft. 6 in.; depth, 20 ft.; measurement, about 1,890 tons. Their engines, also manufactured by Messrs. Laird Brothers, are 350-horse power, on the horizontal principle, with double piston rods. The cylinders are 56 in. long, with a 3 ft. stroke. There are four distinct boilers, which may be used separately or together, and 16 furnaces. The whole of the machinery is below the water-line. The ordinary hull is of iron, of extra strength; over this is a coating of 10 in. of teak and armour-plates 4½ in. thick, nearly the whole length of the side, but tapering in thickness at bow and stern. The stem curves outwards five feet below the water-line, and, being formed of massive wrought iron, forms a ram of immense penetrating force. This prow, as regards the propulsion of the vessel through the water, really forms part of the hull. The stern is shaped with the view of protecting the screw propeller and glancing off shots. The whole arrangements display a great combination of strength. There are two turrets, the greater portion of which is below the main deck, with two guns to each. These towers are built on a strong iron spindle fixed to the vessel, and their enormous weight is supported by a number of roller wheels. The plating of the turrets is 5½ in. thick. Each turret will be mounted with two guns, each weighing 12 tons. The guns will be placed parallel to each other, and only six men will be required to man them—three to each gun. The accommodation for officers and crew is ample. There is a steering apparatus on the main deck. The trial was conducted in private, but Messrs. Dinney and Hobbs, Admiralty Inspectors, were present. The Scorpion, with 200 tons of coal on board, drew 13 ft. forward and 14 ft. 9 in. aft. Her steering qualities were found to be admirable, and she made a complete circle in an average time of five minutes. The Government inspection is expected to take place shortly. The following is the official report of her achievements:—"The exact speed of the ship was tested by running between the Queen's Channel Fairway buoy and the Victoria Channel Fairway buoy, a distance of 0·906 of a knot. This was done first at full power, all four boilers being at work, and afterwards at half power, with two of the boilers shut off. The result of the trial at full power was as follows:—First run, 10·036 knots; second run, 10·945 knots; mean of the two, 10·490 knots. During these runs the engine made from 69 to 70 revolutions, the pressure of steam being about 18 lb. to 20 lb. The trial with two boilers gave the following results:—First run, 10·192 knots; second run, 9·292 knots; mean of the two runs, 9·745 knots; engines making 59 to 60 revolutions, with 14 lb. to 15 lb. of steam." The starting gear of the engines is worked by a small engine, instead of by hand, which gives the engineers a great command over them. In reversing, the plan was found to work admirably.

REINFORCEMENTS FOR CHINA.—It is stated that Her Majesty's troop-ship *Tamar* is ordered to be ready at Portsmouth about the middle of October, to embark troops for Hong Kong. Lieutenant H. G. Thompson, 1st Battalion 1st Royals, has been appointed aide-de-camp to Major-General Guy, C. B., the new commander of the troops in China.

MEXICAN DOLLARS.

The large amount of Mexican dollars by the *Shannon* were sold for China at 5s. ¾d. per ounce, showing a reduction of 1¼d. Considering the expected arrival of the steamer *Plantagenet*, from Vera Cruz, with a further total of £100,000 in this coin, the rate now obtained is considered satisfactory. The value of this coin is also prejudiced by the announcement from Shanghai that considerable supplies were being melted into bar silver, owing to the latter carrying a premium.

ANOTHER VESSEL FOR THE CHINA TRADE.—The *Lydia Hilton*, a fine little clipper of 148 tons register, classed A 1 10 years, built for Messrs. Henry Vickers and Co., London, was launched by Messrs. Pickersgill, of Southwick, on the 24th ult. Her dimensions are:—Length of keel and rake of stem, 97 feet; breadth of beam, 22 feet; depth of hold, 10 feet; and 216 tons builder's measurement. She is full coppered, and is for the China trade; she is a three-masted schooner, and is the smallest vessel ever built on the Wear for the China trade.

THE BISHOP OF VICTORIA.—The Bishop of Victoria has just returned from a tour in the north of Europe; during which he held confirmations under commission from the Bishop of London, at Dunkirk, Hamburg, Copenhagen, Gothenburg, Christiania, Stockholm, Rige, Berlin, and Dresden. On the 25th of July the Right Reverend prelate, previous to his continental trip, also held an ordination at Islington under commission, at which eleven missionaries of the Church Missionary Society were admitted to the Ministry of the Church for stations abroad. One of the number, the Rev. C. F. Warren, has been designated for Hong Kong, and is expected to sail for China in the early part of September.

COTTON FROM THE PACIFIC.—Among the other places where the cultivation of the cotton plant is spoken of as successful (says the Commercial Article of the *New York Herald*) is the Sandwich Islands. In the Island of Tahiti the experiment in its growth has been eminently successful. Surrounded by water, the atmosphere is necessarily moist; near the equator it is abundantly hot; and the only remaining requisite, labour, is secured from the natives, through the great rewards which it secures in the high prices which cotton now commands. So great has been the success of the experiment that increased preparations are making for another year, and it is confidently expected that cotton will henceforth be one of the great staples of the Pacific Islands. The new line of steamers about to commence running between New Zealand and Panama affords an outlet for the cotton grown there, and it can easily be shipped from Panama to Europe or New York. Many of the South Sea Islands, as favourably situated as Tahiti, will also engage in the cultivation, which will tend to lessen existing cotton rates. Those islands which are now occupied by cannibals, it is confidently expected, will be reclaimed by enterprising emigrants, induced by the natural facilities for cotton growing, and the high prices paid for the staple; and thus the middle Pacific will become civilised and productive. Nearly all of the Pacific Islands are possessed of great agricultural as well as commercial advantages, which time and application will develop and reward. A late Panama steamer brought two thousand and six bales of Pacific cotton, of which eleven hundred were shipped to New York.

WOOL-FLAX A SUBSTITUTE FOR COTTON.—The importance of wool-flax (says a New York journal) promises to rapidly grow in the public appreciation, when its merits become a little better understood. We learn that there is a manufactory in Dayton, Ohio, where flax is converted into this material, more commonly called "er-o-lin," which takes the place of cotton in the extensive and important manufacture of "mixed goods." It has been in practical use for a year or more, and the concern finds ready market for all it can produce. It can take the place of cotton in all mixed fabrics in which cotton and wool form the component parts. It has the remarkable property of being worked in any proportions, with, and exactly like wool—an advantage that no other vegetable fibre possesses in a very great degree. The machinery now set up in Dayton works up several tons of raw material per day into flax-wool. In use, spinners treat it precisely as they do sheep's wool, and twenty-five to thirty per cent. can be added without interfering with the fulling or felting of the cloth, while its presence in the fabric can only be detected by experts. It gives strength and firmness to the cloth, and, it is supposed, will add to its wearing qualities. Though it has not been spun by itself, it is said that it will only require a slight modification of the railway heads and draw-frames of the cotton spinners to produce a yarn of ordinary fineness.

VESSELS EXPECTED.

(Exclusive of this day's advices.)

From JAPAN.—At LONDON: Meppel, Witness, Lady Ebrington, Twe Cornelissen, Patricia, Merse, Harwood, W. W. Smith, Red Deer, and Ann Adamson. At LIVERPOOL: Marion, and Vampyre. At FALMOUTH: Auld Reekie. At NEW YORK: Osborne.

From CHINA.—At LONDON: Ethel, Monarch, Belle, Benvoirlich, Sea King (str.), City of Aberdeen, Yang-tsze, Fiery Cross, Flying Spur, Serica, Min, Young Lochinvar, Belted Will, Robin Hood, P. J. F. Burchardt, Keepsake, Echo, Chandanagore, Rajah (str.), Volunteer, Aunt Lizzie, Holmesdale, Rifleman, Isabella Robinson, Zelia, Vimeira, Zarah, Lady Wharncliffe, Gloucester, Lorton Vale, Iceni, Netherby, Sarah Ralston, Wm. Thompson, Marlborough, Robt. Lowe (str.), Ellen Rodger, Dora, Whinfell, Glenaros, Ocean Queen, Theodore and Julie, Amelia, Magnus, Josephine, Glaramara, Sappho, Charles Davenport, Bahia, and Osborne House. At LIVERPOOL: Geologist, Simoda, Cyclone, Fanny, Joshua Bates, Wm. Dawson, Lauderdale, Ziba, Glencoe, Neville, Cornelia, Inamhore, Express, Mayflower, Regina, Edward Percy, Henriette Cornelis, Victoria, Montgomery, Unrivalled, Glenlee, Helvellyn, Australia, Eliza Nicholson, and Ann Forster. At FALMOUTH: Divina, Panama, and Linda. At ENGLAND: H.M.S. Vulcan. At BORDEAUX: Johanna. At HAMBURG: Mecklenburg, and Gravina. At NEW YORK: Eva, Dorchester, Egean, Regnago, St. Paul, Luson, Anita, Gleam, and Mandarin.

From MANILA.—At LONDON: Alavesa and Cambodia. At LIVERPOOL: Diadem, Trafalgar, Patriot King, Alicia Annie and Barinaga. At FALMOUTH: Der West, Canaan, and Albuera. At COWES: John Banfield. At QUEENSTOWN: Victoria Cross. At HAVRE: Nouvelle Antoinette. At NEW YORK: Tropic and George Peabody.

From SINGAPORE.—At LONDON: Oscar, Confidence, Pet, Polly, Invincible, Daniel Rankin, Bonanza, Miss Nightingale, Eleanor, Eena, Couranto, Najade, Athelstan, Dewa Gungadhur, Dunkeld, Tartar, and Princess of Wales. At LIVERPOOL: Bella Gallega, C. C. Chisholm, Victory, Agra, Beloochee, Ferris, H. Puddemsey, and Bombay. At FALMOUTH: Sarah Jane and Hindustan. At BORDEAUX: Salares and Java. At NANTES: Suez. At NEW YORK: Ocean Home, Gertrude, Caroline, and Rudolf. At BOSTON: Ceylon, Aristides, Alexander, and Magnet.

From BATAVIA.—At FALMOUTH: Fredrika.

From PENANG.—At FALMOUTH: Schlosser. At CORK: Ceylon. At BORDEAUX.—Sophis.

FREIGHTS AND CHARTERS.

Outward freights remain without animation, the tonnage on the different berths being still large, and the rates consequently low both for general cargoes and coals. Several homeward charters have been fixed from the rice ports, but even at reduced rates it is difficult to place vessels. The importers of teak are also well supplied. Ships are, however, still wanted from Shanghai; also small vessels of good class from Hong Kong and Singapore.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £36 and £1. 15s. For Shanghai: £48 and £2. 3s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £25 and 19s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have engaged freight in the Kensington for the conveyance of the following Government stores from the River Thames to Hong Kong—viz., 140 tons navy provisions, &c., 18 tons heavy shot (in boxes), and 3 tons light goods (including a few combustibles), and have invited tenders for the conveyance of 158 tons heavy shells (100 loose and in boxes), 21 tons light stores, and 54 tons gunpowder, to Shanghai, also from the River Thames.

CASUALTIES.

NEW YORK.—August 11; the Sophia, Beverly, from Hong Kong, arrived here, reports having passed through quantities of icebergs on the 7th of August.

The Taeping, from Shanghai to London, has put into Amoy dismasted.

The Gustav Adolph (British vessel), from London and Pernambuco to Hong Kong, put into Rio Janeiro on the 1st of August, with damage to spars.

The Australian (Old. barque), Reiners, from Shanghai to Liverpool, has been totally lost in Bally Straits, crew saved.

OFF ASCENSION.—July 23; Johanna, Marsan, from Hong Kong for Bordeaux, not Vrouw Johanna, as before reported.

CAPITAL.

Subscribed £2,000,000
Paid and called up 500,000

BANKERS.

Bank of England; Alliance Bank.
And Branches at Bombay, Calcutta, Hong Kong, and Shanghai.

Deposits received at 10 days' notice, on the usual terms and for fixed periods, at rates subject to special agreement.

Drafts issued, and bills negotiated, payable in India, China, &c.

Circular Notes and Letters of Credit, payable throughout Europe, are also issued for the convenience of passengers per overland route.

The purchase and sale of Indian and other securities and the safe custody of the same undertaken. Dividends, pay, pensions, interest, or other moneys realised, and the registry of Indian Government Loan Notes effected, so that the interest may be paid in England.

Every other description of banking and agency business in connection with India, China, &c., conducted on the most favourable terms.

J. OUSELEY, General Manager.

THE BANK OF HINDUSTAN, CHINA, and JAPAN (Limited).

NOTICE IS HEREBY GIVEN, that an EXTRAORDINARY GENERAL MEETING of the Company will be held at the Banking-house of the Company, No. 1, Bank-buildings, Lothbury, in the City of London, on MONDAY, the 12th day of September next, at One o'clock, p.m., and the business to be transacted will be to Confirm certain Resolutions passed by the Company in Extraordinary General Meeting on the 25th day of August, 1864, of which the following are copies:—

1. It was Resolved—"That the agreement dated the 24th day of August, 1864, between this Company of the first part, and the Imperial Bank of China, India, and Japan (Limited) of the other part, be approved, and the Directors be authorised to affix the seal of the Company to the same, and do all things necessary to carry it into effect."

2. It was Resolved—"That the capital of the Company be increased by the creation of 20,000 new shares of £100 each, to be issued at £6 per share premium to the persons and upon the terms stated in the before-mentioned agreement, and that the resolution of the Board to the above effect be ratified and confirmed."

3. Resolved—"That the Directors be authorised to add four Directors to their present Board, to be selected by them from the existing Board of the Imperial Bank of China, India, and Japan (Limited)."

Dated this 25th day of August, 1864.

By order,
R. SWIRE TOMLIN, Secretary.

1, Bank-buildings, Lothbury, London.

THE IMPERIAL BANK OF CHINA, INDIA, AND JAPAN (Limited).

NOTICE IS HEREBY GIVEN, that an EXTRAORDINARY GENERAL MEETING of the Company will be held at the Offices of the Company, No. 8, Walbrook, in the City of London, on MONDAY, the 12th day of September next, at Twelve o'clock at Noon precisely, to confirm certain resolutions passed by the Company in extraordinary general meeting on the 25th day of August, 1864, of which the following are copies, viz.:—

"1. That an agreement, dated the 24th day of August, 1864, and made between the Bank of Hindustan, China, and Japan (Limited), of the one part, and this Company of the other part, having been read and submitted to this meeting, this Company do hereby approve of the same, and do authorise the directors to affix the seal of the Company thereto.

"2. That this Company be wound up voluntarily.

"3. That the Honourable James Frederick Stuart Wortley, Richard Cooke Coles, Esq., Joseph Mackrill Smith, Esq., and Henry Turner, Esq., be appointed Liquidators, for the purpose of winding up the affairs of this Company, and distributing the property; and that the Liquidators be authorised to receive in compensation or part compensation, for the business and property of this Company shares in the Bank of Hindustan, China, and Japan (Limited), upon the terms specified in the above-mentioned agreement; and if any member shall express his dissent from this resolution by a notice in writing to the Liquidators, not later than seven days after the meeting at which this resolution is passed, and shall require the Liquidators to purchase the interest of such dissentient member, the Liquidators shall raise the purchase money to be paid to such dissentient member by the sale of the share or shares in the Bank of Hindustan, China, and Japan (Limited), which under the terms of the said agreement, would have been allotted to such dissentient member."—By order of the Board,

HENRY TURNER, Manager.

8, Walbrook, August 30, 1864.

DOCKS.
PORT OF AMOY, CHINA.

AGENTS and Commanders are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING, SPARRING, and RE-FITTING VESSELS of all sizes, and for CLEANSING and PAINTING Iron Ships, at moderate charges.

Their large Granite Dock, 286 feet long on the blocks, with 19 to 21 feet water in the entrance at spring tides, and fitted with Caissoon Gate and Steam Pumps, is in complete working order, and is well supplied with every description of materials.

EUROPEAN FOREMEN superintend the work in all departments.

Amoy, 1st January, 1864

MESSRS. EVANS and Co., Merchants, Shanghai, beg hereby to give their friends and the public notice that the only person who can now lawfully pledge the credit of the firm is Mr. HENRY EVANS, whose authentic signature may be seen at the office of Messrs. Godwin and Son, Solicitors, Newbury, Berks.

VICHY.
THE PROPERTY OF THE FRENCH GOVERNMENT.

Natural digestive Pastilles.—These lozenges made with the Vichy Salts are a sovereign remedy against the maladies contracted in hot countries, and aid materially the action of the mineral water taken internally. A very agreeable sweetmeat.

SUPERINTENDENCE AND CONTROL OF THE GOVERNMENT.

Sold in boxes containing one pound each.

A. SHORTREDE & CO.

Hong Kong, Jan. 1, 1864.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

Sold Retail.—London: Joreau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich. Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay: Franjee Nesserwanjee and Co. Singapore: Martin and Little Batavia: L. Platon and Co. Macao: J. D. Freita.

J. C. and J. FIELD,
ORIGINAL MANUFACTURERS (IN ENGLAND) OF

London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT.—PAINLESS CURES.—Sores, wounds, ulcerations, and other diseases affecting the skin, are amendable by this cooling and healing unguent. It has called forth the loudest praises from persons who had suffered for years from bad legs, abscesses, and chronic ulcers after every hope of cure had long passed away. None but those who have experienced the soothing effect of this Ointment can form an idea of the comfort it bestows by restraining inflammation and allaying pain. Whenever this Ointment has been once used it has established its own worth, and has again been eagerly sought for as the easiest and safest remedy for all ulcerous complaints. In neuralgia, rheumatism, and gout, the same application properly used gives wonderful relief.—Sold at Professor Holloway's Establishment, 244, Strand, and by all medicine vendors throughout the civilised world.

HURST AND BLACKETT, 13, GREAT MARLBOROUGH-STREET.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY and the ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard 's Own, Ess Bouquet, Military, Royal Yacht Club New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable an convenient Hair Brush ever invented. Letters Pate Granted Nov. 6, 1852.

Merchants and Shipper supplied on liberal terms.

22, THREE KINGS COURT, LOMBARD-STREET, LONDON.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three King-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. Messrs. JNO. GOSNELL and Co have been appointed Perfumers to H.R.H. the Princess of Wales.

Ditto, octaves, cocoa wood, six German silver keys, on pillars ... ... £1. 1s. to 2 2 0
Ditto, six sterling silver keys, in case 4 4 0

All the flutes are tried and proved by Mr. Benjamin Wells, who attends daily to give instruction upon the new and old systems of fingering.—ADDISON and LUCAS, 210, Regent-street, W.

FLAGEOLETS.—Flute Flageolets, cocoa wood and German silver keys, £1. 11s. 6d. to £2. 2s.; ditto, six sterling silver keys, in case, £4. 4s. The Flute Flageolet will be found a charming accompaniment to the pianoforte in dance music, &c., and being remarkably easy to sound, may be put into the hands of very young performers. The fingering is the same as the concert flute, to which instrument it will be found a valuable introduction.—ADDISON and LUCAS, 210, Regent-street, W.

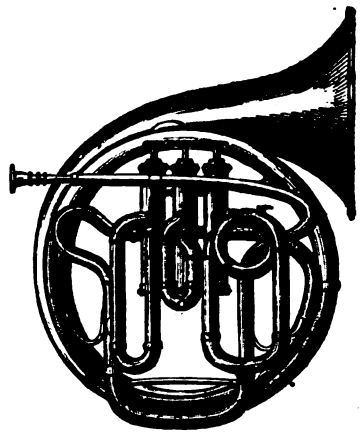
GUITARS, £2. 2s., £3. 3s., £4. 4s., £5. 5s., £6. 6s., £8. 8s., to £12. 12s., the finest models. Cases included with the £4. 4s. Instruments and upwards.—ADDISON and LUCAS, 210, Regent-street, W.

HARMONIUMS, IMPROVED PATENT, by Alexandre.—1. In oak case, £6. 6s. 2. In mahogany case, £7. 7s. 3. In oak case, one stop, £10. 10s. 4. In mahogany case, ditto, £12. 12s. 5. In oak case, three stops, £13. 13s. 6. In ditto, five stops, £23. 2s. 7. In ditto, nine stops, £26. 15s. 8. In ditto, 10 stops, tremolo, £27. 6s. 9. In ditto, 13 stops, £37. 5s. 10. In ditto, 14 stops, tremolo, £37. 16s. 11. In rosewood case, one stop, £13. 13s. 12. In ditto, three stops, £15. 15s. 13. In ditto, five stops, £25. 4s. 14. In ditto, nine stops, £28. 17s. 6d. 15. In ditto, 10 stops, tremolo, £29. 7s. 6d. 16. In ditto, 13 stops, £39 7s. 6d. 17. In ditto, 14 stops, tremolo, £39. 18s.—ADDISON and LUCAS, 210, Regent-street, W.

KETTLE DRUMS.—Cavalry large Drum, 23 inches, including cover ... ... £21 per pair.
Orchestra, first size ditto, 24 in., including cover ... ... 24 „
„ second ditto, 27 „ „ ... 30 „
„ third ditto, 30 „ „ ... 40 „
„ fourth ditto, 36 „ „ ... 50 „

METRONOMES (musical time indicators).—No studio is complete without this indispensable to interpret the tempi of the great masters' compositions. Samson's improved, winding without key, £1. 11s. 6d., with bell, to £2. 12s. 6d.; ditto, military ditto, large size, in case, £4. 4s.; mahogany or rosewood, the best ordinary English make, with bell, £2. 2s.; ditto, without bell, £1. 6s.; tripod stand, with spirit level, £3. 13s. 6d.—ADDISON and LUCAS, No. 210, Regent-street, W.

VOCAL HORN, highly finished, £8. 8s., in case. This is especially recommended to amateurs and professors as a beautiful drawing-room instrument. Being in C, songs with pianoforte accompaniment can be played as published for the voice without transposing or the use of crooks. The tone is a combination of the French and tenor horns, and is produced without effort. Mr. C. Harper, professor at the Royal Academy of Music and the first horn in Mr. Costa's Orchestra, attends to give instructions.



MILITARY and BRASS BAND INSTRUMENTS.—Messrs. ADDISON and LUCAS respectfully direct the attention of commanding officers and presidents of band committees to the reduced rate at which they are now able to furnish the best toned and most durable military band instruments; and they confidently assert that while a great saving to the band fund will be accomplished, the musical effect of the bands using these instruments will in many cases be improved, and in none diminished. Messrs. A. and L. warrant all the instruments supplied by them to be well in tune together. To insure this, every instrument will be tested by eminent professors before being issued. Messrs. A. and L. beg to add, in conclusion, that the brass instruments now supplied by them are, in every part, English manufacture, not foreign bells and pistons put together, and are the same (with every modern improvement) that have been issued to the army for 50 years at nearly double the prices. Every instrument not approved of will be exchanged, free of cost. Estimates for sets of military band instruments furnished, with every particular respecting the most effective formation of bands. Regiments requiring efficient bandmasters will have every assistance from Mr. Lucas, Principal of the Royal Academy of Music.

1. Cornets, any model, three pistons ... £7 7 0
Ditto, four pistons 8 8 0
2. Soprano cornet, in E flat and F 5 5 0
3. Valve trumpet, crooks complete 7 7 0

22. Eleven-keyed ophecleide 8 8 0

MUSICAL BOXES.—Small Pocket, in horn cases, two tunes, £1. 1s.; three tunes, £1. 11s. 6d.; four tunes; £2. 2s. Large, for table, by Nicole, Geneva, warranted the best, four tunes, in walnut case, £4. 4s.; four ditto, rosewood ditto, £4. 14s. 6d.; six ditto, walnut ditto, £6. 6s.; six ditto, rosewood ditto, £6. 16s. 6d.; eight ditto, walnut ditto, £8. 8s.; eight ditto, ditto, £8. 18s. 6d.; 12 ditto, rosewood ditto, £12. 12s. to £16. 16s. Extra large, for table, with the new effects of flute, drum, triangle, and castanet accompaniment, six tunes, drum, bell, and castanet accompaniment, £31; six ditto, with flute accompaniment, £24; eight ditto, drum, bell, and castanet accompaniment, £25. 4s.; eight ditto, with flute accompaniment, £39. 8s.—ADDISON and LUCAS, 210, Regent-street, W.

NURSERY-BARREL PIANOFORTES.—These instruments are acted on by barrels turned by hand, performing dance and lively music with good effect, are very durable, and will be found an excellent substitute when a professional performer is not available; any pianoforte tuner can keep them in order. Mahogony, eight tunes, £14. 14s.; ditto, 10 tunes, £16. 16s.; rosewood, eight tunes, £14. 14s.; ditto 10 tunes, £16. 16s.; extra barrel, eight tunes, with case, £3. 10s.; ditto, 10 tunes, ditto, £4. 10s.—ADDISON and LUCAS, 210, Regent-street, W.

ORGAN ACCORDIONS.—Fingered same as pianoforte, with stop £5. 10s., without stop £4. 10s.; in case complete. Stands with pedal, enabling the performer to use both hands, £1. 15s.—ADDISON and LUCAS, 210, Regent-street, W.

PORTABLE HARMONIUMS.—Folding into case, 3-octaves, £8. 8s.; 3½-octaves, £10. 10s.; 4-octaves, £12. 12s. each. Dimensions when folded—length, 24 inches; width, 12 inches; height, 11 inches.—ADDISON and LUCAS, 210, Regent-street, W.

REGULATION DUTY TRUMPETS.—Best make with line and tassels, £2. 2s.; ditto, electro plated, in case, £3. 13s. 6d.; sterling silver, £21.—ADDISON and LUCAS.

REGULATION DUTY BUGLES.—Best make, with line and tassels, £2. 2s.; ditto, electroplated, in case, £3. 13s. 6d.; sterling silver for presentation, plain, with silk lines, £21; ditto, elegantly chased, £26. 5s.; ditto, all the chased work and inside of bell richly gilt, £31. 10s. to £35; silver lines and tassels, £3. 3s.; bugle pistons, to fit in bugle, brass, £3. 12s. 6d., ditto, sterling silver, £31.—ADDISON and LUCAS, 210, Regent-street, W.

ROMAN and ENGLISH STRINGS.—In consequence of the difficulty experienced by Amateurs and Professors in procuring Roman strings, Messrs. ADDISON and LUCAS beg to announce that they import the finest that can be got, and the only kind used by the most eminent artists on the violin, harp, guitar, &c.:—Harp, English gut strings and best silver, per set, £2. 2s.; ditto, Roman gut strings and best silver, per set, £3. 3s.; guitar, Roman gut strings and best silver, per set, 4s.; violin strings, English, each—1st, 4d.; 2nd, 6d.; 3rd, 8d.; 4th, 6d.; per set, 2s.; ditto, Roman, each—1st, 8d.; 2nd, 8d.; 3rd, 1s.; 4th, 6d.; per set, 2s. 10d.; ditto Paganini 4ths, sterling silver, each 2s.; viola, best—1st, 6d.; 2nd, 8d.; 3rd, 8d.; 4th, 8d.; per set, 2s. 6d.; violoncello, English, best—1st, 1s. 6d.; 2nd, 2s.; 3rd, 2s.; 4th, 2s.; per set, 7s. 6d.; contra basse, best—1st, 4s. 6d.; 2nd, 8s.; 3rd, 9s.; 4ths, covered, 12s.; per set of three, £1; violin, viola, and violoncello, 3rd and 4th strings, covered with gold coloured wire, which never tarnishes, same price as ordinary strings.—ADDISON and LUCAS, No. 210, Regent-street, W.

SAXOPHONES.—Soprano in C or B flat £12 12 0
Do. in F or E flat 15 15 0
Tenor in C or B flat 15 15 0
Baritone in F or E flat 18 18 0

VIOLINS.—Prize Medal copies of the Cremona Makers, £2. 2s., £3. 3s., £4. 4s., £6. 6s. to £12. 12s. each. A collection of excellent old instruments at much below their real value.—ADDISON and LUCAS, No. 210, Regent-street, W. History of the Violin, by William Sandys, F.S.A., and S. A. Forster. 1 vol., 12s. 6d.

ADDISON AND LUCAS, 210, REGENT STREET, W.

(BY ROYAL LETTERS PATENT.)

PROTECTION FROM FIRE!

BRYANT AND MAY,

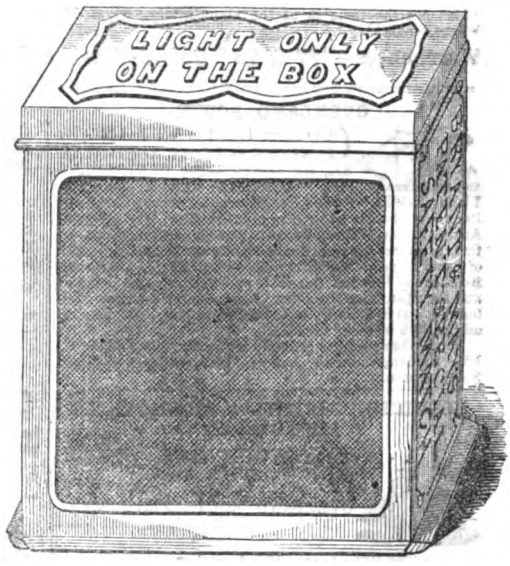
FAIRFIELD WORKS, LONDON, E.,

Invite attention to their "PATENT SAFETY MATCH," which contains no Phosphorus! is not Poisonous! and Lights only on the Box! which they can now supply in TIN BOXES, as shown below.

B. & M.'s Patent Safety Matches in Tin Boxes.

NOTICE.

AN ARK.



B. & M.'s Patent Safety Matches in Tin Boxes

The above are prepared specially for Shipment, and are Warranted suitable for ALL CLIMATES.

WAREHOUSES: WHITECHAPEL ROAD, LONDON, E.
MANUFACTORY: FAIRFIELD, BOW, LONDON, E.

BRYANT AND MAY, LONDON.

TO PURCHASERS AND CONSUMERS OF MATCHES EVERYWHERE.

One of the most fruitful sources of ACCIDENTAL FIRES is admitted to be the general use of common Lucifer Matches, which ARE SO EASILY IGNITED, and in a variety of ways impossible wholly to guard against; for example, the gnawing of rats or mice—the falling of a box from a shelf—the action of the sun's rays if placed in a window—a match being carelessly dropped and trodden upon—and in various other ways which it would be beyond the power of the most PRUDENT to anticipate or guard against. A statement of the SACRIFICE of LIFE and PROPERTY occasioned by the use of the DANGEROUS PHOSPHORIC MATCH, even for a single year, would be something appalling, and such as few persons would be prepared for.

Is there a Remedy for this?

There is, and it is at once so simple and easy of adoption, as to leave without excuse all and every one not availing themselves of it.

THE PATENT SAFETY MATCH,

MANUFACTURED BY

BRYANT AND MAY, LONDON,

Affords an instantaneous light as readily as the common PHOSPHORIC MATCH, whilst it is FREE FROM ALL ITS DANGEROUS PROPERTIES. Since the introduction of the above PATENT SAFETY MATCH (WHICH LIGHTS ONLY ON THE BOX) the value and importance of which is now universally acknowledged, various attempts have been made to deceive the Public by applying the term "SAFETY" to other Matches, some of which are in fact of THE MOST DANGEROUS KIND. The pecuniary fraud thus practised sinks into insignificance in comparison with the mischief likely to result from the false impression made on purchasers, who, supposing they have supplied themselves with OUR REALLY SAFE MATCH, are thrown off their guard, and thus placed in a much more PERILOUS POSITION in respect to ACCIDENTAL FIRES than if they had knowingly purchased the COMMON DANGEROUS MATCH, as in the latter case they could have adopted such precautionary measures as lay within their reach. We, therefore, respectfully request purchasers to observe that the "PATENT SAFETY MATCH" is manufactured ONLY by BRYANT and MAY, without whose address and *Trade Mark, an Ark* (as above), NONE can be genuine.

All Orders for Bryant and May's "Patent Safety Matches, Wax Vestas, and Cigar Lights,"—(all of which Light only on the Box)—made payable in London, will receive careful and prompt attention.

**** The Matches are in Slide or Tin Boxes; the Vestas in Slide, Fancy, and Japanned Tin Boxes; and the Cigar Lights in Boxes suitable for the Pocket*

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Delta, arrived Sept. 13.—From Singapore: Mr. Potter. From Shanghai: Mr. E. Sturgis. From Hong Kong: Mr. A. Fayard, Mariano Gil, Rev. P. D. Aquilino Ban, D. A. Comy.-Gen. Green.

To Southampton, per Syria, expected to arrive Sept. 19.—From Shanghai: Mrs. Reynolds. From Hong Kong: Capt. Murray and European servant, Lieut. Campbell, Capt. Findlay, Mr. and Mrs. Carbis. For Gibraltar: Rev. Cervera and eight Spanish soldiers. From Penang: Mr. and Mrs. Scott and five children, two native servants, Major Tweedie. From Singapore: Mr. Thos. Dyson.

Per steamer Sea King.—From Shanghai: Mrs. John and two children, Mrs. Cammidge, Miss De Fray, Mr. Brodermann, Mr. Cartright, Mr. Norris.

Per steamer Rajah.—From Shanghai: Mr. and Mrs. Mangum, Mr. Carter, Captain Mackay, and two officers of H.M.'s 67th Regiment.

PASSENGERS OUTWARD.

Per P. and O. steamer Massilia, Sept. 4, from Southampton.—To Hong Kong: Maj.-Gen. and Mrs. Grey, Lieut. Eaton, R.N., Lieut. Thompson, Miss Robinson, Lieut. G. Morice, Miss Pagden, Mr. I. Mollison, Miss P. Plumridge, Miss Longstaff, and three second-class passengers. To Shanghai: Mr. R. A. Mowat, Mr. H. G. Aston, Rev. C. H. and Mrs. Butcher, Mr. F. Stokes, Miss Wilson. To Singapore: Mrs. Braddell, Miss Manuel, and four second-class passengers. To Calcutta: Mrs. Gerrard, Col. Voyle, Messrs. J. I. Lane, R. W. Leven, C. J. Bateman, Hullett, G. Lineaton, Hunter, Turnbull, G. Reid, Bell, J. F. Trotter, and J. W. Anderson, Mrs. Percy Hill, Miss Luard, Capt. Passingham, Mrs. Knight, Mrs. J. Bellamy, Paymaster Huddlestone, Major and Mrs. W. Davis, Miss Davis, Lieut. A. Munro, Miss Tissindie, Miss A. Tissendie, Capt. F. Green, Mrs. Standerwick, Mrs. Anderson, and seven second-class passengers. To Madras: Dr. G. H. Alexander, Mr. A. J. Atkinson, Mrs. Donaldson, Major Fraser, Dr. Dorward, Miss Dorward, and four second-class passengers. To Ceylon: Mrs. Imray and infant, Mr. M. Bethune, Mr. and Mrs. J. Davidson, Miss Macready, Miss Anderson, and six second-class passengers. To Alexandria: Messrs. Ackland, Joyce, and Taylor, Mrs. George and child, Mrs. Almond, and three second-class passengers.

From Marseilles, September 12.—To Hong Kong: Mr. and Mrs. Adams and Mr. Leonard. To Shanghai: Mr. and Mrs. Coutts, Mr. E. Iveson. To Singapore: Mr. Charlton. To Calcutta: Mr. G. Dickson, Miss Dickson, Mr. and Mrs. Browne, Dr. J. M'Neile, Mr. H. B. Harrington, Mr. and Mrs. S. H. Clark, Miss Fisher, Mr. S. Pell, Miss Troup, Mr. Morrell, Mr. H. G. Morrell, Messrs. Watson, A. Connal, Warwick, Ellison, E. Willmott, Dickson, Capt. C. K. M. Walker, and three second-class passengers. To Madras: Mr. Franklyn, Miss Franklyn, Lieut.-Col. Fielden, Mr. J. B. Cross, Capt. and Mrs. Read, Major Hinxman, Lieut. Pearson, Mr. Edwards. To Ceylon: R. B. Tyller. From Suez.—To Madras: Rev. Mr. and Mrs. Ryder, Rev. Mr. Schaffer.

Per P. and O. steamer Ripon, Sept. 12, from Southampton.—To Singapore (via Bombay): Mr. J. Nagle.

Per P. and O. steamer, Sept. 20, from Southampton.—To Shanghai: Miss J. Provants, Asst.-surg. Veale. To Hong Kong: Mr. Newton, Mr. J. H. Hargreaves, Mr. D. H. Speer, R.N. To Singapore: Mr. Dunlop. From Marseilles, Sept. 28.—To Singapore: Mr. P. C. Keake, Lieut. and Mrs. Burn. To Shanghai: Mr. L. Russell, Mr. D. Anderson. To Hong Kong: Mr. Marsh.

Per P. and O. steamer, Oct. 4, from Southampton.—To Hong Kong: Mr. and Mrs. Preston and infant. To Shanghai: Mrs. Jarvie, Mr. Turnbull. From Marseilles, Oct. 12. To Shanghai: Mr. Gordon and friend, Mr. A. Schultze.

Per P. and O. steamer, Oct. 12, from Southampton.—To Hong Kong via Bombay: Mr. F. M. Gibb. From Marseilles, Oct. 20.—To Penang via Bombay: Mr. and Mrs. W. F. Davidson.

Per P. and O. steamer, Oct. 28, from Marseilles.—To Hong Kong: Mr. J. Tait. To Singapore: Mr. and Mrs. H. W. Wood and lady friend, Messrs. W. and C. Degener.

Per P. and O. steamer, Nov. 12, from Marseilles.—To Hong Kong: Mr. Wheeley. From Alexandria.—To Singapore: Miss Cook.

Per French steamer Peluse, from Marseilles, Sept. 19.—To Shanghai: Mr. Pryor. To Hong Kong: Mr. G. Simpson. To Batavia: Mr. T. Purvis.

QUARANTINE NOTICE.—LISBON, SEPT. 3.—By an order of the Board of Health of Aug. 29, in "Diario" of 30th, the ports of Macao, Shanghai, and Hong Kong are declared "infected with cholera," and all the other ports of China "suspected."

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

We have advices from hence to the 12th July. The London mail of the 10th May, and the French mail of the 17th, had both arrived out.

A very material addition to the military strength at the disposal of Sir Rutherford Alcock had reached him in the shape of an augmentation of H.M.'s 20th Regiment. They were brought on by the steamer *Chanticleer* and ship *Queen of England*, and had a passage of nine days, having left Hong Kong on the 30th June, and arriving at Yokohama on the 9th July. The men had not yet disembarked, the accommodation for them on the heights being unfinished. They were to land on the 14th, and march up to the barracks where the first detachment of the regiment is quartered. The troops seemed to have benefited by change of climate already, notwithstanding they had been cooped up in a vessel at anchor since their arrival. Several vessels of war of different nationalities had also arrived, constituting, with the fleet already in harbour, an imposing naval display. The *Japan Herald* believes that the Yedo Government had had twenty days given them to consider whether they will or will not permit foreign vessels to pass through the Inland Sea for purposes of commerce, and been informed that if they refused the demand will be enforced. The 25th of July was designated as about the time when the movement would take place, should the Japanese not have yielded the point amicably before. The course resolved on by the Tycoon and the Council of State had not transpired, but nothing indicated an intended co-operation of a Japanese force with ours against that truculent Daimio the Prince of Nagato, which was reported some time back by the Yokohama journal before referred to.

We have no confirmation by these advices of the fact of Sir Rutherford Alcock being at Nagasaki, as reported from Hong Kong in our last issue. Neither is anything said of an intention on the part of Sir Rutherford to leave Yokohama; but General Brown had left Hong Kong for Japan. There can now, we regret to say, be very little uncertainty about an hostile demonstration being intended by Her Majesty's Minister to Japan, since, in addition to the large accession of naval and military force spoken of above, we have it from Shanghai that two companies of the 67th Regiment and half a battery of Artillery left there for Yokohama on the 21st July by the American steamer *Ta Kiang*.

CHINA.

PEKING.

POLITICAL RELATIONS OF FOREIGNERS WITH THE CHINESE.

The following despatch has been published from the American Embassy:—

The U.S.A. Minister at Peking to the U.S.A. Consul-General.

Legation of the United States, Peking, June 15, 1864.

SIR,—From many letters received by me from the ports, it appears that a misunderstanding prevails as to the extent of the rights and duties of American citizens under the treaty, and the regulations made in pursuance thereof. I have felt, therefore, that it might facilitate the administration of our affairs, if I express my opinions in relation to those questions about which there has been controversy. I accordingly address you, and through you the other consuls and my countrymen, giving my construction of the treaty and regulations upon several disputed points, as well as a few directions in relation to ships, passports, &c.; and some general suggestions in reference to the co-operative policy agreed upon by the representatives of the Treaty Powers at Peking.

I hold that the Chinese Government has the right, as an incident of its unyielded sovereignty, to enforce its own revenue laws, and to make such regulations as may be necessary to that end. [See Rules 6 and 10 of the Supplementary Treaty, and my despatches to the Department of State, approved by Government, Nos. 30 and 32.]

That the foreign Minister, when notified of regulations, if he find them to be in accordance with the treaty, is, after having in his diplomatic character done what he could to perfect them, under obligation to notify them to his countrymen, upon whom they then become binding. [See letter of E. Hammond for British Government in reply to the Shanghai Chamber of Commerce, and despatches of British and American Ministers in relation to the Yangtsze regulations, approved by their Governments.]

That no authority inferior to that which made and approved the regulations can absolve persons from their observance.

That the Chinese Government having by treaty yielded jurisdiction over the persons of our citizens so that it cannot punish them even by fine, it is obligatory upon us to punish them for infractions of the Treaty and regulations. [See despatch of Mr. Marshall to Mr. Marcy, November 25th, 1853, and same to Mr. Cunningham, Vice-Consul at Shanghai, November 1st, 1853; Mr. Cushing to Mr. Marcy, September 19th, 1855, Fitzroy Kelly and James Stephen, Temple, May 22nd, 1862.]

The manner of doing this is pointed out in Sec. 7 of the Act of Congress approved June 22nd, 1860. It is to be done through the Consuls, the Minister only having original jurisdiction in cases of felony, murder, and rebellion, and where a Consul is interested. [See Secs. 13, 24, and 27 of the Act.]

The Chinese Government cannot withdraw a Consul's exequatur, for it has yielded this right under the law of nations, in the grant of entire jurisdiction over our citizens. Besides, the Consuls in China have a peculiar status; they are judicial officers, and exercise many powers under the treaty unknown to similar functionaries in the West. [See my despatch (72) and discussion with the Chinese Government, also letters of Mr. Cushing to Sec. Marcy, Nov. 7th, 1854, and Oct. 8th, 1855.]

That, though the Chinese Government may not sue in the Consular Court as a party to the record, still it may go there to make complaint and to give information, which the Consul is bound to entertain. This is political action. [See Cushing, idem, G. Wingrove, Cooke and James Hennen, Temple, Jan. 13th, 1862, Ms.]

If the Consul shall fail to do his duty in respect to punishment, then the question becomes one for reference to the "superior officers of the Government, who shall see that full inquiry and strict justice shall be had in the premises." [Art. 10 of the Treaty.]

The Chinese Government cannot be compelled to plead in the Consular Court at the suit of any one. Hence controversies between the consulates and the customs, if they cannot be arranged, become diplomatic questions to be referred to Peking. [See Cushing, idem. Sir Frederick Bruce *in re* Bowman *v.* Fitzroy, Blue-book No. 3, approved by British Government, also my despatch to Mr. Mangum, Consul at Ningpo, Dec. 9, 1862, in case of barque *Agnes*, approved by U. S. Government.]

A citizen of the United States in the Chinese customs' service, cannot, in that character, be held to answer in the Consular Court of his country for acts done in the line of his official duty under the orders of the Chinese Government. In such case the remedy is against that Government. [Opinion of Sir William Atherton et al. Ms., Temple, March 6, 1862.]

The Chinese Government may confiscate goods landed in breach of port regulations, but only those in respect to which the infringement of the regulation was committed—that is to say, those landed and not those still on board. [Sir F. Bruce in case of the *Blackburn*, Blue-book No. 3.—Also my despatches in case of the *Agnes*, and that of Prince Kung, admitting this doctrine.]

In cases of fine, where the words "not exceeding" are attached to the penalty, the consul may fix a smaller sum; but where the sum is fixed there is no option, and the consul upon proof must inflict the fine, and all efforts to mitigate such fine must proceed upon equitable grounds, and not as matter of legal right. [Sir F. Bruce in case of the *Blackburn*.]

Only three ports are now by treaty open to trade on the River Yangtsze, viz., Chinkiang, Kiukiang, and Hankow; and trade at any other ports subjects ship and cargo to confiscation. There can be no trade, directly or indirectly, by tacit consent of local authorities—by towing and permitting the Chinese to cut the line where they please, or in any manner whatsoever. [See Art. 14 of U. S. Treaty, and Art. 30, and Arts. 10, 11, of British Treaty in connection therewith; also Provisional Arrangements for the navigation of the R. Yangtsze, Dec. 5th, 1861; and those adopted Nov. 10th, 1862, and approved by British and American Governments.]

If the Chinese authorities confiscate without sufficient proof of breach of regulations, then the aggrieved party may, through the consul, appeal against such action to the minister at Peking, whose duty it will be to reclaim against the Chinese Government; but in no case is the citizen, or the consul for him, to take the law into his own hands. This would relieve the Chinese Government from that responsibility which should attach to it, and render all friendly relations impossible.—[Sir F. Bruce in case of the *Pearl*; also his correspondence with Consul Gingell, at Hankow, approved by the British Government; and instructions to Admiral Kuper, Blue-book No. 3.]

To secure an honest application of the confiscation power, I have, in conjunction with my colleagues, urged the establishment of a joint tribunal, or mixed commission, to sit in cases of confiscation. The Chinese authorities have yielded this in principle, leaving the details to be arranged by the consuls and local authorities—first at Shanghai provisionally, and afterwards at the other treaty ports if found to work well. This will satisfy both sides, and facilitate settlements at the ports; or, if the cases shall come to Peking, by classification and arrangement of the evidence, make decisions practicable. [See despatch of Prince Kung to me, June 13th, 1864.]

The greatest care should be taken before extending the protection of the American flag to purchased vessels. The proof of citizenship and the *bona fide* character of the purchase should be required. The flag should not be lent or sold to dishonour, or "be abused by the subjects of other nations as a cover for the violation of the laws of the empire." [See Consular Manual, page 273, and regulations of the Treasury Department there referred to. Also U. S. Treaty, Art. 14.]

A wise discretion should be exercised by the consuls in granting passports to travel into the interior. The right to grant these is derived from Art. 9 of the British Treaty through the favoured-nation clause (Art. 30). And though I do not hold that we are bound to take the construction of a treaty from the power through which we derive a privilege, still a desire for uniformity would suggest that such construction should receive our respectful consideration. [See my despatch No. 26, approved by the Government.]

I, therefore, call your attention to Sir Frederick Bruce's Circular of Nov. 21st, 1860, to the British consuls, approved by his Government, and commend its several suggestions to you for your guidance. "When an application is made by a person claiming to be a native citizen of the United States, for a passport, before it be granted he should make a written declaration to that effect, stating also his age and place of birth, which paper should be filed. The consul may, however, require such other evidence as he may deem necessary to establish the facts of the applicant's citizenship. If the applicant claims to be a naturalised citizen, he should be required to produce either the original or a certified copy of his certificate of naturalisation, or such other evidence as shall be fully satisfactory to the consul." [Extract from instructions to the Diplomatic Agents of the United States, page 17; and my letter to Acting Consul Pomeroy at Tientsin.]

I have already written you in relation to the so-called concessions. There are no such things as concessions in the sense generally understood by that term. It is the right of our citizens to buy, sell, and live in any part of the treaty ports; and any claim by a Treaty Power of a concession of territory from the Chinese Government, by virtue of which it can exercise jurisdiction over the persons or property of our citizens, would, if admitted, be an abridgement of our rights. [See despatch of Mr. Marshall to Mr. Marcy, July 26th, 1853, with history of efforts of Consuls Griswold and Cunningham against concession claims, and disavowal by the British Government of concession views through Consul Alcock. Letter of Sir Frederick Bruce to Consul Medhurst approved by British Government; and my despatch (42) approved by U. S. Government in Mr. Seward's despatch (40), and that in relation to municipal affairs at Shanghai (37), approved by Government.]

We have no right, for municipal or other purposes, to take jurisdiction of Chinese, or of the subjects of non-treaty powers, even though requested to do so by the Chinese authorities. We should seek to strengthen the Chinese administration in the direction of order, to see to it that they should not shirk their treaty obligations. [See my letter to Consul-general Seward, and Sir F. Bruce to Consul Sir Harry Parkes at Shanghai.]

With reference to the entrance of American citizens into the Chinese service, I can only say that there can be no objection to their entrance into the civil service; but there are strong objections to their active participation in the strife in which this people is unhappily engaged. The penalty for entering the rebel service is well known; and the decree of my predecessor, Mr. McLane, of December 5th, 1854, is still unrepealed, against taking military or naval service under the Government against the insurgents. In the peril of our interests at Shanghai from the rebels, this decree was not enforced; but subsequent events, leading to the death of General Ward and the Burgevine imbroglio, convinced me that the taking of such service not only endangered our relations with China, but might lead to complications with other treaty powers. I, accordingly, in my despatch No. 44 expressed myself in this sense, and my views were "specially commended" by the Government. I, therefore, reiterate them, to the end that such service may be discouraged. The British Government has already withdrawn its permission to its officers to take military service; and every effort has been, and is being, made, by the British Minister at Peking, to induce the Chinese to strengthen themselves so as to relieve the British Government, not only from the expense of keeping troops in China, but from the common danger of a Chinese force headed by adventurers.

Major Gordon, who has done so well, earnestly wishes to be relieved but is retained by a common sense of danger until he can weed the force of its dangerous elements, and hand it over safely to the entire control of the comparatively well drilled and patriotic Chinese officers. Mr. Berthemy, the enlightened representative of France, is equally desirous with the British Minister of removing all cause of expense and anxiety to his country, and looks forward with hope to the day when the Chinese shall triumph over their difficulties, and be able to maintain order without external aid. I am happy also to inform you that Mr. Vlangali, the able Minister of Russia, is deeply impressed with the importance of repressing that adventurous element which, if fostered, can only lead to disaster in China.

At an early period of my mission I was instructed by the Government to co-operate with the other Treaty Powers in China. In my despatch No. 42, you will find a history of my efforts in that direction, and of the

Digitized by Google

policy agreed upon; that policy has been fully approved by our Government, and I believe by that of every other Treaty Power. It is briefly this:—To consult and co-operate in China upon all material questions; to defend the treaty ports so far as shall be necessary to maintain our treaty rights; to support the foreign customs' service in a pure administration and upon a cosmopolitan basis; to encourage the Chinese Government in its efforts to maintain order; to neither ask nor take concessions of territory in the treaty ports, nor in any manner to interfere with the jurisdiction of the Chinese Government over its own people, nor ever menace the territorial integrity of the Chinese Empire.

I call your attention to this policy in order that you may know the commitments of our own Government and ourselves with the other Treaty Powers. You will perceive that we are making an effort to substitute fair diplomatic action in China for force; that we seek to do justice that we may have justice, and thus co-operation becomes the rule in carrying out these relations. It should be sincere; and to be effective requires, in the first place, a predisposition to get on well with one's colleagues; and, in the second, that just moderation which cannot fail to win the respect and confidence of one's associates.

While such are our obligations with respect to the foreign representatives in China, they are equally strong towards the Chinese officials, whether native or foreign, for it is through these that we maintain our relations with China, and any want of courtesy or consideration for them at once re-acts upon ourselves, and destroys our power for usefulness. (See my despatch approving the conduct of Consul Clark at Fuhchau.)

Hoping for your continued support, together with that of the other Consuls and my countrymen generally, of the views I have expressed, and the generous policy I have stated,

I am, Sir, your obedient servant,

ANSON BURLINGAME.

P.S. I have submitted the above letter to the British, French, and Russian Ministers, and they authorise me to inform you that they entirely approve of its views and policy.

TIENTSIN.

Our advices from Tientsin extend to the 1st July, but are not of importance. The weather had been oppressive, the thermometer standing at 85 deg., but little sickness had been noticed amongst either natives or foreigners. Occasional thunder-storms had cleared the air, and kept up the supply of *ozone*. Cholera had not appeared amongst foreigners, and the number of deaths amongst the natives was but slightly above the average of the year. Business, as might have been expected, was dull, and transactions strictly limited. Quotations, for almost all descriptions of goods, were nominal. Cotton alone was in demand at Tls. 15.5.0 to Tls. 16 per picul. The Prussian prize, late Danish schooner, *Falk*, sailed under the Prussian war flag, with a cargo of peas and cotton for Hong Kong.

NEW-CHWANG.

Advices from this port are up to the 4th July, by the gunboat *Osprey*, arrived at Shanghai. This vessel took Mr. Consul T. T. Meadows from Tientsin to his post at Newchwang.

SHANGHAI.

The dates are down to the 22nd of July. The English mails of the 26th of May arrived out on the 11th of July. We find no further allusion to the typhoon detailed in our last issue on the 6th inst.

The following are extracts from the *Friend of China* of July 19:—

"With exception of a case of cholera or typhoid fever now and then, we hear of but little sickness; and think it may be settled that the present season is much healthier than it was at the same period last year in Shanghai. Always prone to ascribe the cause of a plague to some local circumstance, we overlook the fact that such terrors as cholera, and fevers of peculiar stamp, such to wit as bore in 1843 the name of the Hong Kong fever, are borne in upon the community they afflict, not by reason of any specific inducement, but simply because they are part of a train which has had its origin at a distance so remote that it is difficult to trace. Do we not, for instance, hear of cholera being at a certain place northwards, in one year, the next year further south, and its course spoken of as proceeding in a direction indicated; just in the same way that we reason on the probable path of a cyclone when we first know that in this locality or in that it exhibited certain features? And speaking of cyclones, there is no doubt but that which recently passed over us effected a wondrous deal of good in purging the atmosphere of malific vapours, and we may hope that the worst to be experienced all the rest of the summer is the unpleasantness of heat.

"It was with extreme regret we heard on Sunday of the decease of the Right Rev. Bishop Boone. This time last year the respected divine seemed a hale man for his age, and having spent nearly three decades in this trying country, there seemed every probability of his reaching at least the three score years and ten which the psalmist has proclaimed to be the average limit of man's stay on earth. The continued illness of Mrs. Boone, however, compelled him to leave the field of his labours for a time, and the death of the lamented lady, when about midway between this and her native land, had, no doubt, a most depressing effect on the nervous system of our respected pastor. It would seem, indeed, that he could not rest or be happy until he rejoined the flock over whom he had so long presided in love and esteem; his act of returning to China at the most dangerous and trying season of the year, being, as the result has proved, highly indiscreet. Hardships endured on board the disabled steam-ship *Candia*, too, will all have had their effect on the frame of the deceased gentleman, and from the day he landed here to the day of his death, his distressing debility gave, we believe, too sure an earnest of what would follow.

"On the occasion of his funeral at the cemetery in the British settlement yesterday evening, the large attendance, first at the service which was performed in the Hongque Church, by the deceased's domestic chaplain, the Rev. Elliot Thomson, assisted by the Rev. F. R. Mitchell, and afterwards in the graveyard, gave amplest proof of the high regard—the deep affection—entertained for one who, in his day of health and strength, worked well. Happy will it be for us all if our end be like his!"

The following extract from the *North China Herald* shows the position of Colonel Gordon and the Chinese forces. We have no further news of the operations at and about Ningpo under the French:—We are happy to be able to state that it is the intention of the British authorities to place the Fawha battalion of drilled Chinese, and the gun lascars now attached to the Royal Artillery, in a camp near Sungkong for the purpose of instruction. The neighbourhood of Sungkong has been chosen, as there is no place in the vicinity of the settlements suitable for artillery or musketry practice. We are further informed that it is General Brown's intention to place Colonel Gordon in temporary command of these troops, until the decision of the home Government shall become known. Colonel Gordon will be assisted by several officers of the 67th regt., and by the drill instructors at present attached to the Fawha battalion. So soon as the service will admit of it, an artillery officer will also be appointed. The system to be pursued differs essentially from that which has hitherto obtained. The men will not be under the command of foreigners, should it be necessary for them to take the field. The intention is that this new body of drilled troops shall be placed under native officers, whose military education will be carefully attended to. For the present, these men will be serviceable simply as guardians of the frontier line, but arrangements are being made by which, should the Chinese authorities wish it, the more highly drilled will be withdrawn, and drafted off to some purely Imperial army, while their places will be filled by recruits. We may reasonably expect that by this means an important change will in time be effected in the entire Imperial army. For, whereas the Chinese have hitherto looked with distrust on the drilled battalions, they will now see that the system of officering the men with native mandarins leaves no room for suspicion or jealousy. The Futai, who is fully convinced of the necessity for reform in the Imperial army, is most favourably disposed towards this scheme. Every assistance which it is in the power of the local government to afford will therefore be placed at Gordon's disposal. Gordon will remain completely under the orders of the English military Commander-in-Chief, and, in the absence of the latter, under those of the Commandant of H.M.'s troops at Shanghai. That the Futai is impressed with the great advantages thus thrown in his way may be judged from his having ordered Li Aidong, who is now at Quinsan in command of 600 men, to repair to the same camp with his troops and place them under instruction. While Li Aidong's men are thus engaged they will be under the supervision of Major Thomson, late of the Quinsan force, and now Li's A.D.C. Such is at present the design of the British authorities, which, if carried out, is likely to prove far more serviceable to China than has the organisation of an independent force under foreigners of every class and every shade of character."

HONG KONG.

In our advertising columns will be found a prospectus of a local bank for China, in which it appears that Messrs. Dent and Co. take the leading part. The project is a very proper one. We have always argued that China could support a bank for itself. We trust that the board of directors will not be influenced by the following comments of the *Daily Press*, expressed, as usual, with more force than elegance:—

Digitized by Google

It is very singular that the lack of public spirit, which is the bane of this colony, should have so pervaded the minds of the merchants resident here as to have made them appear like dolts or superannuated fogies, in a financial point of view, with respect to the development of the resources of the place. It really must have appeared to the mercantile community of other ports that the Hong Kong merchants had no money. How many banks have been "concocted" in Bombay and London, and being established here have driven a splendid business and have divided large dividends? Even the company for supplying the colony with gas was formed in London, and the only shares offered for sale here were the few which formed the reward to the nose of wax whom it was necessary to put forward to perpetrate the shameful job.

The fact is that there has been so much favouritism and snobbism in this community—so much prejudice and disgusting sycophancy, with such a contempt for intelligence and independent notions, that really nothing remained to form a bond of union—not even the commonest sense; and if perchance it pleased the pigs to form a joint-stock company the whole proceeding resolved itself into a series of absurdities which soon reduced it to a laughing-stock.

For instance, a company was formed to run steamers between this and Canton, and after all the mysteries, the superciliousness, the hauteur, and the vapid dignity of officialdom had been played out, the result appeared in the shape of two boats with immense capacity for the consumption of fuel, but with none whatever for the stowage of cargo. They had four chimnies each, and could accommodate two passengers to each chimney; and in order to make the passengers as warm as the chimnies, the quarter deck (below which the cabins were) was absolutely sunk. It was a difficult matter to walk along the deck without burning one's clothes. They were constructed by a pet builder, managed by a pet agent, and cost an enormous sum of money. The novelty of officialdom and of the boilers too having worn off, and a few heavy calls having been made on the proprietary, the whole concern was wound up with the loss of lock, stock, and barrel, and we believe something besides.

Then, again, there was the club which formed a hobby of the notorious Colonel Caine. The estimate was a given number of shares at $400, which money being paid up and received it was found that $600 per share additional was required. And even then, after that sum had been received, the establishment was in debt, and hobbled along petted, dirty, ill-managed, and indebted until its sale became necessary.

And in fact it has been adopted as an axiom by this community themselves, that any joint-stock company started by themselves must of necessity come to grief—assuredly for the reasons we have indicated and for none other. Thus it came to pass that a few enterprising Parsees and Scotchmen in Bombay invented and achieved so many banks in China. They had little money, but they had eyes in their heads and sense too. They saw a clear field before them with a lot of swell donkeys browsing on it, and they turned it to pretty good account.

The adage runs that even a worm, if driven to desperation, will turn on its oppressors—so, in the case before us, the success of the numerous joint-stock banks which have been established here eventuated in such an excitement in Bombay and London that new banks were "invented" with extraordinary rapidity, and consequently, the business being overdone and the ground overoccupied, the Hong Kong wiseacres began to collect their ideas, and to form a combination to grind some of their own flour.

It is but fair to mention that the Whampoa Dock Company is an exception to the general rule above laid down. That company was, however, got up entirely by a man of great wealth and influence, who has ever been at war with the principles which have actuated this community, whether as regards the frail, rotten, and mutable foundation whereon society is based, or as regards their deeds of omission or commission in a public point of view. The exception, therefore, corroborates the rule!

The following announcement, taken out of a Bombay daily paper, reads to us most ludicrously, and has, in fact, dictated these remarks. The liberality of the projectors in assigning one-sixth of the shares to people in China is most profuse—the gas company appear quite niggardly in comparison:—

THE BANK OF CHINA (LIMITED).

We have to announce the formation of a new bank under the above title, with a capital of sixty lakhs of rupees (with power to increase to three crores), in 30,000 shares of rs. 200 each. The head offices will be in Hong Kong, with branches in Shanghai and other parts of China. The promoters are—The Hon. Michael H. Scott, the Hon. Walter R. Cassels, Richard Willis, Esq., A. F. Wallace, Esq., Robert Hannay, Esq. Cowasjee Jehangheer, Esq.

The Bank of China is projected to occupy in China a position similar to that which the banks of Bengal, Bombay, and Madras hold in India.

The board of directors in China will be composed of gentlemen of high standing and local influence.

The promoters will immediately apply to Her Majesty's Government for a charter.

The bank will meantime be registered under the Companies' Limited Liability Act of 1832.

The promoters will memorialise the British Government in China to establish the same relations with the "Bank of China" as exist between the Indian Government and the three Presidency banks.

Five thousand shares will be reserved for allotment in China, and four thousand will be taken up by the local Financial Association of India and China.

We believe that the promoters have made arrangements with the Financial Association to receive applications for shares.

Buckstone, the celebrated horse, which was backed for a mint of money for the Derby, 1862, and won the Ascot Cup in the following year, died at East Point Stables, Hong Kong, on the 10th of July last. The price paid for him in England was 4,500 guineas, and his death in the Celestial Empire adds one more instance to the many on record of the fatality attending blood stock in the tropics. He was intended for stud purposes, and never ran since his arrival at his new home. Sir William and Millionaire are in the same stable.

On the subject of Sir R. Alcock's policy in Japan, the *China Mail* says:—

"Next to writing upon China, the hardest work in the world is to write upon Japan. Sir Rutherford Alcock, according to the Japan journals, makes a deep mystery of the impending British policy in that country. This is simply making a mountain of a molehill, for the only serious point at issue between ourselves and the Japanese is the closing of the Inland Sea by the Prince of Nagato.

"Now, as it happens that Sir R. Alcock has long been on the look-out for a sound cause of quarrel with the Japanese, and, further, that there is a peculiarly strong force of men and *materiel* in this part of the East at present—and these mainly at Sir Rutherford's disposal—we may safely expect to hear of hostilities being opened very shortly. Perhaps Sir Rutherford Alcock is right. The Japanese may possibly enough be all the better for a thorough licking. Prince Satsuma does not appear to be the worse for what he got from Admiral Kuper, and, so far as we know of our Japan Minister's views, he is likely to push the policy of coercion to a considerable extent, if not to its utmost limit. In point of fact, Sir R. Alcock's present position in Japan is one peculiarly suited to his own temperament. Some years ago he was rebuked by the Foreign Secretary (Lord Russell, if we mistake not) for threatening war with the Japanese; now he is in a position to make war or abstain from doing so precisely as he considers best. He is a dangerous man to have charge of such means of offence, and we can only hope that he will use them judiciously."

The Kowloon land sales went off better than expected. The first day eleven marine and two inland lots were knocked down at an aggregate premium of $745, the annual rental being $6,440. The second day, fourteen marine and thirteen inland lots were sold at an aggregate premium of $2,205; the annual rental being $8,900. In all 40 lots were sold, premium $2,950, rental $15,350.

His Excellency the Governor is pleased to make the following promotions and appointments in the Hong Kong Volunteers.

Commandant Frederic Brine, to be Lieutenant Colonel Commandant.

Atwell Coxon, Esq., Private Hong Kong Volunteers, late sub-officer Singapore Rifle Volunteers, to be Captain.

Second Lieutenant Henry Cohen, to be Lieutenant, vice Fraser, resigned.

William James Henderson, Esq., Serjeant-Major Hong Kong Volunteers, late Private 1st City of London Rifle Volunteer Brigade, to be Second Lieutenant, vice Cohen, promoted.

Lieutenant Kearns D. Tanner, Instructor of Musketry H.M.'s 99th (Lanarkshire) Regiment, to be Hon. Rifle Instructor.

William Stanley Adams, Esq., M.D.C.M., Gunner Hong Kong Volunteers, to be Hon. Assistant Surgeon.

Mr. Charles Thorne's company performed "Othello" in the theatre to a numerous audience. As might have been expected, the experiment of producing one of Shakespeare's plays was found to be somewhat difficult as regarded its results upon the audience. On the whole, however, the performance met with approval. The part of *Othello* was well sustained by Mr. Charles Thorne, who appears to be a veteran upon the boards. The character of *Desdemona* was excellently sustained, while those of *Emilia* and *Iago* were well up to the mark, the former, indeed, being perhaps the best-rendered character in the play.

CANTON.

The *China Mail* correspondent writes:—

Canton is still dull as regards commercial vitality, although there are some slight indications of life remaining. The leading houses continue to maintain branches either on the Honam side of the river or on the well-known Shamien site, which latter has been beautified by tasteful matshed bungalows. The native traders with foreigners are still subjected to the most galling mandarin squeezes, and many of them have ceased to do business in consequence. In the adjacent district, towards the West, there have been clan fights, and recent information is to the effect that an army of Hakkas, 10,000 strong, is moving about, plundering and destroying Punti villages. They are armed in European fashion, and fire in platoon at the word of command, a circumstance which indicates the presence of foreigners in their ranks. The growing appreciation among the Chinese of Western fire-arms is one of the signs of the times, and so is the mischievous uses to which they are being so readily turned.

We deeply regret to record the death of the Rev. S. W. Bonney, who has been for many years a missionary at Canton in connection with an American society. He was a hard-working, pious, and devoted man, and his place will not be easily filled. In fact, he was a model to missionaries in China.

The following comments, the result of a personal visit of the Editor of the *Daily Press*, whose residence at that port dates, we believe, from 1840:—

"Having been absent from our desk on a visit to Canton for upwards of a week past, our readers generally may probably expect from our pen an attempt to express the sentiments and impressions which occupied our thoughts during our stay at that once far-famed emporium, as also such gleanings of political intelligence as we were enabled to gather. As far as the native trade of the place is concerned, a manifest improvement has taken place within the last six months—that is to say, there is more bustle in the streets, more merchandise in the shops, and more traffic on the river. Money is declared to be very scarce, and things generally appear uncommonly cheap.

"The Shameen site is beginning to develop itself. The permanent buildings now erected on it are the church, the parsonage, and the hongs of three British firms. There are besides about ten commodious mat bungalows on the site. The three firms who have erected permanent buildings on Shameen, have their offices there as well, but the dwellers in the mat bungalows have their offices in Honam, and resort to Shameen for the sake of the refreshing south breeze which blows up the Macao passage. Strange as it may seem, the Shameen site is cooler in midsummer than either Macao or Poke-fo-lum. We speak from the experience of the past week, during which a refreshing breeze never ceased night or day—generally speaking, it was inconveniently strong, and the nights were so cool that it was out of the question to sleep without bedcovering. We do not know a pleasanter trip than a visit to Shameen presents. These American steamers are glorious craft to travel in—the fare, the attendance, the cleanliness and everything are unexceptionable. A few days' residence at Shameen is highly agreeable and conducive to health, whilst a visit to the city shopping, or to the heights "prospecting," or to Poontinqua's garden botanising, form an agreeable variety.

"As for the Shameen site *per se*, we fancy that at the present moment it is rather out of the way of business, but we think, should the foreign community make it their head quarters, that the shopmen will come behind them, and the tea and cotton men settle at Honam. In this case Shameen will become very central and convenient. We think, however, that the plan adopted for laying down the Shameen site is on rather too magnificent a scale, and that, large as it is, it will prove quite incapable of holding the foreign community which dwelt in Canton at the time of the *Arrow* outbreak. There is a praya of fifty feet all round, and then a street up the middle of 100 feet, and the hongs are being built one after the other isolated so that really little, if any, more than half the ground will be occupied.

"The foundations for the new British Consulate are being proceeded with. We heard that it was necessary to sink deeper than anticipated, and that the contractor hesitated about signing. By the way, the mat bungalows on the Shameen site are, we think, quite as commodious and well built as the barracks at Cowloon. We were told that the former only cost about $400 whilst the contract for the latter was $1,300! Our military authorities should see to this.

"Regarding the chances of Canton recovering itself, we think that all depends on the action of the Government. It cannot be doubted that the Canton province is most productive, populous, and wealthy; its population is the most energetic, intelligent, and enterprising of all Asiatics, save and except the Parsees. Yet their wealth is hoarded, their energy paralysed, their enterprise curbed. Feud fights prevail throughout the breadth of the province—the communications are rendered perfectly unsafe by marauders—and the especial mission of the mandarins appears to be the practice of extortion. The only place in the province where trade can be carried on is the colony of Hong Kong—the communication between which and Canton is open and free by means of the daily steamers; money can be safely deposited here, until an opportunity for investment presents itself, and insurable vessels can be engaged to carry merchandise to any part of the coast. But we should suppose that this one outlet for enterprise and capital has been overdone, and that hence arises the complaint of dull times.

"It seems abundantly clear to us, that if the communication between Canton and the hundred large towns and cities contained within a radius of fifty miles, were clear and uninterrupted—if the vicinity of all such towns and villages were secure from faction fights—and if the success of a merchant ceased to be the signal for extortion being practised on him—then we maintain that the Cantonese would resume their wonted habits of enterprise, and that confidence, in fact, being restored, old Canton would rise from her ashes. Half this desideratum would be accomplished if foreign steamers were to run from Canton to the towns up the river; but even this the mandarins will not permit, although tempting offers have been made to them for the purpose. Their obstructiveness and their rapacity are on a par.

"For instance, the opening of Hankow has proved prejudicial to Canton in so far as country Congous are concerned. The Canton teamen were determined not to yield the trade without a struggle, and, consequently, last year they secured a number of chops of Congou which they had brought down to Canton, and on which they lost heavily; and little wonder, seeing that the mandarins squeezed 7½ taels per picul out of them in the shape of transit dues."

Our Soochow correspondent informs us that an expedition which started about three weeks ago for the purpose of completing the subjugation of the district around the provincial capital, returned on the 3rd July, after having captured the walled city of Chang-shing, situated between Hoochow and Yih-shing. The rebels, it is said, made a stout resistance. The position was of great importance to them, as a means of communication with Hoochow. On the 5th, the Futai left Soochow for the purpose of establishing a municipal government at Chang-shing.

The double screw steamer *Far East*, Captain Henry Jones, left Shanghai for Hankow on the 21st July, and will, we understand, load at that port for England. Rate of freight has not transpired.

JAVA AND NETHERLANDS INDIA.

A daring case of forgery had been detected in Batavia. A native entering the office of Messrs. M., M., and Co., presented an acceptance for *f.*10,000, signed by Kouw Tjeng Po, and endorsed with the signatures of the firms of J. Speet and Tiedeman and van Kerchem. One of the clerks detected that the signature of the latter endorsers was a forged one, and it was soon discovered that the whole was a case of one of the most daring forgeries heard of for many years past. The native was arrested, when he acknowledged he had been sent in to discount the acceptance by a Chinaman then waiting outside to see the issue of the mission. Our celestial friend was also immediately arrested, notwithstanding his protestations of innocence. It has since been discovered that the same Chinaman has already succeeded in discounting forged acceptances to the

Digitized by Google

extent of *f.* 40,000, and that one or two large houses will have to suffer the loss. The delinquent is a young man of good connections, but who has managed to run through a large fortune within the space of one year. He was assisted in these forgeries by a fellow countryman, who is also in custody, and who has confessed having made the false signatures at his instigation.

The Governor-General has granted a patent for a period of fifteen years to Messrs. Van Vriesendorp and Gaade, of the Hague, attorneys of Mr. S. Carpmael of London, for the introduction into Netherlands India of improvements in centrifugal machines.

An insane attempt at a revolt had lately been discovered. The leader was a young man employed at the Supreme Court. It seems that he had persuaded a few native soldiers of the garrison to join him. He was, however, betrayed, and is now in close confinement together with his accomplices.

MALACCA STRAITS.

SINGAPORE.

Our dates come down to the 6th August. The London mail of the 27th June arrived on the evening of the 29th July.

The commerce of the three stations of the settlement, taken together, amounts to over sixteen millions sterling, and it is worthy of observation, that though the American war has materially interrupted the supplies of the great import staples from Great Britain, yet the stoppage has not affected the total of the trade

Singapore was suffering from a condition of the weather altogether unexampled in the memory either of the European residents or of the natives themselves. The heat was excessive; and a complete absence of those refreshing showers which have hitherto been such a characteristic of the climate rendered it well nigh unbearable, and at the same time seriously prejudicial to agriculture. Singularly enough, however, the fruit crop had not suffered, but on the contrary had been brought into market in greater abundance than in any previous year.

PENANG.

The Governor was at Penang, from whence he was visiting various parts of Province Wellesley.

The Government steamer *Pluto* had been with letters to the Rajah of Purlis asking information with reference to the death of five Siamese, who were supposed to have been murdered by people on board a Chinese junk. A junk was found at Purlis, the Nacoda of which admitted that he had landed men from Penang, but that they had immediately proceeded across the peninsula to Sangora. Suspicion being aroused, the Nacoda of the junk was apprehended, and placed in custody until information shall have been received from Sangora.

Remarking on the burning of the *Louisa* by pirates, and the slaughter of the captain and mate, the *Penang Gazette* observes:—"There is no doubt, we should be inclined to think, that several of the vessels bound to China which have never been heard of are not always destroyed by typhoons: pirates in the China Sea are probably as destructive. About a twelvemonth ago two vessels, the *Sarah Maria* and *Jacatra*, left this for China, and after sailing from Singapore nothing has ever been heard of either."

SIAM.

Report by Consul Sir Robert Schomburgh on the Trade of Bangkok for the year 1863.

SHIPPING.—During 1863 the entries, not including junks, were 304 vessels of 139,743 tons; the departures were 296 vessels of 115,914 tons. Compared with 1862 this shows an increase of about 9,000 tons in entries, and a decrease of 16,000 tons in departures. A large number of ships were lying in port at the close of the year waiting for rice, and also several large American ships were laid up, fearing capture by the *Alabama* if they ventured out.

The average shipping employed in the port during the last five years has been 282 vessels of 120,205 tons; hence, considering only the clearances, the employment during 1863 was above the average.

BRITISH SHIPPING.—During 1863 the entries were 82 vessels of 30,363 tons, and the clearances 78 vessels of 28,603 tons which is an improvement of about 3,000 tons on 1862, and is very close to the average for five years, viz., 79 vessels, and 30,300 tons.

IMPORTS.—The table of imports furnished by the foreign inspector of customs does not appear to me to be very complete, some large items, such as machinery imported for the Government, and presents to the King, being omitted; the trade in precious stones is also much understated; however, I believe it to give the best information obtainable.

It shows an increase over 1862 in the importation of piece goods, but I am informed by some of the largest importers that the piece goods trade has not flourished during the year, as buyers have seldom offered remunerative prices.

EXPORTS.—The total value of the exports has been about £880,000, rather above a five-year average.

RICE.—The export has been about 1,632,000 piculs, which is rather less than the amount exported in 1862, but just about the average export during the last five years.

SUGAR.—82,700 piculs were exported, being about 20,000 piculs less than the amount exported in 1862, and 47,000 piculs less than a five-yearly average.

SALT.—The salt trade with Batavia, which arose under contract with the Netherlands Government, having been mismanaged by the Siamese contractor, who failed to provide cargoes with any regularity, has now ceased.

COTTON has commanded a high price, having been in demand for shipment to Bombay. The quantity has been insignificant. Sticklac has been exported in unusual quantities.

Nothing noteworthy has occurred in respect of other articles of trade.

Bangkok, January 24, 1864.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BUYERS—On the 4th Aug., at Singapore, James, the youngest son of Mr. J. C. Buyers, aged 2¼ months.

COW—On the 6th Sept., at 419, New Cross-road, Deptford, the wife of Charles B. Cow, Commander of the ship Himalaya, of a daughter.

GORDON—On the 4th Sept., at Woolwich, the wife of Captain H. W. Gordon, C.B., of a son.

KNEVITT—On the 5th Sept, at 19, St. Paul's-road, Canonbury, the wife of Robert K. Knevitt, Esq., of a daughter.

MAPPIN—On the 8th Sept., at Queen's-road, Clapham-park, Surrey, the wife of John Newton Mappin, jun., Esq., of a daughter.

MARRIAGES.

ABBOTT—CREIGHTON.—On the 3rd Sept., at the parish church of Kinsale, county Cork, Ireland, by the Rev. J. W. Hopkins, M.A, assisted by the Rev. William Baldwin, M.A, Duncan Dunbar Abbott, Esq., of Pembridge-square, Bayswater, to Marian Clara Vincent, eldest daughter of George Gray Creighton, Esq., M.D., of Kinsale.

ROUTH—AIRY.—On the 31st Aug., at the parish church of St. Alphage, Greenwich, Edward John Routh, Esq., Fellow of St. Peter's College, Cambridge, son of the late Commissary General Sir Randolph Isham Routh, K.C.B., to Hilda, eldest surviving daughter of George Riddell Airy, Esq., Astronomer Royal.

RODRIGUES—RODRIGUES.—On the 16th July, at Hong Kong, Henrique Rodrigues, to Germinia Rodrigues.

SEVERS—BALDOCK.—On the 30th Aug., at Walcot Church, Bath, by the Rev. W. Williams, assisted by the Rev. E. Brown, Henry H. Severs, Esq., of Hong Kong, to Julia Elizabeth, youngest daughter of the late Wm. Baldock, Esq., Royal-crescent, Bath. No cards.

SANGSTER—WALSH.—On the 26th July, at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, Colonial Chaplain, Charles Frederick Augustus, fourth son of John Sangster, St. John's-wood, London, to Jane Mary Josephine, third daughter of the late C. Walsh, of Sydney.

STARK—LE CAIN—On the 2nd Aug., at the Presbyterian Church, Singapore, by the Rev. John Mathison, Robert Stark, Esq., to Harriett Jessie, only daughter of the late Walter W. Le Cain, Esq.

WALFORD—DAVIS—On the 3rd Sept., at St. Marylebone Church, Euston-road, London, W. H. Walford, Esq., Chief Officer P. and O. Service, to Miss Emma Davis, of Woodfield House, Aspley Guise, Bedfordshire. No cards.

WIGNALL—BARKER.—On the 1st Sept., at Salem Chapel, Leeds, by the Rev. Wm. Hudswell, J. H. W. Wignall, Esq., of Shanghai, China, to Emma, youngest daughter of the late Henry Barker, Esq., of Leeds. No cards.

DEATHS.

BARBER—On the 7th Sept., at Merton Abbey, Surrey, Captain James Barber, formerly of the Hon. East India Company's Service, aged 77.

BARTHOLOMEW—On the 12th July, at Hong Kong, Alexander Bartholomew.

BOONE—On the 17th July, at his residence, Hong-que, Shanghai, the Right Rev. W. J. Boone, aged 53 years.

BULLY—On the 24th July, at Macoa, Edward Bully, ship chandler.

BOOTH—On the 4th July, on board the S.S. Elgin, on her passage from Japan to Shanghai, Thos. Booth, Chief Engineer.

BONNEY—On the 26th July, at Canton, after a lingering illness of 2 months, the Rev. S. W. Bonney, aged 49 years and 4 months.

CRAWFORD—On the 29th July, at Milport, Scotland, Captain Robert Crawford, aged 70.

COOPER—On the 28th Aug., at Malta, on board H.M.S. Orlando, Edward Cooper, Esq., Midshipman, only son of Captain Cooper, of the Peninsular and Oriental Company, aged 19. Friends will please accept this intimation.

CORDEIRO—On the 21st July, at Macoa, Albano A. Cordeiro.

DOYLE—On the 23rd July, at the General Hospital, Hong Kong, William Doyle, Private H.M.'s 99th Regt., aged 26 years.

ELIOTT—On the 3rd Sept., in London, Sir William Francis Eliott, Bart., of Stobs and Wells, Roxburghshire, N.B., aged 72.

FLADSEN—On the 18th July, at Hong Kong, H. P. E. Fladsen, Master of the British ship Mount Stuart Elphinstone, aged 45 years.

GAYNER—On the 11th July, at Hong Kong, the wife of Capt. Gayner, H.M.'s 99th Regt., of a son.

HAPEL—On the 17th July, at the Civil Hospital, Hong Kong, C. Hapel, Customs, Canton.

JAMIESON—On the 10th Aug., at Upper Brunswick House, Southampton, after a few hours' illness, Thomas, eldest son of Capt. Jamieson, P. and O. Company's ship Pera, aged 10 years and 4 months.

KITTO—On the 17th July, at the Civil Hospital, Hong Kong, J. Kitto, destitute seaman.

LAWRENCE—On the 19th July, at Shanghai, E. B. Lawrence, chief officer of steamer Soochow.

POTTS—On the 15th July, at the Seamen's Hospital, Hong Kong, William Potts, late second mate British ship Zenobia, aged 19 years.

SEAVERS—On the 20th July, at the Civil Hospital, Hong Kong, S. W. Seavers, destitute seaman.

WESTCOTT—On the 20th July, at the Civil Hospital, Hong Kong, William Westcott, acting clerk, Victoria Jail.

Digitized by Google

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—MACAO.—Tyshans: Arrivals of the third crop amount to 1,500 bales, making up 21,571 bales, equal to about 13,000 piculs, for the season to date; contract deliveries for the fortnight are 1,900 half-chests, 200 boxes Congou, 1,600 half-chests and 500 boxes Souchong of the better kind. There have been no sales on the market. The Banian, principally laden at Whampoa, took in here about 100 tons of the best for London.

CANTON.—One or two chops of country Congous have actually come orward, and it is expected that 100 chops may be received in all. A fair amount of business continues to be transacted in Tayshan Congous. For Scented Teas a good demand exists for fine, which are scarce and tend up; medium and common being plentiful and cheaper. In Canton Greens the business is restricted to Gunpowder, fine being scarce and dear, middling and common plentiful and cheap. Tayshan Congou: 1,250 boxes and 500 half-chests at 22 taels for brownish blackish leaf up to 30 taels for finest imitation Kaisow. Plain Orange Pekoe: 1,000 half chests at 25 to 31 tls. for fine to finest. Souchong: 1,000 half-chests at 16 to 18 tls. for common. Scented Orange Pekoe: 4,000 boxes at 23 tls. for fair up to 34 tls. for very fine. Scented Caper: 7,000 boxes at 22½ tls. per middling up to 35 tls. for superfine. Canton Greens: 5,000 boxes Gunpowder at 12½ to 25 tls. for common to fine, and 2,000 boxes Imperial at 12½ to 15 tls. for common to fair. The stock is uncertain, being in a variety of stages of preparation.

FOOCHOW.—There has been a brisk demand during the fortnight for all descriptions—large purchases of common to medium Congous have been made for the Australian market, and prices for those descriptions have advanced from 1 to 2 tls. The better kinds have been in less inquiry, and rates have tended down. For the past day or two settlements of Congou have been on a more moderate scale. A fair demand has continued for Souchongs at previous rates. Pekoes are very dull. Ooolongs and Scented Teas are in moderate request at rather easier rates. The settlements since last report are stated as under:—Congous: 38,000 chests, 34,000 half chests, and 1,000 boxes, at 6.5.0 to 16.00 tls., for siftings to good common 18 to 22 tls., for coarse to good flor'y, 24 to 34 tls. for Souchong flavoured, and 35 to 36 tls. for fine Kaisows. Souchongs: 5,500 chests, and 2,000 half chests at 20 to 40 tls. Pekoe: 400 chests at 25 to 40 tls. Oolong: 4,300 half chests and 500 boxes at 18 to 29 tls. Scented Teas: 8,400 boxes at 18 to 44 tls. The arrivals to date are as follow:—Congou and Souchong, 284,000 chests, against 274,000 chests same period last season. Oolong, 68,500 half chests against 62,000 do.

SHANGHAI.—Black: The settlements show in many instances an advance of fully one tael, and holders are decidedly firmer since exchange has declined. Settlements amount to 39 chops, at prices from 18½ tls. for common Oonhams to 43 tls. for finest Oopacks or Ningchows. Arrivals from Hankow have been very large, but most of the teas have been re-shipped without being offered on our market. A few chops of second crop Oopack have been shown, and their quality appears about equal to last year's crop. Settlements on the market, 33 chops or 21,751 chests Oopacks, Oonhams, Ningchows, Hohows, and F. Pekoe. Re-shipped on owners' account, 85 chops or 42,275 chests, do. do.; total 124 chops 64,026 chests; making total to date 100,549 chests. Stock waiting shipment and for re-sale, 28 chops. We quote first crop Oopacks, 31 to 43 tls.; Ningchows, 28 to 43 tls.; Oonhams, 18½ to 28 tls.; Hohows, no settlement. Green: The only transaction during the fortnight have been the settlement of two chops of new season's Pingsuey, at 43 and 44 tls. respectively; for other classes there has been no inquiry. Re-shipments and settlements:—1,887 half-chests Fychows, &c.; 4,789 hf.-chests Pingsuey; total, 6,676 hf.-chests—making total to date, 10,599 hf.-chests. Stock of Green tea is estimated at 3,668 hf.-chests Fychow, &c.; 524 hf.-chests Shanghai packed Japan; 8,294 hf.-chests Pingsuey; total 12,486 hf.-chests.

HANKOW.—In consequence of the continued unfavourable advices from Shanghai, of the depressed state of the money market there, and the high rate of exchange ruling, operations during the past fortnight have been somewhat checked. Notwithstanding, however, the falling off in settlements the teamen remain firm for last quoted rates. Second crop, the arrivals of which have been moderate, turn out rather superior, both in leaf and liquor, to those of last season, and for good mediums the teamen ask very full prices:—Settlements for the fortnight are 105 chops, including 8 contracts, and 4 sent to Shanghai on Chinese account, making the total settlements for the season 332 chops, and leaving a stock on the market of 35 chops. Quotations are, good medium 19 to 24 tls., 2nd crop, good finest 20 to 27 tls. Oonhams common to good 15 to 22 tls.

KEWKIANG.—Black Teas: The stringency of the money market in Shanghai had the effect of checking operations, and the only business done during the fortnight had been the settlement of 4 chops medium Ningchows at 25 to 27 tls. in barter against imports. Supplies had been limited, the total arrivals to date amounting to only 48 chops, whereof 43 had been shipped, 5 remaining in stock. Quotations were nominal, but the holders preferred selling on the spot to shipping to Shanghai. Ningchows, were quoted 31 to 32 tls. fair to good 25 to 28 tls. The total settlement and and shipments of the season to date amounted to 24,095 chests against 29,326 chests same period last season. Green Teas: There are no additional advices to those quoted in last report. It seems certain that supplies will be short, and rates high.

YOKOHAMA.—Of old teas the stocks are now reduced to a very few piculs of good ordinary and common: about 150 piculs have been settled during the fortnight. The new crop is beginning to come in somewhat more freely, but yet in very limited quantities, and for these very extreme prices, showing an advance of about $1 to $2, have been demanded and submitted to, to the extent of about 3,000 piculs, principally for the American market. Quotations are as follows:—Ordinary, $1.00 to 3.00; good do., $4.00 to 6.00; common, $8.00 to 12.00; good do., $14.00 to 19.00; medium, $20.00 to 26 00; fine, $28.00 to 30.000; finest, $31.00 to 32.00; new medium, $26.00 to 32.09.

NAGASAKI.—Tea has continued to come in but slowly, in consequence of the high prices demanded by the manufacturers in the interior. About 2,000 piculs of leaf ranging from $18 to 33 have been purchased at $3 over last year's rate, chiefly in order to keep the firing-places going. At present there is no stock on the market, continued rain having presented any supplies coming forward. Native dealers report a plentiful crop this season.

RAW SILK.—SHANGHAI.—Early in the fortnight the market was moderately quiet, and although prices were very firm, there was no alteration in quotations, until the English mail of 26th May arrived with telegrams to the 2nd June, advising an active home market, with an advance of one shilling per lb: for fine silk. This enabled the dealers to establish an advance of 5 to 10 tls. per picul, and at the close there has been considerable excitement in the market, with very irregular prices. The settlements may be estimated at 3,000 bales, the bulk of which are medium and inferior Tsatlees. Of really fine silk the market has been almost cleared of all the parcels offered for sale, but as some of the Chinamen have withdrawn their musters, in the hope of realizing higher prices, a small quantity is still included in our present stock. A portion of the second crop has been received and proves inferior in every way to the first, and the dealers confidently assert, that the yield is less than last season. It is expected that there will, in consequence, be a large proportion of common and inferior silks, especially Taysaams, some few lots of which have already arrived and found buyers at very extreme prices. The receipts from Japan have been 314 bales, the latest advices announce the arrival of a few bales of new silk which sold at high prices. Further arrivals were daily looked for. The following are the current quotations:—Tsatlees: No. 1 chops, 405 to 410 tls.; No. 2, 385 to 390 tls.; No. 3, 365 to 370 tls. per picul. Market: No. 3 chops, 350 to 360 tls.; No. 4, 340 to 350 tls.; No. 5, and common, 325 to 335 tls. per picul. Taysaams: No. 1, 350 to 460 tls.; No. 2, 330 to 340 tls.; No. 3, 315 to 325 tls.; No. 4, and inferior, 260 to 305 tls. per picul. Yuenfa: No. 1, 360 to 370 tls.; No. 2, 345 to 355 tls.; No. 3, 330 to 340 tls.; No. 4, and inferior, 320 to 325 tls. per picul.

CANTON.—The 2nd crop cocoons are nearly all reeled off, and the 3rd has commenced; musters of the latter have been received, and as far as can be judged the quality appears good, but the quantity it is now said will fall short of what was at first anticipated. The reported rise in Europe for fine Silk brought on by last advices has not had the effect of stimulating purchases here, ruling prices being 8d. to 1s. per lb. over latest Home rates. The quotations for this departure are thus given, viz: Loong-kong No. 1 $435 to 440. Do. No. 2 $420 to 425. Kow-Kong $405 to 410. Rereeled Cumchuck (nett) $485 to 490. Waste Silk, No. 1, $53 to 54. Do. No. 2, $44 to 45. At these prices there are no buyers for Europe. 24 piculs have gone forward to Southampton and about 80 piculs for Bombay.

YOKOHAMA.—A few parcels have come down, some portion of which was either new silk of last year's cocoons lately reeled, but mixed with old silk, and generally inferior. Some 50 bales have been settled at from $525 to 535, which prices appear to us to be very high, if we take the quality of the silk into consideration. Since then a few more bales have come to market, the quality of which seems to be improving, and, consequently, they are held for higher prices.

CHINA EXPORTS.

DRUGS, &c.—Camphor: Sales at $17.60 unpacked, and $19 packed. Stock, 600 piculs. Cassia Lignea: A somewhat better quality has arrived, and quotations have advanced 10 cents. Settlements reported, 700 piculs, at $15 to $15.80. Stock, 1,500 piculs. Cassia Buds: The stock has been augmented to 80 piculs. The article is now being offered at $53.50, which shows a decline of 50 cents. China Galls: A fresh supply of 400 piculs caused a depreciation in value. A settlement of 300 piculs is reported at $12.50. Stock, 200 piculs, held at the same price. Vermilion has fallen 50 cents, and is now offered at $42.50 to $43 per box of 50 catties. Rhubarb: 55 pls. good ordinary quality have been taken at $72, and shipped per Marlborough to London. For another chop of low middling the extravagant price of $130 is asked. Musk: The old stock of 180 catties is still held at extreme rates. Galangal $2.90 to $3, nominal, no buyers. Essential Oils: None on the market.

COTTON.—At Hong Kong sales of Northern arrivals at $32 to $36. At Shanghai, quotation 19 tls. and buyers holding off. At Yokohama, market stiff at $28.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael)	6	months sight.	7s. 0d.	7s. 0d. to 7s. 2d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...
At Canton, At Hong Kong, At Macao	6	ditto	4s. 9½d. to 4s. 10d.	4s. 10d. to 5s. 11d.
At Singapore	6	ditto	4s. 10d. to 4s. 10½d.	4s. 11d. to 5s. 0d.
At Manila	6	ditto	4s. 7d.	4s. 7d. to 4s. 8d.

At Shanghai, Bills on India, Rs. 335 to 338 per 100 taels. At Hong Kong, Rs. 232 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 12 premium. Mexican dollars at Shanghai, taels 71 per 100, and Exchange on Hong Kong, 34 to 35 discount.

The following is from the circular of Messrs. Sharp and Co. Hong Kong, July 28:—

GOLD.—Since last report we have received one and a half lacs of dollars' value; whilst the exports, including the shipments per *Malta* on the 12th July and excluding those to leave by the *Carnatic* to-morrow, amount to four lacs and ten thousand dollars. The price, after some fluctuations, has returned to the point of last mail's quotation.

SILVER.—This bullion has been in very small supply, and very large demand. There has come to hand one hundred and twenty thousand dollars value, and there has been half that amount sent North, the balance will go on by the French mail to-morrow after this account has been closed. There is a most pressing necessity for some coin suitable for the North of China, and it is to be hoped that the new Hong Kong dollar of a silver tael piece may ere long supply the want.

Digitized by Google

DOLLAR CURRENCY.—During the fortnight we have received three qundred and eighty thousand dollars, and have sent away one million and four hundred thousand. Clean coin have rallied a little from their depression, on account of the slight improvement in Shanghai; these occasional improvements being continually checked by an attempt to realise a portion of the immense sums at present pawned at exorbitant rates of interest.

DISCOUNT AND MORTGAGES.—These have been done respectively at 8 and 9 per cent. per annum.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—No report.

At SHANGHAI.—From London: July 6, Lodge M'Norton. From Liverpool: 16, Wild Deer. From Bristol: 6, J. Stanton, jun. From Sunderland: 5, Comus. From Newcastle: 18, Ariadne.

At HONG KONG.—From London: July 15, Lord Raglan; 23, Gauntlet; 26, Southern Belle. From Liverpool: 16, Verbena. From Glasgow: 16, Dumbarton (str.); 20, Elizabeth Ronneberg, and, 28, Hermslen. From Newcastle: Cassiterides; 20, Orion. From Sunderland: 18, Trafalgar and Aboyne; 23, Harkaway. From Shields: 18, Carisbrook. From Cardiff: 19, Quick and Beatrice; 20, Ocean. From Hamburg: 23, Laura. From New York: 15, White Eagle.

At MANILA.—From Liverpool: July 17, Olano, and, 20, Josey Maria.

At SINGAPORE.—From London: Aug. 5, Spirit of the Deep. From Newcastle: July 23, Eddystone. From Cardiff: 28, Bravo.

At BANGKOK.—None.

At PENANG.—From Glasgow: July 12, Dunnikier.

DEPARTURES.

From JAPAN.—None.

From SHANGHAI.—For London: July 8, Silver Eagle and White Adder; 11, Highflyer; 12, Fychow; 20, Knight Templar. For Liverpool: Affghan.

From FOO-CHOW.—For London: 11, Holmsdale; 13, Star of China, and, 14, Dartmouth.

From HONG KONG and CANTON.—For London: July 24, Chanticleer (*via* Macao). For Liverpool: July 14, Jessie Beazley. For New York: 15, Cornelia.

From MANILA.—For Liverpool: July 19, Indiaman. For New York: 15, Bengal, and, 27, Continent.

From SINGAPORE.—For Liverpool: July 29, Volunteer.

From BANGKOK.—For New York: July 3, Eastward Ho.

From PENANG.—For London: July 21, Empress, and, 23, Sunium.

LOADING.

At JAPAN.—For London: Amoy, Vigil, Fleda, Lucknow, and Anna Maria. For Liverpool: Gyrn Castle.

At SHANGHAI.—For London: Gresham, Assyrian, Caractacus, Castle Howard, Claramont, Toftscomb, Essex, Shakespeare, Southern Cross, Wild Deer, City of Quebec, and Stirlingshire. For Liverpool: Brockham, Southern Empire, Sea Snake, and Thomas Bell.

At AMOY.—For London: Willy.

At HONG KONG and CANTON.—For London: Adriatic, Cathaya, Ben Lomond, Yeavering Bell, Peterborough, Valdivia, Aboyne, Hyacinth. For Liverpool: Chaa-sze, Everest, General Windham, and Delhi. For New York: Roslin Castle.

At MANILA.—For London: Seaforth, and Staffordshire. For Liverpool: Constance, Frederick, Jupiter, Kathay, and Labrador. For Falmouth: Gondola, Ocean Express, and Voladora. For New York: Franklin.

At SINGAPORE.—For London: Prince Alfred, Rangoon, Spirit of the Deep. For New York: Panic.

At BANGKOK.—None.

At PENANG.—For London: Spitfire, and Marengo.

FREIGHTS AND CHARTERS.

JAPAN.—To London: Cotton and tea, £4 to £4. 10s.; silk, £5 to £5. 10s.

SHANGHAI.—The following are the settlements for home during the fortnight: Essex (1,256 tons), to London, £3; Comus (375), Kanagawa to London, £4. 5s.

FOOCHOW.—To Great Britain, £3 to £3. 10s.

HONG KONG AND CANTON.—To London: George Holmes' Circular gives the following:—The Peterborough (560 tons) at £3. 10s. per ton; Valdivia, Aboyne, Hyacinth, Horsa and Johnny Temperly on the berth at current rates; and the Delhi for Liverpool. To New York: The Maggie Leslie (478), Bedford (620), to load at Amoy or Foo-chow at £3. 5s. per ton. The Sailor's Home (1,240) proceeds to Shanghai for $2,000 in full, and thence to London or Liverpool at £2. 10s. per ton. To Bangkok and back: The rates are 40c. per picul, and 15 to 20c. additional if to north.

MANILA.—The only vessel fixed in the Staffordshire for London, at £3 for clayed sugar and £4 for tobacco. An improvement on these rates is looked for.

BANGKOK.—Tonnage is but little inquired for, the rates are as follows:—To Hong Kong: 40 to 45c. per picul, and to Shanghai or Ningpo 70 to 75c.

PENANG.—To London: £3 dead weight; £3. 10s. light freight; and £4 measurement.

PASSED STRAITS OF SUNDA.

FROM ENGLAND AND CONTINENT TO CHINA, &c.—From Liverpool to Shanghai, 19 July, Agincourt; 23, Bantam, Amsterdam to Singapore and Castor, Liverpool to Singapore; 25, Jubilee, London to Hong Kong; Prata (orders), Jacob, and Anna, Rotterdam to Japan, via Catharina; 27, Vulbore, Bordeaux to Saigon, and Bangainville, Bordeaux to Saigon.

FROM CHINA, &c., TO ENGLAND AND CONTINENT.—July 10, Dewa Gungadhur, Singapore to London; 14, Scawfell, Canton to London; 17, Invidcible, Singapore to Liverpool; Chanaral, Sarawak to London; 20, Twee Cornelissen, Japan to Falmouth; and 25, Eliza Sheen, Shanghai to London.

COMMERCIAL POSTSCRIPT.

The following vessels from Foochow, with the new season's teas, are now daily expected:—Fiery Cross, Serica, Young Lochinvar, Flying Spur, Min, Yang-tsze. H.M.S. Vulcan, from Shanghai, with returned troops and stores, is also due.

According to the bullion table of Mr. Page, the export in August was:—

	Gold.		Mex. Dol.		Bar Silver.
Singapore, Java, &c. ..	£1,143	...	£57,130		
China	200	...	22,608	...	63,840,

ARRIVALS NOT INCLUDED IN THE TABLES.—Sept. 6, at Helvoet, from Batavia, Ferdinand and Louis; 5, at Zierikzee, from Batavia, Concurrent; 7, at London, from Sarawak, Chieftain; 8, at Deal, from Rangoon, Satana (?); 6, at Copenhagen, from Akyab, Ludwig Holm; 7, at Havre, from Rangoon, Charlotte; 6, at Bordeaux, from Hong Kong, Johanna; 7, at Texel, from Akyab, Hedvig; 7, off Queenstown, from Maulmain, John Kerr; 8, at Texel, from Tjilatjap, Madura; 10, at Deal, from Akyab, Atlantic; 11, at Liverpool, from Shanghai, Neville; Dunkeld, from Singapore, Hurry Puddensey; at New York, from Manila, Isabella; 12, at Falmouth, from Akyab, Krimpenaan de Lek; 10, at Liverpool, from Akyab, De Salabery; 2, at Gibraltar, from Sumatra, &c., Rattler; 13, at Falmouth, from Rangoon, E. Sherman, from Akyab, City of Boston; 10, at Copenhagen, from Akyab, Freid; Aug. 29, at Boston, from Manila, Fearless; 30, from Singapore, Alexander. Sept. 12, at Plymouth, from Rangoon, Matilda; 14, at Falmouth, from Rangoon, George and Johan; 13, at Liverpool, from Manila, Diadem; 10, at Brouwershaven, from Batavia, Albrecht, Beyling.

DEPARTURES.—Sept. 9, from London, for Singapore, Early Dawn; 11, for Hong Kong, Borealis; 12, Arab Steed; 13, for Shanghai, Norwood; 13, from Liverpool for Manila, Thos. Royden; for Shanghai, Water Witch, Gossamer; July 29, from Callao for Macao, Cæsar; Sept. 14, from London for Shanghai, Abbotsford, in ballast.

SPOKEN.—Akbar, Penang to London, July 11, 35 S., 24 E.; Provincie Drenthe, Amsterdam to Samarang, June 10, 29 S., 19 W.; Osborne House, Canton to London, July 23, on the line, 36 (?) E.; Johanna Christina, Rotterdam to Batavia, Aug. 1, 11 N., 23 W.; Admiral de Ruyter, Amsterdam to Batavia, September 4, 50 N., 2 W.; John Bartlett, of Dundee, for Shanghai, July 15, 2 S., 23 W.; Stratford, of Liverpool for Singapore, July 21, 11 N., 26 W.; Insulaire, Cardiff to Singapore, July 30, 9 N., 25 W.; Presto, Amsterdam to Samarang, Aug. 1, 12 N., 26 W.; Susanna Johanna, Rotterdam to Sourabaya, Aug. 2, 11 N., 26 W.; Falcon (barque), Callao (?) to Hong Kong (?) July 18, 12 S., 31 W.; Ship, No. 7,410, 3rd d.p. (Oasis), Liverpool to Sumatra, July 26, 6 N., 26 W.; Lady Ebrington, Japan to London, July 4, 28 S., 50 E.; Velocidade, London to Japan, July 21, 1 S., 25 W.; Ida Elisabeth, Rotterdam to Samarang, May 21, 3 N., 24 W.; Rudolf, Rotterdam to Batavia, July 30, 14 N., 25 W.; Talleng (Dutch barque), Amsterdam to Batavia, July 31, 14 N., lon. 46; Isabella (barque), Swansea to Hong Kong; Aurora Australis, London to Shanghai, August 6, 13 S., 34 W.; Marianne, Bristol to Singapore, July 30, 24 S., 32 W.

NEW CLIPPERS FOR THE CHINA TRADE.

A fine clipper ship, to be named the *Flying Cloud*, will be launched in about a month from the ship-building yard of G. Peverall, Esq., of Sunderland. Her length is 180 feet, beam 34 feet, depth of hold 20 feet. The framework is of iron, with diagonal fastenings. The beams are 30 inches apart, and she is planked with teak. Her masts are of iron, and fitted with steel yards. Her owner is John Patten, Esq., of Weston, Durham. She is to be commanded by Captain Shield, late of the *Capriolani*. Her building and fitting out has been conducted under the special superintendence of Captain Winchester, late of the *Carribean*.

About the end of October will also be launched the *Coral Queen*, from the ship-building yard of Messrs. Pile, Hay, and Co., of Sunderland. The *Coral Queen* is a fine clipper of 800 tons. Her length is 180 feet, beam 33, depth, 19 feet; iron frame, diagonally fastened and planked with 6-inch teak. She is fitted with every modern improvement, and will be a very superior ship. She is owned by John Hay, Esq., of Sunderland, and will be commanded by Captain John Winchester, late of the *Carribean*, under whose superintendence she has been built.

The Chinese and Japanese Repository for August presents a greatly-improved appearance as regards type and paper, and we observe the publishing office is removed to 31, King-street, Cheapside. The present number contains another section of that most interesting tale, "The Story of Han-wan and the White Serpent." The "Distinguished Men of the Tang Dynasty" is devoted to an account of Li Tai-pi, the Chinese Anacreon, whose rhapsody "In the midst of the flowers I pour out my wine," and manner of death reminds one forcibly of his Grecian prototype. "The Study of Chinese by Europeans" is the summary of a lecture delivered by Sir John F. Davis, Bart., at the Asiatic Society in June last. The continuation of Mrs. Lockhart's paper on "Medical Missionary Practice in Peking in the Year 1863" gives, as might be expected, a considerable insight into the habits of life of the poorer inhabitants of that great city, and of their modes of thinking and feeling. For those who delight in more abstruse knowledge there is another portion of "The Science of the Chinese Algebra."

Foreign Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Sept. 10.

The dead season is nearly past; the session of the Parliament will be closed within a week, while the new session will be opened as usual on the third Monday of this month. The Ministers are all returned home from their trips to Germany, and are preparing the several Bills that will be delivered in at the opening of the session. The different Budgets have already arrived at the offices of the Council of State. When they have been discussed, the debates on the Government Act (*regeringsreglement*) for the West Indies will begin. Nothing has yet been heard about the Bill to abolish the heavy duty upon the journals. Indeed, it seems that the abrogation of that miserable tax upon knowledge will be deferred *ad kalendas Græcas*, notwithstanding the urgent protests of our press, whose ruin it is, and of the public.

The rumours that Mr. Betz, the head of the Financial Department, will be obliged to ask for his retirement, continue to circulate. It seems impossible for him to content the several members of Parliament with his long-promised modifications of our system of taxes; he endeavours, by all sorts of combinations and manœuvres, to disarm the Opposition; but I do not believe that he will succeed again, now that everyone is convinced that Mr. Betz is not the *specialite* he was thought to be when he sat upon the Opposition benches.

The ministerial *Haagsche Courant* assures us that the Budget for the East Indies (*comptabiliteitswet*) is ready to be presented at one of the first sittings of the Second Chamber of the States General. The rumour that the indisposition of Mr. Fransen van de Putte, the Minister of the Colonies, was dangerous is by this fact officially contradicted.

His Majesty has returned from his seat "het Loo" to the Hague; and within a few days her Majesty will leave for a journey of some weeks.

The Archduke Nicolas of Russia left our bathing-place, Scheveningen, for Copenhagen. The alliance between the Grand Duke, the heir to all the Russias, and the Princess Dagmar, sister of your Princess of Wales, is regarded as certain in our political circles.

At last the Palace of Industry is opened at Amsterdam, after it has taken about eleven years to carry out a plan which, I believe, was executed in England in about seven months. The exhibition, however, is worth the time and trouble consumed in getting it up. The appearance of the building is indeed very striking, and is an ornament to our capital. It was opened with great solemnity in the presence of the uncle of the King, Prince Frederick. Mr. Sarphati, the well-known banker, who projected the plan, has been created by the King Knight of the Order of the Netherlands Lion, and Mr. S. A. C. Dudok van Heel, the builder, Knight of the Luxemburg Order (*de eikenkroon*).

According to the latest news from Batavia (14th July), it seems to be impossible to construct the Ambarawa branch line of the network of railways in Java. Should this be true, then the Srobogan line must be laid down, and as this cannot be done without the consent of the States General, it is more than probable that the Bill authorising the construction of the Java railways must be re discussed.

The demand made by Mr. H. G. Uhlenbeck, ex-Minister of the Colonial Department and ex-Director of the Public Works in the East Indies, for increase of pension, is rejected by the Council of State. The Prince of Orange, in his quality of General of the Infantry, has been employed in inspecting the troops, now in the camp of Milligen.

The Government intends to send this year two or three more detachments to the East Indies than the limited contingent of 1,200 soldiers.

Civil engineer Mr. J. van Bosse is appointed engineer for the service in the East Indies. The Nestor of the Amsterdam traders, Wilhelm Willink, Esq., has died at Amsterdam, and the pensioned rear-admiral N. A. Vries at Kampen.

His Majesty's steamer *Zoutman* started yesterday for Japan, *via* Batavia; H.M. corvette *Maurets der Nederlanden* will sail within a few days for the West Indies, to return in six months.

The wife of the Rev. Vanden Berg, clergyman at Batavia, now temporarily residing at the Hague, has destroyed herself by taking a large quantity of sulphuric acid. Domestic quarrels seem to be the reason for this deplorable act.

Yesterday the institution for the instruction of East Indian functionaries at Delft was opened by a speech of the director, Mr. G. Keyzer.

COMMERCIAL.

INDIGO :—From Java ...	25,000f.	137,000f.	454,000f.	403,000f.

COFFEE.—The market was, since the last auction of 83,000 b., offered by the N.T.C., very active. An advance of 1 to 1¼c. was willingly paid for the qualities which were sold from 41 to 41½ c.; there is much inquiry for the fair and green sorts. On the 14th September 122,800 b. will be offered by the N.T.C., mostly ordinary qualities. The 2,200 b. Macassar, ex Maassluis, were sold at private auction at 31¼ to 42 c.; the 3,400 b. Java at 37½ to 42 c.; the 560 b. Java, ex Æolus, at different prices. Stock 426,600 bales, against 545,800 b. in 1863.

SUGAR.—The market is very animated by the bad reports from Java and France. There is much inquiry at July prices, but sellers are not inclined to operate. About 7,000 kr. were sold, No. 15¾ at 40f.; No. 16¼, at 40¼f.; No. 17, at 40¾f. The 1,121 kr., No. 17, ex Friesland, were sold at 40½f. for export. The quality was humid. The private stock amounts to 8,222 kr. The N.T.C. will offer by public sale on the 23rd of September, 20,700 kranjangs.

HIDES.—5,254 p. Singapore ox were sold at 20¼ to 38 c. The market remains unaltered.

RICE.—The market is dull. No inquiry for Java sorts. Only 9,000 b. Necranzie were sold at secret prices. Stock, 56,300 b. against 9,600 in 1863.

COTTON.—The market is not so firm as at our last report. The auction of the N.T.C. was very dull. The 2,390 b. middling Tinnevelly valued at 112 to 114c., were sold at 99½ to 102½c.; the 459 b. middling fair East Indian, valued at 94 to 96c., were sold at 83½ to 86c.; the 4 b. middling fair East Indies Sawginned were sold at 90c., and the 87 b. fair Japan at 107½ to 112 c. An advance of 2c. on these prices is now willingly paid.

TEA.—At a public auction 671/4 and 887/12 ch. China Congo were partly sold at 75 to 119c.; 160/12 ch. finest Pecco Souchon at 157c., 144/4 ch. China Pecco at 160c., 500/12 ch. China Pouchon at 61 to 89c., and 58/4 and 5/8 ch. Java; Boey at 51c.; Congo at 84c., Souchon at 88c., Oolong at 69c., Pecco at 134c., Tonkay at 65c., Schin at 52c., Hysant at 90c., Uzim at 118c. The market is now very inactive. Stock, 16,100/4 ch. against 21,900/4 ch. in 1863.

SPICES.—At the public auction of the N.T.C., on the 21st of August the whole quantity offered was sold, viz.: Nutmegs, 437 casks No. 1, at 88c.; 827, No. 2, at 76c.; 84 casks, No. 3, at 51c.; 24 casks, No. 4, at 43 to 44c.; 4 casks damaged, at 46c. Mace: 412 casks D, at 71c.; 301 casks E, at 69c. Cloves: 63 casks, No. 2, at 35c.; 7 casks, No. 3, at 33c.; Java Cinnamon, 142 fard, No. 2, at 81 to 86c.; 886 fard, No. 3, at 77 to 83c.; 337 fard, No. 4, at 74 to 76c. Black Pepper: 1,660 b.,

Digitized by Google

No. 1, 909 b., No. 2, and 1,458, No. 3, at 21f. The prices now quoted are nutmegs, No. 1, 90c.; No. 2, 80c.; No. 3, 57c.; No. 4, 45c.; Mace, D, 75c.; E, 73c. Cloves, No. 2, 34c.; No. 3, 33c. Stock: Nutmegs, 378 casks. Pepper, 1,950 b. The market is firm.

INDIGO.—The confidence in this article is always improving. 250 chests (private import) were sold at full prices. On the 5th October the N.T.C. will sell at auction 390 chests Bengal, 345 chests Java, and 163 chests Java Cochineal.

COCHIN COCOA NUT OIL.—With much demand at 25f. to 25½f.

RATTANS.—Dull. Only 1,081 b., ex Vincentius de Paulo, were sold at prices that did not transpire.

TIN.—Market very firm; business to a fair extent done privately. Large quantities, 81,371 bl., were delivered last month by the N. T. C. Sellers decline to operate under 62½f. 300 bl. Billiton were sold at prices that were kept secret. Stock, second hand, 98,900 bl.; N. T. C., 17,352 bl.

ARCAK.—150 casks, ex Henrietta Maria, were sold.

TOBACCO.—The 1,278 b. Java, GP, offered by subscription, were not sold. At public sale were offered and partly sold, 1,230 b. Kotta, in average, at 86 1-5th c.; 168 b. Kepet, at 5½c.; 50 b. Wonor, at 50c.; 117 b. Sentanan, at 73½c.; 76 b. Gedek, at 93c.; 65 b. L/A, at 36 1-6ths c.; 67 b. L/L, at 49½c.; 100 b. L/P, at 49½c.; 252 p. HZ, at 14c.; 79 b. I/S, at 24⅝c.; 133 b. Singahan, at 67 2-5ths c.; 1,277 b. SBS, at 58⅜c.; S, at 72¾c.; SS, at 21c.; RS, at 49½c.; 608 b. CHdB, at 19¼c. The market is since very inactive, only 1,796 b., ex Fransina Wilhelmina, from Batavia, trade mark Blitar, were sold. Stock, 9,548 b. Java.

CURCUMA.—Java, firm; nothing to have under 12f.

DRUGS.—Chin Rhubarbar 9 ch. offered at public auction, but retired at 3½f. to 4f.; 18 ch. Oleum Ricini sold at 30 to 31c., 45 ch. Japan wax sold at 33¾ to 36¾; 25 ch. gum Damar sold at 22 to 23c.; 7 ch. gum Benzoe (Sumatra) retired at 60c.; 30 b. gum elasticum E. I. sold at 90f., 10 ch., Getah Gitang at 53f., all per 50 kilos.

MONEY firmer. Discount (Bank) 5 to 5½; open market, 5 to 5½; N. W. S., 60⅜ to 7-16ths; Three Per Cents., 72¼ to 72½; Four Per Cents., 96. Handelmaatschappy, 138½. Change, London, 3 pm., 11.68f.; short, 11.92f. Paris, 3 pm., 46.32f.; short, 47f. Hamburg, 3 pm., 34.95f.; short, 35.50f.

PASSENGERS INWARD.

From Banjoewangie, at Brouwershaven, per Hendrika, Capt. Bus: Messrs. J. G. Jansen, 2nd lieut. infantry, and Mr. Spring with family.

From Batavia, at Zierikzee, per Baron van Heemstra, Capt. Nepperus: Messrs. Rochell, Velu, Quack, V. D. Veen, Koert, and fourteen soldiers.

From Batavia, at Brouwershaven, per Dordrecht, Capt. Loos: Messrs. Stieler, le Clercq, van der Beek, Blogg, Blok, van Eibergen Santhagens, Watson and family, Miss van Driel, and nine soldiers.

From Batavia, at Texel, per Sourabaya Packet, Capt. Olivier: Messrs. Olivier, Prins, V. D. Linden, Caspers and Boekholst.

From Padang, at Brouwershaven, per Koning Willem III., Capt. Kilian: Mr. van Bostraten and family, Mr. Kropveld, Miss Turick and seven soldiers.

PASSENGERS OUTWARD.

From Amsterdam to Japan, per Yokohama, Capt. Comfurius: Mr. M. Frisch.

From Amsterdam to Batavia, per Electra, Capt. Landweer: Messrs. Munters, commander and Voorman, 1st lieut. and 102 soldiers from the colonial recruiting depot at Harderwyk.

From Texel to Batavia, per Admiral de Ruiter, Capt. Mollinger: Messrs. J. F. W. v.d. Willige, von Schmidt auf Altenstadt, E. v. Beek, J. A. Tange, R. C. Krouse, H. J. v. Fiegen, J. A. Horestadt, M. Brunsveld, van Hulten.

From Rotterdam to Batavia, per Eva Johanna, Capt. A. J. B. Hordyk: Mr. Guise and family, Mr. Prevost and family, Miss Prevost, Miss A. C. de Thouars, Mr. D. de Wit.

READY TO SAIL.

At TEXEL.—Engel, for Japan; Vrede, for Batavia; Herman de Ruyter, for Samarang; Regina Maris, for Sourabaya.

At BROUWERSHAVEN.—Argo, for Batavia; Eva Johanna, for Batavia; Singapore, for Singapore and Hong Kong; Edouard and Marie, for Sourabaya; L. J. Enthoven, for Batavia; Kaapstad Packet, for Cape of Good Hope and Batavia.

LOADING.

At AMSTERDAM.—For Kanagawa and Decima: Maria. For Padang: Maria Agnes. For Batavia: Ymuiden, 3 Gezusters, Zeenimph, Java Packet. For Batavia and Sourabaya: Henrietta Maria, Holland. For Samarang: Waalstroom, Peking, Nederland, Celebes, Sourabaya Packet.

At ROTTERDAM.—See "Freights."

FREIGHTS.

The following quotations are from the circular of Messrs. Fauchey and de Vletter, shipbrokers, Rotterdam:—

For Batavia: Nova Zembla (979 tons), 15 f. to 20 f. For Batavia and Sourabaya: Eersteling (726), Medea (753), Neptunus (687), 15 f. to 25 f. For Sourabaya: Stad Dokkum (390), Nieuwe Waterweg (1,360), 20 f. For Samarang: Vesta (437), 18 f. to 20 f. For Padang: Lammechina Elizabeth (637), Maarten van Rossum (723), 30 f. to 35 f., all with 15 per cent. and per ton of 2,000 kilogrammes. For Singapore: Maria Louisa Antoinetta (613), 35s., and 10 per cent. per ton of 40 English square feet. For Singapore and Hong Kong: Jan van Galen (366), 40s. to 50s., and 15 per cent. per 40 square English feet. For Kanagawa: Niphon (360), 60 f., and 15 per cent. per 80 English square feet. For Melbourne: Sophia Koningin der Nederlanden (741), and Professor van der Boon Metsch, 30s. to 50s., and 15 per cent. per 40 square English feet.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, SEPTEMBER 10.

The Danish Consul at Hong Kong, in a despatch to the Minister for Foreign Affairs at Copenhagen, reports that the Sonderberg schooner *Chin-chin*, which had been captured by the Prussian steam corvette *Gazelle*, was released, as the commander of the corvette had received special orders from Berlin to respect all vessels hailing from the Duchies of Schleswig and Holstein. The same consular report states that the Danish schooner *Tordenskiold*, owned at Faaborg, in Jutland, had succeeded in eluding the pursuit of the Prussian ships of war.

From Russia we learn that the most important feature in the march of the great annual fair at Nyni Novgorod is the overland tea, which had risen in value. Last year the price obtained for this description was 100 roubles, whilst 115 r. are now willingly paid. This is accounted for by the two-fold circumstance that the supply is considerably less, and the quality far better than usual. Of Canton tea there were only 10,000lbs. on sale, which realised from 75 cop. to 1 r. 65 cop., according to quality. Of refined sugar 10,000 poods (of 40lbs. each) were brought to the fair, which sold for 8 r. 30 cop. to 9 r. for first quality, and 7 r. 90 cop. to 8 r. for second. Formerly the sugar refiners never attended the fair in person, the business being conducted by middle houses as agents, but this year several refiners are on the spot. Very little coffee had been brought for sale, chiefly from St. Petersburg, and prices were 1 rouble higher than last year.

The Senate of Hamburg, in conjunction with the Senates of Lubeck and Bremen, have jointly appointed Mr. G. A. Schoettler to be Hanseatic Consul at Newchwang.

Among the latest arrivals in this city from the East are Mr. and Mrs. Bullock, from Akyab, Mr. Consul R. von Carlowitz, from Canton, and Mr. G. W. Schwemann, from Shanghai.

COMMERCIAL.

COFFEE.—The deliveries both for consumption and shipment have been very extensive since last outward mail, and the market is in a favourable state, several large purchases having been made on speculation even at the present high prices.

SUGAR.—Importers have had to submit to a further decline of 4 to 8 sch. bco. per 100 lbs. for all descriptions of raw, but this reduction had the effect of attracting purchasers, and very considerable transactions ensued, after which the market closed rather firmer. Refined goods found buyers to an ample extent at stiff prices.

RICE.—For rough grain there has been but little demand, while cleaned descriptions were in great request, though the prices obtained were slightly in favour of purchasers. Among the transactions were 2,000 bags of good middling Bengal, and by public sale, for underwriters' account, 2,300 bags of sea-damaged Arracan.

SPICES.—Market for all articles firm, but with dealings to a very limited extent.

TIN.—Business confined to the execution of small orders for consumption and conveyance to the interior of Germany.

SPELTER.—Market dull, and prices have a downward tendency. Arrivals from the interior in August, 54,400 centners. Total arrivals from 1st January to end of August, 373,400 centners, against 136,000 for the corresponding period of last year, 140,000 in 1862, and 65,000 in 1861. Present stock, 15,000 centners, against 48,000 last year, 140,000 in 1862, and 65,000 in 1861.

COPPER.—Stocks being small, holders are not inclined to sell at the present rates, but demand higher prices, in consequence of which the business of the fortnight was but trifling.

SHIPPING.

SAILED.—Sept. 3, Marie Lucie, from Cuxhaven to Singapore; Leopold, from Hamburg to Hong Kong; Ino, from Hamburg to Hong Kong.

LOADING AT HAMBURG.—For Singapore: Nordstern. Macassar and Hong Kong: Chefoo. Singapore and China: Turandot. Manila: Arizona.

LOADING AT BREMEN.—For Rangoon and Akyab: Everhard Delius. Rangoon direct: Von Berg and Ottone. Shanghai: Andreas. Honolulu: Libelle.

CONSULAR TRADE REPORTS.

FOREIGN-OFFICE, Sept. 6.

The following despatches have been received at the Foreign-office, from Sir Frederick Bruce, Her Majesty's Minister in China, and from Mr. Caine, Her Majesty's Consul at Swatow:—

Peking, June 7.

"My Lord,—I have the honour to enclose 'Returns for Shanghai of import and export trade under foreign flags' for the year 1863, published by the Chinese Custom house. On the last page there is a table giving the yearly amounts of foreign commerce, beginning with 1854.

"The import trade has increased from 41,000,000 taels (about £13,000,000) in 1860 (the last year before the opening of the Yangtze and the northern ports), to 81,000,000 taels (about £27,000,000) in 1863.

"The increase is due, in a great measure, to the large and increasing trade, from the ports opened on the Yangtze, in Chinese produce of all descriptions. Owing to the violence of the winds and the rapidity of the currents in certain places, the application of steam to navigation was required before the Yangtze could be made available as a highway for transport. The decks of the steamers are now crowded with Chinese passengers, and their holds are filled with produce destined not for foreign export, but for Chinese consumption. The practical advantages of foreign inventions are thus brought home to masses of the population in the very centre of China, and they can now avail themselves of the natural outlet for the productions of those rich internal provinces, instead of being driven to the slow and circuitous method of artificial water communication, and exposed to the exactions of officials of the different provinces they had to pass through.

"The large amount under the head of re-exports embraces the trade in imports and exports which have been brought to Shanghai as an *entrepot*, and are thence distributed to different ports of China, to Japan, and to the Western world.

"The exports of Shanghai itself have suffered from the diminution of the silk crop, due to the advance of the insurgents into the silk districts, and the flight or forcible seizure of the labouring population.

"The entries of foreign-owned tonnage employed in carrying this trade have increased within the same period from 293,568 to 996,890.

"I have, &c.,

"FREDERICK W. A. BRUCE.

"The Right Hon. Earl Russell, K.G., &c."

"Her Majesty's Consulate, Swatow, June 27, 1864.

"Sir,—I have the honour to forward a copy of my report upon the trade of this port during the year 1863.

"I have, &c.,

"E. Hammond, Esq." "G. W. CAINE.

"REPORT ON THE TRADE OF SWATOW FOR THE YEAR 1863.

"BRITISH SHIPPING.

"The shipping returns for the year 1863 exhibit a large increase in the number of British vessels entering this port. This will best be seen by a glance at the following table:—

"ENTRIES.

With Cargo.		In Ballast.		Tonnage.	
1862.	1863.	1862.	1863.	1862.	1863.
130	215	33	23	62,965	93,085

or, total arrivals 238 against 163 of 1862, being an increase of 75 vessels, and a tonnage of 30,120 over the previous year.

"CLEARANCES.

With Cargo.		In Ballast.		Tonnage.	
1862.	1863.	1862.	1863.	1862.	1863.
101	184	58	52	60,815	92,382

"The above shows an excess of 83 vessels leaving with cargo.

"The trade between Singapore and this port has been almost completely driven away by reason of the heavy sums demanded by the Chinese officials on each voyage, and also in consequence of the extortions levied by the villages near Swatow on all Chinese passengers. The amount charged for merely landing them is $10 per head, whereas passengers from Hong Kong by steamer save $2, the charge being $8. These are most iniquitous charges, but the officials appear unwilling, or, perhaps, are unable, to put down extortions levied by such powerful clans as those inhabiting the villages of Swaboe, Goswa, &c. The Singapore vessels now discharge their cargoes into lorchas at Hong Kong, which can, being native owned, dispose of their goods at any of the ports between this and Hong Kong, many going to Cupchi, between which port and Hong Kong a large trade, I am told, has sprung up.

"FOREIGN SHIPPING.

"There has been a very large increase in the number of vessels under flags of continental States frequenting this port as compared with former returns. The subjoined table will best illustrate this:—

"ARRIVALS.

Flag.	1862.	1863.	Increase in 1863.	Decrease in 1863.
American	20	29	9	—
French	4	2	—	2
Hamburg	15	54	39	—
Bremen	2	19	17	—
Danish	7	14	7	—
Dutch	12	7	—	5
Swedish	7	8	1	—
Siamese	5	9	4	—
Other flags	9	14	5	—

"These vessels average from 150 to 300 tons, and are better suited to the coasting trade under Chinese charter than our larger vessels, which require more cargo than can be stowed at Swatow, where there is a paucity of godown room; goods have, therefore, to be retained up country until the vessel is ready to take in her cargo, when it is sent down in boats which go at once alongside to put it on board. Nearly all the vessels employed in the trade of the port, exclusive, of course, of steamers, are chartered by Chinese merchants, who much prefer these smaller craft, which are besides chartered at a lower rate than either British or American vessels.

"It will be perceived that foreign shipping has increased in much greater proportion than the British; and if steamers be not taken into account foreign ships exceed the British by 69 vessels, the tonnage of the former being 55,147, and of the latter 31,803, or an increase of 23,341 tons in foreign bottoms. The coast trade in steamers is, however, still monopolised by British vessels.

"IMPORTS.

"The total value in sterling of the import trade for 1863 is estimated at £1,770,635, while that for the previous year was £1,264,444, being an increase of £506,191 over the year 1862, this excess being principally in the following items, viz.:—

In bean cake	£232,053
In beans and peas	50,424
In opium	97,035
In native cotton	84,596
In tin	14,635
In cotton yarn	9,867

"In the above imports foreign goods in native bottoms have been taken into account; the value of this trade for the year 1863 amounts to £22,029, which, as compared with 1862, shows a falling off of £35,734. This has been caused by the preference which is now given to foreign vessels by the native merchants over their own unwieldy junks, very few of which now visit the port. The lighter and smaller built vessels of the lorcha or west-coast boat class trade between Hong Kong and this, a line on which there is no traffic in foreign bottoms except by steam vessels. Goods shipped in west-coast boats have a great advantage, as, being native craft, they can visit any of the ports, and so choose their market. Much smuggling is carried on in this way.

"EXPORTS.

"The total value of the export trade for 1863 amounts to £808,069, which, when compared with that for 1862, shows an increase of £84,479. This excess is chiefly perceptible in sugar, the increase in this article being £51,818. There is also an increase in the quantity of tobacco exported of the value of £21,273.

"Sugar, tobacco, paper, coarse chinaware, and grasscloth are the principal articles of export.

"The total estimated value of the trade of this port for 1863 (exclusive of native trade in native vessels, of which I have been unable to procure any returns), is, therefore, £2,578,704, or an increase of £590,670 over the previous year, being an excess of considerably over half a million sterling, which, considering the many disadvantages this port labours under in its foreign merchants being denied access to the chief cities through the non-reception by the Chinese officials of Her Majesty's Consul at Chao-chow-foo—the heavy mulcts demanded by powerful village clans on all goods sent inland—as well as the disturbed state of the country—village feuds being the rule and not the exception—will afford a very fair idea of the steady advance of the trade of the port.

"Since my last report was written the Consulate has been removed from Double Island to Kahchio, immediately opposite Swatow, between which two places all the shipping lie. Some dwelling houses have lately been built at Kahchio, as well as godowns, and more of the latter are in course of erection.

"I understand that much extra ground has been set apart this year for the cultivation of sugar, in consequence of the demand in the north of China for this product. The Chinese mode of pressing sugar is most rude; the cane is passed between two perpendicular granite cylinders; one being turned by oxen gives a motion to the other by means of cogs cut in the granite and shod with hard wood. The juice is thus expressed, and runs through a channel cut for that purpose into a large wooden tub, from which it is removed to the boiling hut closely adjoining. These cylinders are not at all firmly fixed, depending altogether upon their weight to keep in position. I believe a company of Europeans, working one of the modern sugar mills, might make a large profit, if the Chinese would consent to sell their crops when ready for cutting. They cannot be induced to use the European sugar mills themselves. Messrs. Bradley and Co. imported one, but the natives refused to purchase, or even try it.

"Swatow, June 15, 1864. G. W. CAINE, Consul.

THE STRAITS SETTLEMENTS.

To the Editor of the London and China Telegraph.

SIR,—My attention has lately been directed to your article of the 8th August, which had hitherto escaped my notice, and I concur in much that is therein said respecting the future government of the Straits Settlements.

It is a subject of greater importance than most suppose, especially now that the Dutch are extending their influence in Sumatra, and the French are gradually progressing in Cochin-China and Cambodia.

Whether the Settlements are to continue under the India Board, with a direct reference home, as some propose, or whether they are to be transferred to the Colonial-office, the important position of Governor should no longer be given to those who, though actuated by the best of goodwill, cannot be expected to possess the necessary diplomatic education, or who are but too apt to treat delicate questions with a military abruptness ill-suited and unpalatable to those with whom they have to treat, or with whom they are brought in contact. I have no doubt that the attention of those more deeply interested than myself has been brought to bear on this subject, and I trust that some of them will move in the matter before it is too late.—Your obedient servant, VIATOR.

London, Sept. 4th, 1864.

LONDON, THURSDAY, SEPT. 15, 1864.

RETURN OF SIR FREDERICK BRUCE FROM PEKING.

AFTER an absence of about five years from England, Sir FREDERICK BRUCE has returned on leave of absence from his diplomatic mission at the Court of Peking. As the first British Minister accredited to the Emperor of CHINA, his name will be handed down with the annals of British relations in the Chinese Empire under extraordinary circumstances, that would not otherwise belong to his post if he had been appointed to any ordinary State. The post was one of no small importance to fill at the juncture of his arrival in China, when he had to conciliate a semi-barbaric Power just after the conclusion of a long and sanguinary war. As brother to the late lamented Lord ELGIN, who concluded the Treaty of Tien-tsin, Sir FREDERICK doubtless was indebted to that connection for the high and onerous post of Minister Plenipotentiary to the greatest empire in population on the habitable globe. Patronage of this nature, in too many instances, has been used to the sacrifice of the public interests. But we candidly confess, after an intimate knowledge of Sir FREDERICK BRUCE'S career in China, we are of opinion that he was the right man in the right place at the Court of Peking. Not that we have uniformly agreed with every shade of policy he has carried out. But we maintain that few men would have exhibited the unflinching moral courage, combined with a dignified *suavitor in modo*, towards the punctilious mandarins of an effeminate and *effete* Government, that he has done on occasions of vital interest to peace and commerce. Nor have his diplomatic relations with his colleagues at Peking been less conciliatory, dignified, and successful. On all occasions in his intercourse with the Ministers of France, America, and Russia, he worked for a diplomatic union, so that the jealous administration of the EMPEROR should not profit by dissension in the foreign camp; and here his efforts were crowned with success. He maintained, at the same time, the dignity of the British name so pre-eminently that his colleagues unanimously chose him as their exponent with Prince KUNG and the Regency on all matters of high import, affecting the Western Powers. In his immediate relations with the Foreign-office he likewise exhibited a firm confidence in his own course of action, that partook of an independence unusual, even in the conduct of a plenipotentiary armed with full powers, towards the Secretary of State for Foreign Affairs. In one of his despatches on the LAY-OSBORN business, he rebukes his superior for the course pursued in handing over to Mr. LAY the power of organising an Anglo-Chinese naval force without first consulting him. This point was recently debated in the House of Commons, when the Premier seemed rather to applaud the boldness of the Foreign Secretary's subordinate.

While he never flinched from his duty towards the Chinese Government, his foreign colleagues, or his own Government at home, he never descended to truckle with the contending claims of British residents in China. On the contrary, he was deemed a severe Minister, especially in his capacity of Superintendent of British Trade in China, which brought him in contact with the mercantile community—of which nine-tenths of the civilians consist. The stringent regulations issued for the control of commerce at the open ports bear testimony to this; and his determination not to allow merchants to step with impunity beyond the bound of the stipulations laid down in the Treaty of Tien-tsin, show that he dispensed justice with an even hand, and respected the native authorities. Moreover, where there was even a certainty of England securing large concessions in which her less powerful allies would have been unsuccessful, Sir FREDERICK never sacrificed the *entente cordiale*, that so happily subsisted among the representatives of the foreign Powers, by grasping at material advantages not conceded to them. By this line of policy he disarmed the least scrupulous Powers in extending their territorial acquisitions; and demonstrated, to the surprise of the Chinese Government, that the policy of England towards China was of a much more disinterested character than they had hitherto entertained; while it was the glory of her diplomatic, military, and naval officers to uphold the unsullied honour of their country. A great deal of disapprobation, and some degree of contumely, from time to time assailed Sir FREDERICK, as his independent course of action ran counter to the interests of other nations, and the self-aggrandisement of the foreign Residents at the open ports. But time has smoothed down these asperities, as subsequent events have shown the wisdom of British policy in China as carried out by this astute Minister, who has battled successfully with contending interests, that would have made more experienced diplomatists of inferior calibre shrink from the post, or lead the country into never-ending wars. He accepted the post while the ruins of the late EMPEROR'S palace of Yuen-ming-yuen were still smoking after its destruction by the allies; he held it firm while the Government was overturned by a *coup d'etat*, of the most sanguinary description among its leaders; and now, after a residence of nearly four years within the precincts of the ancient sacred city, he leaves the British Legation at Peking in full accord with the Chinese authorities of every degree, as well as all the contemporary legations established there. That his conduct has been approved of by his Sovereign is evinced by the title of K.C.B., which adds to the nobility of his name what it did not possess on his departure from England. It is possible that further honours may await him on presentation to HER MAJESTY, not only for his honourable career in China, but his connection with the noble House of BRUCE.

The following is a *résumé* of the chief events in the diplomatic career of Sir FREDERICK BRUCE, K.C.B.:—Attached to the late Lord ASHBURTON'S Special Mission to Washington, February 9, 1842; Colonial Secretary in Hong Kong, from 1844 to 1846; Lieut.-Governor of Newfoundland, June 27, 1846; Consul-General, in the Republic of Bolivia, June 23, 1847; Charge d'Affaires in Bolivia, April 14, 1848; to the Oriental Republic of the Uruguay, August 27, 1851; Agent and Consul-General in Egypt, August 3, 1853; accompanied Lord ELGIN'S Special Mission to China, in April, 1847; brought home, September 18, 1857, the Treaty with China, signed at Tien-tsin, June 26, 1858; appointed C.B. September 28, 1858; appointed Envoy Extraordinary and Minister Plenipotentiary to Emperor of CHINA, December 2, 1858; Chief Superintendent of British Trade in China, March 1, 1859. Mr. BRUCE'S Mission was prevented from proceeding to Peking by the opposition of the Chinese, when the Taku forts, in the Peiho, were attacked, June 25, 1859, by the British and French allied forces. The Mission returned to Shanghai, where it remained till after the conclusion of hostilities, and the exchange of the ratifications of the Treaty of June 26, 1858, at Peking, October 24, 1860. Mr. BRUCE proceeded to Peking November 7, 1860, but withdrew to Tien-tsin for the winter, whilst arrangements were being made for putting a residence in proper order for his reception. The Mission was established at Peking March 26, 1861, but it was not till April 2, that Mr. BRUCE paid a visit to Prince KUNG. Was made a K.C.B. December 12, 1862.

During his absence, we learn from the local *Gazette* that T. F. WADE, C.B., HER MAJESTY'S Secretary of Legation, assumes charge of the British Legation, and Chief Superintendency of Trade in China. This gentleman is the well-known sinologue—one of those whom WINGROVE COOKE facetiously designates the fifteen-years-in-China-and-can-speak-and-write-the-language-men. With all due regard for his capabilities as a linguist, we are afraid that his native idiosyncracies may lead him into the mazy labyrinths of Chinese philosophy so far, in discussing politics with Prince KUNG, that he may possibly overlook the substance of British policy, as inaugurated by his chief. Bred

to the Scottish bar as an advocate, Sir F. W. A. BRUCE applied himself to the diplomatic task before him with a legal knowledge and comprehensive judgment that rarely falls to the lot of men in that service, which is too often recruited from quarters least capable of qualifying its officers for the delicate missions they have to perform. It is to be hoped that Mr. WADE, as *locum tenens*, will maintain with dignity the position he temporarily occupies, and, above all, to refrain from undoing any of the fabric Sir FREDERICK has reared. He cannot do better than follow in the footsteps of so able a master of diplomacy.

THE TAIPING REBELLION.

NOTWITHSTANDING the disbandment of GORDON'S native disciplined force, the campaign of the Imperialists against the Taipings progresses successfully. Of course, it was to be expected that a knowledge of this event, on reaching the leaders of the rebellion, would instil renewed courage into them, and fresh hopes of overcoming their undisciplined countrymen under the command of cowardly mandarins. If such was the case it has not led to any decisive movement on the part of the CHUNG WANG, their brave and skilful military chief, who, it appears by the latest accounts, has either joined the garrison at Nanking, or proceeded further into the interior, to make a last dying effort in the cause of the TIEN WANG. As to that mysterious personage claiming to have a divine mission and the essence of the Godhead in his veins, but whilom HUNG-SIU-TSIUEN, the poor scholar—it would appear that he is reported dead; so that the "Imps." will not have a chance of capturing a real live deity, to exhibit in one of their human cages, should the army now investing Nanking starve the garrison into surrender. That he was alive when his delectable preceptor, the American missionary ISSACHAR ROBERTS, fled without his carpet-bag from Nanking—which he called the "Den of Thieves"—we have the testimony of that crack-brained propounder of the Gospel of the fact up to the end of 1862; and if we can trust the indirect evidence of the Reverend Mr. LOBSCHIED, the Emperor of Taipingdom was "alive and kicking" in June, 1863. But there came rumours to Shanghai in the interval that his "Divine Majesty of the Heavenly Kingdom of Great Peace" was defunct. If we remember aright, it was said that he had "shuffled off this mortal coil," like many a Taiping "coolie king" around him, from over-indulgence in the luxuries of his table, to which he had been unaccustomed in his early life; while his deluded followers in the camp were actually devouring human flesh, with cannibal ferocity when it was that of a slain "Imp." Be that as it may, there were many and valid reasons at one time that he had died, of which the independent movements of the CHUNG WANG, and other fighting chiefs, gave corroborative evidence. If he had succumbed in the summer of 1862, there were obvious reasons that it should be kept secret, in order to prevent the defection of fanatical adherents who believe in his personal immortality. We now learn, by the latest accounts from North-China, that three spies from Nanking, being discovered at Soochow, to save their lives divulged the fact that the TIEN WANG had died on the 4th of July last; and otherwise gave intelligence to the Viceroy of KIANG-SOO of the dreadful straits the inhabitants and garrison of Nanking were put to in obtaining the necessaries of life, on account of the perfect investment of the city; all of which tallied with what was previously known to the Imperialists. There is, therefore, strong testimony that HUNG-SIU-TSIUEN, the orginator, and, for at least fourteen years, the soul of this extraordinary movement and insurrection, is no longer alive to manage the helm of affairs, which he held with such power and skill. It is reported also through St. Petersburg that Nanking has capitulated.

This being the case, we may look for the extinction of the rebellion sooner than was anticipated; that is, the breaking up of the rebellion as a united religious and political movement; for we may expect that out of its dismemberment the military element will hold on for years to come, as they must of necessity seek subsistence by the sword in other provinces not yet impoverished by their desolating presence. Already it is reported that marauding bands from Nanking have appeared in the central provinces of Hoo-peh and Hoo-nan; and the Government, urged into some degree of shame at their inactivity by the foreign Ministers at the Court of Peking, have organised new levies of militia, and sent some of their best troops into the disturbed districts. Moreover they are arming their soldiers, as far as their limited means will permit, with efficient muskets and rifles, to displace the antiquated jingal. On this point the official mind is now convinced of the superiority of foreign weapons of war; and the urgent necessity of drilling the army into their use. We observe that Major GORDON, instead of deserting the country where he has won his laurels, by a speedy departure for his native land after his "occupation was gone," remains for some time at Shanghai to organise a native camp for military instruction on the European system. This is but another gratifying phase in the character of our gallant countryman, in his devotion to the military profession, and the abnegation of self, wherever he deems his services to be of use to his fellow-men, irrespective of creed or country.

Accounts from Che-kiang are not so satisfactory, where the suppression of the rebellion in that province was handed over to the Franco-Chinese disciplined contingent under Captain D'AIGABELLE. The rebel garrison of Hoochow still holds out against the army brought against it. And easily they may do so when their besiegers are encamped some ten miles off the city. One would almost imagine that the French commander of this force has no desire to end the campaign too soon, if we may judge of the pertinacity with which he keeps his artillery at that distance, when they ought to be under the city walls; while the enemy have all their approaches free to communicate with their friends for supplies of food and ammunition. Our gallant allies, on these points, are not so scrupulous as Major GORDON and his English officers. What that true soldier sought for after the treachery at Soochow, Captain D'AIGABELLE seems to avoid; and would deem it, probably, a misfortune should he be called on by the native authorities to resign his post and disband his men. We shall not venture to remark further upon the dilatory operations near Hoochow. At the same time we cannot refrain from joining our contemporaries in China in reprobating the conduct of the detachment of French chasseurs of the Imperial army and sailors of the navy stationed at Ningpo. Here the ruffianly fellows assigned for this service have been conducting themselves in the most abominable manner; not only towards the inoffensive inhabitants, but the English officers of Colonel COOKE'S Anglo-Chinese force, which forms the garrison of that city. Recently a drunken miscreant jostled against a sedan chair, in which one of these gentlemen was being carried to his quarters, when, taking offence at the apparent awkwardness of the chair-bearers, he butchered one of them on the spot. On one occasion, also, a body of soldiers and sailors endeavoured to disarm the guard at one of the gates, and force their way into the city for purposes of plunder and rapine. But they were kept at bay by Colonel COOKE and a strong guard of his disciplined force, which compelled these French marauders to retire to their camp outside the walls, and the gunboats anchored in the river, from whence they had issued. From remonstrances made by the British Consul, and the officers of the Anglo-Chinese force, it would appear that the discipline of the soldiers and sailors at this post is so lax that the French Consul and officers in charge have no control over their men. At least they say so in reply to our remonstrances—which is an admission that should reach head-quarters in Paris; as not only reflecting upon the efficiency of the French army and navy in the Far East, but ought to be remedied by the Ministry of Marine and War without delay. We observe also that the French at Ningpo have built and launched two gunboats at Ningpo, the first of a flotilla of five, for the service of the Chinese Government, as the nucleus of a Franco-Chinese navy, after the failure of establishing the LAY-OSBORN fleet. These boats are reported to be of inferior build and machinery, from the wood being unseasoned and the latter old. The armament of them is unusually heavy, and doubtless intended for bombarding Nanking, should it not surrender before these steamers enter the Yang-tsze. As we anticipated in our remarks on this subject in former issues, the French are going "the whole hog" into active assistance by sea and land, in the Imperial cause against the Taipings, and nobody mentions the word "neutrality." Evidently they have been delighted at our vacillating policy, and hail the retirement of British officers from the Chinese service as the signal for their having the biggest finger in the Imperial pie. They have settled down at Ningpo, where dockyards are constructed, and numbers of French shipwrights are at work, so that in time they may have as extensive an arsenal as at Saigon. Our authorities had better look to it. The progress of French ambition in the East is rapidly under-

Digitized by Google

mining British influence in China; and with their naval reserve in Cochin-China, they could at any time bring into these waters a formidable fleet that might defy all comers.

NEW FRENCH TREATY WITH THE ANNAMESE.

THE telegraphic communication which we publish below has been received in Paris by the last mail, per Messageries Imperiales from Saigon, announcing the conclusion of the new French treaty with TU-DUC, King of Cochin China and Annam. As we previously pointed out, the French have nominally yielded up the six provinces of Lower Cochin China, which they had wrested from that King, on consideration of their holding a protectorate over them, and receiving the sum of 20,000,000 dollars. Doubtless the Annamese imagine that when the French are paid the money they will take their departure, and leave only a few soldiers and sailors at Saigon, whom they might easily overcome in the event of a fresh rupture. But in this they will be mistaken; and there is every probability of dissensions and pretexts occurring in Cambodia for the French to extend their protectorate to that region also. The result may be that they will hold in a few years the destinies of the whole of Indo-China in their hands, and will be able to dictate any terms they choose to the kings and governments of that vast territory. Of course they will take care that these "pay the piper," while the Emperor of FRANCE will hold a country for the employment of his fighting subjects in the Far East, to emulate the power of England in India.

Advices received here from Saigon to the 26th of July announce that a new Franco-Annamite treaty was signed on the 15th of that month. The principal clauses of the treaty are the following:—

The establishment of a French protectorate in six provinces of Lower Cochin China.

The opening of three important ports on the Annam coast, with the concession of nine kilometres of ground in the vicinity of each port, where French merchants shall be at liberty to travel and trade.

Entire liberty is granted to French missionaries to propagate the Christian religion throughout the whole kingdom.

The establishment of Consular agents at Hué and the ports open to commerce.

Payment of an indemnity of 100,000,000f. to the French Government.

THE SHANGHAI SILK RETURNS.

SIR,—I read with considerable surprise in *The Times*, dated this morning, the following paragraph of a despatch from Sir Frederick Bruce, dated Peking, June 7, 1864, respecting the export and import trade of Shanghai, and addressed to Earl Russell, K.G.:—

"The exports of Shanghai itself have suffered from the diminution of the silk crop, due to the advance of the insurgents into the silk districts, and the flight or forcible seizure of the labouring population."

Sir Frederick Bruce accepts as true such reports as the European officer in the service of the Chinese Government at Shanghai may please to make to him; but I am in possession of the bi-monthly overland reports of the export trade of China for some years past, published for the information of the mercantile community, and so far from there being a diminution in the annual export of silk since the insurgents captured Soochow on the 8th of May, 1860, and possessed themselves of the silk provinces, there has been an annual increase in the export of silk until the present year, when, in consequence of Majo Gordon having obtained possession of Soochow by the treachery of the Futai, and the subsequent expulsion of the insurgents from the silk provinces, there has been a diminution in the export of silk, reported to amount to 40,000 bales in 1863 4. Either, therefore, the bi-monthly reports of exports in my possession are untrue, or the report of the Chinese Custom-house officer at Shanghai is untrue; but there can be no doubt the statement is unfounded that the falling off in the export of silk is owing to the "advance of the insurgents into the silk districts,' the fact being that the silk districts have been desolated by having been made a battle-field by Major Gordon in effecting the expulsion of the insurgents.—Your obedient servant, W. H. SYKES.

Literature.

Memoires sur La Chine: Religion. Par le COMTE D'ESCAYRAC DE LAUTURE. Paris: Librairie du Magasin Pittoresque.—In noticing the appearance of the new part of M. de Lauture's most interesting work, we shall confine ourselves to an indication of the important nature of its contents. Religion, with reference to China, is a topic which the author admits to be too extensive even for him, and which, in fact, he has but glanced over, though he boasts that he "shall perhaps have done more for the study of the Chinese religions than many more learned and more competent men than himself." Some of the difficulty felt in dealing with the matter arises from the fact that, as with laws, and customs, and sciences, China has the peculiarity of absorbing rather than adopting whatever new ideas time or man may have the mission to impress upon her. The usual operation is reversed: China remains unchanged; the new ideas it is that undergo modification. Thence there is an immense magazine for future thinking in the opening sentence of the portion of the "Mémoires" now before us:—

China, one of the most ancient empires of the world, has religious forms and notions which she did not borrow. She has received in succession the cults and dogmas that number most disciples on the earth, and are followed by the peoples of greatest celebrity. Religion, equally with man, has not escaped that profound modification that China imposes on whatever approaches her; and as every one of the imported forms has continued to maintain itself in some part of China and among some of the population, the study of the religion of the Chinese would be the study of religion as a whole, under every aspect and in every phase.

The Confucian worship our author considers, since the days of Kang-chi, to have simply a political value, though the sacrifices may seem to give it a religious one. "But the modes of Asia are different to those of Europe: symbolism has assumed there bolder forms than ours." Buddhism, again, "at least in China, that is, in its largest area, is destitute of faith, and has no influence that can be recognised, either on the public habits or on the government of the State." No such simple and comparatively pure worship as either one or the other of those just mentioned would satisfy the craving of two or three hundred millions of uneducated minds for something more decided in its symbolism and more apparent to the senses. Hence the worship of the Chinese is in reality the grossest idolatry, consisting in the adoration of the immense number of gods constituting the Chinese Olympus, whose multitude is receiving constant additions. Here is the history of a very recent promotion, who owes his apotheosis to British bullets:—

One example will show how Saint-ship is arrived at. In 1840 Tshen-kwa-tsheng, a Chinese general, had to defend Woo-sung against the English. He was a pious man, compassionate to others, though rigid to himself, and his habits were of the simplest kind. The peasantry, whom he protected against violence, called him, after the Old Buddha, Lao-fo. He displayed great activity in his preparations, but the inequality of the weapons left him no chance of victory. When the day of battle came, he put on his Court dress and proferred fervent prayers to heaven and earth. He fought with great courage, and fell riddled with bullets, invoking Heaven, his face turned in the direction of the Imperial residence. The terrified people exclaimed, "The Great Wall of China is broken down; what is going to become of us?" Ten days after death the corpse was found, which, says his biographer, was not at all decomposed. The Emperor ordered that tablets should be put up in the temples of two cities, and conferred honours on his family. A statue was made of him, said to be an excellent resemblance, which, when dressed like him, was placed in the temple of Tsheng-kwang, at Shanghai. The story is also current in the country, that Tshen-kwa Tsheng had made it known to the visitors of the temple of divination at Soong-Kiang that on his reaching the skies he was raised to the dignity of Second General of Thunder.

Under the head of Foreign Creeds M. de Lauture gives what is known of the small Jewish colony that appears to have been seated for centuries at Kai-fung, in the interior. It now numbers only seven families, who are in a state of the greatest poverty. The Mahometans are very numerous in some parts of China, and there are no less than twenty-four mosques in Peking itself. Islamism, as we had occasion before to notice, M. de Lauture considers to be an element of great peril to China. He remarks:—

This peril is revealed by frequent revolts and conspiracies, not only on the side of Turkistan and Central Asia, but even in the Chinese provinces of the empire—recently in Sham-si, Shen-si, Honan, Shan-tung, and in the very neighbourhood of Peking. Yun-nan, where the revolt has existed for some years, has not yet returned to order. It must, however, be stated that the revolt was provoked by the restless despotism of China. It is asserted that the Governor of Yun-nan meditated the massacre of the Mussulmans; it is certain that he himself was massacred. Islamism is in great force in China. The English can make no use of it, because of India being so near, and they have inspired the Mussulmans of that country with too great a hatred of them to gain the confidence of those elsewhere. We are better situated in that regard, Algeria being farther off; but Islamism is a dangerous force to employ; it must neither be relied on nor assisted; if China were Mussulman it would be an immense Morocco; we should be violently ejected, and the country would decline so quickly under the sway of fanaticism and indolence that it would not be even worth the trouble of returning to.

To complete his picture of religion in China the author has of course to refer to the efforts made by the missionaries of the various forms of Christian faith to effect the conversion of the inhabitants; but he entertains little hope of their success for the present, giving it as his opinion, "if it be allowable to reason humanly on things divine, that Christianity will make no greater progress in China than it has in Mahometan countries or in India." The dissensions among the Christians themselves must interpose grave obstacles to the propagation of the faith they seek to spread. M. de Lauture observes:—

The Catholic missions suffered a rough check when the Dominicans and others came to dispute possession with the Jesuits. The situation is still more difficult now than at that epoch; the Dominicans opposed to the Jesuits a religion they styled more pure; in the present day, in the same way, the Protestants oppose their reform to the Catholics; and these Protestant divided into a great number of sects, think more of disputing and combating with one another than of convincing the Asiatics and combating for Jesus Christ. They are not agreed either with the

Digitized by Google

Catholics or among themselves on the Chinese translation of the name of God, or on that of the greater portion of the terms used in the Bible or in the Catechisms. They appear to affect not even to speak the same language; they have created what they already call *missionary Chinese*—a sort of hybrid and variable language that will never have its Academy; and it is natural that the Asiatics, witnessing the quarrels of the Christians, offer to be converted only when the others have been able to agree among themselves. Matters sometimes go even farther, and deep discredit is thown on religion by respectable and honestly convinced men, who are the victims of odd fancies, such as a belief in the millennium, in spiritualism, or are tainted with the mania of the Quakers.

In conclusion, we must not omit to mention that the present part of the "Memoires" is illustrated by numerous prints of deities, temples, and other such objects, excellently and spiritedly engraved after original Chinese drawings.

The Foreign Office List; Compiled by EDWARD HERTSLET, Librarian, and Keeper of the Papers, Foreign-Office. Harrison, Pall-mall.—This is the "twenty-fifth publication, corrected up to July in the present year," of what is in the title-page most properly designated a Complete British Diplomatic and Consular Handbook. Mr. Hertslet's position necessarily affords him every facility for making the compilation perfect, and having taken note of the volume for several years past, we have observed with pleasure how it has continued to grow in size and comprehensiveness. As all the appointments in China and the Far East fall, not under the Colonial, but under the Foreign-Office Department, the "List" is as necessary to the counting-house of many a merchant, here or abroad, as a Gazetteer. Nor will it be less welcome, handsomely got up as it is, to the parlour or drawing-room table, since the sketch of his services appended to each individual's name makes it invaluable as a reference-book on subjects that must daily form the topic of conversation. Let us take as an example one of the latest appointments to the Staff of the Legation in Japan:—

Macdonald, John, was for some time in the Secretary's department of the Great Western Railway Company at Paddington. Was appointed Student Interpreter in the Consulate-General in Japan, January 4, 1859. He was in attendance on the Japanese Ambassadors from the time of their departure from Japan, January 31, 1862, till their arrival at Marseilles, when he gave over his charge to the French officer deputed by the Emperor for that purpose during their stay in France. He resumed his attendance during their stay in England, in May, 1862. Was appointed Second Assistant at Yedo, in Japan, April 1, 1864.

The information as to the internal constitution of the Foreign Office is precise, and the list of past holders of offices, beginning in 1761, suggests a curious train of reflections. The First Secretary of State for Foreign Affairs, when the arrangement of the departments was remodelled in 1782, we find to have been Charles James Fox, with Richard Brinsley Sheridan for his Under-Secretary. In fact, what with remodelling, and what with the extension of the scope embraced by our commerce and political action, countries appear to have been allotted in Downing-street by some trick of chance rather than by design. One department, we learn, with a chief clerk at its head, and five gentlemen under him, takes charge of "China, Japan, Haiti, Siam, and the United States." How on earth did they get together? Certainly, neither alphabetically nor geographically. We must hope all is for the best. The book before us, at least, will go far to convince whoever may consult it, that there a perfect system does exist, where one might be led to infer haphazard and disorder. How vast the information at the reader's service will be understood when we add that the book contains 246 closely printed pages, and has maps showing at a glance every place throughout the world where a British consular agent of any rank whatever is to be found. Besides this the indexes of names and subjects are very full, and there is a list of foreign embassies, legations, and consulates in all parts of the British dominions.

Impressions d'un Japonnais en France, suivies des Impressions des Annamites en Europe; par RICHARD CORTAMBERT. Faure, Paris.—This is one of the amusing little books which result from the appearance of Eastern envoys in our Western world of Europe. M. Cortambert is a well-known writer on subjects connected with geography, and is versed in matters relating to the Far East. The small volume, the title of which stands at the head of this notice, contains two separate works; one purporting to give the impressions of a Japanese *savant* during his visit to France, the other, those of the Interpreter of the Annamite Embassy. The former reminds one of the famous letters, by Goldsmith, of Mustapha Rub-adub-Keli Khan—we quote from memory—the other having all the appearance of being, if they be not really, the production of an Annamite educated in Europe, and conversant with the languages of the West as well as of the East; and both supply amusing comments on the state of society in Europe, and especially in France. "How," says our author, "will the learned Japanese judge of France? What will he think of this artistic and literary people which metamorphosises itself and becomes manufacturer, merchant, banker, and agent, on account of the imperious demand for lucre? What will he think of this really generous nation, which labours to cover itself with the mantle of egotism, and which glorifies egotists? What will he think of this misery in silk—of this rascality in a black coat—of these audacious infamies in triumphal cars? What will he think of these powerful European States, that vow eternal friendship one day and tear up the treaty two days afterwards?" What, indeed! Of Japan, the *savant* says:—"As everyone knows, Nagasaki is a large city which has opened its ports for a long time to the Chinese and the Dutch; the former are suspected, but are left nearly free; the latter are more respected, but are carefully watched. The Japanese trade with them because custom orders it, and because of existing treaties. The Japanese, nevertheless, act with extreme reserve towards strangers, and their prudence resembles pretty nearly that of an honest man who finds himself obliged to deal with people of doubtful respectability. Our empire is at the present moment on the eve of dissolution—its isolation is its strength; and if the Europeans ever plant their foot on its virgin soil, the poor country will become as corrupt as the rest of the civilized world. If I were sovereign of an honourable nation, I would take good care not to deliver up my subjects to the corrupting contact of men who use vice and perjury as a ladder?"

M. Cortambert takes his Japanese through the principal scenes of Parisian life. We see him at the Grand Hotel, at the Louvre, in the libraries, amongst the students, the thieves, the actresses, and hear his remarks on all these differently characteristic classes.

"Which is the first nation in the West?" says another Japanese doctor:—"Is it the English, which continually scuds over the globe, like the hungry and fleet albatross, picking up here an island, there a port, and making a mouthful of immense territories, which it never allows to be taken away again? Is it the Dutch nation, which, in spite of all the annoyances we have inflicted on it, still persists in purchasing our commodities? Is it the Spanish or the Portuguese, once masters of half of the globe? Is it the French, those hardy warriors who make heroic geography all over the globe, and who do not know how to keep the colonies they acquire? . . . . They tell me of incessant quarrels between France and England, who, although embracing each other on both cheeks, diplomatically, three or four times a year, abuse and tear at each other like Manchou and Chinese. Is it just, in fact, that the English should have a malicious pleasure in constantly insulting France, which thought fit to conquer in the Crimea and in the Celeste Empire?" It does not take a wizard to tell us here that we have only to scratch our *pseudo* Japanese and find a *neighbour* beneath!

Most authors describe best that which they know most about, and M. Cortambert shines when he touches the main features of Parisian life. The Academy is nicely touched off:—"Messieurs," says one of the bald occupants of the famous chairs, "our assembly is not only the sanctuary of the intellect, but that of classic style in its purest expression. If we diverge for an hour from that right line, French literature, of which we are the chiefs, will crumble to pieces; we shall fall into complete anarchy. There is nothing grand but that which is dead." On the great characteristic of France, ability, our author is bitterly satirical and amusing in turns; he knows his countrymen and he does not spare them; he lays on the rod like a loving parent—bearing in mind the old French adage, "He who loves well strikes hard!" "Take note," he says, "of the immense advantage which men of talent have over men of genius; the first are always understood, the second rarely during their lifetime; the former know how to make use of the fancies of the moment, the latter go ahead of their age, and are more admired by posterity than by their contemporaries. Talent is everywhere petted and idolised, while genius terrifies while it fascinates. The one is the cat while the other is the lion." The following is a general estimate of France that fortunately does not come from an English pen:—"The French form a great and fine nation, neither more barbarous nor more civilised than Japan. They have noble principles: to raise up the feeble, to bring down tyrants, to do good, prevent evil, and reign over the world by means of justice and

Digitized by Google

benevolence. But I am not quite sure that this magnificent doctrine is faithfully carried into execution. This I know, that the heart of France palpitates at the recital of a painful event; that the whole country trembles with fury at the news of a disgraceful action, and that an immense cry of indignation arises from all parts when another people, in defiance of humane laws, oppresses a generous nationality. The French people hate the abuse of force, and everywhere, by a strange contradiction, are the first to make use of it. Its principal faults are, first, inordinate pride (vanity?), and secondly, a detestable habit of vilifying others. Pride impels it to place military virtue in the first rank—it must have victories, and it achieves them. Yet it thinks itself so grand, so superior, that it does not attempt to improve itself. Its contempt of others—which results, doubtless, from the brilliant quality of its intelligence" (aided possibly by the extreme narrowness of its information) "must strangely impede its own progress. An open attack should stimulate genius; raillery disconcerts it; contempt seems sterile". This is a clever sketch, not all in honey colours.

We can honestly, recommend M. Cortambert's little volume to the attention of those who enjoy that kind of examination which shakes the dust out of old corners and clears away old cobwebs, although at the cost of some little interference with our comforts and our prepossessions.

The British Army and Navy Review for September is a great improvement on the two former numbers, good even as they were. "The Church in the Navy, by a Commander R.N.," is one of the most valuable articles that has appeared in any United Service periodical for a very long time. How religious matters are at present managed for the navy may be learnt from the following fact:—"An officer having acquainted himself with the details of the excellent system by which each soldier is supplied with a neat portable-sized Bible, Prayer and Hymn-book, in one volume, brought the subject before the Senior Chaplain of Greenwich. The reverend gentleman informed him that the supply of Bibles, &c., was not his duty, and that he did not know whose duty at the Admiralty it was." Wherever a better system, or any system at all, is in operation, the sailor is indebted for it to the conscientious feeling of individual commanding officers. The China squadron has been pre-eminently favoured in this respect. The writer says:—

"Head money," and the sense of strength and security, had created in the China squadron an utter disregard of the sacredness of human life and of private property. The former incentive had been wisely done away, but still many poor Chinese had cause to bless Sir Michael Seymour that within sight of his flag the horrors of war were so unfelt by non-combatants. His successor, Sir James Hope, inflexible in his own example and person in putting down robbery and wrong, felt that, to influence his outlying ships, a reminder of their duties as Englishmen and Christians was exceedingly needful. Accordingly, in 1859, he was the first commander-in-chief of our days to order daily morning prayer in the ships of his fleet, together with reading of Holy Scripture, and, where a chaplain was borne, brief exposition. It being mentioned to him how much the indifferent observance of the Sabbath scandalised the converts from heathenism, he ordered, among other things, that no salute should be fired on Sundays; and if a foreign vessel coming into harbour did so, his flag-lieutenant was sent to say that "it was the English custom to return the salute on Monday morning." This was a small matter, yet, being a public one, it was a witness to his own squadron, as well as to foreigners, of the temper of their chief. Nearly frozen in the Gulf of Pecheli, in 1860, and with "salt junk" and weevily buscuit for Christmas cheer, thirty well-trained voices sang Christmas carols in full harmony on the maindeck of the *Chesapeake*, as few parishes in England would have equalled, none excelled.

CHINA—THE NEW EL DORADO.

(THE TIMES.)

Every Englishman has his part in the inheritance derived to him from the energy, the wisdom, and the courage of generations of Englishmen passed away. The narrow area of these little islands would be but a poor sphere of action for thirty millions of persons, all more or less ambitious, all more or less impatient of the inconveniences of a crowded country, and all alive to the truth that, although the more may be the merrier, the fewer will be apt to have the better fare. Three hundred years ago adventurous leaders and resolute followers were already engaged in sowing our language and religion over distant continents. They were then initiating those measures which have had the result we see. An English boy is born, not only to the rights of a native in the islands of his birth, but to full and wide enjoyment of the sparsely peopled regions of Canada, to an equal chance in the varied fields of industry in the American States, and to a share in the tremendous destiny of those great countries at the Antipodes, compared with which England shows but as a speck upon the map. Our fathers gained for British industry this great inheritance; but what they did for industry the merchant conquerors of India did for the more disciplined enterprise of the better-taught classes. India has been to the unquiet spirits among our professional ranks what America and Australia have been to our more enterprising labourers—an opportunity of rising into wealth and power. It was also in its day a means of sudden success by a short career of commercial energy. This, so far as it was exceptional in its character, is now gone by, and India, now known and occupied by competing "houses" can only take rank with our other great markets as a theatre for commercial speculation. The present El Dorado of commercial men seems to be China, where there is still a vast void to be filled, where our merchants are entering as it were upon a virgin country, and the first comers have found fortunes at their feet. *More money has, it is said, been made in China during the last five years than in all the years of the East India Company's monopoly.**

How could it be otherwise? When the common sense of the English constituencies had swept away the quacks and fanatics who stood between the people of England and the people of China, and when by a wise and humane coercion of the Tartar rulers the line of demarcation was broken down, the adventurous pioneers who advanced into the country found a people who thoroughly appreciated every commercial appliance that could be brought before their eyes. The Chinaman well knew, and groaned under the knowledge, that every third cargo that went forth in his bamboo junk was taken by a pirate, and when the new adventurers offered him, first square-rigged vessels, and then steam-vessels, the whole carrying trade of the Empire was at their command, with no other drawbacks than the inadequacy of their means of grasping it. The Chinaman also well knew that no junk or even square-rigged vessel could venture into the Formosa Channel without imminent danger of being sunk by one of those fierce typhoons a specimen of which has recently made a northward circle as high as Shanghai and the Yang-tsze. "Can insure?" soon became the anxious inquiry of the Chinese consignor, and the insurance of the trade of one-third of mankind also lay at the feet of the new adventurers. The Chinaman had a banking system of his own, much older than any record of the Goldsmiths' Company can show, and every Chinese city has its Lombard-street. He feels, however, that the system is rather rotten, and he hoards much of that silver which is pouring so continuously into his country. All this is to be drawn out by the happy Europeans who shall gain his confidence and who shall make him believe that his principal is secure and his interest certain. Again, the Chinaman knows the value of peace and quietness, and the new adventurers were able to offer him for sale or hire a house which should be unto him as a castle, the garrison whereof should cost him nothing, but should be supplied gratis by the distant red-bearded barbarians. There was an undeveloped settlement called Shanghai, the land whereof was then of such minute value that a merchant could easily afford to attach a deer park to his house and warehouse in the best part of the setttlement. All that land is now sold by the foot like a frontage in Cheapside. A Chinaman will give as much for a bit of ground to squat upon within the magic influence of the British Consulate, or under the guns of the British man-of-war, as a stockbroker will give for a closet under the shadow of the Royal Exchange. Dream of the profits of all these things! Brokerage, freights, insurance, corner lots, and frontages, shipping sales and customs' speculations; add the mysterious, but not unprofitable, fluctuations of the exchange, and remember that money may be placed at Shanghai at 20 per cent. upon good Chinese security, and at 40 per cent. at no very terrible risk to a lender present on the spot. Surely this was opportunity enough for the few energetic men who, with some capital in hand, with any quantity of credit behind them, stood ready to take advantage of the moment? Surely, also, this is an Elysium to the imagination of penniless young plodders who have mastered the art of book-keeping and learnt to calculate exchanges? These things are only whispered among the initiated, and will, possibly, be denied, but it is the truth that China is the great opportunity of the day for the youth of the commercial classes, and it is right that their attention should be called to the fact. It is true that nothing human can be more forlorn than a friendless European in China, but nothing can be swifter than the fortunes of one who holds the conditions for a favourable start.

"A yellow jacket and a short peacock's feather" are Major Gordon's chief rewards for nearly suppressing the rebellion; and although it may not be wise in a public which looks with reverence upon heraldic garters to scoff at a peacock's feather, yet we may remark that great military services must be better appreciated at Peking and more solidly rewarded than they appear now to be before absolute quiet will be established in the Empire. It does not, however, appear that absolute quiet is essential to our commercial success there. Sir Frederick Bruce has just reported that in three years the import trade of Shanghai has risen from thirteen to twenty-seven millions; and he attributes this to the opening of the country up the Yang-tze and the introduction of steam. "The decks of the steamers are now crowded with Chinese passengers, and their holds are filled with produce, destined, not for foreign export, but for Chinese consumption." Perhaps, also, the Taipings have been a little our friends as well as our enemies in this matter. We do not, indeed, quite agree with Colonel Sykes that by devastating the silk districts the Taipings did good to the permanent culture of silk, although they doubtless increased the export for the time. If the Colonel saw a manufactory on fire, and the manufactured articles all in process of being thrown out of window he would probably congratulate the owner upon the rapidity with which his merchandise was "moving off." Such was the case with the silk of the silk districts when the Taipings appeared. But it is remarkable that the Taipings have helped to make the fortune of Shanghai by rendering it very dangerous for any Chinaman of substance to live outside the settlement. Thus much we are ready to grant in favour of Colonel Sykes and his amiable clients. Our chief object, however, in calling notice to the despatches from Sir Frederick Bruce, and in marking the progress of this European—might we not almost say British?—settlement of Shanghai, was to call attention to China as a great present opportunity for commercial enterprise. There are many labourers there, but the harvest is greater than can be gathered by the honest and industrious, and there is too much left to tempt the rowdy and the robber.

* Our China merchants would like to be able to say Amen to this.—ED.

PRESENTS FROM SIAM.—The steamer *Eldorado*, from Alexandria, which arrived a few days ago at Toulon, brought a large collection of wild animals presented to the French Government by the Kings of Siam, as well as two enormous chests full of valuable seeds and vegetables. Among the beasts are a Thibet bear, a Camboge money, a Mongolian pheasant of extraordinary size and wonderfully beautiful plumage; also a miniature doe from Pegu, a magnificent Malacca tiger, a black Siamese panther, remarkable for its size and ferocity; a Burman peacock of singular beauty, two hooded pigeons, of which the fecundity is so extraordinary that it is expected to make the fortune of the fancier who may be able to acclimatise them in Europe; and a black water-serpent, the bite of which is said to produce the same effect as a violent attack of apoplexy. To the above are to added two Siamese buffaloes, which in that strange country are trained to run races, as horses are in England and France.

BULLION FOR INDIA.—A special train of seventeen bullion trucks arrived at Folkestone from London by the South-Eastern Railway on the 8th inst., bringing 1,316 cases, containing 2,632 bars of silver, the weight amounting to 61 tons 10 cwt., and the value being £333,191. Mr. T. G. Ledger, the Custom-house agent for the company, superintended during an hour and a-half its immediate shipment on board the *Prince Ernest* steamboat, Captain Mortleman, specially employed to convey the bullion to Boulogne, from which port it is being transported across France to Marseilles for the Indian mail. The charge for freight from London to Boulogne is nearly £500. The transport of this valuable consignment is under the charge of Messrs. Pickford and Co., and Messrs. Gaudet, Freres, and Co. Eleven or twelve hundred more cases of bullion for India were expected to follow last night.

TEA BRANDS AND THEIR MEANING.—The following will interest housekeepers:—"Hyson" means "before the rains," or "flourishing spring," that is early in the spring—hence it is often called "Young Hyson." "Hyson skin" is composed of the refuse of other kinds, the native term of which is "tea skins." Refuse of still coaser descriptions, containing many stems, is called "tea bones." "Bohea" is the name of the hills in the region where it is collected. "Pekoe," or "Poco," means "white hair," the down of tender leaves. "Powchong," "folded plant." "Souchong," "small plant." "Twankay" is the name of a small river in the region where it is bought. "Congo," from a term signifying "labour," from the care required in its preparation.

MAJOR-GENERAL GUY.—By the death of Lieutenant-General Frith, Major-General Thomas Wood attains the rank of a Lieutenant-General, and Colonel Guy, who has just embarked to take the China command with the local rank of Major-General, becomes a Major-General on the fixed establishment.

Naval and Military.

The 3rd battalion of the Grenadier Guards, under the command of Colonel his Serene Highness Prince Edward of Saxe-Weimar, have arrived at the Chelsea Barracks, from a month's duty under canvas. The battalion returned from the camp by road, bivouacking at Bagshot-heath and at Hounslow-heath.

Col. Said Bey, of the Turkish Imperial Service, who has been permitted by the War Department authorities to carry out a course of studies during the yast eight months, under Mr. Anderson, Assistant-Superintendent of the Royal Gun Factories in Woolwich Arsenal, on all matters connected with the manufacture of ordnance, has completed the requisite course, and is about to return to Constantinople, where the Turkish Government have the intention of erecting factories for the production of their own heavy ordnance, as well as the small-arms, &c., necessary for the equipment of their own troops, without having recourse to foreign assistance. Col. Said Bey is spoken of as being an officer of great ability and aptitude for all kinds of mechanical and manufacturing operations, and during his sojourn at Woolwich he has manifested much activity and perseverance.

The first instalment of the naval 100-pounder 6½-ton smoothbore wrought iron guns has arrived at Chatham, from the Royal gun factory, Woolwich, in the War Department transport Bomarsund, Mr. Spicer master, which went alongside the Ordnance-wharf to await orders from the War-office as to the landing of the guns. According to arrangements previously made, the guns were intended for shipment on board the ironclad frigate Achilles, 6,121 tons, 1,250-horse power, which is to be armed exclusively with the 100-pounders; but, in consequence of that vessel not being able to receive them for some days to come, the guns were unshipped from the Bomarsund and landed at the gun-wharf to prevent the transport being unnecessarily detained. In consequence of this misunderstanding between the Naval and War Department authorities the guns, after being landed at the Ordnance-wharf, will be reshipped in the course of a few days and conveyed down the harbour to the Achilles, this arrangement—or, more properly speaking, want of arrangement—entailing additional labour and responsibility on the part of the War-office officials at Chatham. The Bomarsund also brought a number of gun-carriages and other stores, and these, as well as the 100-pounders, were landed by means of No. 7 crane, the steam cranes erected at the gun-wharf not being used on this occasion to land guns of the weight of 100-pounders. The Bomarsund proceeded from Chatham to the Nore, for the purpose of receiving the guns from the screw-steam frigate Forte.

The Forte, 39, screw-frigate, Captain Arthur Mellish, bearing the flag of Rear-Admiral Richard Laird Warren, late Commander-in-Chief of Her Majesty's naval forces on the south-east coast of America, has arrived at Spithead, and on anchoring exchanged the usual salute with the flagship of the Admiral in command at Portsmouth. The Forte sailed from Rio de Janeiro on the 30th June, from Bahia on the 12th of July, and from Fayal on the 9th of August.

The Orontes, screw troopship, Capt. W. H. Hire, has been undocked at Portsmouth, and is ordered to leave Portsmouth on the 9th prox. for Dover, where she will embark troops for the Cape of Good Hope and the Mauritius, calling at Devonport on her way down Channel.

Monetary and Commercial.

The shareholders of the Imperial Bank of China, India, and Japan met at the bank in Walbrook, and confirmed the resolutions passed at a previous meeting accepting the terms proposed for amalgamation with the Bank of Hindustan, China, and Japan. The affairs of the bank are to be wound up voluntarily. The shareholders of the Bank of Hindustan, China, and Japan also met and confirmed the resolutions passed at their previous meeting, authorising an amalgamation with the Imperial Bank of China, India, and Japan, and increasing the capital of the bank to the amount of £2,000,000. Four directors of the Imperial are to be added to the Bank of Hindustan. Mr. Turner proceeds to Yokohama to open a branch of the latter institution.

There have been some trifling failures, amongst which is Palmer and Co., East India and China trade. Capt. Palmer formerly commanded the *North Star*.

There has latterly been much speculation in the shares of the Comptoir d'Escompte. And as naturally it has not been successful to all who engaged in it, attacks have been made on the directors of the Comptoir for the manner in which they draw up the monthly return of its position. This return, it is said, does not give month by month that clear idea of the profits realised which speculators find it desirable to possess. The answer put forward on behalf of the establishment is, that it is not its business to encourage speculation in its shares, and that in reality, the returns cannot be made up differently to what they are, inasmuch as it is impossible to get at shorter intervals than three or six months the results of the operations of the Asiatic and other distant agencies.

The Board of Trade Returns for the month, and the seven months, ended the 31st July, show to demonstration that the commerce of the United Kingdom continues in its course of progress. The total Declared Value of our Exports for the month was £14,394,364, being an increase of £745,524, or 5½ per cent., over the corresponding month of last year. Compared with July 1862, the increase is 18¾ per cent. The value of our cotton exportations was 13 per cent. in excess of those of the same month last year, but the quantity was less by about 3 per cent. Compared with July 1862, they show an increased value of 26 per cent., and a diminished quantity of 21 per cent.

The Exports to the countries and ports eastward of India, in regard to the articles distinctively enumerated, are as follows:—

CHINA AND HONG KONG.

	For the month ended 31st July. 1862.	1863.	1864.
Cotton yarn	240,450	—	322,610 lbs.
Cotton manufactures	6,813,786	3,371,697	5,192,717 yds.
Worsted stuffs	335,148	708,262	1,371,718 „
Woollen and worsted cloths	138,344	141,145	214,455 „
Lead	816	1,274	566 tons
	Value for the Seven Months ended 31st July.		
Cotton yarn	£165,609	£70,893	£153,266
Cotton manufactures	1,026,612	585,045	1,172,415
Worsted stuffs	203,462	327,654	513,791
Woollen and worsted cloths	162,292	197,851	175,084
Lead	114,781	210,644	93,962

The Cotton Manufactures exported to the other great centres of traffic in the Far East figure as follows:—

	For the month ended 31st July. 1862.	1863.	1864.
Singapore	4,403,286	1,908,294	940,280 yds.
Java	2,701,493	1,911,423	1,078,144 „
Philippine Islands	13,000	1,188,218	80,922 „
	Value for the Seven Months ended 31st July.		
Singapore	£465,890	£271,826	£505,971
Java	384,774	174,323	418,898
Philippine Islands	170,682	151,655	334,646

Of Cotton Yarn, 69,000 lbs. were exported to Singapore in July of the present year, against 236,600 lbs. in the same month last year, and 405,450 lbs. in 1862; the value for the first seven months of 1864 being £70,133, against £91,051 in 1863, and £81,365 in the year preceding.

IMPORTS.

Raw Cotton exhibits the same wonderful increase in the quantity entered as from China, which, no doubt, includes that sent from Japan, that we have had to call attention to in preceding months of the present year. The quantities and values present a comparison thus stated:—

	For the Month ended 31st July. 1862.	1863.	1864.
Quantity	1,451	27,724	71,959 cwts.
	For the Six Months ended 30th June.		
Value	£515	£793,888	£3,570,152

Of Sugar, the quantity imported from Java and the Philippine Islands in the month of July was all of 3rd and 4th quality—of the former 4,278 cwt., and of the latter 16,542 cwt. For the seven months

Digitized by Google

ended 31st July, the import was—of 2nd quality, 2 cwt.; of 3rd quality (not equal to Brown clayed), 29,328 cwt.; of 3rd quality (not equal to Brown clayed, but equal to Brown Muscovado), 18,427 cwt.; 4th quality (not equal to Brown Muscovado), 47,769 cwt. As the effect of the new duties, which came into force on the 16th April last, is now very apparent, we give the value of the import from Java and the Philippine Islands, distinguishable according to the quality:—

	Value for the Six Months ended 30th June. 1862.	1863.	1864.
2nd quality..	£49,349 ..	£1,581 ..	£2
3rd (not equal to Brown clayed)..	242,071 ..	461,687 ..	41,205
3rd (equal to Brown Muscovado)..	— ..	— ..	20,231
4th (not equal to Br. Muscovado).	— ..	— ..	44,297

The Import of Hemp from the Philippine Islands in the month of July, 1864, was 23,848 cwt.; and for the seven months 98,076 cwt., against 195,917 cwt. in the same period last year, and 93,484 cwt. in 1862. The value for the six months ended 30th June was £130,783, against £204,129 in the corresponding half-year of 1863, and £112,380 in 1862.

The present Returns furnish the means of estimating the entire course of the traffic to and from the Far East for the first half of the present year, by giving the Imports and Exports to and from the United Kingdom. The results are these—

From	Imports for the Half-year ended 30th June. 1862.	1863.	1864.
Hong Kong	£118,799 ..	423,659 ..	1,800,091
Singapore and Eastern Straits ..	1,121,480 ..	785,278 ..	913,506
China (exclusive of Hong Kong)	6,697,530 ..	7,400,054 ..	6,916,934
Japan	309,566 ..	671,586 ..	791,389
Netherlands India (Java, &c.) ..	76,115 ..	12,524 ..	8,378
Philippine Islands	446,027 ..	718,960 ..	269,987
Native Territories:—Borneo ..	7,664 ..	23,435 ..	6,634
Siam	35,285 ..	16,778 ..	14,522
Cochin China, Camboja, and Tonquin	— ..	— ..	4
To	**Exports (British and Irish Produce) for the Half-year**		
Hong Kong	£656,254 ..	£591,598 ..	£873,027
Singapore and Eastern Straits ..	646,136 ..	534,824 ..	783,891
China (exclusive of Hong Kong)	1,226,908 ..	1,186,979 ..	1,435,531

The biddings for 30,00,000 rupees in bills on India took place at the Bank of England. The proportions allotted were to Calcutta 18,00,000 rupees, and to Bombay 12,00,000 rupees. The minimum price was as before, viz., 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications with the limits amounted to 130 lacs. Tenders on Calcutta at 2s. 8d. will receive about 91 per cent., and on Bombay at 2s. ¼d., about 33 per cent. No allotment was made to Madras. On the last occasion the applications within the limits amounted to £2,280,000, and before that to 2,380,000, so that a diminution in the immediate demand for remittance to India is now indicated. It is probable, however, that the advices above referred to as just received may cause a revival.

The amount of bullion by the P. and O. Company's steamer *Massilia*, from Southampton on the 4th inst., was:—In gold, to Galle, £2,500; to Madras, £889. In silver, to Calcutta, £143,000; to Penang, £6,900; to Singapore, £12,550; to Hong Kong, £4,500; to Shanghai, £5,000; to Kanagawa, £750. Total in gold, £3,389; in silver, £172,700.

ARTICLES OF IMPORT.

TEA.—Our market during the past fortnight has continued in a very depressed state, notwithstanding the more favourable position of the stocks, now showing a decrease of over 20,000,000 lbs. from the highest point at the end of May. The beneficial effect of this reduction has, however, been more than counterbalanced by the large export reported from China for the first two months of the season, coupled with the continued high rate for money, and as the trade still buy only for immediate wants, and importers show more desire to realise, prices for many kinds have ruled ½d. to 1d. per lb. lower. The chief feature has been the sales of considerable parcels of the Teas received by overland route, the Moning and Wopak kinds from 2s. 8d. to 2s. 10d. per lb., and the Kaisows from 2s. 7d. to 2s. 11d.—at this latter figure only a small parcel has been placed. The *Sea King* has arrived with a whole cargo of fine Moning and Wopak, and sales have been made at 2s. 6d. to 2s. 10d. Low and dusty kinds of Congou remain without alteration; fair to good common have been in request, and the latter is now difficult to buy under 1s. 0¾d. to 1s. 1d. per lb. Sales of fair to good flavoury kinds have been difficult to make, and prices have given way ½d. to 1d. per lb. Good to fine Kaisows, of old season, have been but little in request, and for the few remaining, lower prices would have to be taken. Common to good blackish-leaf kinds have sold ½d. to 1d. per lb. lower. Fine Monings and Wopaks, of old season, have sold rather under previous prices. Tayshans remain much as before; a few new make fine, from Canton, received Overland, have been sold at previous prices. Oolongs remain dull, fine only being wanted, of which there are scarcely any offering. Souchongs have sold at a reduction upon last quotations, but only in small parcels, the supply on offer being in excess of the demand. Flowery Pekoes show no improvement. Except for the finer kinds of scented tea there is but little inquiry, and prices rule in favour of buyers. Uncoloured Japans continue much depressed, even at the low rates now current. In Green Teas there has been rather more doing out of the arrivals from New York, and Young Hysons show a rally of about 1d. per lb. from the lowest point. Hysons are difficult of sale. Imperials have sold readily at previous rates; but Gunpowders, of fine to finest Moyune kinds, have been only saleable at a decline of 2d. to 3d. per lb. Canton Young Hysons show a reduction of fully 1d. per lb. Good to fine Gunpowders are wanted, but common to fair remain heavy of sale. Public sales commenced on the 6th instant, comprising 37,206 packages, of which 24,803 packages were printed without reserve, of these, 28,150 packages have passed auction, of which 19,684 packages have been sold, including 19,274 packages without reserve. The sales ended yesterday; 8,055 packages passed; 5,855 found buyers, all of which were "without reserve." There was no material alteration in prices, the decline previously noticed being fully established. Common black leaf congou sold from 10¾d. to 1s. 0¼d.; fair black leaf, 1s. 2d. to 1s. 5d.; common red leaf, 1s. 0½d. to 1s. 4½d. per lb. A break of common Canton gunpowder brought 8½d., and a parcel of very common hyson skin realised only 5d. per lb. Of the 37,206 packages which were brought forward at these sales, 25,445 packages found buyers.

SILK.—We have had a month of comparative quiet in silk, the particular season of the year and high range of prices inducing consumers, both home and continental, to limit their purchases as much as possible. Some little eagerness has been manifested during the last week to purchase the first arrivals of new silk from China, and about 700 bales have been sold at very full prices—generally at 1s. above our quotations of a month since. The stock of old silk is very small in all classes, both of China and Japan silk, and holders are very firm. Deliveries are comparatively good.

COTTON.—The market has been heavily depressed by rumours from New York of approaching peace, and by the unsettled state of the Money Market. The week therefore closes irregularly with a decline of 1d. to 2d. per lb., the advance of the Bank rate checking any tendency to improvement. China has shared the general dulness, and quotations

Digitized by Google

must be reduced 1d. to 1½d. per lb. The *Cotton Supply Reporter* gives the import for the first six months of the present year from the quarters named as follows:—China, 227,623 bales; HongKong, 183,746 bales; Japan, 27,094 bales; and Philippine Islands, 20 bales.

SUGAR.—Extreme apathy has prevailed in the market since our last, and although the supply on offer has not been large, sales on the spot even of small quantities were difficult last week at a reduction of about 6d. per cwt. The same dulness has continued during the present week, and prices have been barely maintained, even at the decline.

COFFEE.—This market has been sufficiently steady for both plantation and native, and good business was done in each at on the average former terms; but on Thursday the market became flat, and prices gave way 6d. to 1s. per cwt. At auction 740 casks, 283 barrels, 539 bags Plantation Ceylon sold at 82s. to 86s. 6d. for good middling to good bold coloury; 77s. to 81s. for fine ordinary to low middling; and 80s. to 86s. for peaberry.

RICE.—For cargo kinds the export demand has exceeded the quantity offering, and value has improved 3d. per cwt.; but soft grain is again 3d. cheaper. Quotations for Bengal range from 9s. to 13s. 6d., and for Java, from 9s. 6d. to 18s. On Thursday, 16,728 bags Necranzie, at auction, on account of the underwriters, brought 8s. 6d. and 9s., being the fair value.

CAMPHOR.—Auctions have included 66 tubs Japan, half sold at 92s. 6d. per cwt. for fine, and 87s. 6d. dirty: and 121 chests China, a small portion sold at 82s. 6d. for mixed with sulphur; buyers of good China at and a little over 85s., but no sellers.

CASSIA LIGNEA.—Steady, with some inquiry upon previous terms, 85s. to 94s. Buds: Quiet, without buyers upon former terms, £14 to £15.

DRUGS.—Cubebs: Flat; and of 40 bags at auction, three-fourths (damaged) sold at 90s. to 96s. 6d. per cwt., being cheaper. Dragon's Blood: Steady; and of 7 cases at auction, three sold at £6 to £6. 10s. per cwt. for fair lump. Galangal Root remains very dull; 103 bags at auction were all retired. Rhubarb: Very quiet, with scarcely any present demand (except for really good) at current rates, varying from 3s. 9d. to 8s.; and 98 boxes at auction were nearly all retired.

GUMS.—Benjamin: Of 168 cases Sumatra at auction, a few good second quality sold well at £14. 10s. per cwt., the remainder retired in the absence of demand, excepting two or three lots of trash sold at 35s. Damer: Rather dearer, and firm; of 189 cases at auction, three-fourths sold at 42s. 6d. per cwt. for middling pricked, and 35s. 6d. to 36s. 6d. ordinary small and dusty. Gamboge: Continues scarce and firm; only 4 cases at auction, and those retired.

GUTTA PERCHA.—Market very quiet, with scarcely any trade; no auctions, 6 tons, however, of fine quality are reported to have been sold at 2s. 6d. per lb.

INDIA-RUBBER.—Remains very quiet, with scarcely any demand at present rates, at which holders are generally firm; some business has, however, been done within the quotations, 1s. 2½d. to 1s. 5d.; 32 cases good Batavia kind sold at auction at 1s. 3½d. per lb., being cheap.

HEMP.—Manila: Market very dull, with scarcely any demand; a large quantity brought to auction, 7,700 bales, nearly the whole of which was retired at £30 to £32 per ton.

HORNS.—Auctions have comblued 75 tons Madras, 26 tons Calcutta, 10 tons Bombay, and 3 tons Singapore; about two-thirds found buyers at 30s. to 31s. 6d. per cwt. for 2 lb. average, and 24s. to 26s. 6d. for 1¼ to 1½ lb., being generally rather cheaper. 10 tons Calcutta Tips retired.

JAPAN WAX.—More enquired for; sales of mid fine saucer have been made at 62s. to 65s. and for good lump 61s. 6d. is offered. On Saturday last 48 cases good saucer sold at 65s.

OILS.—Anniseed: Limited business has been accomplished at 6s. 2d. per lb., at which there are still buyers, but no sellers at the moment under 6s. 3d. Only 8 cases at auction, which were retired. Cassia: Remains very dull; 10 cases at auction retired; a few cases subsequently sold at the higher quotation of 3s. Cinnamon: Firm, and of 6 cases at auction, half sold at 2s. 10d. to 2s. 11d. per lb. for good. Mace and Nutmegs: Steady, and of 3 cases at auction one sold at 2½d. per oz.

SAGO.—Very quiet; 361 boxes at auction, all retired. Flour: Remains steady, and 423 bags at auction sold at 16s. to 16s. 6d. per cwt. for good.

SHELLAC.—The heaviness of this market has become more intense; and there is a further reduction in prices of 5s. to 10s. per cwt.: of 744 cases at auction, less than half were placed: Orange at £6. 10s. to £7; Liver, £6 to £6. 5s.; dull pale Garnet, £6; and fine Button, £8. 10s.

SPICES.—Cloves: Steady; 26 cases Penang at auction retired; of 22 casks Amboyna, half sold at 5½d. to 5¾d. per lb. for middling; and 98 bags Zanzibar retired. Mace: Steady; 8 cases of Penang at auction sold at 1s. 6d. to 1s. 9d. per lb. for middling to fair palish. Nutmegs: Very quiet; and of 88 cases Penang at auction, half sold at 1s. 1d. to 1s. 10d. per lb. for ordinary small to good medium.

PEPPER.—Black: Some little indication of improvement, which appeared subsequently to our last, has since entirely disappeared; and of 5,146 bags Penang at auction half sold at 3½d. to 3¾d. per lb.; and 311 bags Singapore sold at 3¾d. White is again rather cheaper, and 420 bags Singapore at auction sold at 5½d. to 5⅝d. per lb. for ordinary to fair.

TERRA JAPONICA.—Cutch Pegue is again 1s. per cwt. cheaper; and of 722 bags Pegue at auction, half sold at 23s. per cwt. for good, and 21s. good of very old import. Arrivals and sales advertised. Gambier had looked rather firmer, and 25s. 6d. per cwt. was realised in limited transactions, but it has become flat at 25s. 3d., at which price 592 bales at auction all sold.

MISCELLANEOUS.—Blacklead: Continues very quiet, and generally cheaper; and of 1,454 barrels at auction, half sold at 10s. to 16s. per cwt. for middling to very good lump, and 7s. 6d. to 8s. 3d. dust. Galls: Quiet, without business of consequence; Japan and China, at the moment, steady at previous rates, but inactive. Musk: Firm; and of 53 caddies Tonquin at auction, one-third sold at 26s. to 30s. per oz. for fair to fine; 4 tins Grain sold at 43s. to 50s. middling to fine. Rattans: Steady; 4,105 bundles Penang, and 1,568 bundles Calcutta, sold at auction at 4s. to 5s. 10d. per 100. Sapanwood: Continues firm; 20 tons Ceylon sold at auction at £10 per ton. Soy: Nothing doing; 6 casks at auction retired. Star Anniseeds: Again rather cheaper; and of 231 cases at auction, half sold at £5. 10s. to £5s. 17s. 6d. per cwt. for good, and £5. 5s. to £5. 7s. 6d. mouldy. Sellers of good sound privately at £5. 10s. Sticklac, Siam: Flat, and cheaper; and of 278 cases at auction, two-thirds sold at 36s. per cwt. for fair bold, but woody, and 32s. to 33s. 6d. blocky. Vermilion: Flat: and 9 boxes at auction all retired.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £9. 10s.; hoops, £10. 10s.; sheets, single £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7. 5s.

STEEL.—Swedish keg, £16 to £17.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8¼d. to 8¾d. per lb.

TIN.—104s. for block; 105s. for bar. Tin plates, best charcoal, I.C. 29s. 6d. per box.

LEAD, &c.—English pig, £20. 5s. to £20. 10s.; W.B, £22. 10s.; shot, patent, £23. 15s.; sheet, £21. 15s.; spelter, £24. 10s. to £24. 15s.; zinc, English sheet, €30; quicksilver, £8.

The following is from the circular of Messrs. French and Smith:—The month of August was for the most part inactive, the uncertainty as to the course of the money market keeping a check on any but moderate transactions. Iron: In Scotch pig the fluctuations have been unimportant; occasionally a little activity is apparent, but the market seems too heavy to be easily moved. For rails and merchant bars there is a good demand. Staffordshire is steady. Copper: In the early part of last month was very quiet, but there is now some improvement, although the demand is but moderate. The supply of good ores at Swansea continues short. Tin: The English smelters have found some difficulty in supplying their customers with common Tin; of refined the supply continues ample. In the Foreign Tin Market the last few days we have seen considerable excitement, owing to the deliveries in Holland during the month past having reached the large figures 55,520 slabs. No doubt a great proportion of these deliveries is in store in London and elsewhere, instead of Holland. Tin Plates: Without improvements. The quantity shipped to all parts for the past month was 60,000, against 89,000 boxes in August, 1863. Lead: A little more in demand. Spelter has maintained the advance in price. The stock on 31st ult. was 11,481 tons. Quicksilver remains unchanged.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

July 27, Jeannie Douglas, Donaldson, from Newcastle, for Shanghai, with damage; 12, Courser, Griffin, sailed for Penang.

FREIGHTS AND CHARTERS.

Outward freights remain without animation, the tonnage on the different berths being still large, and the rates consequently low both for general cargoes and coals. Several homeward charters have been fixed from the rice ports, but even at reduced rates it is difficult to place vessels. The importers of teak are also well supplied. Ships are, however, still wanted from Shanghai; also small vessels of good class from Hong Kong and Singapore.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £36 and £1. 15s. For Shanghai: £48 and £2. 3s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £25 and 19s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have engaged freight in the Kensington for the conveyance of the following Government stores from the River Thames to Hong Kong—viz., 140 tons navy provisions, &c., 18 tons heavy shot (in boxes), and 3 tons light goods (including a few combustibles), and have invited tenders for the conveyance of 158 tons heavy shells (100 loose and in boxes), 21 tons light stores, and 54 tons gunpowder, to Shanghai, also from the River Thames.

CASUALTIES.

ST. HELENA, JULY 26.—The Kiandra, v. Kuffeller, from Passaroeang to Amsterdam, which put in here leaky 18th July, had also lost bulwarks, split sails and rudderhead, and apparently started cutwater, &c. She has been surveyed and recommended to be lightened for further examination. The Eunice, Lewis, from Colombo to London, which put in here 3rd July, and proceeded on the 5th, took on board part of the cargo of the Teide, Becards, from Manila to Liverpool.

The Arab, from Liverpool to Singapore, which put into Rio Janeiro 22nd July, leaky, and with part of cargo thrown overboard, has been surveyed and recommended to be discharged.

The Jeannie Douglas, Donaldson, from Newcastle for Shanghai, which put into Mauritius July 27 with damage, had experienced a very severe hurricane June 27 in lat. 42 S., lon. 14 W., which lasted three days, during which she had her cabin filled with water, cargo shifted, &c.

Amsterdam, September 7.—The Christina, Remeens, from Banjoewangie, which arrived in the Texel, September 5, reports having encountered much bad weather from May 31 to June 16, and it is feared has damaged her cargo, as she had the hood of her cabin stove in, through which much water made its way below.

RUSTOMJEE DHUNJEESHAW, Esq. (Messrs. P. F. Cama and Co.)

Counsel.

E. H. POLLARD, Esq.

The scheme of a Local Bank for this Colony, with Branches at the most important places in China, has been in contemplation for a very long period.

The local and foreign trade in Hong Kong and at the open ports in China and Japan has increased so rapidly within the last few years that additional Banking facilities are felt to be required.

The Banks now in China being only branches of Corporations, whose head-quarters are in England or India, and which were formed chiefly with the view of carrying on exchange operations between those countries and China, are scarcely in a position to deal satisfactorily with the local trade, which has become so much more extensive and varied than in former years.

This deficiency the Hong Kong and Shanghai Banking Company will supply, and will, in fact, assume the same position with relation to this Colony as the Presidency Banks in India, or the Banks of Australia in their respective localities.

The establishment of a Mint in Hong Kong, providing an adequate supply of proper currency, will render a local Banking medium essential to carry out its operations, and the almost certain disappearance of the existing Compradorie system (so far as money is concerned) will also ensure Banks becoming in course of time the exclusive medium for the transactions of the monetary operations connected with trade.

For the anticipated success of this enterprise there are therefore ample grounds; and the great prosperity which has attended the working of other local associations in China clearly shows that the largest profits are obtained by those public companies which possess an interested local body of proprietors or shareholders whose support naturally forms a chief element of remunerative success.

The Bank will commence operations simultaneously in Hong Kong and Shanghai, and as the importance of its business at the latter place must be very great, it is intended to establish a Local Board of Directors there for more effectually meeting the work. As circumstances render it advisable the Bank will establish Branches at other places.

In the distribution of Shares Hong Kong and Shanghai will equally participate. Shares will also be reserved for the other ports in China and Japan and for persons residing elsewhere, who are directly interested in the China trade.

Applications for Shares must be addressed, until further notice, to the Provisional Committee, care of—

MESSRS. DENT AND CO.

BANK OF HINDUSTAN, CHINA, AND JAPAN.

NOTICE IS HEREBY GIVEN, that the BANK OF HINDUSTAN, CHINA, and JAPAN (Limited), has REMOVED from 16, Cornhill, to No. 1, Bank-buildings, Lothbury.

Consultations daily from 10 to 3 and 6 to 8.
London Agents:—J. Allen, 20, Warwick-lane, Paternoster-row; Mann, 39, Cornhill, London; and the booksellers in town and country.

HOLLOWAY'S OINTMENT AND PILLS.—INSTANT RELIEF.—Sores which are daily extending, ulcers which are hourly deepening, may be arrested in their torturing progress, and induced to take a healthy action, by applying this healing Ointment and taking these purifying Pills. It soothes all distempers of, and extracts all morbid humours from the skin. Old ulcers of the legs, inflammations caused by varicose veins, and cramps of the lower limbs, can sensibly be eased and shortly cured by Holloway's never-failing Ointment, which represses excessive and stimulates sluggish vascular and nervous action. In constitutions breaking down under piles, fistulas, and other similarly painful maladies, a few applications of this cooling Ointment will give comfort, and a persistence in its use will effect a cure.

REGENT PIANOFORTE ROOMS.

ADDISON AND LUCAS,

MUSICAL INSTRUMENT MANUFACTURERS,

(By Special Appointment to Her Majesty).

210, REGENT STREET, W.,

RESPECTFULLY direct attention to their ORCHESTRAL, MILITARY, and other MUSICAL INSTRUMENTS, adapted for Band or Drawing-room use, and all made with every improvement and tuned under the superintendence of the most eminent Professors, including Mr. T. Harper, Mr. C. Harper, Mr. Wells, and other members of the Royal Italian Opera, Philharmonic, &c., &c.

ÆOLIAN HARPS.—Single—12 strings, 16s., and 21s.; ditto, 24 strings, 25s. and 32s. Double (this may be used as two Single Harps)—24 strings, 30s. and 35s.; ditto, 48 strings, 42s. and 50s. each,—cases included.

ANGLO-GERMAN CONCERTINAS.—Messrs. ADDISON and LUCAS direct the attention of performers on the German Concertina to these Instruments, which are finished with the same care as their Concertinas with English fingering, and are the only durable instruments of the kind made. Anglo-German Concertinas (English-made):—20 keys, in wood case, £2. 2s.; 22 ditto, £2. 10s.; 28 ditto, £3. 3s. German Concertinas, the best of the foreign make, 6s., 8s., 10s. 6d., 12s., 21s., to £1. 15s.—ADDISON and LUCAS, 210, Regent-street, W.

BOWS.—VIOLIN BOWS, at 2s., 4s., 5s., 6s., and 8s. each, to £1. 1s.; Dodd's Prize Medal, plain, 10s. 6d.; superior, 15s.; silver mounted, 21s., 25s., 31s. 6d., and 42s. each, to £5. 5s.; tenor bows from 4s. to £2. 2s.; violoncello bows from 4s. to £2. 2s.; contra bass bows, from 5s. to £1. 1s.—ADDISON and LUCAS, No. 210, Regent-street, W.

CONCERTINAS.—1. Mahogany, 48 keys, double-action, in case £2 10 0
2. Ditto, superior, in mahogany case 3 10 0
3. Rosewood, 48 keys, five-fold, bellows, in mahogany case 4 4 0
4. Ditto, five-fold morocco bellows, in rosewood case 5 5 0
5. Ditto, extra finish, 48 metal keys, in rosewood case 7 7 0
6. Ditto, ornamented in rosewood case... ... 8 8 0
7. Rosewood, 48 keys, silver touches, improved vibrators, in rosewood case 10 10 0
8. The patent concert concertina, amboyna, bird's-eye maple, or ebony tops, inlaid, metal studs, with sterling silver touches, &c., the best concert instrument, warranted and kept in order for 12 months 12 12 0

The same instrument, prepared expressly for India, amboyna tops, strongly clamped with German silver metal studs, &c., in rosewood box, brass clamped 15 15 0

With glass studs, extra, £1. 1s.; with steel vibrators, extra, £4. 4s.

Nos. 5, 6, and 7 may be had finished in amboyna, ebony, or coromandel wood, at an extra cost of £2. 2s.

Tenor concertinas, 48 keys... ... £9. 9s. to £15. 15s.
Bass concertinas, 48 keys ... ... £12. 12s. to £16. 16s.
ADDISON and LUCAS, 210, Regent-street, W.

DRUMS.—Side, £1. 10s. to £2. 2s.; Regulation, with Royal Arms, £3. 3s. to £4. 4s.; Bass ditto, plain, £4 4s. to £5. 5s.; painted with Royal Arms, £6. 6s., £8. 8s., £10. 10s. and £12. 12s. each.—ADDISON and LUCAS, 210, Regent-street, W.

EUTERPEONS and SELF-ACTING ORGANS.—Great care and experience are necessary in the selection of instruments acted on by barrel and machinery. Messrs. ADDISON and LUCAS are able to insure to purchasers the most perfect that can be purchased. Vienna flute organs, self-acting, 85 guineas; Euterpeons, ditto, from £105 to £1,000; organs, ditto, from £21; portable organs, with trumpets, &c., from £21. Estimates and drawings free per post.—ADDISON and LUCAS, 210, Regent-street, W.

FLUTES.—Boehm's Council and Prize Medal Cylinder Flutes, old Fingering, cocoa wood, in case £8 8 0
Ditto, with sterling silver keys on all the holes 16 16 0
Ditto, entirely of sterling silver, or wood with silver keys and sockets, old or new fingering 26 5 0
Ditto, in gold, with silver keys 84 0 0
Ditto, entirely gold 141 15 0
Concert flutes, eight German silver keys, cocoa wood ... ... 30s. to 4 4 0
Ditto, eight sterling silver keys, cocoa wood ... ... £6. 6s. to 15 15 0
Ditto, octaves, cocoa wood, six German silver keys, on pillars ... ... £1. 1s. to 2 2 0
Ditto, six sterling silver keys, in case 4 4 0

All the flutes are tried and proved by Mr. Benjamin Wells, who attends daily to give instruction upon the new and old systems of fingering.—ADDISON and LUCAS, 210, Regent-street, W.

FLAGEOLETS.—Flute Flageolets, cocoa wood and German silver keys, £1. 11s. 6d. to £2. 2s.; ditto, six sterling silver keys, in case, £4. 4s. The Flute Flageolet will be found a charming accompaniment to the pianoforte in dance music, &c., and being remarkably easy to sound, may be put into the hands of very young performers. The fingering is the same as the concert flute, to which instrument it will be found a valuable introduction.—ADDISON and LUCAS, 210, Regent-street, W.

GUITARS, £2. 2s., £3. 3s., £4. 4s., £5. 5s., £6. 6s., £8. 8s., to £12. 12s., the finest models. Cases included with the £4. 4s. Instruments and upwards.—ADDISON and LUCAS, 210, Regent-street, W.

HARMONIUMS, IMPROVED PATENT, by Alexandre.—1. In oak case, £6. 6s. 2. In mahogany case, £7. 7s. 3. In oak case, one stop, £10. 10s. 4. In mahogany case, ditto, £12. 12s. 5. In oak case, three stops, £13. 13s. 6. In ditto, five stops, £23. 2s. 7. In ditto, nine stops, £26. 15s. 8. In ditto, 10 stops, tremolo, £27. 6s. 9. In ditto, 13 stops, £37. 5s 10. In ditto, 14 stops, tremolo, £37. 16s. 11. In rosewood case, one stop, £13. 13s. 12 In ditto, three stops, £15. 15s. 13. In ditto, five stops, £25. 4s. 14. In ditto, nine stops, £28. 17s. 6d. 15. In ditto, 10 stops, tremolo, £29. 7s. 6d. 16. In ditto, 13 stops, £39 7s. 6d. 17. In ditto, 14 stops, tremolo, £39. 18s.—ADDISON and LUCAS, 210, Regent-street, W.

KETTLE DRUMS.—Cavalry large Drum, 22 inches, including cover ... ... £21 per pair.
Orchestra, first size ditto, 24 in., including cover ... ... 24 „
„ second ditto, 27 „ „ ... 30 „
„ third ditto, 30 „ „ ... 40 „
„ fourth ditto, 36 „ „ ... 50 „

METRONOMES (musical time indicators).—No studio is complete without this indispensable to interpret the tempi of the great masters' compositions. Samson's improved, winding without key, £1. 11s. 6d., with bell, to £3. 12s. 6d.; ditto, military ditto, large size, in case, £4. 4s.; mahogany or rosewood, the best ordinary English make, with bell, £2. 2s.; ditto, without bell, £1. 6s.; tripod stand, with spirit level, £3. 13s. 6d.—ADDISON and LUCAS, No. 210, Regent-street, W.

VOCAL HORN, highly finished, £8. 8s., in case. This is especially recommended to amateurs and professors as a beautiful drawing-room instrument. Being in C, songs with pianoforte accompaniment can be played as published for the voice without transposing or the use of crooks. The tone is a combination of the French and tenor horns, and is produced without effort. Mr. C. Harper, professor at the Royal Academy of Music and the first horn in Mr. Costa's Orchestra, attends to give instructions.

MILITARY and BRASS BAND INSTRUMENTS.—Messrs. ADDISON and LUCAS respectfully direct the attention of commanding officers and presidents of band committees to the reduced rate at which they are now able to furnish the best toned and most durable military band instruments; and they confidently assert that while a great saving to the band fund will be accomplished, the musical effect of the bands using these instruments will in many cases be improved, and in none diminished. Messrs. A. and L. warrant all the instruments supplied by them to be well in tune together. To insure this, every instrument will be tested by eminent professors before being issued. Messrs. A. and L. beg to add, in conclusion, that the brass instruments now supplied by them are, in every part, English manufacture, not foreign bells and pistons put together, and are the same (with every modern improvement) that have been issued to the army for 50 years at nearly double the prices. Every instrument not approved of will be exchanged, free of cost. Estimates for sets of military band instruments furnished, with every particular respecting the most effective formation of bands. Regiments requiring efficient bandmasters will have every assistance from Mr. Lucas, Principal of the Royal Academy of Music.

1. Cornets, any model, three pistons ... £7 7 0
Ditto, four pistons 8 8 0
2. Soprano cornet, in E flat and F 5 5 0
3. Valve trumpet, crooks complete 7 7 0
4. Contra alto or flugal horn, bell upright or forward 6 6 0

11. Valve trombone, G or F bass 8 8 0
12. Ditto, C or B flat, tenor 8 8 0
13. Slide trombone, in G or F bass 6 6 0
14. Ditto, B flat or C tenor 5 5 0
15. Euphonion, B flat, four pistons, bell upright or circular 9 9 0
16. Ditto, in C, four pistons 9 9 0
17. E flat bass bombardon, bell upright or to encircle body 9 9 0
18. Ditto, four pistons 10 10 0
19. Small bass, in B flat or C, three ditto 8 8 0
20. Double bass bombardon, B flat or C, bell upright 12 0 0
21. Double bass bombardon, B flat or C, to encircle body 13 16 0
22. Eleven-keyed opheicleide 8 8 0

MUSICAL BOXES.—Small Pocket, in horn cases, two tunes, £1. 1s.; three tunes, £1. 11s. 6d.; four tunes; £2. 2s. Large, for table, by Nicole, Geneva, warranted the best, four tunes, in walnut case, £4. 4s.; four ditto, rosewood ditto, £4. 14s. 6d.; six ditto, walnut ditto, £6. 6s.; six ditto, rosewood ditto, £6. 16s. 6d.; eight ditto, walnut ditto, £8. 8s.; eight ditto, ditto, £8. 18s. 6d.; 12 ditto, rosewood ditto, £13. 12s. to £16. 16s. Extra large, for table, with the new effects of flute, drum, triangle, and castanet accompaniment, six tunes, drum, bell, and castanet accompaniment, £21; six ditto, with flute accompaniment, £34; eight ditto, drum, bell, and castanet accompaniment, £25. 4s.; eight ditto, with flute accompaniment, £29. 8s.—ADDISON and LUCAS, 210, Regent-street, W.

NURSERY-BARREL PIANOFORTES.—These instruments are acted on by barrels turned by hand, performing dance and lively music with good effect, are very durable, and will be found an excellent substitute when a professional performer is not available; any pianoforte tuner can keep them in order. Mahogany, eight tunes, £14. 14s.; ditto, 10 tunes, £16. 16s.; rosewood, eight tunes, £14. 14s.; ditto 10 tunes, £16. 16s.; extra barrel, eight tunes, with case, £3. 10s; ditto, 10 tunes, ditto, £4. 10s.—ADDISON and LUCAS, 210, Regent-street, W.

ORGAN ACCORDIONS.—Fingered same as pianoforte, with stop £5. 10s., without stop £4. 10s.; in case complete. Stands with pedal, enabling the performer to use both hands, £1. 10s.—ADDISON and LUCAS, 210, Regent-street, W.

PORTABLE HARMONIUMS.—Folding into case, 3-octaves, £8. 8s.; 3½-octaves, £10. 10s.; 4-octaves, £12. 12s. each. Dimensions when folded—length, 24 inches; width, 12 inches; height, 11 inches.—ADDISON and LUCAS, 210, Regent-street, W.

REGULATION DUTY TRUMPETS.—Best make with line and tassels, £3. 2s.; ditto, electro plated, in case, £3. 13s. 6d.; sterling silver, £31.—ADDISON and LUCAS.

REGULATION DUTY BUGLES.—Best make, with line and tassels, £2. 2s.; ditto, electroplated, in case, £3. 13s. 6d.; sterling silver for presentation, plain, with silk lines, £21; ditto, elegantly chased, £26. 5s.; ditto, all the chased work and inside of bell richly gilt, £31. 10s. to £35; silver lines and tassels, £3. 3s.; bugle pistons, to fit in bugle, brass, £2. 12s. 6d., ditto, sterling silver, £21.—ADDISON and LUCAS, 210, Regent-street, W.

ROMAN and ENGLISH STRINGS.—In consequence of the difficulty experienced by Amateurs and Professors in procuring Roman strings, Messrs. ADDISON and LUCAS beg to announce that they import the finest that can be got, and the only kind used by the most eminent artists on the violin, harp, guitar, &c.:—Harp, English gut strings and best silver, per set, £2. 2s.; ditto, Roman gut strings and best silver, per set, £3. 3s.; guitar, Roman gut strings and best silver, per set, 4s.; violin strings, English, each—1st, 4d.; 2nd, 6d.; 3rd, 8d.; 4th, 6d.; per set, 2s.; ditto, Roman, each—1st, 8d.; 2nd, 8d.; 3rd, 1s.; 4th, 6d.; per set, 2s. 10d.; ditto Paganini 4ths, sterling silver, each 2s.; viola, best—1st, 6d.; 2nd, 8d.; 3rd, 8d.; 4th, 8d.; per set, 2s. 6d.; violoncello, English, best—1st, 1s. 6d.; 2nd, 2s.; 3rd, 2s.; 4th, 2s.; per set, 7s. 6d.; contra bass, best—1st, 4s. 6d.; 2nd, 8s.; 3rd, 9s.; 4ths, covered, 12s.; per set of three, £1; violin, viola, and violoncello, 3rd and 4th strings, covered with gold coloured wire, which never tarnishes, same price as ordinary strings.—ADDISON and LUCAS, No. 210, Regent-street, W.

SAXOPHONES.—
Soprano in C or B flat £12 12 0
Do. in F or E flat 15 15 0
Tenor in C or B flat 15 15 0

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Euxine, arrived Sept. 26.—From Yokohama: Mr. Barton. From Kanagawa: Mr. P. V. James, R.N. From Shanghai: Mr. Leighton, Mr. Evans. From Hong Kong: Surg. and Mrs. Lawrence and infant, Mr. Mason. From Singapore: Mr. Couver.

To Southampton, per Massilia, expected to arrive Sept. 31.—From Hong Kong: Capt. Stevens, Staff-surg. Bain, Messrs. Wm. Maud, S. Burns, and H. K. Newland, Mr. J. G. Ronald, Lieut. and Mrs. Cracroft and child, Mrs. Brandreth, two infants, and European female servant, Dr. and Mrs. M'Clelland, and native female servant, Major and Mrs. Smith, Messrs. Irwin, and W. E. Parry, Dr. Gavins, Lieuts. Reid and W. G. Webb, Messrs. E. Stewart, H. W. Stainforth, Farquharson, and Geo. Lawson, Mrs. Cullen and two children, J. Cullen, F. Julyan, E. Budden, J. Coulbourne, and W. Unwin. To Gibraltar.—From Hong Kong: Don Jose Roca y Pazza. To Malta.—From Hong Kong: Mr. T. G. Le Marchant.

To Suez, per Simla, arrived Sept. 16.—From Hong Kong: George Foster. From Singapore: Mr. and Mrs. Chevallier. To Aden.—From Singapore: Mr. M'Lean.

PASSENGERS OUTWARD.

Per P. and O. steamer Poonah, Sept. 20, from Southampton.—To Shanghai: Miss J. Provand, Assist.-Surg. Veale. To Hong Kong: Mr. Newton, Mr. J. H. Hargreaves, Mr. D. H. Speer, R.N. To Singapore: Mr. Dunlop. To Madras: Miss Sibley, Mr. and Mrs. St. John Shaw, Capt. and Mrs. Mainwaring and infant, Major and Mrs. Peyton and child, Mrs. C. B. Powell and infant, Archdeacon and Mrs. Dealtry and infant, Messrs. Hardinge, Shaw, D. Buick, and C. Kilgour, Mrs. Twiss. To Calcutta: Mrs. and Miss Ronald, two Misses Swaine, Mr. J. C. Lethbridge, the Rev. W. and Mrs. Lethbridge, Mrs. A. Hunter, Miss White, Mrs. Evans and infant, Mr. and Mrs. R. C. Lepage and infant, Mr. H. Dead, Mrs. H. Haldane, Mr. L. J. Guise, Mr. and Mrs. Mellor and child, Mr. B. Howes, Mr. J. Baynes, Mrs. R. J. Richardson and infant, Mr. J. Tucker, Colonel and Mrs. Tibbert, Mr. Farncombe, Mr. Martin, Mrs. S. Wilson, Major Rothney, Miss Llewellyn, Mrs. R. Louis and infant, Mr. V. Bell, Miss Harvey, Mr. J. Phillips, Mr. J. Henderson, Mr. R. S. O'Connor, Mr. Richd. Peppard, Mrs. Stainforth, Mr. Smith, Mr. F. C. Bainbridge, Mr. H. A. Mackey, Mr. J. R. Henderson, Mr. Witham, Lieut. Charles Key, Miss Sherlock, Miss Armstrong, Dr. Elmslie, Mr. Rundle, Mr. J. W. Jamieson, Mr. J. H. Galwey, Paymaster Rundle, Assistant-Surgeons G. Atkinson and A. Mintz. To Ceylon: Mr. and Mrs. F. H. Kelson, Mr. Bois, Mr. N. F. Winter.

From Marseilles, Sept. 28th. To Singapore: Mr. P. C. Keake, Lieut. and Mrs. Burn. To Shanghai: Mr. L. Russell, Mr. D. Anderson. To Hong Kong: Mr. Marsh. To Calcutta: Major and Mrs. Bosk, Mr. B. and Mrs. Lane and infant, Mr. E. Macnaghten, Mr. Teil, Rev. E. and Mrs. Pixley, Capt. and Mrs. and Miss R. Carr and child, Lieut. A. F. and Mrs. Harcourt, Mrs. Cowley, Mr. and Mrs. G. Watson, and Miss Wallace, Capt. Jonathan Reed, Mr. H. D. Fergusson, Capt. C. Ogilvie, Hon. C. T. and Mrs. Addington, Lieut.-Col. and Mrs. and Miss Verner, Mr. W. Ruddell, Mr. F. R. Browning and friend, Capt. A. W. Owen, Col. and Mrs. Man and Son, Mr. Man, Mr. Browne, Mr. S. V. Gordon, Mr. Jenkins, Mr. E. Darlington, Dr. Leitner, Mr. A. Finch, Mr. M. F. Stephen, Mr. C. Macnaghten. To Madras: Mr. John Brown, Col. and Mrs. A. Biddulph, Mr. Biddulph, Capt. Twiss, Dr. Rutherford. To Ceylon: Mrs. Forlonge, Miss Forlonge. From Suez to Madras: Capt. and Mrs. Drever.

Per P. and O. steamer, Oct 4, from Southampton.—To Hong Kong: Mr. and Mrs. Preston and infant. To Shanghai: Mrs. Jarvie, Mr. Turnbull. From Marseilles, Oct. 12. To Shanghai: Mr. Gordon and friend, Mr. A. Schultze.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our dates are down to the 27th July. The London mail of the 26th May arrived out on the 17th July.

The intelligence for the fortnight is of considerable importance. Her Majesty's ships *Barossa* and *Cormorant* left on the 21st July on a cruise to Choshiu (Tsiosiu), for the purpose, it was said, of communicating to the Prince of Nangato certain despatches from the representatives of foreign Powers. Two of Nangato's officers, who have just returned from Europe, were on board the *Barossa*, and, we believe, some officials appointed by the Government. The captain of the *Semiramis*, French war steamer, Mr. Enslie, and several other officials, also accompanied the envoy. The *Djambi*, Dutch war steamer, it had been expected, would also leave with them, but at the last moment this arrangement was altered. Sir Rutherford Alcock remained at Yokohama.

A change in the Governorship of Yokohama is reported. The newly-appointed holder of that office is Ookaski, who was formerly one of the Secretaries at the Custom-house. It is also said that Matzdaira Yamato-no-Kami and Etakura Suwa no Kami, and many smaller officials, have been degraded from their office for alleged mismanagement in the affair of notifying foreigners as to the resolution of the Government concerning the closing of the port of Yokohama.

Our Yedo intelligence, indeed, indicates anything but the existence of a satisfactory condition of affairs in the native Government. It is averred that there is some more than ordinary split in the Cabinet. The Tycoon is left entirely without the aid of his Council, every member of which is taken with an unusually severe fit of sickness immediately upon the receipt of summons to his duties. The opinion prevails that this malady has no other cause than an intense panic, induced by the conviction that events of great and serious import are now hovering around them, to the emergencies of which they feel incapable. The provinces of Hidatchi, Schimotsuki, Shimosa, and Musashi, are said to be in a most disordered condition in consequence of ravages and disorders committed by the Shaeshing-Cumi, a body of rebels or fanatic patriots, dating its start from the ancient college in Mito. They have established their headquarters upon the hills in the neighbourhood of the great river Bandotaro, from whence they levy black mail of money and men from the neighbouring smaller daimios and other inhabitants, with the professed purpose of organising a formidable force to aid in any measures for the expulsion of foreigners.

The Tycoon, it is said, will leave Yedo again very shortly to return to Miako, where he feels that, in the present state of affairs, he would be in greater safety.

Many and very serious disturbances continue to be reported from the neighbourhood of Yedo. Bodies of Loonins are reported to have ensconsed themselves in the Tonkuba Yama, whence they will doubtless be dislodged by considerable numbers of the Government troops, sent for their dispersion or capture.

General Pruyn, the American Minister, has paid a visit to Yedo—according to the *Japan Herald*, with reference to certain negotiations and business arrangements which have been going forward with the Japanese Government, for the

Digitized by Google

purchase and building in America of vessels of war. The *Commercial News* affirms that his Government has ordered General Pruyn to resume permanent residence at Yedo, and that the Dutch Government has sent similar orders to its Consul-General, M. van Polsbroek. Commander D. McDougall, of the United States war steamer *Wyoming*, has been promoted to the rank of captain, for services at Shimonoseki.

The remainder of the 20th Regiment, which, as stated in our last, arrived from Hong Kong on the 9th of July, landed on the 14th, and marched up to the new barracks on the Bluff. Since the disembarkation, the *Japan Herald* says:—"We regretted to observe so many of these brave fellows with evidences of their long residence in an unhealthy climate, and heartily wished that the fine one in which they will probably be located for some months at least, might reinstate them; up to this, however, we regret to say it has not appeared to have had such effect, for there has been a most lamentable mortality to notice. There has been scarcely a day that once or twice, at least, the mournful muffled drum and fife has not sent its thrilling tones to the hearts of their comrades, as some poor fellow has been borne to his final rest. We have not heard distinctly the cause of this mortality. We expect in most cases it is low fever induced by the causes above mentioned; but we believe it is also in part undoubtedly caused by indiscreet indulgences in vile liquors—and that vilest and most unwholesome of all (to the European stomach) Japanese saki. We rejoice to hear, while compiling this issue, that the reports from the barracks are much more favourable."

An unsatisfactory state of things exists in the silk market, some hitch having arisen as to the importation of the article from Yedo. The *Japan Herald* states on this point:—"All our anxious inquiries with regard to the non-arrival of silk from the country have been met with ominous shakes of the head, and such replies as the following:—'There is a deal of trouble in Yedo with the officers;' or, 'The officers refuse to inspect the silk, and to let it come down to Yokohama.' Now, what all these replies mean is not precisely clear; but they are sufficient to show there must be a preconcerted plan laid down by somebody to prevent or restrict the operations between the native dealers and the foreigners. All the silk coming from the interior of the country to Yokohama has to pass through Yedo, and cannot be conveyed thence to this place without paying a heavy squeeze, and being accompanied with a permit. These regulations leave the native merchants entirely in the power of the Japanese authorities, who can at their pleasure either grant or withdraw their permit." Our contemporary suggests that the British Minister should direct his Consul to call a meeting of merchants in the settlement to gather their opinions and experiences on the repeated annoyances and grievances they are made to suffer.

On the 22nd July the case of Blum Brothers and Co. v. A. Marks and Co., was adjudicated by Mr. G. S. Fisher, the American Consul. This was an action brought by Messrs. Blum Brothers and Co., of Shanghai, merchants, against Messrs. A. Marks, and Co., of Yokohama, auctioneers, to recover the sum of $238, amount of sales of a consignment of goods. The defendants satisfied the Court that they were instructed to sell the consignment of goods by auction at not less than cost price, with the option, if they thought fit, to take them over; that under this power they had taken them over, and had paid the amount of the invoice to Messrs. Dunn and Co. (a firm lately absconded from this place). The American Consul held the defendants to have been justified in regarding Messrs. Dunn and Co. as the agents of Messrs. Blum Brothers and Co., and consequently judgment passed for the defendants with costs.

COMMERCIAL NOTICES.—Shaw Brothers and Co. have established a branch at Yokohama, under the style of Shaw, Cull, and Co., the partners being James Cull, China, and Charles Shaw and Co. Liverpool. W. M. Strachan and T. Thomas have established themselves as merchants and commission agents at Yokohama; and R. Lindau and Co. as general commission merchants. The partnership subsisting between Henry A. Ballard and Thomas Hegg was dissolved on the 1st of July.

NAGASAKI.

The Prince of Nagato (or, as it is sometimes spelt, Nangato) appears determined to have a full score of offences run up against him. His last exploit, as we learn from Nagasaki, has been to fire upon the *Monitor*, an American steamer. That vessel left Hakodadi with only a limited supply of fuel and ammunition, in the belief that she would reach Nagasaki in ten days; but meeting with adverse winds, her supplies were exhausted before she neared the latter port, and she was obliged to seek assistance on the coast. Running inland, the first port she sighted was Fukugawa, where she determined to enter. The officials who boarded her promised to refer the captain's report to their superiors, and left on apparently friendly terms. But during the night fire was opened on her without any warning, from a small battery on the S.E. of the town, and steam was got up with all possible despatch. As she was getting under weigh, a number of men who had assembled on the beach, fired a volley from jingals and muskets; but, fortunately, neither these nor the larger guns of the battery injured her. As soon as she got out of their range, she opened fire from two small Parrott's rifled cannon which she had on board, with good effect, destroying several houses. Proceeding under sail to the island of Susima, she renewed her requests to the officers who boarded her, to be allowed to take coal or firewood, and water, and they promised she should be supplied on the morrow. That day, however, elapsed without any one coming near her; and on the following the captain sent a party ashore, to cut firewood and fill water-casks, who, it appears, were not interfered with. With the supplies thus obtained, the *Monitor* proceeded on her voyage; but meeting with foul winds was again obliged to resort to the same expedient, on another part of the coast; and eventually had to burn spare spars to enable her to reach port.

The Spanish frigate *Narvaez* visited Nagasaki on the 9th July, to coal and procure provisions; but as Spain is not only not a treaty Power, but regarded by the Japanese with feelings of the strongest enmity, she appeared at first likely to find some difficulty in gaining assent to her wishes. Eventually, a direct application to the Governor was successful, and permission was given to her captain to procure whatever he needed, and for himself and officers to go ashore. It will be recollected that the *Narvaez* brought down to Hong Kong the report that General Brown and Sir Rutherford Alcock were both at Nagasaki, and that it was determined instantly to vindicate the right of foreign commerce to navigate the Inland Sea. Possibly "the wish was father to the thought" in the Spanish breast, for, as we now know, there was no foundation for the statement.

The following, from the *Japan Herald*, is a valuable contribution towards enabling us to form a judgment of the character and policy of Nangato:—"We have before related somewhat of the history of the family of Mowori—Matzdaira Daizen no Daiboo, Sin no chioojoo. It is not to our purpose now to refer to it further than to remind our readers that the ancestors of the present Prince were once the Princes of no less than eleven of the finest provinces of Japan, viz., Nangato, Sono, Aki Bingo, Harima, Bitjou, Inaba, Hoki, Idzoomo, Iwami, and Bizen, and were despoiled of them all, save the two first named, by the first Shigoon of the present dynasty. Reduced thus to so inferior a position amongst the peers of the realm, the pride of his haughty family has continually fretted and festered, ready to break out into open fury at any moment when the course of events should point to some hope of revenge for the past, and the regaining to the house its ancient possessions. In the furtherance of these aims he succeeded in inducing one of the Prime Ministers of the Mikado to conspire with him; and it was by this friend that the forged order to the Tycoon, professing to issue from the Mikado, for the expulsion of foreigners, was issued; the intended purpose of this cabal being to lead the Tycoon into conflict with foreigners, which the wily Prince of Nangato saw would induce a condition of things from which his views could be more easily worked; or that, even if this scheme failed of the result, through the disobedience of the Tycoon to the mandate of the Emperor, then that he might be denounced by Nangato as in rebellion against the Emperor. The whole plot, however, happened, by some lucky chance, to be discovered by the Tycoon when at Miako. The treachery of Nangato became fully seen through; and Nangato's position became of the most critical character with respect to his own Government. He then, as reported by us some time since, left his former city of Hangi in the province of Choshiu, and retired to his stronghold, Yama-Goutchi, in the province of Suwo, whither he was accompanied by his fellow-conspirator. We have every reason to believe this to be correct. If it indeed be so, it is no matter of surprise if the Tycoon's party, though disinclined to bear the burden themselves, should be willing

Digitized by Google

spectators, rather than else, of the probable coming chastisement of the haughty Prince of Nangato, who doubtless showed but little tact or judgment in attempting to make his own acts of aggression upon foreigners a part of his plot against the Tycoon."

HAKODADI.

Several vessels have lately visited this port on the chance of sale to the Japanese; the ready sale and high price obtained for the brig *Meteor* having served as a bait to owners. They have been disappointed, however, and the vessels have been obliged to leave, taking low freights for China. The Governor of Hakodadi has made a ceremonious exodus from the town to the new fort near the village of Kamida, about two and a half miles distant. He is to take up his residence there, and there is consequently to be some change in the distribution of the troops stationed in and about Hakodadi. Everything is perfectly tranquil, and the small amount of trade of which the place is capable, is going on as usual, and would get on much better were it not for Japanese official interference. The Governor, who is himself rather a favourite amongst foreigners, appears to be led by his officials—who not having his responsibility, are said to advise him to the pursuit of the most illiberal policy; so that, although civil and apparently friendly, they would seem at the Northern port, as elsewhere, entirely oblivious of the fact that treaties convey some rights and privileges. The whole of the trade of the port is conducted by a system of contracts; very few if any of these can be made without submission by the Japanese dealer to a considerable squeeze for "registering." A few silk contracts with neighbouring Princes are reported to have been agreed upon; owing to this interference, one, if not more of them, was totally broken, and others only partly fulfilled. The like interference prevails in respect to the sale of steamers, and produced the disappointment referred to above. We hear that a Prince of the Province of Tsoogaroo (Etsjiu no Kami, we expect), had sent his officers to Hakodadi with $158,000 for the purchase of steamers; but the Governor, under the pretext that they had no right to go on a trial trip in a foreign vessel without his consent, which he would not give, spoilt the bargain with respect to the *London*.

CHINA.

PEKING.

Our dates are to the 25th July, at which date the foreign Ministers were rusticating in the hills in the neighbourhood of Peking. The weather had been excessively hot, and no rain having fallen, there were well-founded apprehensions lest the crops should utterly fail. One of the eight iron-helmet princes and several high officials had three times visited a sacred pool, known as the pool of the Black Dragon, at a spot about seventeen miles to the west of Peking. Here and at other famous shrines kotowing, gong beating, cracker firing, and every other manifestation of Chinese religious feeling were kept up for several days. At length rain did fall, and revived the hopes of the agriculturists.

Rumours of a threatened attack on the foreign Legations had been circulated, but created little alarm. Reports of a more extraordinary character have, however, gained credence amongst the lower orders in the capital. Some ingenious individual started a rumour to the effect that the foreigners are in the habit of kidnapping little boys and girls, and utilising them in various ways, amongst others by picking their eyes out for photographic purposes. The Chinese authorities took the matter up *con amore*, and succeeded in arresting several of the people who were found spreading the rumour. This and the public execution of five men who were proved to be really kidnappers, set the matter at rest. Lyne's murder still remains enveloped in mystery. Vaccination (not inoculation) establishments have been opened by the Chinese authorities in Peking and at Tientsin. The foreign doctors at each place have been supplied with lymph from the native hospitals.

SHANGHAI.

The French mail, of 17th June, arrived out on the 2nd August. The dates are down to the 4th.

The shipping reporter to the *Recorder* gives the following narrative of piratical attacks on foreign vessels:—

From accounts which reach us from time to time, it would appear that the Formosa Channel, and more especially the neighbourhood of the Pescadores, is at present the hotbed of a very formidable and desperate fleet of piratical junks, so much so that within four days from the 25th to the 28th July we have to record an attack made by these marine banditti on two distinct vessels, one on the 25th July, the other two days subsequently; the particulars of one vessel only have come to hand, which we publish below:—

The *Baron Kellner*, an Austrian barque of 381 tons register, anchored at Woosung on the 1st Aug., from Hong Kong, deeply laden with coals. She experienced heavy weather after leaving—a strong easterly gale with heavy sea on the 15th July, 150 miles S.E. of Hong Kong, and a typhoon on the 21st, in lat. 21.43, long. 116.26, commencing from the N.E. and veering to S.S.E., with a heavy cross sea, moderating after 24 hours; and experienced fine weather up to the 25th; and when about 25 miles to the S.W. of the Pescadores, with a three knot breeze from southward, observed six piratical junks making towards the ship, forming two divisions, each junk pulling about 50 oars, and sailing and overhauling the barque fast, in consequence of her being deeply laden with coals.

One of the junks out of the three foremost ones stood to the windward of the ship, while the other two shortened sail to enable her to do so. Only about a dozen men could be seen on board—the others had evidently stowed themselves away ready for a rush—as their object was to come alongside and board; while performing that manœuvre, they hailed and said in English that they wished to come alongside, still bearing down on the vessel, while the other two made sail and tried to perform the same feat on the other side; they were hailed in English to keep away, but not heeding the caution, and as the distance had been shortened to only 100 yards, a shot was fired well ahead, so as to check them if possible, but nothing daunted, on they came;—the same dose was given to the two other junks on the starboard side. Their intention was now evident; they intended to board on both sides simultaneously, and make short work of her. The smell of the powder did not check them; on they came, and hot work was expected, as the distance had been shortened to only about thirty yards. This was certainly more close than pleasant, when one of the 12-pounders belched forth her iron messenger, striking the junk between wind and water. This electrifying shock turned the tide of affairs in favour of the barque, and in an instant, as if by magic, the decks of all three junks were crowded with men; it was evident that the junk was sinking, as she bore down on the other two, who also altered their course.

The *Yokohama*, a three-masted schooner, hove in sight about this time, from Swatow bound to the Gulf of Pechile, and fears were entertained that the second division of the junks would attack before the schooner came near enough to signalise, and a musketry fire was kept up for some time. The sight of a second antagonist appeared to terrify them, so that they took the sinking junk in tow and shaped their course for land. The *Yokohama* remained in company all night with guns loaded and shotted, and nothing having occurred, each vessel steered their course in the morning. The Danish brig *Elora Maria* was spoken two days after, from Copenhagen, bound to the Amoor, and was informed by her that the *Yokohama* had an engagement with a fleet of junks the day previous, but succeeded in beating them off.

The *Commercial Recorder* says:—"Little has occurred in the settlement itself to call for much remark. The typhoon is forgotten, and everyone is engaged in watching the tea and silk markets with eager eye. The latter market is somewhat at a standstill, owing to the high prices demanded by sellers. There have been no trials of any consequence of late, but next week an important insurance case regarding opium comes off, which promises to be of unusual interest, and likely to last several days.

"Cholera, we regret to say, still hovers in our midst. Mr. Whistler, tea inspector in the firm of Jardine, Matheson, and Co., was seized with the complaint on the 30th July, and after a short illness expired. It seems to be a malady which comes and goes here, and great as the care is which is bestowed on the settlement, it is not easy to refute the remark that the increasing Chinese population within the limits of the settlement may be one of the many causes that add to the unhealthiness of the summer months.

"The Custom-house returns have been published for the year ending December, 1863; and despite Mr. Cobden's 'accurate' speech regarding trade in China, it is not easy to notice any falling off. Foo-chow-Foo has sent home 47,811,871 lbs.

Digitized by Google

of tea, including black and green, while Shanghai heads the list with 53,596,923 lbs. during the past year."

Bernard, or Barney Morriss, the American colleague of the Englishmen cast for capturing the *Tsatlee*, was brought to trial at the American Consulate, and to his plea of "Guilty" was sentenced to the punishment of ten years' imprisonment in either China or the United States. As one year's imprisonment was deemed sufficient for the Englishmen, ten times one seems heavy—very heavy. If he remains here long, however he will escape—so its no odds!

CAPTURE OF NANKING.

The following account is from the *North China Herald*:—

The ancient southern capital has at length reverted to the Imperialists. The campaign in Keangsoo having been brought to a satisfactory conclusion, supplies were completely cut off from Nanking, and it accordingly became a mere question of time how long the beleaguered garrison could hold out. On the 17th ult. news was received that the rebel Emperor, the Tien Wang, or Heavenly Prince, had committed suicide by swallowing gold-leaf. The besiegers pushed on their work still more rapidly than before, and on the 19th an enormous mine which had been run up to the Taiping men (north-east gate) was exploded, and a portion of the wall, about one hundred and twenty feet in length, completely destroyed. The wall at this place is some sixty feet high and forty feet thick, and it is said that sixty-eight thousand pounds of gunpowder were used in the explosion. The spot chosen was the same which had been selected by the rebels for their attack when Nanking fell into their hands. The Imperialists state that they lost five thousand killed and wounded in the breach, but for this assertion there is not the slightest foundation, as on the day following the assault there remained no trace of a struggle. Having passed the wall, a rush was made for the Tien Wang's Palace, which was at a distance of about four miles from the breach.

The palace was surrounded by a wall, about twenty-five or thirty feet in height, not loopholed. The only difficulty experienced by the attacking party was, therefore, at the gate, and here they state their loss was immense. This assertion is in like manner utterly false. The gate must have been forced with little or no difficulty, or quietly given up, and the very citadel of Taipingdom was in the hands of the enemy. Many of the Tien Wang's wives were found hanging on trees in various parts of the grounds, and his body was likewise found. It had been thrown into a small compound or garden in the rear of the Imperial apartments in the palace, and still remains there. The work of destruction then commenced. The city itself was found to be a mere desert, very thinly inhabited. Parties went out to plunder in different directions, but returned without having obtained any articles of value. Hardly any rice was found, but the streets were in many places almost choked by the bodies of men who had evidently died from starvation. The Palace was gorgeously fitted up, and although it was burned on the day after the capture of the city, there still remains sufficient proof of its magnificence. The Imperial seals, three in number, were found, and are now in Tseng Kuo-fan's possession. One of them is of solid gold, and weighs about thirty pounds.

Meanwhile the Chung Wang (the Faithful Prince), who had escaped with the Tien Wang's son, was captured by some villagers a few miles from the city, and brought in triumph to Nanking. It is said that when the Chung Wang saw that at least a portion of his party must be captured, he insisted on Tien Wang's son taking the pony which he was riding—a pony which has attained a name for great strength and swiftness—and escaping. The young Prince did so, and Chung Wang was taken prisoner. He is now kept rigorously guarded, but is not unkindly treated, in a cell within the building occupied by Tseng Kuo-fan. He has been shaved, and is not ironed. He converses freely with everyone, and conceals nothing with regard to the state of Nanking. He places the population at a very low figure, and reduces the strength of the garrison to about eighteen or twenty thousand men. He is at present engaged in writing a history of his life. Meanwhile, he awaits his sentence from Peking. What that sentence will be there can be no question. Indeed, it were madness to allow one so renowned as the Chung Wang to escape. His name would be the signal for revolt, and myriads in all parts of the country would flock around him if he raised his standard.

The capture of Nanking was disgraced by none of the sanguinary scenes which were anticipated. No doubt isolated looting parties were guilty of outrage and murder in various parts of the city, but there was no systematic slaughter by the Imperialist troops as such. Tseng Kwo-fan is about to return to An-king for a short time, pending the completion of the necessary arrangements at Nanking; but in a few weeks he will return and make Nanking the centre of his government. The Kiang-ning-foo, or chief magistrate of the city, has already taken up his residence at his Yamen, and it is expected that within a short time the civil power will be fully established and in working order.

The object so long desired and expected during the campaign against the rebels having at length been attained in the capture of Nanking, it is but fair to inquire what advantages are likely to accrue to foreigners from a result to which they have contributed so materially. The dismay which struck the Chinese Government, when on March 19th, 1853, the ancient southern capital of the empire fell into the hands of the insurgents, seems gradually to have passed away, and the loss of the city to have been recognised as a fact, melancholy it is true, but, irremediable. Years passed by, while Hsiang Yung and Chang-Kuo-liang, Ho-chun, and finally, Tseng-kuo fan, sat down before the walls without effecting any influence on the growing importance of the rebellion. Yet from the month of April 1853 the Imperialist forces invested Nanking, and were continually reported as achieving important successes. We may, however, safely assert that but for foreign interference not only would Nanking be still in the possession of the insurgents, but that the entire extent of territory embraced within the provinces of Keang se, Keang-su and An-huei would also have fallen into their hands. Under these circumstances the claims of foreigners to derive some advantage from the capture of the city should not be passed over. As a matter of course, Nanking will be opened to England, France, and America, under the sixth Article of the French Treaty of 1858, and the "favoured nation" clauses in the other treaties. But we doubt that Nanking will ever prove valuable as a place of trade, or desirable as a residence for Europeans. The prospects of trade are not encouraging, and even were Nanking the natural outlet for any description of native produce, the length of time which must elapse before merchants and traders will again settle in their former haunts, and divert business into its ancient channels, would render the opening of that port a doubtful advantage to foreigners. The prospects of trade being thus dull and discouraging, the question of salubrity of climate claims attention. As to this there is but one opinion. Situated in the centre of a marsh, and deficient in all the appliances used by more civilised nations to obviate the disastrous effects of miasmatic exhalations, Nanking may fitly be described as a hotbed of disease and death. The English forces sent up in 1842 to enforce, if necessary, the conclusion of Sir Henry Pottinger's treaty, suffered very severely, and "did not recover from the maladies which then attacked them until their return to Hong Kong." A writer in the *Annales de la Propagation de la Foi*, Tome xvi, page 293, quoted by Williams in *The Middle Kingdom*, draws the following dismal picture of the situation of foreigners at Nanking:—

"This vast plain being only a marsh half drained, the moisture is excessive, giving rise to many strange diseases, all of them serious and not unfrequently mortal. The climate affects the natives from other provinces and Europeans. I have not known one of the latter who was not sick for six months or a year after his arrival. Every one who comes here must prepare himself for a tertian or quotidian. For myself, after suffering for two months from a malignant fever, I had ten attacks of a malady the Chinese here call the Sand, from the skin being covered with little blackish pimples resembling grains of dust. It is prompt and violent in its progress, and corrupts the blood so rapidly, that in a few minutes it stagnates and coagulates in the veins. The best remedy the people have is to cicatrize the least fleshy parts of the body with a copper cash. The first attack I experienced rendered all my limbs insensible in two minutes, and I expected to die before I could receive extreme unction. After recovering a little, great lassitude succeeded."

With regard to this extraordinary disease it is probable that what the writer calls *Sha ping*, "the sand disease," has been confounded with *Sha ping*, a common name for cholera. We may thus expect to find an old foe with a new face in the shape of a malignant form of cholera, a prospect which does not add to the pleasures of anticipation when directed towards Nanking. It will, therefore, be a matter for consideration whether the interests of both natives and foreigners would not be advanced by the selection of some more suitable port, to take the place of Nanking, A commission has been sent up the river to report upon the state of the city, and on its return we shall probably be in a better position to judge of the advantages to be derived from forming settlements there. At present, however, from the facts we have elicited, it would seem that the opening of the southern capital to foreign trade will not prove a boon of any considerable importance.

HANKOW.

A correspondent's letter from this place reports:—Cotton is being grown very abundantly in the plains both above and below this, and the crop will be larger than for years, if rain will come in about ten days. Hemp, enough and to spare, is of fine quality this season. It is a pity this hemp, or properly speaking grass, cannot be more largely adopted in France and England; it would be such fine freightage for ships. I remember it was a "hope" when first I came soon after the opening of the port; since then in France it has been found very suitable for certain manufactures, which are, however, somewhat carefully hidden.

Freights to Shanghai have been as low as 1½ taels offered, although it is maintained only 2 taels have been taken. It is feared the S.S.N. Company must find it unprofitable, and that unless the vessels are more economically worked, and the en-

Digitized by Google

gineers given less latitude with the beverages of the company as also with the coals, the company will find itself coming under that clause of its "deed of settlement" which provides for 10 per cent losses. The river is evidently overdone with steamers worked as now. Nanking is taken; this may do much for the river traffic, and cause many drafts to be despatched. Exchange has ruled in favour of steamers, treasure going up and down without being landed; at rate of 2½ to 3 per cent. discount, certainly shows cheap money here.

The defence rampart is progressing, and the battlements are giving it an imposing appearance. The United States Consul-General has been here investigating the proceedings of the United States Consul, with whom the Chinese authorities, it is reported, refuse to have further communication.

The English Consular gaol is finished; it is unfortunate as much cannot be said for the levelling of the Bund.

I should not omit to mention the efforts being made to discover either gold or coal some fifty miles up the river from this. Under direction from two influential merchants here, it is reported a gentleman is engaged boring, and that already he has obtained a depth of 80 to 100 feet. It is to be hoped the result may be made public. Much better coals are to be obtained in Hankow now than formerly, and it may be assumed that they will come into more general use for steamers.

NINGPO.

We have been requested to insert the decision given in the American Consular Court at Ningpo by Mr. Vice-Consul Edw. C. Lord, in a case brought by certain Chinese bankers against Robert Rayner, Esq., a partner in the firm of J. Bohstedt and Co., the plaint having been laid against him as he is the only partner in that firm whose nationality was represented by a Consul at Ningpo. The plaintiffs claimed about $47,000 borrowed from them by Yng-Cha-fah, lately defendant's compradore, under pretext that he had borrowed such money for account of his employers. An attempt was made to support this statement by a number of witnesses, but the case broke down, it being quite evident, from the testimony given, that Messrs. Bohstedt and Co. never instructed or authorised the compradore to borrow money, and that they had no knowledge whatever of his dealings with the banks. Judgment was therefore given as follows:—"Inasmuch as the testimony in the case fails to show that the position and authority of defendant's compradore differed in any respect from those of compradores generally, it follows that no action can be sustained against him for the debts in question, except on the principle that foreign houses generally are responsible for all debts contracted by their compradores. And as the Court does not regard this principle established either by law or equity, it decides that the plaintiffs have failed to sustain their claim against the defendant, and are therefore liable for the costs of the suit."

A correspondent of the *Friend of China* writes in reference to the French forces:—

Recent information from Hankow informs us that the Imperial soldiers and French Contingent frequently forget that they are allies; the former freely showering missiles from the walls down upon the latter, who, in return, open fire with a coolness that is seldom displayed even against a recognised enemy. It is very evident that the French have a footing in this province which the united efforts of Chinese diplomacy and foreign intrigue will not cause them to surrender. What with French dockyards, French missionaries, and a French Contingent, who receive their instructions from the French Government, though paid by the Chinese, these are certainly not good omens for the reflective mandarins to think over, but something that will teach them that, if they choose to employ foreigners to do the work which they themselves have not the courage and ability to perform, they must be prepared to make any sacrifices which their employes in the field may demand. I fancy the French are acting on the principle that—

"He who fights, conquers, and toils,
Is surely entitled to share in the spoils."

AMOY.

The following items from this port are from a correspondent, under date 26th July, to whom we beg to tender our thanks:—

The British ship *Tuiping*, Capt. M'Kinnon, from Shanghai to London, with a cargo of tea, was towed into this harbour on the morning of the 23rd inst., by H.M. gunboat *Flamer*, Lieut. Gooch, with the loss of all her spars (except main and mizen masts), figure head, iron bowsprit, part of bulwarks, boats, &c., &c., having encountered a severe typhoon when in lat 20.8 N. and 125.54 E.; on the 11th July it blew frightfully hard, and had the foremast not fallen when it did she would have foundered. Those on board say they never expected to see any more of this world! She is going into dock and will have to discharge a small portion of her cargo, of which I believe there is not a package damaged. Her repairs will probably take a month to complete, when she will again sail for her previous destination, and it is to be hoped make a quick and prosperous voyage, as she is a magnificent vessel. The *Fychow* and *Highflyer* left Shanghai the day after the *Taeping*, bound to London, and it is expected they met with the same blow.

The Hamburg brig *Hever* is reported to have gone down at her anchors in Kelung harbour (Formosa), all hands lost with the exception of the captain and two men.

There are forty-nine ships in harbour to day. The British brig *Willie* sailed for London on the 23rd inst., with 212,100 lbs. Congou tea. The American ship *Samuel Russell* is loading here for New York on owner's account.

HONG KONG.

The English mail, of 26th June, arrived out on the 5th August. Dates are down to the 12th.

The following account is from the *China Mail*:—

The gunboat *Grasshopper* has made some progress in the suppression of piracy in this neighbourhood by destroying a number of junks at anchor and suspected to be piratical. Of course, we shall not know the evidence upon which the lieutenant in charge of the vessel acted until the next parliamentary blue-book is issued. In the meantime, we give an account of the affair which has been furnished to a local contemporary:—

On Thursday morning last (August 7), about ten o'clock, H.M.'s gunboat *Grasshopper*, under the command of Lieutenant Walker, left this harbour under sail, getting up steam as she went, to endeavour to capture four pirate junks which were reported to have attacked and taken possession of a large trading junk on the 26th ult. A Chinaman who was a passenger in the trading junk when she was captured by the pirates, and had managed to effect his escape, went in the gunboat to give information of the whereabouts of the pirates, and to identify them if seen. The *Grasshopper* proceeded to a place called Pak-sui, near Kewlan, where she arrived on Friday morning, and had great difficulty in getting near the village, owing to the shallowness of the water. At this place a large number of junks were seen, some of which the Chinaman recognised as being those which had captured the trader, and amongst them was the junk which they had taken, with the cannon with which the pirates opened fire on the gunboat immediately she put in an appearance. Boats were manned, and the crew of the gunboat boarded the junk, whereupon the pirates fled, leaving most of their prisoners confined under hatches. Several of the latter, when set free, being alarmed, attempted also to take to flight, and mingling with the pirates some were killed by the shots fired at the fugitives, of whom about thirty in all fell killed and wounded. The decks of the trader in which the passengers and crew had been confined below, was found to be strewed with powder, the pirates evidently imagining that the gunboat would fire shell into her and thus blow her up. One of the crew of the trader was picked up mortally wounded and two found dead. One of the pirates was taken prisoner and is sworn to as having been with the others during the attack on the trading boat on the 26th ultimo.

The *Grasshopper* having taken possession of the captured trading junk then proceeded to Macao, where she remained till midnight on Saturday, when, leaving the prize in charge of the British Consul, she proceeded again to Paksui, where on Sunday she captured and destroyed twenty-six or twenty-eight piratical junks and boats, all of which were heavily armed and were fitted in every respect as pirates. All the guns, arms, and ammunition found in these boats were likewise destroyed, and attention was directed to the village itself, which was also found to contain a large quantity of arms and ammunition, besides being stocked with sugar, hides, and rice in immense quantities. It is estimated that the property in the village was worth not less than $200,000. No captures were made on shore, the pirates, of whom there were at least six hundred, having fled to the hills. A large quantity of empty bags were found ready to transfer cargo to, in order to effect sales without fear of detection. On the approach of the gunboat two or three of the pirate junks managed to get away; with these exceptions, the whole fleet, as well as the village, were totally destroyed by the *Grasshopper*.

It was ascertained from the liberated captives that the pirates had received information of the intended visit of the gunboat and that they were in hopes to have been able to get away before her arrival, but finding they were unable to do so they had calculated on the gunboat blowing up the prize. The chief of this desperate gang is named Yow-wing sing, and is said to have been a noted pickpocket in Hong Kong. Some of his vessels are reported to have been at Hainan about a fortnight since, and doubtless are the same which attacked the junk as reported to-day in another column. These are also stated to be connected with the *Parana* massacre and to have had a hand in the *Louisa* piracy. The *Grasshopper* returned to Hong Kong yesterday morning, the recaptured junk being still at Macao in charge of the Consul. None of the gunboat's officers or crew have received the slightest wound.

The suppression of piracy privilege is, in our view, one so liable to abuse, that the strictest vigilance should be observed in examining the proofs submitted, as to the piratical character

Digitized by Google

of the junks destroyed by H.M.'s gunboats. Without casting any reflection upon the procedure of Lieutenant Walker, who was in command of the *Grasshopper*, we may be allowed to suggest to the Home Government that all such cases, involving as they do a serious destruction and loss of property, should be carefully reviewed, in order that Her Majesty's gunboats do not get into loose habits with regard to their chartered liberties of destruction in Chinese waters.

The *China Mail* takes up the cudgels against a writer in the *Standard* on the rebellion who signs "Taiping." The same journal also announces a change in the governorship.

"We have heard that Sir Hercules Robinson is likely to go to Ceylon as Governor, and that Mr. Mercer will succeed him in Hong Kong. Sir Hercules worked very hard the first two years he was here, turning his attention earnestly to business. Partly through his own ability, and partly through good luck, he was able to place the Colonial revenues on a good footing and the annual balance-sheet, when sent home, was doubtless the means of drawing favourable attention to his administration. Both our contemporary and ourselves cordially acknowledged the 'smartness'—as our cousins would call it—of his gubernatorial operations during 1859-60; but no man is infallible, and Sir Hercules missed one good chance in delaying the sale of land at Kowloong, which we hear is turning out very miserably. Indeed, the sale of this land has been utterly blighted by the mistaken action of the Government in not offering it on fair and liberal terms. Should our information prove correct, we can only congratulate Governor Robinson on his promotion, which he deserves on account of the aptitude he has shown for getting up new subjects and addressing himself to fresh duties.

"Were the matter one of private feeling, Mr. Mercer might command the suffrages of the whole community, but the case must be viewed on public grounds. For a few years—the fewer the better—we might be content to see Mr. Mercer at the head of affairs, so that he might be able to retire to England with *eclat* after a long and creditable service here; but, beyond question, we want new blood in the local administration—a new man, in fact, who will work hard in originating and carrying out plans for the good of the colony, not merely a man who can move through the traditional and perfunctory duties of the office with grace and courtesy."

The following records the progress of the new bank:—

"With reference to the progress of the new banking company at present in course of formation, we learn that matters have become so far advanced that a committee drafted from the provisional committee are engaged in receiving applications for the three principal appointments in the establishment, viz., a manager, a secretary, and an accountant. For the first of those offices we hear that a gentleman well known and respected as a bank manager in this colony is likely to be proposed; and if the duration of his services in his present situation should not interfere with his acceptance of the high terms likely to be offered him, the probability is that he will receive the appointment at once.

"With regard to the accountantship, we cannot see that any one unacquainted with such duties in a bank can possibly be chosen for such an important post; and as for the secretaryship, we have heard that a gentleman not wholly unconnected with the army is likely to be first favourite for this post, although it is well enough known that many others have a strong predilection for the office, some of them, doubtless, well qualified, others hoping to come in first in the race owing to what they consider to be incontestible influence in their favour. We can only hope that in this, the first of our independent local banks, the best man will get the first place."

The cargo from the *Coulnakyle*, from London, has been very much damaged, and it is reported that as much as one-third of it has been condemned to the auctioneer's hammer. We hear that Mr. W. H. Fittock, Vice-Consul at Canton, has been removed to Ningpo as Acting Consul. We are glad to find that, by the *London Gazette* of yesterday, he is announced as full Consul. Our readers may remember that some three years since we pointed out the injustice of appointing some juniors as Consuls while Mr. Fittock was left out.

The British barque *Eva*, sold by auction, was knocked down to Captain Farr for $12,600.

The British schooner *Salamander* arrived in Amoy with the crews of the Hamburg brig *Hever* and the Dutch brig *Johanna Fredericka*, both vessels having been totally lost at Keelung on the night of the 12th July. The mate and five of the crew of the *Hever* were washed overboard and drowned.

SIAM.

We have much pleasure in acknowledging the first copy of the *Siam Times*, and we trust it will continue to reach us regularly. We have hitherto found great difficulty in procuring the current items of news from Siam.

From the *Siam Times* we gather that the lorcha which was supposed, and with good reason, to have gone on a piratical excursion was called *Ale Margupi*, and that the master's name was James Hopkins; Thomas W. Webb being sailing-master, and the crew consisting of ten Chinese. Hopkins seems to have met with the fate he intended for others. Our contemporary gives the facts of the case as follows:—

Previous to the lorcha sailing from Bangkok, the master had contracted several large debts here, and suspicion being aroused, that the lorcha was out on a piratical expedition, the creditors became anxious regarding their money; warrants were accordingly issued for his apprehension, and Capt. Bush was entrusted with their execution, besides, having authority to arrest him on the criminal charge, if he found sufficient existing grounds to justify his doing so. That Hopkins was prepared to fight may be gathered from the fact of his having taken two guns from Paknam, belonging to the schooner *Water Lily*, the property of Captain Bush, and concerning their disposition, he thus wrote under date 18th April, 1864:—"The two guns I took from Paknam I have in my possession, on board my vessel, lorcha *Ale Margupi*, where I intend to keep them, and they shall remain, as I brought them on board myself for use, and not to look at, but to do execution, if requisite. They are, I can assure you, in good working order, both being fixed on pivots abaft my mainmast, &c;" and in another paragraph he "defies John Bush to take his vessel." These preparations for fighting and defiances clearly prove his intentions on leaving Bangkok were far from honourable, and this opinion is further upheld by the statement of one Siaboo, who took a letter from the Acting Consul (British) to the Governor of Mung Kraat, concerning Hopkins' debt to Siaboo, with instructions to apprehend him; this the Governor could not do without an order from H. E., the Prac klang, Minister of Foreign Affairs; Hopkins was sent for, and the tenor of the letter being explained, he pulled out his revolver, pointed it at the Governor, who was frightened, and concluded his menaces by declaring he did not care for the Consul. On his return to the lorcha, Siaboo saw Hopkins break a Chinaman's arm, and strike Webb, his sailing-master, on the face. It must be evident the language and acts we have mentioned do not seem to infer that Hopkins was at all inclined to be either an honest man regarding his past transactions or future proceedings, and though a cruel death has prevented the ends of justice being met, it would be charitable to wish he had been less severely dealt with.

JAVA AND NETHERLANDS INDIA.

Dates from Batavia are to the 14th August.

The British schooner *Japonica*, Capt. Lindsay, which left Macassar on the 30th July last, bound to Macao, with a cargo of tripang, green peas, rattans, hides and ebony, valued at 140,000f., on the morning of the 31st, struck on a reef to the east of Pulo Dewaken. The vessel speedily became leaky, and it was feared would be a total wreck. A gunboat was despatched from Macassar to protect the property.

BANCA.—On the 13th June a barque struck on the reef south of Lepar straits and stretching in a south-easterly direction from Tandjong Roe towards that island in the vicinity of the wreck of the Belgian brig *Charles Henri Stow* lost there last year. The barque was the *Isle o' May* of London, 392 tons, Gray, master. Nothing was found in her but stone ballast, a few water-casks, and some provisions consisting of a few barrels of flour, bread and beef. No ship's papers nor instruments were found. The crew seems to have left the ship in some haste and to have gone on board of one of the three ships sailing in the neighbourhood and which were seen on the morning of the 14th by some Lepar men. The barque seems to be strongly built, for after five days knocking about in the surf, no leak was found in her when the administrator of Toboali went on board, so that it is hoped, that with some little pains, she may still be saved.

MALACCA STRAITS.

SINGAPORE.

Dates thence are to the 20th August. The London mail of the 11th July arrived out on the 11th August; and the mail of the 16th July on the 20th August.

Mr. Whampoa has been appointed Vice-Consul for Russia at Singapore, and Mr. Ferdinand von der Heyde Vice-Consul for the Free and Hanse towns, Lubeck, Bremen, and Hamburg. Mr. C. B. Plunket has been appointed Deputy-Coroner of Prince of Wales' Island.

A case of disobedience of the lawful commands of the master of the British barque *Joadel Manaan*, against the chief mate of the said vessel, was investigated by the Marine Magistrate on the 16th August. After a lengthened investigation which occupied the Court over seven hours, his Worship sentenced the defendant to three weeks' imprisonment in Her Majesty's Gaol.

Digitized by Google

A coffee and reading room has been opened at Fort Canning, under the sanction of Brigadier de Sausmarez, for the men belonging to Nos. 4 and 6 batteries, 17th Brigade, Royal Artillery. The Brigadier stated on the opening night—"About four years ago, while he was in command of a garrison with five times the number of men, a great deal of petty crime was daily committed, where he and three other officers, in considering what steps should be taken to employ the leisure hours of the men, became convinced that a reading-room would best suit the purpose. The place he alluded to was Hong Kong. A reading room was opened there, and both they and the men themselves came to see the salutary effects of such an institution—crimes were rarely committed, and there were fewer courts martial."

Thomas Smith, the flag-staff keeper at Mount Faber, was so severely assaulted and wounded by Emerico de Souza on the night of the 13th July that he subsequently expired. The delinquent had been sentenced to a fine of 400 rs., which was paid.

The Administration Report for the past official year has appeared, whence it appears that the revenue from purely local sources, and excluding such receipts as those from the Post-office, and others which properly belong to other settlements, is £191,909. This exceeds by very nearly £20,000 the receipts of any previous year, and is brought about by the Stamp Tax, and an improvement in the returns of the excise farms. Under ordinary circumstances, there would have been a surplus of £25,000, but the military expenditure, which in previous years has averaged about £50,000, last year rose to £81,000, and as the whole, under present arrangements, is charged against the settlement, the result is a deficit of £5,000. "How the cost of the military has so far increased in this past year (remarks the *Straits Times*) it is impossible for any one except those connected with the Madras Government, from whom our troops are derived, to make out. It almost seems as if the Indian Government now, when they are about to lose us, have resolved to take the most they possibly can out of our improved resources."

The following are the returns of the Imports and Exports of Singapore during the year 1863-64 :—

PENANG.

On the 8th August, as the barque *Marengo* was moving out of the harbour, with the intention of proceeding to sea, she came into collision with the *Nonpareil*, which had been lying astern of her. The *Nonpareil's* anchors having started, both vessels drifted with the tide upon the Swedish barque *Fredrik*. The *Marengo*, having her sails set and anchors off the ground, was enabled to get clear very quickly, but the *Nonpareil* and the *Fredrik* were entangled by their chains and could not easily extricate themselves. Some damage was done to the *Fredrik* by the collision, in consequence of which the captain of the *Fredrik* brought an action against the *Marengo* for damages done to his ship. The case was tried before the Recorder, who decided that the *Marengo* was primarily the cause of the *Nonpareil's* coming into collision with the *Fredrik*, and found her liable in damages to the *Fredrik*, to the extent of $107, with $50 of costs.

On the 7th August a fire broke out in Victoria Estate, which destroyed the building containing the rum distillery, though most of the rum casks were saved. The distilling apparatus was nevertheless seriously injured. The exertions of the manager, ably seconded by the police, saved the entire works from being consumed.

THE mishap to the Persian Gulf submarine cable, between Cape Monze and Guadur, has been followed by the parting of the wire between the latter place and Mussendom ; and the land line is reported not to be in good order. The *Amberwitch* was on the spot, but in consequence of the roughness of the weather she had been unable to execute the repairs.

THERE has been another sanguinary affray among the Chinese coolies at Bombay. It took place at Elephanta, when in the most barbarous manner they murdered one of their own people, and set the few Europeans who were on the island at defiance. Subsequently a detachment of the Tanna police, under Major Henderson, arrived on the scene, and in the most gallant manner seized upon the persons of the ringleaders and conveyed them to Tanna.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

AITKEN—On the 15th July, at Hankow, the wife of James Aitken, of a son.

CASTRO—On the 9th Aug., at Hong Kong, the wife of J. M. D'Almada e Castro, of a son.

DICKINSON—On the 12th Sept., at Farleigh House, Surbiton, the wife of Geo. F. Dickinson, Esq., of a daughter.

HAY—On the 22nd Sept., at 56, Bedford-gardens, Kensington, the wife of Eugene Hay Esq., of a daughter.

HENDRICKSON—On the 10th Aug., at No. 8 Police-station, at Hong Kong, the wife of Inspector Hendrickson, of a son.

LEGGE—On the 7th Aug., at Hong Kong, the wife of the Rev. Dr. Legge, of a daughter.

LOBSCHEID On the 6th Aug., at Hong Kong, the wife of the Rev. W. Lobscheid, of a daughter.

WILSON—On the 17th July, at Hankow, the wife of Frank H. Wilson, of a daughter.

MARRIAGES.

ANDERSON—POLLARD—At St. John's Cathedral, Hong Kong, on 2nd August, by the Rev. J. J. Irwin, D.D., Colonial Chaplain, John Graham Anderson, to Rosa Mary Pollard, of Sydney, New South Wales.

DALY—POLLEY.—On the 13th Sept., at the parish church, Clapham-common, Robt. Daly, Esq., late of Shanghai, China, to Georgina Elizabeth, eldest daughter of William Polley, of High-street, Wandsworth.

FISHER—SIMPSON.—On the 13th August, at Singapore, by the Rev. J. C. Waterhouse chaplain, Mr. John Fisher, of Singapore, to Amelia Ferrell, relict of the late Capt. Simpson.

At PENANG.—For London: Spitfire and Golconda.

At BATAVIA.—For Channel: Peeress, Sirius, and Celeritas. For Rotterdam: Voornit, Albert the Good, and Mary Goddard. For Amsterdam: G. P. Servatius, Reflect, Hochelagd, Sinnevelly, and Lovestein. For United States: Borneo and Vellore.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—July 27, Spirit of the Deep, London to Shanghai; 30, Canadian, London to Shanghai; 31, Crown and Arita, Cardiff to Hong Kong; Aug. 6, J. Vinicombe, Sunderland to Hong Kong; 3, Lord Macaulay, Cardiff to Hong Kong; 4, Henry Darling, London to Singapore; Anna Helen, Cardiff to Shanghai; 5, Bosworth, Shields to Shanghai; 6, Langdale; 7, Galabo, Cardiff to Hong Kong; and, 8, Esperance, Sunderland to Shanghai.

From UNITED STATES to CHINA, &c.—Aug. 1, Alfred, New York to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—Aug. 6, Peerless Shanghai to Liverpool; 7, Gazelle, Singapore to Prussia.

From CHINA, &c., to UNITED STATES.—Aug. 5, Agnes, Singapore, to Boston.

FREIGHTS AND CHARTERS.

JAPAN.—For London and Liverpool: £4. 10s. to £5. Hong Kong: $5 to $6. Shanghai, by sailing vessel, $3. Little offering.

SHANGHAI.—To London the rates for tea are £3. 10s. to £4. To Liverpool: Cotton, £3 to £3. 10s.

HONG KONG.—The following from George Holmes' Circular will show the principal settlements:—Isabella, 1,100, Shanghai to London or Liverpool, £2. 15s. per ton. Harkaway, 611, Foochow to London, $3. Cassiterides, 370, Foochow to New York, £3 per ton of 40ft., if to London, £3. 12s. 6d. per ton of 50ft. The rates to Bankok and back are 40c. per picul, with 15c. to 20c. extra, if ordered north.

MANILA.—There are no settlements to report. The nominal rates to the U.K. may be called £3 for clayed, £3. 15s. for unclayed sugar, and £4. 5s. for hemp.

SINGAPORE.—Freights generally show an improvement. To London and Liverpool the following are the rates:—Tin, £2; sugar, £2. 15s.; measurement goods, £3. 15s. per ton of 50 cubic feet.

BATAVIA.—The rates remain good, notwithstanding numerous arrivals seeking. To Holland: For sugar the rates are £4. 11s. to £4. 16s. per ton.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—The two chops of country Congous mentioned in last report as having arrived, have been placed at high rates. A few chops additional are shortly expected. Tayshaans are rather lower; Scented Orange Pekoes are quiet, and but a small business has been done in Capers. Common Canton Gunpowders are cheaper, but the better kinds are firm at quotations. The following are the transactions of the fortnight:—Congou: 2 chops, blackish wiry leaf, little pekoe flavour, at taels 31½ to 33. 1,000 half-chests and 500 boxes Tayshan, at 22½ taels for fair, up to 36 taels for finest imitation Kysow. Scented Orange Pekoe: 2,000 boxes, middling to very fine, at 25 to 35 taels. Scented Capers: 30,000 boxes, common to very fine, at 18 to 35 taels. Canton Gunpowder: 3,000 boxes and 500 half-chests, at 14 to 21 taels for common to fair. Stocks are moderate, but being in various stages of preparation, cannot be stated with precision.

SHANGHAI.—Black: We can again report a considerable business during the past fortnight, at prices which show in advance of fully two taels on our previous quotations. The bulk of the settlements have been composed of second crop Oopacks, at from 1d. to 2d. over last home rates. Our stock is considerable, but as holders are not generally anxious sellers, we do not look for any decline in price. We make the quality of second crop Oopacks superior to last season's, but the Oonhams, Ningchows, and Hohows are inferior. Settlements on the market, 22 chops, 10,989 chests Oopacks, Oonhams, Ningchows, Hohows, and F. Pekoe. Re-shipped on owners' account, 38 chops, 18,288 chests, do. do., total 60 chops—29,287 chests; making total to date 149,826 chests. Stock, waiting shipment and for re-sale, 55 chops. We quote 1st and 2nd crop Oopacks, 28 to 31½ taels; Ningchows, 28 to 34½ taels; Oonhams, 20 to 28 taels; Hohows: No settlement. Green: Very little has been done during the past fortnight, the unfavourable news from New York checking buyers for that market. About 15 chops of Pingsuey have arrived from Ningpo, but they have generally been re shipped without being offered. Only one chop has been settled at taels 43, and a few parcels of Shanghai-packed at taels 35 to 37. Re-shipments and settlements—866 half-chests Fychow, &c.; 12,277 half chests Pinsuey; 626 half-chests Japan and Shanghai packed; total, 13769 half chests—making total to date, 24,368 half-chests. Stock of Green Tea is estimated at 2,489 half-chests Fychow, &c.; 1,778 half chests Shanghai packed Japan; 7,746 half-chests Pingsuey; total, 12013 half-chests.

FOO CHOW.—The Circular of Messrs Fussell and Co. states:—We have again to report a very large business having been transacted in our tea market. In our last printed report we noted that the second crop Congous had commenced arriving in quantity, and that owing to the heavy rains in the country the quality was inferior; we have now to advise that on the departure of the mail a very large business was done in these kinds at high prices; during the past few days there have been but few buyers in the market, and as the latest arrivals of Congou from the country prove to be much better in quality, purchases have been effected at rates, quality considered, showing a reduction of fully 2 taels per picul. There has been an active demand for fair common to fair flavoury sorts for shipment to Australia and America, and these kinds may be quoted slightly dearer. Souchongs have been taken to a fair extent for England on rather easier terms.

SILK.—SHANGHAI.—Since last report the market has been in an excited state, buyers influenced by the late improved advices from Europe, have shown great eagerness to purchase. The prices in the interior, however, have advanced considerably, and the value of Carolus dollars having also improved, the dealers have in many instances withdrawn their stocks from the market, being unable to replace sales made at present rates. The difficulty experienced in purchasing has alone prevented large settlements, but 1,500 bales have been sold during the fortnight. Prices have advanced taels 30 to 35 per picul, Chop No. 3 Tsatlees having been sold at taels 400, but at present the dealers are very unwilling sellers and are demanding still higher rates. The arrival of the French mail of 17th June with telegrams to the 25th, conveying unsatisfactory political news, has so far had little effect on this market. By last advices from Japan, there appears to be barely any stock and quotations were nominal. About 87 bales have arrived during the fortnight.

CANTON.—The advices lately received from the country respecting the third crop are discouraging, and it is generally stated as being smaller than the 2nd; consequently our prices are firmly maintained, and no decline can now be looked for until it is ascertained whether the 4th crop is likely to prove more abundant. The rather favourable accounts from the Home Markets have not encouraged speculative purchases for London, and beyond a few mixed parcels belonging to Indian firms, there is nothing to report as gone forward this season. Quotations for fine Silk are nominally a little higher, but the coarser kinds are rather easier. viz:—Loong-Kong, No. 1. $440 to 445; do. No. 2, $425 to 430. Kow-Kong $405 to 410.—re-reeled Cumchuck (nett) $480 to 485. Waste Silk, No. 1, $53 to 54; No. 2, $44 to 45. The settlements have been 80 piculs for Bombay and 100 boxes re-reeled Cumchuck for New York.

DRUGS, &c.—CANTON.—Cassia Lignea: No settlements, stock 2,000 piculs, held at former rates. Cassia Buds: 20 piculs have been sent to Macao for sale there, reducing the stock to 60 piculs. China Galls: The old stock of 200 piculs is now offered at $12.25, showing a further decline of 25 cents. Vermilion: As before, $42.50 per box of 50 catties. Rhubarb: The stock on the market alluded to in last report, viz., 100 pls. low mid., is still unsold, $85 to $90 being the rate demanded. Musk: A fresh supply of 50 catties has arrived—fine middling good flavour, 34 catties were at once taken for Chinese consumption, and the remaining 26 catties for export at $86; 50 catties good middling superior flavour sold at $87, and 55 catties good ordinary weak flavour sold at the same rate; 35 catties of the old stock have also been taken for native use, leaving an unsold stock of 40 catties fine middling on the market, the same being held firmly at $95. Galangal: $2.90 to 3.20 nominal, no buyers. Essential Oils: None on the market.

CHINA IMPORTS.

COTTON YARN.—During the early part of the fortnight the value of all descriptions of yarn was maintained at the rates previously current, and quotations for lower and medium numbers continue unchanged. Nos. 38 to 42 have however declined slightly during the last few days. Settlements are put at 146 bales. Grey Shirtings: Have met with a moderate amount of inquiry in this market during the fortnight, but quotations are maintained with difficulty, and in some instances a decline of 5 to 10 cents per piece is noticeable. The sales are estimated at 10,250 pieces. White Shirtings have met with a fair demand at about the prices previously current, and 5,250 pieces have found buyers during the past fortnight. T-Cloths: A decline in price to the extent of 5 to 10 cents must be quoted for these fabrics, which meet with but little attention at the hands of the Chinese dealers. The transactions of the fortnight are limited to sales of about 4,300 pieces. American drills: A small parcel of 40-yard drills amounting to 750 pieces has been placed at $9.50 per piece. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: The inquiry which, during the month of July, existed for these fabrics has apparently been satisfied, and the sole transaction to be noticed is a sale of 1,000 pieces coloured brocades, which actually took place prior to the departure of the last mail steamer, but was not then reported.

Digitized by Google

Damasks remain without inquiry or sales to notice. Chintzs: 200 pieces reported as sold during the past fortnight. Handkerchiefs: There are not any sales of these goods to notice.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies'& Habit Cloths: A fair demand, which has been freely met, has been exhibited for these goods since the commencement of the present month, and prices remain much as before quoted, the sales of the fortnight comprise 3,638 pieces of all descriptions. Long Ells: A moderate amount of business has likewise been transacted in these goods since the date of last circular, and the total sales reported since the departure of last mail steamer amount to 750 pieces. Camlets: Without alteration to notice in value, have found buyers to the extent of 660 pieces. Lastings: Have also been in fair demand during the past fortnight at about the quotations previously current, and sales of 820 pieces of these goods are reported. Blankets: 250 pairs have found buyers.

METALS.—Iron, Flat, &c.: The market in this colony for all descriptions of metals has been without any animation, and the sales to be reported of iron are exceedingly limited, comprising only 450 piculs of nail rod and 250 piculs of wire at previous rates. Lead: Only 60 piculs have been sold during the fortnight. Tin: The sales amount to 110 slabs. Tin Plates: Remain as quoted under date of 28th ultimo, with sales for the fortnight amounting to 450 boxes. Steel: Without sales to notice.

EXCHANGES ON LONDON.

[For dates see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 10d. to 6s. 11d.	6s. 11d. to 7s. 0d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...

COMMERCIAL POSTSCRIPT.

The Malta and Alexandria cable is again in working order. The screw steamer *Sea King* has been sold into another trade.

The Circular of Sam Mendel, Manchester, of yesterday says:—During the past week prices have further given way both for yarns and goods. The sales to-day are on an increased, but by no means active scale, the market is weak, and the feeling of depression is scarcely less than previously reported. Grey shirtings, 7 lbs., 14s. 9d. to 15s. Cotton Yarn, Nos. 16 to 24, 2s. 5d. to 2s. 7d.

Mr. J. C. Stilar, late of China, has established as a tea broker. The following is from his Circular of 24th:—"The news brought by the mail of continued heavy shipments, coupled with the stringent state of the money market, had the effect of throwing a gloom over the trade; large public sales were advertised for the 20th, which have terminated, passing off heavily and at very irregular prices, a fall being established in some instances of 1d. to 2d. per lb. upon common and medium kinds, and 2d. to 3d. upon medium to fine. 31,113 packages passed the hammer, of which 24,735 sold, 23,758 being 'without reserve.'"

ARRIVALS NOT INCLUDED IN THE TABLE.—Sept. 21, at Texel, from Batavia, Josephine Bernhardina; 23, at Liverpool, from Shanghai, Elisabeth Nicholson; 27, at Liverpool, from Rangoon, Fearnought.

DEPARTURES.—Sept. 21, from Bremen, for Shanghai, Andreas; 22, from off Portland, for Batavia, Argo; 22, from Liverpool, for Shanghai, Lauderdale; 28, From London, for Cardiff and China, Pioneer, for Newcastle and Batavia, Glenforth; 23, from off the Eddystone, for Singapore, Marie Lucie; 24, from Cardiff, for Hong Kong, Desdemona; from off the Lizard, for Batavia, Eva Johanna; 23, from Sunderland, for Singapore, Ocean Pearl.

SPOKEN.—Echo, Canton to London, June 3, 17 N., 124 E.; Bentinck, Liverpool to Singapore, Aug 31, 16 N., 27 W.; Prince Arthur, Liverpool to Hong Kong, Aug. 28, 16 N., 27 W.; Robin Hood, from Foo-Chow-Foo, August 8, 35 S., 21 E.; Young Lochinvar, from Foo-Chow-Foo, August 19, 26 S., 3 E.; Almora, from Nagasaki, off the Cape of Good Hope; Suez, of Nantes, Penang to Belle Isle, July 25, lat. 30, lon. 31; W. W. Smith, Japan to Liverpool, June 17, 4 N., 134 E.; Tartar, Singapore to London, July 30, 32 S., 34 E.; Albuera (which had spoken the Moka, ship, from Manila), Manila to London, August 9, 35 S., 22 E.; Wilhelmina, Batavia to Amsterdam, July 6, 21 S., 67 E.; Anna Sophia, Batavia to Amsterdam, August 13, 33 S., 15 E; Alaveza, Manila to London, August 3, 36 S., 22 E.; Kykduin, Amsterdam to Batavia, August 21, 13 N., 24 W.; Dolphin, Cardiff to Shanghai, August 14, 16 S, 31 W.; Athelstane, Singapore to London, August 2, 35 S., 25 E.; Akbar, Penang to London, September 8, 33 N., 37 W.; Canaan, Manila to Falmouth, August 7, 17 S., 4 W.: Jubilaum, New York to Shanghai, July 23, lat. 28, lon. 34, Boni, Shields to Batavia, August 24, 12 N., 27 W.

At ST. HELENA.—Aug. 5, Ferris, Messenger, from Singapore, and sailed for Liverpool; 6, Benvoirlich, Jenkins, from Shanghai, and sailed for London; Caroline Chisholm, from Singapore, and sailed, 8, for Liverpool; 7, Lady Ebrington, from Yokohama, and sailed, 8, for London. The Dutch transport Fop Smit, 63 days from Batavia, with 140 soldiers for Rotterdam, touched at St. Helena on the 8th of August. The English ship Netherby, Captain Hulman, 110 days from Foo-chow-foo for London, on the 10th; in the Formosa Channel she had been attacked by 150 Chinese pirates in about 100 sampans; they robbed the ship of a portion of her cargo of tea, and were only repulsed by the use of firearms, when several were killed. The Glencoe, [illegible] days from Hong Kong for Liverpool, on the 17th; the Bahia, 117 days from Whampoa for London, on the 18th; the ship Glenlee, 92 days from Hong Kong for Liverpool, on the 20.h; the ship Unrivalled, 100 days from Shanghai for Liverpool, on the 25th; the schooner Auld Reekie, 133 days from Yokohama for Falmouth, on th 26th; the bark Harwood, 112 days from Yokohama for Liverpool, on the 25th; the Flying Spur, on the 23rd.

At TABLE BAY.—July 9, Lord Palmerston, from New York, and sailed, 12. for Shanghai.

At ASCENSION.—Aug. 30, Clio, from Batavia, and sailed for Amsterdam. Off Ascension, Aug. 7, Dunkeld, from Singapore; 13, Gazehound, from Manila, for Falmouth; 14. Brothers Saeluna (?), from Batavia, for Rotterdam; 25, Spahis, from Penang, for Bordeaux; 28, Young Lochinvar, from Foo-chow-Foo, for London; Anna Sophia, from Batavia, for Amsterdam; 30, Antoinette, from Manila, for Havre.

At ST. HELENA.—Aug. 4, Pantaloon, v. Geyt, from Batavia, and sailed 5 for Rotterdam; 5, Marie, Biesthorst, from Batavia, and sailed 6 for Rotterdam; 6, Maria Magdalene, Willenbrink, from Tjilatjap, and sailed 7 for Rotterdam; 20, Jacqueline and Elise, Krukkenberg, from Batavia, and sailed 21 for Amsterdam; 24, Jonkhr, Mr. v. d. Wall v. Puttersholk Lammerts, from Batavia, and sailed 26 for Rotterdam; 25, D. T. Visser, v. d. Linden, from Batavia, and sailed 26 for Amsterdam; 26, Billiton, from Batavia, and sailed 27 for Amsterdam; 28, Wilhelmina, Koster, from Batavia.

At ALGOA BAY.—July 19, J. G. Fichte, sailed for Singapore; 31, Anita, Williams, from Shanghai, and sailed, Aug. 2, for New York; Aug. 13, Oscar I., Lansen, sailed for Anjer; Aug. 5, The Wildeman, Drisst, sailed for Java.

At SIMON'S BAY.—Aug. 15, Glengyle (str.), O'Sullivan, from the Clyde, for Hong Kong; 17, H.M.'s Ringdove, from Hong Kong; 9, H.M.'s str. Vulcan, from Shanghai; Aug. 5, Antonia Ferry, Lucas, sailed for Hong Kong.

CASUALTIES.—The Bahia, Le Fanu from Canton, for London, which put into St. Helena, 18th August, was making water; she shipped extra hands, and proceeded. Further surveys have been held on the Kiandra, Van Kuffeler, from Pasaroeang to Amsterdam, which put into St. Helena, 18th July, leaky, and she has been found in such a decayed state that the surveyors have declared her irreparable at that port.

The Palmerston (barq.), Maillard, from Cardiff to Shanghai, which put into Simon's Bay, 27th July, had sprung a leak on the voyage, making nine inches of water per hour; she had been surveyed and lightened by the discharging of a portion of her cargo of coals, and it was supposed that she would shortly proceed on her voyage.

H.M.S. Ringdove, from Hong Kong, which arrived at Simon's Bay on 7th August, was reported to have been obliged to throw her guns overboard during a gale; she left on 18th August for London.

FOREIGN OFFICE.

SEPT. 3.

The Queen has been graciously pleased to appoint Charles A. Sinclair, Esq., now Her Majesty's Consul at Chinkiang, to be Her Majesty's Consul at Foo-chow-foo; Frederick Harvey, Esq., now Her Majesty's Consul at Ningpo, to be Her Majesty's Consul at Chinkiang; and William Henry Fittock, Esq., now a British Vice-Consul at Canton, to be Her Majesty's Consul at Ningpo.

SEPT. 26

The Queen has been pleased to approve Said Abdullah ben Omer el Djenid as Consul at Singapore for his Imperial Majesty the Sultan; and M. Eustratio Petrococchino as Consul at Malta for his Majesty the King of the Hellenes.

TREASURY WARRANT.

The Commissioners of the Treasury, by warrant dated the 24th of September inst., have fixed the rates of postage to be levied subsequently to the said date on packets consisting of patterns or samples of merchandise of no intrinsic value, posted in any part of the United Kingdom, addressed to any part of the East Indies, Ceylon, or Hong Kong, or posted in any part of the East Indies, Ceylon, or Hong Kong, addressed to any part of the United Kingdom, and transmitted by British packet-boat, direct or *via* Egypt, and on similar packets transmitted in closed mails *via* France (the sea conveyance being by British or French packet-boat).

CAPTURE OF NANKING.

(THE TIMES.)

"Nanking has been captured by the Imperialists." Such was the brief and simple message which gave us first to know that the head of the Ming dragon, rival to the orthodox dragon Manchoo, has at length been cut off. We have full details of the event in the advices which we publish to-day. The important fact, however, is that the Taipings have lost their capital. It was only the possession of Nanking which lent them the semblance of a public cause. Without it they had been as any other horde of robbers. But there was something impressive to a Chinese mind, and even to some European minds, in the acts of a Government which could date its edicts from Nanking. Fourteen hundred years ago, when Peking was unbuilt, and its site was a desert, Nanking was a province of palaces, where men swarmed like ants upon the earth, and pagodas, which were wonders of the world, rose unto the skies. For a thousand years, and amid the contentions of successive dynasties, all falling and rising in violence, this immense city was for the most part in name, but always in reality, the metropolis of the empire. It had been the capital of the Ming dynasty, and however vain might have been the pretence, yet the chiefs of a great army who called themselves Kings, who proclaimed to the world that their object was to overthrow a foreign race of Princes and to re-establish a purely Chinese rule, and who had been for ten years in possession of this ancient capital, had some specious claim of right to distinguish them from robbers upon the inland waters and pirates on the seas. Now this shred of respectability is gone. Nanking has been restored to the Imperial rule. The Taipings seem to have been utterly dispersed. The bulk of them will probably shave their heads and tie on false tails of silk and hair, and either seek a subsistence in the Imperial ranks, or spread themselves westward, where they will meet with no foreign officers and well-drilled Imperialist soldiers. In an over-peopled country and under a corrupt Government the elements of disorder will always be rife, and the adven-

Digitized by Google

turers who still hold together will not want for recruits wherever they may go. There always will be, as there always have been, armed hordes of plunderers and robbers; but, as a political fact, the Taiping rebellion may be said to be extinct.

As to the manner in which this result has been brought about the best account yet received will be found in a very interesting report which we publish elsewhere. The capture has been evidently the effect of the moral influence of General Brown's direct and indirect assistance. Our General seems to have taken up the Imperial cause with great zeal, and to have continued his aid after all hope had passed away that Europeans would be permitted to direct the consequences or mitigate the effects of Imperial successes. When Captain Sherard Osborn appeared in the Chinese waters with his flotilla the dread produced was so great that the Taiping chiefs at once prepared to make their submission. When this fleet disappeared they seem to have taken heart again. But Colonel Gordon's continued successes soon deprived them of all hope, and spread a belief among their followers that their case was desperate. Even in this last storm Colonel Gordon, at General Brown's instance, presided in the councils of the Imperialists, although he did not formally command; and, as he pushed his reconnaisance to within fifty yards of the Taiping defences, he must have advanced far within the walls of the ancient city, and even within the more contracted lines of defence of the modern town. All recent accounts have told us that the condition of the insurgents has been for some years wretched even beyond the ordinary measure of Chinese miseries; and it is creditable to the courage of these bandits that, with gunboats shelling them from the river, and a numerous disciplined army assaulting upon a plan made by an English officer, they should have defended their walls so stoutly, and should have suffered themselves to be surrounded at last in the fortified palace of that mysterious personage whom they pretended to obey as their Emperor. The very existence of this "Heavenly King" has sometimes been doubted, but as it is positively affirmed that he poisoned himself to avoid falling into the hands of those who would have had little respect for his divinity, and that his body has been found, this disputed point is now satisfactorily cleared up. Chung Wang, the resolute and able Taiping general, who is already known to Europe, not only by his defence of Soochow but also by acts of moderation, and even more than moderation, towards his European and American mercenaries, was supposed at Hong Kong to have eluded or to have cut his way through the besieging army with 2,000 of his followers. This, however, proves to have been a mistake, for he is undoubtedly a prisoner in the hands of the Imperialists. This Chung Wang is the only man whom the Taiping movement has produced on the rebel side who gave any proof of military talent, or any sign of having learnt the prudence of moderation in the conduct of war. We hope that whatever "Peking" may decide his life will be saved.

What the cost of human life has been on this occasion we cannot yet calculate. It is plain that no mercy was extended, and, although the treacherous deeds at Soochow must have acted as a warning to the European officers, the account of the European eye-witnesses makes it evident that the carnage was very great. It is a coincidence that just 900 years ago an Emperor of China, Tai Tsou, the first of the Song dynasty, had besieged and reduced to famine this same city, which, according to the Chinese historians, contained at that period four millions of people. The Emperor, we are told by Du Halde, foreseeing the carnage which must infallibly follow upon the capture, feigned to be sick. His generals and officers of State were alarmed, and surrounding the bed of the Prince suggested, each according to his own notions, the remedy best to be adopted. "The remedy," said the Emperor, "depends only upon you. Swear to me that you will not shed a drop of Chinese blood when you enter Nanking, and I shall be cured." The chiefs of the army took the oath, and kept it so far that "very few" of the inhabitants were killed. The Emperor sent a hundred thousand measures of rice to the famished wretches. This is said to have happened in the year 964, and it is disappointing to find that the precedent of ancient date, although doubtless well remembered, was lost upon the Chinese leaders of to-day. They had not, indeed, the full opportunities for carnage which the merciful conqueror of early times possessed and dreaded. The four millions of which the Chinese traditions boast have long since dwindled down to some 200,000 souls; the ancient walls, of which it was said that if two horsemen passed out at the same gate, and rode all day round them in opposite directions, it would be night before they would meet, have for centuries been only mounds and ruins; the city just captured had shrunk up into a corner of that great marshy plain which was once covered with yamuns and palaces, and Courts of Justice and offices of State, as well as with the habitations of the satin weavers and the warehouses of commerce. Even the great porcelain tower itself, which was the toil of a generation of builders and artists, had decayed to a ruin, and had fallen under the barbarous hands of the Taipings. The contrast between what we hear of Nanking as it is when torn from the Taipings, and what we read of it in its days of grandeur is a striking lesson of the desolation which civil war and bad government may bring upon the cities of an industrious people, and even upon a land teeming with the elements of wealth and plenty. Still, Nanking as it stood in our day was to the Taipings a capital, and its loss is the loss of the last symbol of a political cause under which they might attempt to disguise mere robbery and murder.

Here all aid of ours to the Imperialist rule ought surely to end. It may be doubtful whether we have not already done too much. The Government of Peking are our very good friends, but it does happen that the manifestation of their friendship is sometimes in an inverse proportion to their strength and prosperity. It would be a pity to accumulate upon them too great a burden of gratitude. When the Taipings threatened the actual destruction of all government in China, and seemed about to spread anarchy over the provinces with which we trade, it was our right and our duty towards ourselves to throw our influence, and so far as was necessary to our own interests even our power, into the scale against them. We pertinaciously advocated that policy then, and under similar circumstances we should do so again. It is still our interest to protect our trading establishments against them or any other assailants. Beyond this, however, let us have no more meddling. We can see a most unpleasant point at which an increasing strength in the Imperial Government may act as a necessary cause to increased strength in the British fleet in China.

Continental Intelligence

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Sept. 24.

After an adjournment of nearly five months, the Parliamentary Session was closed on Saturday last by a speech from our Premier, Mr. Thorbecke, in which he praised all that had been done and would be done by his Cabinet. The new session was opened by the King, with the following speech:—

"Gentlemen,—It is with extreme gratitude to Divine Providence that, in opening the present legislative session, I am able to announce to you that the condition of the country may be considered as generally satisfactory.

"Our relations with foreign Powers continue upon the most favourable footing.

"The land and naval forces in the mother-country and our colonial possessions continue to afford me reason for satisfaction.

"Although the condition of our Eastern Indies is in many respects satisfactory, I deeply regret that a violent epidemic has committed ravages in Java, and it is my most ardent desire to hear soon that this malady has ceased to afflict that colony.

"The results of the emancipation of the slaves in our East Indian colonies are not unfavourable if compared with those which an analogous measure has entailed elsewhere.

"The administrative regulations of the Government of the colonies of Surinam and Curacao will be again submitted to you for deliberation.

"I shall have recourse to your assistance in the establishment of the tariffs of import and export duties and of transit dues to be introduced in the Dutch East Indies, and to regulate various questions affecting industrial and agricultural enterprise in that colony.

"Great developments are taking place in public works. The corps of the Engineers of Roads and Bridges fulfils with laudable zeal duties which have recently acquired great extension. A revision of this important branch of the administration, conformable to the exigencies of the day, has been prepared.

"The construction of the State railways is being regularly continued. The returns from these portions open to traffic exceed previous calculations. Conventions for the connection of our railways with foreign lines have been concluded with the neighbouring States. New concessions will give the Dutch network of railways an extension which will require fresh labours upon the roads and at maritime ports.

"I observe with much satisfaction that the execution of the law for middle-class education is everywhere received with lively interest and frank co-operation.

"The results of the harvest have been better than could be hoped. The returns from the deep sea, river, and coast fisheries, have been good, but many lives have unfortunately fallen victims to storms.

"Our trade continues in active development.

"Although the state of war in which several countries are engaged may have exercised an unfavourable influence upon commerce, it is satisfactory to observe that shipbuilding is upon the increase among us.

"Bills regulating medical supervision, the communal guards, and military quarters, will again be laid before you.

"The Bill for the code of examination in criminal cases, which is intended to replace the code now in operation, will also be submitted to you for deliberation.

"The state of our finances will allow of provision being made for the requirements of the public service, and of continuing the redemption of the national debt.

"Bills for the complete suppression of the city tolls (octrois), and for other undertakings of a financial character, will be laid before you during the present session, as well as Bills regulating the method of keeping the accounts of the State finances.

"May the important labours to which the present session summons us tend, under God's blessing, to the great prosperity of the country.

"I declare the ordinary session of the States-General open."

The First and Second Chambers have both been occupied with the examination of the credentials of new members, that being done, the debate on the address in answer to the speech was commenced. The King again appointed Mr. J. A. Philipse President of the First Chamber, and Mr. G. C. J. van Reenen to that of Vice in the Second Chamber; the first according to the proposition of the Cabinet; the latter, on the proposal of the majority of the members of the Second Chamber.

The first sitting of the International Association for the Promotion of Social Science will be held on the 26th inst., at Amsterdam. A large number of French and Belgian Liberals will be present, including Garnier Pages, Eugene Pelletan, Jules Simon, Henri Martin, Louis Uibach, Lavertujon, Albert Leroy, &c. The first question to be discussed in the section of Comparative Legislation is:—"What are the most practical means for ensuring the liberty of the electors and the security of votes under representative Governments?" Some very important speeches may be anticipated upon this subject.

In my last letter I mentioned the University festival at Groningen. On that occasion several gentlemen received diplomas as Doctors, *honoris causa*. Amongst them was Mr. John Lothrop Motley, the eminent writer of the "History of the Dutch Republic."

The N.T.C. has chartered to convey coals from England to Cheribon, Willem Carel and Christina Maria; to Tagal, Cornelia Hendrika, to Pekalongan, Francina Wilhelmina; to Samarang, Otto.

His Majesty has appointed Rear-Admiral G. Fabius commander of H.M. squadron in the East Indies, in place of Rear-Admiral J. May. He will depart by the overland mail of the 19th of next month.

The revenues of the State during the eight months ending August last, amounted to f.41,709,257.24½ against f.39,751,694.05 in the same period of 1863.

A very important collection of pictures, painted by the eminent Ary Scheffer, has been proffered by his daughter, Madam C. Marjolin, to the town of Dordrecht (his birth place), and duly accepted.

His Excellency W. J. C. Knight Huyssen van Kattendyke, Minister of Marine, has received from the Emperor of Austria the insignia of the Order of the Iron Crown, first class.

Some days ago the following gentlemen were nominated members of the Royal Institute for promoting knowledge in reference to the people of India, their language, and country:—J. W. C. Diepenheim, Director of the Cultures; A. W. Kinder de Camerecq, Resident at Java; J. H. Tobias, Resident at Madura; N. Fraknanen, P. C. van Oosterzee; T. P. de Bordes, Engineer of the East India Railways at Batavia; J. H. G. Vosmaer, Adm. of the tin mines at Banca; A. Ligtvoet, and J. C. H. M. Denie, East Indian functionaries.

COMMERCIAL.

COFFEE.—The market is in a favourable state. The 122,827 b. offered by the N.T.C. in public sale, were sold at ¼ to ½c. under the August prices. An advance of 1c. is now demanded. Owing to the failure in the crop in the East Indies, which will produce no more than 600,000 piculs, the N.T.C. will offer only 200,000 b. in Oct. and Nov.; while in Dec. and Jan. no auction will be held. The 397 brls. and 170 b. Plantation Ceylon, offered by the Society of Commerce and Industry, were sold from 46½ to 51c.

SUGAR.—Prices somewhat lower, with very small transactions, waiting for the great public auction on the 23rd. Only 500 kr. were sold.

TEA.—The market remains firm.

RICE.—Dull.

COTTON.—Very dull. Only 200 b. E. India sold at lower prices.

SPICES.—Nutmegs are at auction prices; cloves, at 1 cent advance; Java cinnamon at an advance of 5 to 10c. Pepper: 1,390 b. ex Friesland were sold at prices that did not transpire.

INDIGO.—Without transactions, but firm.

MANZANILLA WOOD.—In good demand at 5¾f.

BANCA TIN.—500 b. were sold at 60¼f., 500 b. at 60½f., 500 b. at 60f. Market dull.

COCOA OIL, COCHIN.—25½f. No stock.

MANILA HEMP.—67f.

JAVA TOBACCO.—There are no transactions to report. Stock, 7,112 b.

MANILA SEGARS.—At auction, to day, 375,000 2nd Cortados 1863 were sold at 35f. to 36½f. cons.; of the 180,000 2nd Habanos 1863, 60,000 were sold at 34¾f., and the rest retired at 35f. cons.

MONEY easier. Bank discount 5½ to 6 per cent.; open market, 5½ per cent.; N.W.S. 60 15-16ths, 3 per cent., 7 27-8ths, 4 per cent. 96 7-16ths, Handelmaatschappy, 137½.

LOADING.

AT AMSTERDAM.—For Kanagawa and Decima: Maria, Libra, Waalstroom. For Padang: Maria Agnes. For Batavia: Drie Gezusters, Zeenimph, Java Packet. For Batavia and Samarang: Friesland. For Batavia and Sourabaya: Henrietta Maria, Holland. For Samarang: Peking. For Sourabaya: Celebes, Sourabaya Packet.

AT ROTTERDAM.—See "Freights."

READY TO SAIL.

AT BROUWERSHAVEN.—Nova Zembla, for Batavia; Eersteling and Medea, for Batavia and Sourabaya; Stad Dockum, for Sourabaya; Lammechiena Elizabeth, for Padang; Maria Louisa Antoinetta, for Singapore; Singapore, for Singapore and Hong Kong; Sophia, Koningin der Nederlanden, to Melbourne.

AT TEXEL.—Nederland, Vrede, Herman de Ruyter, Regina Maris, for Batavia; Engel, for Japan; Padang Packet, for Padang.

FREIGHTS.

Quotations of Messrs. Fauchey de Vletter, Shipbrokers, Rotterdam:—

FOR BATAVIA.—Ouderkerk a/d Amstel (725 tons), Jacob (593 tons), and Maria Anna (553 tons), are engaged.

FOR BATAVIA AND SOURABAYA.—Neptunus (687 tons), 15f. to 20f. for B; 20f. to 25f. for S; Dordrecht (754 tons), 18f. to 20f. for B; 25f. to 30f. for S.

FOR BATAVIA AND SAMARANG.—Dorothea Henriette (419 tons), 18f. to 20f. for B; 25f. to 30f. for S.

FOR SOURABAYA.—Nieuwe Waterweg (1,360 tons), 20f. to 25f.

FOR SAMARANG.—Vesta (437 tons), 20f. to 25f.

FOR PADANG.—Maarten van Rossem (723 tons), 30f. to 35f., and 40f. to 45f.; all with 15 per cent. per last of 2,000 kills., or 120 cubic feet Amst.

FOR KANAGAWA.—Niphon (360 tons), 60f. per last of 80 cubic feet English, and 15 per cent.

FOR SINGAPORE AND HONG KONG.—Jan van Galen (— tons), 30s. to 40s. for S; 40s. to 50s. for H; per ton of 1,000 kils., or 40 cubic feet English, and 15 per cent.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

SEPT. 20.

Important despatches have been received at St. Petersburg from Siberia with regard to the movement that commenced some months ago among the Mahomedan inhabitants of Western China, called the Dunganes, and which has now assumed the dimensions of an insurrection. According to the latest accounts from Senupalatinsk, these fanatics are greatly extending their influence, and making every day proselytes and supporters, especially in Kashgar. The Governor of the Province of Ilú, in West China, appears not to have a sufficient military force at his disposal to enable him to crush the insurrection, though there are people who accuse him of supineness, and others who even go so far as to assert that he is secretly in league with the rebels, and does all in his power to favour their exertions without publicly compromising himself. Reports were current that innumerable hordes of the ferocious Dunganes had already taken possession of the cities of Yarkand and Aksa, and were beleaguering Kashgar. Certain it is that all communication with the above-named Province of Ilú was cut off, and the roads leading to the other provinces blocked up. Some Chinese reinforcements that had been sent against the Dunganes from Turpan and Kuldsha were defeated and fled ingloriously. One of the principal leaders of the Dunganes—name not given, but only mentioned as a Hadji—was endeavouring at Kashgar to centralise the movement and organise an armed force.

The Russian *Mining Journal* gives an interesting description of a large bed of auriferous sand lately discovered at the eastern end of the mountainous district near Nertschinsk on the Amoor. It is situated at the confluence of the Tcherny Urjum with the Bjely Urjum, which, combined, are called the Tchernaya. The sand is described as exceedingly rich, but the quantity of grains extracted is variable and their size uneven. This bed of auriferous sand is forty-four fathoms wide and about six in depth. According to an estimate made by the director of the Siberian mines, the quantity of pure gold that it is calculated to contain is equal to 800 poods or 32,000 lbs. It is now being worked on account of the Russian Government. The quantity of gold obtained in 1863 by private individuals in the beds of the rivers in East Siberia was 3,988 lbs.

Cotton from Bokhara has been selling this year at the great fair of Nijnynovgorod at from 22 to 28 roubles per pood. Last year the same production fetched only 14½ roubles.

COMMERCIAL.

COFFEE.—In the general state of this market there is but little alteration. There is an abundant demand for all descriptions, and the deliveries continue large. Fresh supplies come very sparingly to hand, in consequence of which importers hold back and demand an advance of ½ Sch. Bco., which, in some instances, has been conceded. Stocks of coffee here are so much reduced that the assortment has become very imperfect. Sales of the week, 10,000 bags.

SUGAR.—A further decline of 8 Sch. Bco. per 100lb. has to be recorded, but it caused buyers to come forward very freely, and some heavy transactions were entered into. Refined goods, on the contrary, are firm at last week's currency, at which 10,000 loaves were disposed of.

RICE.—There has been a considerable demand for cleaned East India descriptions, both for shipment and for land conveyance to the interior, fears being entertained for the safety of the potato crop in consequence of the heavy rains of the last fortnight. The market is therefore very firm and looking up. Importers of rough grain were, for the same reason, very unwilling to sell at present values, and no sales of any importance were concluded.

SPICES.—Cassia Lignea commands an easy sale at full prices. Ginger: Firm; 138 chests of Cochin, lately arrived, found immediate purchasers at remunerating quotations. Cloves are rather dearer and looking up. Pepper is firm, with a low stock. Pimento is in demand; 2,500 bags just imported sold readily by private contract, and realised 2 5-16ths Sch. Bco. per lb.

TIN.—The favourable accounts of the Dutch markets have had no influence here. The demand is languid, and prices nearly nominal.

SPELTER.—The calmness in the market last week has been succeeded by an animated business at rising prices. Market closes firm. Sales since last mail 3,000 centners at 16 marks 6 Sch. Bco., and 10,000 centners at 16.8.

TEA.—Market steady. Sales since last mail, 400 ½-chests of Congou ex. Margaretta, 200 chests of Congou, Souchong and Pecco, together with sundry parcels of Imperial and gunpowder.

GALLS.—Chinese and Japanese are rather cheaper. For the former some parcels have been disposed of at 63 mks. Bco. per 100lb.

CARGO LISTS.

JULIE, from Akyab: 8,200 bags rice, to order.

P. C. KINCH, Paulsen, from Manila and Hong Kong: 14,493 bags of sugar, 800 chests of Cassia Lignea, 100 chests oil of anniseed, 100 packages of galangal root.—Ross, Vidal, & Co.

JEANNIE, Smith, from Rangoon: 8,000 bags of rice, 2,000 bundles of rattans.—Order.

LINDA, von Bethen, from Cochin: 211 bales and 41,887 bundles of cocoanut yarn, 103 chests of ginger, 428 casks of cocoanut oil, 351 casks of train oil, 580 coils of rope.—C. Woermann.

LONDON, WEDNESDAY, SEPT. 28, 1864.

THE CAPTURE OF NANKING.

IN our last issue we reported, through the Siberian telegraph from China, by way of St. Petersburg, that Nanking, the head stronghold of the Taipings, had fallen. By the present mail from Shanghai, we are in receipt of the details of that important capture, with the information that the TIEN WANG, the CHUNG WANG, and other rebel chiefs, were within its walls during the siege. We learn, also, that HUNG-SIN-TSIUEN, the originator of this gigantic politico-religious movement, committed suicide, in order that he should escape the tortures prepared for him by the "Imps;" but before that consummation he, like a second "Blue Beard," hung up all his wives, so that the captors found them dangling by their necks from the trees in the Yamun, a holocaust to the remains of the defunct Emperor of the "Heavenly Kingdom of Great Peace." *Requiescat in pace!* say we. Let us not crow over these deluded people in their day of punishment. Suffice it to say that all lovers of law and order in China will rejoice at this last, and we hope final, blow to the monster of Taipingdom. Even those foreigners who sympathised with the movement from a belief that it foreshadowed a path through the vale of Christianity to the regeneration of the heathen in that immensely-peopled empire, will now see that in looking for support to their missions by espousing the cause, they were leaning upon a broken reed. As to those renegade traders and adventurers who espoused the cause from motives of pure self-aggrandisement, at the cost of honour and legitimate trade, we have no doubt that they will suffer sufficiently in character and pocket to give them a lesson that the old adage, "Honesty is the best policy," would have been a safer game to follow than the risks attending contraband traffic. The honourable merchant, who discountenanced this kind of commerce with the Taipings, will now see the advantages that will accrue to the prosperity of the country, through which he derives a profitable import and export trade, by the extinction of this rebellion in the provinces on the Yang-tsze Kiang. It may be some years before the native traffic recovers its former position, but once it does in the centres of population at Soochow, Chin-kiang, and Nanking, there will be no limit to the trade in that part of China.

In the details of the capture, we are glad to see that there was less than usual of the atrocities committed by the conquerors in carrying out the sanguinary system of Chinese warfare. Doubtless this may be attributed to the influence of General BROWN and Colonel GORDON over the councils of the mandarins in command of the imperial army before Nanking. Although the latter-named gallant officer had retired from the Chinese service, still he appears to have been the directing spirit of the capture. From his special rank as a colonel in the Royal Engineers, he was eminently qualified to direct the operations of the Imperialist force; and had he been in a position to do so before, there is no doubt that the city would have been captured years ago. From its extensive lines of circumvallation, it was almost impossible to invest the city with less than two or three hundred thousand men—a force which, with the requirements elsewhere, could not be brought into the field. As it was, TSEU-KWO-FAN, one of the best military mandarins in China, sat down before the western walls with an army varying from 50,000 to 80,000 men, and a flotilla averaging 300 Chinese gunboats. Here the forces remained in position for nearly three years, only attacking the gates of the city at long intervals; while the Taiping garrison made sorties upon the besiegers from time to time, without any decided advantage on either side. But the capture of Soochow and other strongholds, with the dispersion of the greater part of the rebel army and the seizure of prisoners, weakened the resources of the fighting men at Nanking, while the Imperialists were enabled to bring reinforcements to the camp on the west of the city, and stop the communication of supplies on its southern and eastern flank. Hence the garrison had no external communication but by the river, and that was watched by the flotilla. Under these circumstances the attack was made at the east gate of the city, after a breach had been made in the outer wall by a mine containing 60,000 lbs. of gunpowder, opening up 120 feet of wall to the invading force. In another portion of our columns the details will be found. From these it will appear that the garrison made a gallant resistance; especially when we take into consideration their weakened condition. So that, on the whole, the capture of Nanking was, after all, but an ordinary affair in the annals of this Taiping rebellion. There were many more deadly struggles between the belligerents at the capture of smaller cities, and when they encountered the British troops near Shanghai. Consequently, without detracting from the skill of Colonel GORDON in directing the reconnaissances and engineering tactics, or the bravery of the disciplined Chinese in the assault, the reduction of the ancient southern capital of China and the last stronghold of the Taipings does not figure pre-eminently as a military success in the final campaign.

On the other hand, if we look upon this victory in a moral point of view, it is the greatest that has occurred. Here fell the originator of the movement by his own hand, while his brave coadjutor, CHUNG WANG, and no less able chief in the political part, the KAN WANG, were taken prisoners. In thus capturing these men the Imperialists have secured within their power the mainstay of all that is left of the rebellion; and as their fate may be easily supposed to be decapitation, if not worse, their death, added to that of the TIEN WANG, will end the history of Taipingdom. Fifteen years have elapsed since this upas tree was first planted in the Southern provinces of China, and sent its baneful influence into the central and northern districts. For twelve years it grew apace so rapidly that it attained a climax which threatened the dismemberment of the empire. Had its leaders confined their rapine and warfare to the interior, where foreigners have comparatively small influence, it is just possible that it would still be revelling in its strength. But these chiefs, in their unweening confidence, in the fanaticism of their followers, deemed themselves invulnerable against their countrymen, and able to dare the foreigners on the seaboard. In doing this they shipwrecked their cause, and brought the movement to a rapid close. Not more than three years sufficed to crush the rebellion, when attacked by the prowess and military appliances of Western nations. In 1861 it reached its culminating point at Shanghai, threatening to destroy that great foreign commercial emporium; and in 1864 the last remnant of its power has been destroyed at Nanking. Thus we may consider that the Taiping monster has been crushed by British skill and valour; so that peace and prosperity may return to the desolated homes of the industrious and suffering children of HAN.

THE FRENCH IN COCHIN-CHINA.

THE new treaty made by M. AUBARET, and of which the particulars only reached the French Government the other day, has given rise to some sharp words in Paris. In the first place, there is a want of trustworthy information on the subject—a common cause of all ill-feeling in political matters, in France and elsewhere. One party declares that M. AUBARET has ceded the whole of the provinces obtained by France in exchange for a general protectorate over the kingdom of Annam, and that the affair is thus settled; while another declares that such is the tenor of M. AUBARET'S arrangement, but the Government here, in Paris, has repudiated this act of its diplomatic servant. The Ministerialists explain the matter in another way, and although the terms of their statement are as vague as usual, we are inclined to think that their version is the true

Digitized by Google

one; namely, that M. AUBARET has negotiated a treaty upon the basis of general instructions given him by his Government, but that he was necessarily compelled to depend upon his own judgment as regarded the details, and that what he has done requires to be confirmed by the Imperial fiat. There is good reason to believe that this is the true state of the case, for M. AUBARET does not hold the rank of Ambassador or Minister Plenipotentiary, but only of Envoy Extraordinary; and therefore it would be in accordance with ordinary usage that he should only have been authorised to negotiate the terms of a convention to be afterwards approved or modified by his Government. Besides, the probability is that delay would be favourable rather than otherwise to French views, and the Annamites are not in a position to take advantage of it on their own account. Contradictory stories have been sent home from Saigon, but that is a policy to which the world is no stranger.

The feeling in France against the Cochin-Chinese business is remarkably strong: the views of the French do not extend to the Far East. In this the people are behind the Government in policy, the great mass of the former being ready to applaud almost any incursion on European grounds, but averse to distant expeditions, no matter with what object; while the Government is desirous of extending its power in the East, and of following Great Britain in its commercial crusades. That the Imperial Government has achieved something considerable in this way, there can be no question; France is better known now than she ever was in the Indian and China seas, and her manufactures and commerce have reaped some, and will probably reap much greater benefits from the extension of her influence, provided that her efforts be not rendered futile, as they have so often been before, by the substitution of naval and military domination for commercial enterprise. The desire of the EMPEROR to push his power in the East is exhibited upon all occasions, and at the present moment the Ministerial organs are occupied in informing the public how rapidly French influence is growing in China proper. We are told that the Franco-Chinese force is about to be increased, and that before long not only the Taipings, but all other rebels, will be crushed beneath the strong arm of Imperial China led by Imperial France. There is a strong confirmation of this idea to be found in our Ningpo summary of news.

With respect to China as well as Cochin-China, it is well to record the assertion of the *Constitutionnel* that—"The Imperial "Government knows how to extend and increase the legitimate "influence of France, and to protect all her interests." There is no doubt that if French merchants and French manufacturers knew how to push commerce and colonisation as well as those of England, the Government of LOUIS NAPOLEON would afford them magnificent opportunities.

Since the above was written it has been rumoured that the concessions proposed by M. AUBARET are to cost the Annamites four millions sterling. The *Presse* says on the general subject:—"We look upon long expeditions as a fault, and we "think that when a mistake has been committed the wisest "thing is to correct it as soon as possible. Between the cost of "immense establishments and inevitable embarrassments in "future and the treaty of M. AUBARET, it appears to us there "can be no reason to hesitate." And this view is partaken of by a great many. The Government, when it went to Saigon, made a most specific declaration against any territorial acquisition; it forgot its promise to its own people, and it is now suffering inevitable consequences.

THE MISSIONARY CAUSE AT PEKING.

The following letter from the Rev. Joseph Edkins, dated May 30, appears in the *Patriot*, as also the letter from Dr. Lockhart, lately returned to England:—

Everything is peaceful here, and foreign residents come and go without exciting much remark among the Chinese population. Occasional rumours of an intended rising against the European residents deserve and receive little attention. The native Roman Catholics have made themselves famous by transmitting or originating these rumours. It is supposed that they wish, by so doing, to induce the French to send a force for the defence of the Catholic religion and priesthood.

Peking is a great gathering-place for the *literati*, who take all the higher degrees after examination here. The Emperor is the literary as well as political and sacrificial head of the nation. He summons the scholars of the nation to his presence, and rewards them after trial. What at home are university honours are here Imperial honours. This is true so far that many a scholar bases his intention to be loyal to the existing Government on the fact that he is under obligations to it for the bestowal of the literary titles which he wears. A few days since I was visiting the Confucian temple, an old establishment, dating from the Mongol dynasty five centuries ago. The Imperial college, with which it is connected, contains the monuments of the classics, on which are engraved in stone the whole text of the sacred books. There is also a fine palatial building in which the Emperor occasionally expounds the Confucian doctrine. A crowd of young aspirants for the honours bestowed through the medium of this college were traversing the courts, leaning on the marble balustrades, or standing in groups earnestly conversing. I inquired the occasion of so many of them being there, and learnt that the Emperor, to promote diligence in study, invites the young Manchus and Chinese of Peking to a triennial examination. A small money reward is bestowed on the most promising. After examinations of greater pretensions, when the degree of doctor is conferred, it is customary to inscribe the names of the doctors on a monument erected in the front court of the Confucian temple. Several hundreds of these monuments are to be seen there.

We have learned recently that vaccination is practised extensively in Peking among the people and in the families of the Princes. There are two public vaccinators in Peking. One of them, whom I met at a gratuitous vaccine institution in the Chinese city, nearly two miles from this hospital, has been there for many years. The vaccine lymph was originally brought from Canton nearly forty years ago. Two years since it was lost, but a new supply was obtained through the kindness of Dr. Lockhart, who is gratefully remembered by the vaccinator. At present as many as sixty or seventy children are operated on in a day. The days for vaccination are at intervals of a week. The expenses of the institution are borne by official subscriptions, and no charge is made for vaccination; so far from this, a gratuity is conferred on every mother who brings her child a second time. The gratuity (ten cash, or one penny of our money) is a preservative against the loss of the lymph. On other days the operator visits families in any part of the Chinese or Tartar city, to practise for his own advantage. Not having glass tubes to carry the lymph, he takes a boy with him in his cart, whom he pays for the purpose. Beggar-boys are enticed to submit to the operation, consenting to it only on receiving a considerable bribe. They are afterwards, on a suitable day, conveyed to the residences of the noble and rich, in order that the lymph may be transferred from their arms to children born in a more happy position of life.

FRANCE AND THE FAR EAST.

(FROM OUR PARIS CORRESPONDENT.)

In spite of the absence of everybody from Paris, somebody still busies himself about what is going on in those far off oceans of which Frenchmen never talked and rarely ever thought of ten years since. Now everything connected with China and Japan has a special interest to political and commercial ears. With the late announcements by telegraph came many private letters from the Far East, all full of comments concerning the intentions of the English in Japan; some portions of these have ouzed out, and the tenor of them seems to be pretty much as follows. That very grave events are in preparation, that Sir Rutherford Alcock has now some 400 troops at his command, with a small siege train; that reinforcements are expected, and that the attack on the works in the Straits of Simono-Saki will probably have taken place before the departure of the next homeward bound mail. There is not very much in all this that will be new to your readers. It is not the text but the comment in this case which is of value. It is said in Paris that probably, by this time, the English are masters of the Strait of Simono-Saki, "which will lay all Japan at their feet." At the same time it is asserted that the Tycoon has determined to remain entirely neuter because he will not place himself in hostility with the English. The occupation of the Strait of Simono-Saki, say certain French critics, will be immediately followed by that of Kanagawa and the two other most important strategetical points. The English, they say, have therefore arrived at what they have been so long working for, namely, the possession of Japan, which is capable of feeding so largely their commerce and industry; and one writer kindly informs us that:—"If the representative of England at Yedo is to be believed, they will create a trade of two hundred millions per annum within three years." If the prophet speaketh in sterling the prospect is magnificent, and if in francs, not bad. All this sounds very fine, and to read it one would suppose that the success and domination of England in Japan were dead certainties, while France stands quietly by with folded arms utterly unconcerned in the matter. This is possibly not quite the precise state of affairs, and if things do not take exactly the course predicted probably nobody will be less surprised than the prophet who foretells them with such confidence and who looks into the future with such a piercing eye.

The frigate *Eldorado* brought 1,864 soldiers and others, sent home from Cochin-China, from Alexandria not long since; and she brought home also a very fine collection of animals and birds, sent as a present to the Imperial Government by the Kings of Siam. It also brought two immense cases, containing, the plants and seed which supply a peculiarly fine perfume but the name of which is not given. Amongst the freight was a Cochin-China carriage, which has been sent to the Museum of Colonial Productions in the *Palais de l'Industrie*, in the champs Elysees.

The *Eldorada* has just left for Alexandria with five com-

Digitized by Google

panies of marines, a large number of naval officers, infirmary men and artificers, a large quantity of arms, 150 casks of military clothing, besides arms and accoutrements for native spahis; 100 cases of medicines, and the whole furniture for a floating hospital; eight large anchors and chain cables, and a mass of other things, all of which are to be taken up in the Red Sea by the *Sarthe*, which recently arrived from Cochin-China.

CHEQUES AND A CLEARING-HOUSE FOR PARIS.

FEW things seem so strange to an English man of business as the system of paying, as it were, over the counter, common to even great establishments in Paris and other continental towns. You have a draft on a merchant or wholesale house, and you are astonished to see a huge iron chest open within a wirework cage that looks almost like a railway-ticket office, and the cashier takes out a heap of notes and gold and hands you over the amount. In the same way you go to a public office for an account due to you, and after being wearied to death by the interminable forms which have to be gone through, and having to wait at the end of a *queue* of people, who seem to have nothing on earth to do but to wait, first at one pigeon-hole window and then at another, till you get a clerk's signature, a superintendent's initials, an inspector's tick, the sub-cashier's note, the cashier's initials on that, or what not, according to the nature of the affair, or the office with which you have to do—you are agreeably surprised to find that at last you really get your money itself and not a cheque on a banker, entailing the waste of the rest of your morning. There is a good side to almost everything, and this is the bright spot in the most complicated, wearying, and extravagant system that ever was invented to multiply officials and keep down the growth of commerce.

But France, or at least Paris, is beginning—indeed, has fairly begun—to study and to imitate, more or less exactly, the English system of economising time and increasing business. She, like all the world, has adopted our postage stamps; and after a few years' practice in cutting them off with scissors singly, and neatly nipping off the corners, just to pass away the time, she has pierced the sheets, and now tears them off like a Christian. She has adopted our town telegraph system, and now you may send a message from one end of Paris to another for half-a-franc. France and Italy have given the whole world the go-bye in the matter of international post-office orders, which must be adopted between all nations before long; and, lastly, Paris is now gradually adopting our general banking system.

For some time past several banking and financial companies have opened accounts current and furnished their customers with cheque books—or rather with a book of *receipt* forms—and a good many commercial houses have adopted the system. If, however, one of these receipts is given to one of the uninitiated in the cheque system, he will turn and twist it about and generally conclude with the inquiry whether he can *touch* the amount off hand—the habit, you must understand, of most small tradesmen, and even of many others, in Paris, being to give you a note of hand payable at the "end of the month," and you may meet with scraps of paper of this kind for all amounts down to a few francs passing from hand to hand without endorsement or any kind of formality.

The cheque system, however, obtained the sanction of the Legislature during the last session and is now coming gradually into practice. The form in use is that of a draft at sight, and it may be payable to bearer, to any given person or to order; but if *crossed* they are then payable only to a banker, an *agent de change* (stockbroker), notary, or any other person or firm known to the banker as a responsible party.

But it is clearly seen by men of business that without a regularly organised system it will take many years to render the cheque system universal, and release the large amount of capital which now necessarily lies unproductive from day to day and from year to year in private hands. In short, nothing less than the introduction of the *Clearing house* system in Paris. With this conviction M. P. J. Coullet, one of the directors of the *Messageries Imperiales*, has just issued a *brochure* explaining in detail the whole method of clearing in London both as regards the London and country banks, and stating what modifications will, in his opinion, be necessary to fit it to the wants and circumstances of the commercial and financial world of Paris. There are some differences which must be taken into account; one very important one being the greater dissemination of business in Paris than in London. Upon this point M. Coullet says:—

"Let us remember that in London the great mass of business is confined to the city; for example, out of the eighty-six establishments to which we have referred (the clearing bankers), fifty-five are situated within the limits of the city, and only thirty-one in other parts of the town. Still, in spite of this disproportion, one cannot help being struck with the fact that even in a city in which all the commerce is grouped in one spot, it has been found necessary to open thirty-one banks of deposit in other parts. In applying to Paris the reflections to which this state of things gives rise, we arrive at the conclusion that branch or district banks are much more necessary in Paris than in London. We need not develop this idea, which is evident to all who are acquainted with the commerce of Paris, its habits, and local distribution. We therefore believe in the success of the branches which the great establishments have opened in many quarters. If we admit the necessity, or even the utility of multiplying such branches, we find ourselves obliged to recognise as a natural consequence the utility and the necessity of the Clearing-house."

M. Coullet goes minutely into the details and modes of working the Clearing-house in Paris, which he suggests should be in, or close to, the Bourse; and gives, moreover, all the forms required from the note of deposit and cheque-book, with the regulations of a bank of deposit, up to the final liquidation ticket of the Clearing house. These details are peculiarly valuable for the financial and commercial world of London, and the more so from the perspicuous manner in which they are drawn up, but would have interest for a comparatively small number of our readers, and are entirely beyond the scope of an ordinary article.

The grand thing for the commercial world of England to know is, that enlightened men in France are now fully awake to the necessity of making a grand reform in the method of conducting business; and that, although slowly, perhaps, the system will eventually be assimilated in the two countries. It is true that the introduction of the cheque and clearing system in Paris will not, directly, much affect the trade between the two countries, but it proves the growing sympathy between them, and is one of the most promising signs of greatly increased commercial relations.

INDIA.—THE DANGER OF ANOTHER MUTINY.

The Times' correspondent's letters have been full of warnings to the authorities on the danger of depriving the Governor-General of the ample powers possessed by predecessors. The semblance of power, says the writer, is here the substance and reality at the India-office in London. The danger of arming the police with rifles and swords is particularly dwelt on. These remarks have called forth the following letter:—

(To the Editor of *The Times*.)

Sir,—The letter of your Calcutta correspondent published in *The Times* of to-day reflects so accurately the dissatisfaction and the fears of Anglo-Indians of every class, that I venture to ask a little space at this slack season to endorse the writer's views, and to add a few comments of my own. The great and general disgust in India at the manner in which the local Governments, including the Supreme Government, are treated by the home Administration cannot be exaggerated. The natives are not adverse to this system. They are too shortsighted to perceive its disadvantages to themselves, and they like to be able to snap their fingers in the face of governors, commissioners, and even viceroys, by appeals to the Secretary of State. I have just had personal knowledge myself of a case in which a native official had applied, without success, to his own Government and to the Supreme Government for redress of what was certainly a very great wrong done to him in the reduction of a certain establishment. He is a very respectable man, and a very good officer. But the claim was for a refunding of money, and under the new regulations the local Government could only promise promotion at the first opportunity, and the Supreme Government declined to entertain the case. The claimant appealed to the Secretary of State, and received in reply a complimentary letter from that high official, and an order for the payment of the claim. Now, anyone acquainted with India will recognise at once the effect even a single occurrence of this kind must have in a large Eastern city. All of this man's caste will hear of the beneficence of the great man and real ruler of India in London. To him all will direct their eyes and address their prayers. The local authorities will sink into insignificance, if not into contempt, in the minds of the people. The local rulers themselves will fall to the level of their reduced importance, and ultimately, in place of having men in India equal to great emergencies, and accustomed to govern, we shall have simply a number of chief clerks, unaccustomed to responsibility, shrinking from action, successful enough probably in fair weather, but totally unequal to the perils of a storm.

In India Sir Charles Wood is blamed for all this, and is often called not untruly the "best abused" of English statesmen. But those who, like your correspondent, can occasionally peep behind the scenes, know that the Indian Council is the real author of all this miserable meddling.

Digitized by Google

It is worth while inquiring what are the objects and the advantages of this Indian Council. It doubtless affords a number of superannuated Indian officers the satisfaction experienced by the retired tallow chandler in the anecdote. It is pleasant to those gentlemen, no doubt, to "look in on boiling days" in Victoria-street; but the system of boiling may have changed since they were in the trade, and their old fashioned ways may impede instead of expediting operations. Beyond this personal gratification to a few of our Indian magnates—"retired from business," what good does this Council effect? The Supreme Government has a council composed of official and non-official members, natives and Europeans of high rank or position in the country. The subordinate Governments of the Presidencies have similar councils conversant with the local wants of their respective territories. Thus, if a measure is initiated—say in Bombay or Madras, having passed through the local Legislative Council, it may be assumed to be adapted to the special wants of the Presidency it originates in. It is then referred to the Supreme Government of India lest it should contain provisions inimical to the interests of the country as a whole. Over the Supreme Council presides the Viceroy, and in it sits one of the most eminent masters of jurisprudence we possess. The widest and most varied experience and the most complete knowledge of principles are there concentrated on the new candidate for legislative honours. When it has passed this second ordeal one would naturally suppose that its final sanction by Her Majesty's Ministers was almost a matter of course. One would naturally suppose that the duty of the Ministers was simply to see whether local pressure or prejudice had in any way warped the judgment of the legislators in India, and made them swerve from those great principles of government which have the confidence of the Parliament and people of this country. But this would be an error. The measure is referred to the Secretary of State for India in Council, and the whole business has to be done over again by much less efficient performers in Westminster. Perhaps one Councillor has occupied a high official position in the territory to which the measure applies, and his local experience (of ten years ago, or upwards) exercises a far greater influence on the fate of the new Act than the local Governor and all his Council. Even if the Secretary and a majority of the Council side with the Indian authorities, it is always possible for a recalcitrant member to get the ear of a Cabinet Minister ambitious of filling the Viceregal office in India, and the measure approved in the Council may be reversed in the Cabinet. In India we are often startled by contradictory despatches following close on the heels of each other. Orders of the most precise nature, written, apparently, with all the vigour and decision of thorough conviction, arrive at some Indian Presidency, and meet with a prompt and willing obedience. In a month's time, lo! out comes a second despatch on the same subject of a tenor so completely and elaborately opposite to the first that common people can scarcely help believing that in the interval the Secretary of State and all his Council have been turned inside out or upside down. Thus in great measures there is a vacillation, and in small ones a perpetual and mischievous activity, which threatens to ruin our prestige in the East.

Of what use, as your correspondent well asks—of what use is a Governor-General without power? If he is to be merely the secretary of a Secretary of State, if India is to be governed from London, abolish the Supreme Council, for it is an absurdity. But if India is to be governed in India, abolish the Indian Council, which is worse than an absurdity, for it is a mischief. At present, India is evidently over-councilled.

A few words as to the native army—not as to its grievances, but its constitution. Your correspondent is scarcely fair towards it. The Bengal native army mutinied, and a portion of the Bombay army, but the Madras army, composed of about fifty regiments, remained steadfast and faithful to its salt. I place little reliance on the affection of the natives for us. Fear, respect, and habit are the foundation on which we should build our security. But prior to the late mutiny the native army did us good service. With it we conquered India, and the disgrace that has fallen upon it is due to an ill-constituted section of it, and not to the whole of it. A Madras regiment is a little country—it may almost be called a large family. The families of the men live in the lines and move about with the corps. The male children are enrolled when yet in their mothers' arms, and the son serves under the same colours as his father and grandfather did. Families intermarry, the whole regiment becomes thus knit together; all the affections and interests of the men are bound up with their corps; no land, no village, or distant cottage with wife and children dwelling in it distract their thoughts or alienate their sympathies. You will admit, I think, that a better system could not be devised for securing the fidelity of alien soldiers. It was well proved in 1857. When the men were asked if they also were going to mutiny, they replied, pointing to the huts round which their wives and children swarmed, "Are not our families here? How could we mutiny, even if we wished?" The Bengal system is about the reverse of that I have described. The men alone go on duty with their regiment; wives and children remain in their villages. The regiment is recruited in the ordinary way. There is little hereditary service or common bond. Thus the strongest securities for fidelity are wanting. Yet at the present moment the Madras army is being largely reduced; and active recruiting is going on among the old pandies of Bengal.—Your obedient servant,

INDOPOLITE.

Naval and Military.

—o—

H.M.S. Vulcan is now daily expected from China, with time-expired troops and stores.

Captain John Borlase, C.B., who has been appointed by the Board of Admiralty to the command of the Trafalgar, 72, coast-guard ship at Queensferry, North Britain, vice Captain C. F. Schomberg, who has been placed on the retired list, entered the navy in November, 1823, and after serving in the Mediterranean until 1835, next at Portsmouth, then three years in the Pacific, and again eighteen months at Portsmouth in the Excellent, was made lieutenant June 11, 1841. After next serving two years on the coast of China, and again four years in the Mediterranean, he was advanced to commander June 13, 1849. In December, 1850, he was sent to Constantinople to give instruction to the Turkish navy in gunnery, and which duty he continued to perform until August, 1854, when he joined the Ceylon in the Bosphorus, and rendered most important assistance to the late Rear-Admiral Edward Boxer. He subsequently landed with the Naval Brigade in the Crimea, where he served in the batteries at the bombardment of Sebastopol, and was gazetted for his meritorious conduct in command of a rocket party at the battle of Inkerman. He commanded the Melampus, 42, at Constantinople, from December, 1854, until advanced to post rank, April 7, 1855, and paid her off in October, 1856. He commanded the Pearl 21, from August, 1859, until paid off, June 18, 1864, chiefly employed in China, including the action at Kagosima, in August, 1863.

The Russian Imperial storeship Guilack sailed from the Motherbank, off Ryde, Isle of Wight, for the river Amoor, calling in at Rio de Janeiro. She conveys a large quantity of specie for the use of the settlements on the Amoor.

The *Gazette* contains a notice that preparations are now being made for the intended distribution of the proceeds of certain piratical junks captured on the 5th of September, 1860, by Her Majesty's ship Grasshopper and the pinnace of the Esk. Agents or other persons having a demand against the said proceeds are required to transmit the particulars to the Registrar of the High Court of Admiralty; and agents and others holding powers of attorney or other instruments, by virtue of which they may be legally entitled to claim the share belonging to any captor, are to transmit the same, with the usual documents, to the Prize Branch of the Department of the Accountant-General of the Navy. Due notice will be given of the date proposed for the commencement of the distribution, and of the shares in their respective classes.

The 1st Battalion of the 10th Regiment, under command of Major Barlow, sailed from Kingstown, on board the Mary Sheppard, for the Cape of Good Hope. The numbers embarked were 11 officers, 232 non-commissioned officers and rank and file, 15 women, and 17 children. The officers were—Major Barlow, Captain Lucas, Stammer, Armstrong, and Rudge; Lieutenants Scott and Armstrong; Ensigns Palmer, Orton, Austin, and Hood; and Assistant-Surgeon Dunlop. The Mary Sheppard is a sailing vessel of about 800 tons burden, and, judging from the time she took in coming to Kingstown from England, her voyage is not likely to be a rapid one.

The Royal Sovereign turret-ship, Capt. Sheiard Osborn, C.B., now at Portland, has been almost daily under weigh since the 1st of September, testing her many novel fittings and accustoming her officers and crew to working her guns and turrets. The ship, from her extraordinary beam of 63ft. 4in. and her barrel shaped bottom, tests the turrets to their utmost, and it may safely be said that when they can be worked in such a ship with such ponderous ordnance as her present 12-ton guns, they will work anywhere. The ship never was intended for and never can be a sea-going ship. Some of our contemporaries run away with the idea that Captain Osborn is testing the sea-going qualities of the Royal Sovereign, whereas he is merely testing the sea-going fighting qualities of the cupolas or turrets. The guns were worked and have been repeatedly fired with the ship rolling 10 and 11 deg. each way in a minute. No ship, it is supposed, in the service could have cast loose a 100-pounder of five tons under similar circumstances without some serious accident. The 12 ton 150-pounders have now been fired 30 times each, and not a single breeching has been carried away. We know a ship in the Channel Fleet which cannot fire a 100-pounder five or six times in a seaway without calling for a fresh breeching. The wooden gun carriages show symptons of the trial to which they have been subjected, and all on board the ship call for iron carriages as well as iron guns and turrets. The unaccountable manner in which the Royal Sovereign was sent away from Portsmouth without her defects and alterations being completed, although the dockyard found time to plaster 40 tons more of wood and iron over the already overladen sides of this ship, has occasioned great discomfort to all on board during the broken and rainy weather recently experienced, and prevented all the experiments being carried out which Captains Osborn and Coles would have desired. Had she been an Admiralty pet, no care or expense would have been spared; as it is, no one, we are told, at Whitehall would break their hearts if the crew of the Royal Sovereign declare her to be everything that was wretched.

By direction of the Admiralty a survey has been made of a number of the vessels composing the sailing reserve in Chatham harbour, preparatory to their being sold out of the navy, the whole of them, with some few exceptions, being altogether unsuited to the present requirements of the service. There are about 50 vessels of various rates and sizes. The greater number belong the "Symonds" class of frigates and sloops, which, although considered perfect models of naval architecture a few years ago, are now, for all practical purposes, perfectly useless as ships of war. Of the number stated some of the old line-of-battle and other ships, such as the Ocean, the Benbow, the Devonshire, and the Glocester, are doing good service as receiving, hospital, and coal ships; but the majority, including the Ganges, 84, the Vanguard, 80, the Chichester, 50, and the fine frigates Nankin, 50, Vernon, 50, Southampton, 50, and a vast number of sloops and frigates of lesser tonnage, are rotting in the harbour. They impede the navigation, and each ship requires a staff of warrant officers and men to be kept on board for the purpose of "looking after" the vessel. Several of the squadron of sailing vessels in the Medway have been turned to profitable use by being fitted for training and school ships, and sent to the Thames, Liverpool, Bristol, and many other of the principal ports, and it is deserving of the serious consideration of the Admiralty whether, considering that probably not one of the numerous sailing vessels of war now lying at Chatham will ever again be required for service in war are, it would not be advisable to utilise all the available vessels of this class for purposes of seamanship connected with the mercantile marine rather than keep them in idleness until they are only fit to be broken up, as it is expected will be found to be the case with the majority of those now in the harbour.

We (*United Service Gazette*) understand that Sir Charles Wood has prohibited the Indian Government from taking any offensive measure against Bhootan. This step has been taken without consultation with Sir John Lawrence or any of the Indian officials.

The stem of the iron frigate Bellerophon having been completed at the smithery in Chatham dockyard, has been removed to the factory,

Digitized by Google

where it is undergoing the cutting and planing process previously to being fixed in its place. Unlike the other iron frigates, the stem of the Bellerophon is forged in three separate pieces, and is the largest work of the kind ever undertaken at Chatham dockyard. Its gross weight is nearly 30 tons but this will be considerably reduced during the time it is undergoing the necessary preparation before it can be fitted in its place. The peculiar formation of the bow of the Bellerophon, which resembles nothing so much as the lowest part of a capital S, renders the operation of smoothing and cutting it a difficult and somewhat tedious undertaking, but some additional powerful machinery has recently been erected at Chatham dockyard, to be used in operations of this kind. Some new machinery, of a more powerful kind than any hitherto in use at Chatham, has recently been erected in the factory adjoining the dock in which the Bellerophon is building, to be used in the preparation of the 6-inch and other armour-plates destined to incase that vessel, which, according to her present rate of progress, will be ready to receive her first plate early in the ensuing year.

The Thunderer, sailing line-of-battle ship, has been cut down to her maindeck port sills in dock at Portsmouth, and is being fitted as the future target ship for testing armour-plates at Portsmouth.

TRIAL TRIP OF THE "LONDON."

The success of the auxiliary screw steamer *Great Britain* in the Melbourne trade is stimulating the owners of Australian liners to produce vessels of her class. On the 22nd inst. the iron screw ship-rigged steamer *London*, belonging to Messrs. Money Wigram and Co., made a trial run from Gravesend to the Nore. Starting at 2 P.M. she proceeded against a strong flood tide down the river, returning to her anchorage at Gravesend at 5.50, thus accomplishing the distance of 44 miles in 3h. 50m., the revolutions of the engine ranging up to 80, and the maximum speed over 11 knots. This vessel was built by the owners at their yard at Blackwall, her dimensions being 267 feet length, 35 beam, 24 depth, and her tonnage, including the engine-room, 1,752 tons. The engines are by Messrs. Humphreys and Tennant, of 200-horse power nominal, and considering the power, the rate of speed is a great success.

A very handsome luncheon was provided, and as the visitors numbered nearly 200 there was no difficulty in filling every corner of the very capacious saloon. The cabins in the poop, with their fine large ports, almost seduce a landsman to take a trip to Melbourne. Each of the cabins on the lower deck are also fitted with two scuttles, and in all parts of the vessel there is ample room—that great desideratum on board ship. The berths, which number 90 first-class and 160 second and third, are nearly all engaged. Captain Martin, formerly of the *Suffolk*, in the same employ, has been appointed to command the *London*. Messrs. McLeod, Allport, and Co., the brokers for Messrs. Money Wigram and Co. will despatch the vessel for Melbourne on the 22nd October from Gravesend, and it is expected that she will make the passage in 60 days.

NEW FRANCO-ANNAMITE TREATY.

(To the Editor of the *London and China Telegraph.*)

SIR,—The sketch you give of the New Franco-Annamite Treaty, in your issue of the 15th inst., is somewhat incomplete, and your remarks thereon not exactly correct.

The French yield up the three conquered provinces for a protectorate over the six composing Lower Cochin-China.

Saigon, Mitho, and another point are to be occupied militarily by the French.

The laws are to be administered and revenue collected by the Annamese, but no new laws or taxes are to be enacted without the consent of the French.

Three ports on the east are to be opened to French trade, and a certain quantity of ground ceded in each place for a settlement.

Liberty is granted to French missionaries to propagate their religion.

Consular agents are to be established at the capital and trading ports.

Payment of an indemnity of 100,000,000f. to France is demanded.

The difference is not great, but still it is worth noting. The French by this treaty have obtained the command of the five mouths of the Cambodia River, which they had not hitherto possessed. The missionary clause secures them the right of interference whenever they wish it, as those "mild Christians" are always persecuted. The country is handed over to French trade exclusively. Not a word is said for the Spaniards, who contributed largely to the conquest of the three provinces, and the interests of other nations are ignored. We were more liberal in China, at any rate.

The indemnity clause shows that our gallant allies sometimes fight for rather substantial ideas, and that the civilisation they carry with them (Heaven save the mark!) is in their consideration worth a trifle.

It is to be hoped that our Government will also claim similar advantages from the Court at Hue, and that the English also may be allowed to trade in Cochin-China and Cambodia, on the footing of the most favoured nation. Let Mr. Layard see to this before Parliament meets, because it is possible he may be applied to for information on a subject of some importance to our Eastern trade.—Your obedient servant,

London, Sept. 19, 1864. S. M.

IMPORTANT MARITIME DECISION.—A case of considerable importance to the owners and masters of vessels and also to ships' crews was heard at the Falmouth Police-court on the 14th inst. Captain Jolly, of the ship *Brandon*, of London, 900 tons register, summoned John Copeland and 17 other seamen belonging to the ship's crew for disobeying his lawful orders. It appeared from the captain's evidence that he had sailed from London on the 15th of July, 1863, for Melbourne, thence to Akyab; East Indies; thence to Falmouth, with a cargo of rice. At Falmouth he remained some days awaiting orders, which he received on the previous day, directing him to proceed to Antwerp to discharge his cargo. He accordingly went on board and ordered the men to man the windlass and get the ship under way. This they refused to do, stating that they would not sail for any Continental port, as their articles did not bind them to go there. Mr. Moorman, who appeared for the plaintiff, said the only question for their worships to decide, as the refusal to work was admitted, was whether or not the voyage was really concluded at Falmouth, according to the ship's articles. The articles were dated London, July 16, 1863, and were in the following terms:—"For a voyage from London to Melbourne, or any port or ports in the Indian Ocean, or Pacific Ocean, or Chinese Seas, or West Indies, or wherever freight or employment for ship may offer; trading backwards or forwards in any succession till her return to a final port of discharge in the United Kingdom, voyage not to exceed two years." He submitted that according to these articles the vessel could trade to any port where freight might offer, so that she ultimately came to a final port of discharge in the United Kingdom within the two years for which the seamen were articled. Antwerp was not a final port of discharge, but an intermediate port, where freight might be earned, and there was still plenty of time to make a voyage from Antwerp and return to the United Kingdom within the time specified. Mr. Jenkins, for the defendants, submitted that the law was that if the captain wanted to take the men to a place not named in the articles they had a right to refuse, and such refusal could not be construed into an act of disobedience to lawful orders. The judgment of Lord Stowell, in the case of the *Minerva* (1, Hagg Rep., 347 and 356), was decisive on the matter. Lord Stowell said, "if the master propose to take the vessel on a voyage not designated by the articles, the mariners may leave a ship without being guilty of desertion: and words of indefinite meaning inserted in the ship's articles, as 'or elsewhere" will be construed in favour of the mariners; and with reference to the general course and routine of the voyage described in the context such words must receive a reasonable construction conformable to the interests of commerce; they are not to be taken in the indefinite latitude in which they are expressed; they are not to be admitted as an universal *alibi* for the whole world, including the most remote and even pestilential shores." Mr. Jenkins contended that the words in the *Brandon's* articles, "or wherever freight or employment for the ship may offer," were of the same nature and of the same "indefinite meaning" as the words "or elsewhere," quoted by Lord Stowell. The sailing "backwards and forwards" meant between those places named in the articles; and as there was no mention of the Continent the men were clearly entitled, on the principles laid down by Lord Stowell, to refuse to proceed there, and had a right to their discharge at Falmouth, which was the port in the United Kingdom to which they had returned. After some consideration the Bench decided that had the vessel continued to trade between those places mentioned in the articles there could be no doubt that the captain could have compelled the men to serve for two years, but as the ship had returned to England, and there was no Continental clause in the articles, the men must be discharged. The court was densely crowded during the hearing, as there were many captains and crews in that port whose articles were stated to be similarly drawn up to the articles of the *Brandon*.

THE ANOMALY IN JAPAN.—The Kanagawa correspondent of the *New York Times* writes:—"If Japan can be classed among civilised nations, the action of the English in landing forces here would be a declaration of war of itself, as well as the edict of expulsion which she has been under for the past nine months. The absurdity of the position assumed by both parties strikes one at once, when we make the comparisons, in supposing America should order all Englishmen from her soil, and while an embassy was over attempting negotiations on the subject an English admiral should arrive in New York harbour, and demand a place on Staten Island for troops, and require barracks for the same to be built by the United States Government within a stipulated time, which should be immediately complied with. But such is exactly what is being done here."

Monetary and Commercial.

The present high rate of discount (9 per cent.) adopted by the Bank of England is causing a purification which would not have taken place except in a "regular smash." It is very probable that, the system of over advancing being now checked, we may see the end of the year without a crisis similar to 1857, with one exception, and that is "peace" in America. Should that event take place, it will cause a disruption of business in this country which will certainly produce a panic. Our merchants tremble in the balance for this event. We believe, however, that the effect on the supplies of cotton will be overrated for the moment. No one knows the quantity of cotton which has been grown and is now to be found throughout the length and breadth of the Southern States, but we do know the enormous stimulus which has been given to its growth in other parts of the world, and that the supplies from these sources will continue to pour in long after the word "peace" has run along every telegraphic wire in existence.

The following comments on the fall in the price of cotton are from the *Daily News*:—

The reduction of 4d. or 5d. per lb. which has taken place in the price of cotton since the commencement of the peace discussions in America, is calculated to bring about a certain degree of relief in the money market. It stands to reason that if we have to pay 4d. or 5d. a pound less for cotton than we reckoned upon paying a few weeks ago, our pecuniary position is to that extent benefited; and the gain in a national sense—whatever may be the result to speculative holders overtaken by the fall in prices—is not slight if regard be had to the proportion which this fall bears to the total price of cotton in the years preceding the outbreak of the American war. In view of the present altered and uncertain position of the Liverpool cotton market, and of the great results which might ensue to the cotton trade in the event of an armistice being arranged in America, it is probable that additional caution will henceforward be exercised by all engaged in the cotton import trade. Foreign correspondents will no longer

Digitized by Google

be allowed to draw so heavily as heretofore on London firms; the trade will be conducted with a smaller amount of speculation; and it is by no means improbable that before long the shipments of bullion to Egypt, India, and others of the new cotton growing countries, may receive some check. We have yet to learn the effect produced in the Indian markets by the idea of peace in America, and by the heavy fall in the price of cotton here. By many it is anticipated that the immediate effect will be a favourable movement to a rather important extent in the Indian exchanges. From these considerations it will be seen that there is a prospect of some of the discouraging features now presented in our money market being obviated.

The period for the introduction of the Egyptian Loan for £5,000,000 sterling, depends greatly upon the course of our money market; but, circumstances permitting, it will probably be issued about November. The loan is intended to cover liabilities already incurred here and in Paris, representing very nearly the amount above-mentioned, and which become due during the next twelve months. These liabilities consist of £2,400,000, due by the Viceroy of Egypt to the promoters of the Suez Canal, on the arbitration of the French Government; £750,000, due to the Egyptian Trading Company; and Treasury bills to the amount of about £2,000,000, held in London and Paris. A large portion of these liabilities have accrued through the purchase here of agricultural implements and machinery, chiefly required for the cultivation of cotton. It is thus believed that the loan will involve no drain of gold from England.

The new bank in formation at Hong Kong has been well spoken of in the City. Some dissatisfaction has been expressed that the advertisement does not name any agents in London to whom applications for shares could be sent by parties residing in England. On application to Messrs. Dent, Palmer, and Co., we found that no request had been conveyed to them on the subject. Even if the business is confined to local transactions, and exchange operations excluded, representatives in London will be desirable.

A call of £5, payable half as capital and half as premium, is to be paid on the shares of the Commercial Bank Corporation of India and the East by Oct. 8, and interest at 10 per cent. will be charged beyond that day.

An extraordinary meeting of the shareholders of the Chartered Bank of India, Australia, and China is called for Oct. 5, to declare an *interim* dividend for the half-year ended June 30 last.

The meeting of the Oriental Bank was announced in our last as fixed for Oct. 13. The interim dividend will be declared at £2 per share.

A special meeting of the Central Darjeeling Tea Company (Limited) is called for the 30th inst., when it will be proposed, in consequence of the large number of dissentient shareholders, to wind up the undertaking "under the direction of the Court of Chancery."

The shareholders of the Imperial Bank of China, India, and Japan met at the bank in Walbrook, and confirmed the resolutions passed at a previous meeting accepting the terms proposed for amalgamation with the Bank of Hindustan, China, and Japan. The affairs of the bank are to be wound up voluntarily. The shareholders of the Bank of Hindustan, China, and Japan also met and confirmed the resolutions passed at their previous meeting, authorising an amalgamation with the Imperial Bank of China, India, and Japan, and increasing the capital of the bank to the amount of £2,000,000. The undermentioned gentlemen, formerly on the Board of the Imperial Bank of China, India, and Japan, have been elected directors of the Bank of Hindustan, China, and Japan, viz., Mr. J. Mackrill Smith, Mr. James Levick, the Hon. Frederick Stuart Wortley, and Lieut.-Col. French. Mr. Turner proceeds to Yokohama to open a branch of the latter institution.

The directors of the Upper Assam Tea Company (Limited) have declared a dividend of 20 per cent., payable on the 14th instant, making, with the *ad interim* dividend of 10 per cent., paid in June last, a total of 30 per cent. on the year's operations ending 30th September, 1863.

The biddings for £300,000 in bills on India took place at the Bank of England. The proportions allotted were:—To Calcutta, £177,700; to Bombay, £120,000; and to Madras, £2,300. The *minimum* price was, as before, 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications within the limits amounted to £980,000. Tenders on Calcutta and Madras at 2s. will receive about 23 per cent., on Bombay at 2s. ⅛d. about 60 per cent., and all above these prices in full. These terms indicate a diminished demand for remittances to the East. On the last occasion the lowest of the successful tenders was 2s. 1⅛d. on Calcutta, and 2s. 1¼d. on Bombay, and the applications amounted to £1,300,000.

The annexed "official" account of deliveries of tea, both for home consumption and export, for the first seven months of the years 1863 and 1864, shows an increase of seven million pounds, or at the rate of twelve million pounds per annum.

Duty Paid.	1864. lbs.	1863. lbs.
London	33,065,821	30,582,727
Liverpool	2,539,425	2,852,553

ARTICLES OF IMPORT.

TEA.—There has been more business transacted in Tea the last fortnight, fresh arrivals of old and new offering a better selection than for some time past. Prices continue to rule in favour of buyers, as the advices from China and dear money are against importers. The *Serica* has made the fastest run home with the new Kaisows, followed a few hours after by the *Fiery Cross*. Samples have been freely circulated, and a considerable portion of the cargoes sold. The general quality is disappointing after the favourable reports from Foochow, but we believe the finest Teas are yet to arrive. The *Belted Will* has brought the first cargo of new Canton Teas. The new Teas

Digitized by Google

have realized the following: Kaisows, second class or medium quality, 2s. to 2s. 3d., fine 2s. 4d. to 2s. 6d., finest and extra fine 2s. 7d. to 2s. 9d., —the proportion of the latter is very small. Pakhlings, (for export and which are run after, although not up to last year in quality, smelling too much of the fire) half chests 2s. 9d. to 3s., boxes 3s. 6d. per lb. The few fancy Teas to hand have sold quickly, Oolong ½ chests 1s. 10d., boxes 2s. 2d. per lb. Scented Orange Pekoe 2s. 10d. per lb., Canton scented Caper, medium 1s. 8d., fine 1s. 10d. to 2s. per lb., Orange Pekoe, finest 2s. 10d. per lb., Gunpowder 1s. 8d. to 1s. 10d. per lb. There are several chops of the new Monings, ex *Sea King* still unsold, and reduced prices will have to be taken to finish them up. In old tea several chops out of late arrivals from Canton have been sold by private contract, mostly Oopack kinds ripe with strength and Pekoe flavour, at 1s. 5½d. to 1s. 8d. per lb. Green: The *Spirit of the North* with 250,000 lbs., and further arrivals from New York, keep the market fully supplied; prices have ruled more steadily at the decline established a month ago. Sales of uncoloured Japans, at a slight advance. The public sales which commenced on the 20th current comprise 30,000 packages, with the unusually large proportion of 24,000 packages without reserve. The sales are progressing with great heaviness, and the prices realised for red and black-leaf kinds up to 1s. 6d. per lb. are lower than at any period during the present year.

SILK.—The circular of Waithman, Jacomb and Hogg quotes Tsatlee, No. 1, 26s. to 26s. 6d.; Taysaam, No. 1, 24s. 6d. Japan: Mibash, No. 1, 27s. to 27s. 6d. We have had on the whole a quiet market for silk during the past fortnight, and for a time prices appeared weak, but since the receipt of the China telegram, announcing small settlements and higher prices, there has been more disposition to buy, and very full rates are being paid for the silk now unloading, especially for Taysaams. In Japans we are still without any arrivals of importance. Deliveries from 1st to 23rd inclusive: China, 2,550 bales; Japan, 1,387 bales; total, 3,937 bales.

COTTON.—Early in the week there was an improved demand, and business was done at a recovery of ¼d. to 1d. per lb. from the late lowest point, but since Tuesday the market has again become depressed, owing to forced sales by weak speculators, and the value has materially given way, being about ¼d. to 1d. per lb. below that of this day se'nnight. China participated in the advance, but (say our Liverpool advices) has again been much pressed, and must be quoted 1d. per lb. lower. In London, during the week from the 16th to the 22nd, we note sales of 930 bales China at 14½d. to 15d. for fair, and 15½d. for good fair; and 100 bales Japan at 16¾d. for fully fair. The public sales on the 23.d passed off very flatly, and nearly the whole quantity offered was withdrawn or bought in. Out of 342 bales Japan, only 50 were sold at 14¾d. to 15½d. The stock of cotton continues to be exceedingly well maintained at Liverpool, and even increases. On the 16th it amounted to 393,989 bales, which is more than double what it was in September, 1863, and more than four times what it was in September, 1862. This gratifying result, it must be remembered, has taken place in the presence of a largely increased consumption. Of China and Japan, the stock in London on Friday last was 28,240 bales, against 637 at the same time last year.

SUGAR.—Prices generally show a decline of 1s. per cwt. on the rates of the 16th. By private contract, 12,000 bags clayed Manila have been sold at 31s.

COFFEE.—The market closes with a flat appearance. Considering the liberal supply of Colonial offering, the public sales of Plantation Ceylon amounting to 1,970 casks, 2,120 barrels and bags, have gone off with a fair competition, and have found buyers at slightly reduced prices, fine ordinary to low middling 75s. to 77s. 6d., middling to good middling colory 78s. 6d. to 83s.; 145 casks, 1,950 bags Native also went rather lower, small 62s. to 63s., good ordinary 65s. to 66s., superior 69s. 6d. On Friday 930 cases, 323 bags Neilgherry and Tellicherry, 921 bags Malabar and Mysore, and 93 casks 91 bags Naidoobatum went off languidly at a decline of 1s. per cwt.

RICE.—The market has been extremely inactive during the week; nothing of importance has occurred by private contract, and 2,024 bags White Bengal and 2,000 bags Rangoon, at auction, meeting few offers, were withdrawn.

PEPPER.—1,600 bags Black Singapore were offered at public sale, and (including the damaged) the greater part was realised at rather easier prices, middling to fair 3¾d to 3¾d.; as also 261 bags fair Penang at 3¾d. to 3¾d., and 81 bags Singapore White at 5⅛. to 5¼d. per lb. On Friday 314 bags White Penang were bought in at 5¼d. per lb.

CASSIA LIGNEA.—There are no sales to report. 29 boxes Cassia Buds, at auction, were bought in at £14. 10s. per cwt.

CLOVES.—368 bags Zanzibar were offered, but finding no buyers, were withdrawn, at a reduction of ¼d. to ½d. per lb. on the late value; common to fair 3¾d. to 4¼d.

NUTMEGS.—73 cases at auction were disposed of at lower prices, small to middling, 10d. to 1s 3d., one lot fine 3s. 10d. per lb.

SAGO.—By auction, 375 boxes middling small Pearl were taken at their full value, 19s. to 19s. 6d. 320 boxes large grain were bought in. On Friday, 394 cases sold steadily at 20s. 6d. to 21s. for fine small; and 22s. 6d. to 23s. 6d. per cwt. for good bold grain.

SAGO FLOUR.—120 bags fair quality were withdrawn at 16s. 6d.

TAPIOCA.—In public sale 234 bags middling white Penang were sold at 2½d. per lb.

HEMP.—Manila is lower, a parcel having sold at £28 per ton cash, for fair roping quality; and a parcel, barely fair dressing quality, at £24. 5s. to £24. 15s.

SHELLAC.—The 460 chests and 200 bags offered to-day met so dull a demand that only about 20 packages were disposed of at 10s. decline; livery orange, £5: button sort, £5. 5s.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £9. 10s.; hoops, £10. 10s.; sheets, single £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7 to £7. 5s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and Sheathing, £103 to £105 per ton; yellow metal, ¼d. to 8¼d. per lb.

TIN.—101s. for block; 102s. for bar. Tin plates, best charcoal, I.C, 29s. 6d. per box.

LEAD, &c.—English pig, £20. 5s. to £20. 10s.; W.B., £22. 10s.; shot, patent, £23. 15s.; sheet, £21. 10s.; spelter, £24. 10s. to £24. 15s.; zinc, English sheet, £30; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—Iron: Manufactured maintains its price, with a moderate demand; Scotch pig fluctuates but little. Copper is in fair demand. Tin: Foreign has again given way owing to some speculators forcing parcels on the market. In Holland, Banca is 60 to 60¼ florins. Here it may be purchased at 100 for large parcels, 101 for small. Straits is quoted 99 This fall in foreign made it compulsory on the English smelters to reduce their price. They yesterday declared a reduction of 3s. per cwt. Tin Plates: Stationary, with but little demand. Lead is unchanged. Spelter also without alteration.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

	Gold.	Silver.

Silver in Bars	0 5 1⅛
Mexican Dollars	0 5 0½

MANCHESTER MARKETS.

In sellers' prices 7lb. shirtings, which were 18s. 6d., are quoted now at 16s., and for 8½lb. shirtings, which were 21s., the quotation is 19s.; but sales have, in fact, been made at lower figures, and no doubt business generally could be done at less. There has hitherto been some attempt on the part of manufacturers to ignore the decline, and to keep their terms as vague as possible, but this is not so much the case to-day. Both the offers made, however, and the prices taken are very irregular, varying a good deal with the position of the seller and his anxiety to realize. 6lb. shirtings are quoted 14s., and 9lb. 22s. 6d.; 5lb. T-cloths are quoted 10s., 6lb. 12s., and 8½lb. long cloths 16s. 6d., while 9lb. ditto are 18s., and 10lb. 20s.; 9lb. printers are quoted at 23s., but generally speaking where sales have been effected they have been made at less than these quotations. Messrs. John Slagg and Co. report:—"Since last week our market has been tending downwards, and so few offers have been made that it has been impossible to arrive at the exact value of goods. To day there has been more inquiry and more offers obtainable, but at much reduced rates. Holders have to some extent responded to these offers, but the sales effected have been at very irregular prices."

Shipping Intelligence.

DEPARTURES.

Date.	From	For	Ship.	Captain.

FREIGHTS AND CHARTERS.

Outward freights continue very low, and but little export business is doing. Coal freights are also scarce, but a few ships are wanted for Java at somewhat better rates. In homeward charters there is nothing to report.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £3 3 and £1. 15s. For Shanghai: £4 8 to £50, and £2. 5s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £25 to £26 and £1. 3s. For Penang: £27. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of two tons naval timber, 4 tons heavy, and 6 tons light stores, 8 tons sails, 4 tons cordage, and 1 ton anchors, from Deptford to Singapore.

CASUALTIES.

RIO JANEIRO.—August 24: The Arab (Brit. ship), from Liverpool to Singapore, which put in here July 22, leaky, has discharged the whole of her cargo.

DUBLIN.—September 21: The Edinburgh Castle, from the Clyde to Singapore, get on Arklow bank yesterday at 7 P.M., and remained until 1 A.M. to-day, when, after having thrown overboard 100 tons of coal, she came off, making water, and has now put back for Glasgow.

The Bahia, from Canton, which had sprung a leak, was spoken August 2 off Table Bay by the Belted Will, arrived at London.

At ST. HELENA.—Argonaut, Norton, from Manila, and sailed August 9, for New York. August 10: Netherby, Nulman, from Foo-chow-foo, and sailed 12th for London. 12: St. Jan, Sommerse, from Batavia, and sailed for Schiedam; 17, Glencoe, Hutton, from Hong Kong, and sailed for Liverpool; 17, Duc de Richelieu, Bernard, and sailed for Saigon; 2, Akbar, from Penang, and sailed for London. Caroline Chisholm, from Singapore.

THE "FIERY CROSS."—QUICK DISCHARGE.—The ship *Fiery Cross*, from Foo-chow-Foo, arrived in the St. Katharine Dock at four o'clock on Tuesday morning, and by ten o'clock on Wednesday morning she had discharged the whole of her cargo, 14,000 chests of tea, and in the course of the afternoon's tide she was hauled out of the dock into the river.

HOLLOWAY'S PILLS.—POTENT PURIFIERS.—Hundreds of causes contribute to render the blood impure, and thus to produce man's besetting maladies. These admirable Pills address themselves, at first, to expel all taints from the vital fluid, and, in the second place, restore regularity and harmony throughout the organs of assimilation, secretion, and excretion. Holloway's Pills improve the digestive capability of the stomach, and gradually give it strength enough fairly to appropriate any ordinary food, when wholesome in quality and moderate in quantity. These Pills act beneficially on the liver, kidneys, and bowels, and so constitute themselves the protectors of the dyspeptic, nervous, low spirited, and debilitated. Unless digestion be occasionally corrected by such means, the blood cannot be pure.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World, Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch street London

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day. AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., Three Kings-court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored, one application per month will keep it in perfect colour. Price One Guinea per Bottle; half bottles 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected. Messrs. JNO GOSNELL and Co. have been appointed Perfumers to H.R.H. the Princess of Wales.

REGENT PIANOFORTE ROOMS.

ADDISON AND LUCAS,

MUSICAL INSTRUMENT MANUFACTURERS,

(By Special Appointment to Her Majesty).

210, REGENT STREET, W.,

RESPECTFULLY direct attention to their ORCHESTRAL, MILITARY, and other MUSICAL INSTRUMENTS, adapted for Band or Drawing-room use, and all made with every improvement and tuned under the superintendence of the most eminent Professors including Mr. T. Harper, Mr. C. Harper, Mr. Wells, and other members of the Royal Italian Opera, Philharmonic, &c., &c.

ÆOLIAN HARPS.—Single—12 strings, 16s., and 21s.; ditto, 24 strings, 25s. and 32s. Double (this may be used as two Single Harps)—24 strings, 30s. and 35s.; ditto, 48 strings, 42s. and 50s. each,—cases included.

ANGLO-GERMAN CONCERTINAS.—Messrs. ADDISON and LUCAS direct the attention of performers on the German Concertina to these Instruments, which are finished with the same care as their Concertinas with English fingering, and are the only durable instruments of the kind made. Anglo-German Concertinas (English-made):—20 keys, in wood case, £2. 2s.; 22 ditto, £2. 10s.; 28 ditto, £3. 3s. German Concertinas, the best of the foreign make, 6s., 8s., 10s. 6d., 12s., 21s., to £1. 15s.—ADDISON and LUCAS, 210, Regent-street, W.

BOWS.—VIOLIN BOWS, at 2s., 4s., 5s., 6s., and 8s. each, to £1. 1s.; Dodd's Prize Medal, plain, 10s. 6d.; superior, 15s.; silver mounted, 21s., 25s., 31s. 6d., and 42s. each, to £5. 5s.; tenor bows from 4s. to £2. 2s.; violoncello bows from 4s. to £2. 2s; contra bass bows, from 5s. to £1. 1s.—ADDISON and LUCAS, No. 210, Regent-street, W.

CONCERTINAS.—1. Mahogany, 48 keys, double action, in case £2 10 0
2. Ditto, superior, in mahogany case 3 10 0
3. Rosewood, 48 keys, five-fold, bellows, in mahogany case 4 4 0
4. Ditto, five-fold morocco bellows, in rosewood case 5 5 0
5. Ditto, extra finish, 48 metal keys, in rosewood case 7 7 0
6. Ditto, ornamented in rosewood case 8 8 0
7. Rosewood, 48 keys, silver touches, improved vibrators, in rosewood case 10 10 0
8. The patent concert concertina, amboyna, bird's-eye maple, or ebony tops, inlaid, metal studs, with sterling silver touches, &c., the best concert instrument, warranted and kept in order for 12 months 12 12 0

The same instrument, prepared expressly for India, amboyna tops, strongly clamped with German silver metal studs, &c., in rosewood box, brass clamped 15 15 0

With glass studs, extra, £1. 1s.; with steel vibrators, extra, £4 4s.

Nos. 5, 6, and 7 may be had finished in amboyna, ebony, or coromandel wood, at an extra cost of £2. 2s.

Tenor concertinas, 48 keys... ... £9. 9s. to £15. 15s.
Bass concertinas, 48 keys ... ... £12. 12s. to £16. 16s.

ADDISON and LUCAS, 210, Regent-street, W.

DRUMS.—Side, £1. 10s. to £2. 2s.; Regulation, with Royal Arms, £3. 3s. to £4. 4s.; Bass ditto, plain, £4 4s. to £5. 5s.; painted with Royal Arms, £6. 6s., £8. 8s., £10. 10s. and £12. 12s. each.—ADDISON and LUCAS, 210, Regent-street, W.

EUTERPEONS and SELF-ACTING ORGANS.—Great care and experience are necessary in the selection of instruments acted on by barrel and machinery. Messrs. ADDISON and LUCAS are able to insure to purchasers the most perfect that can be purchased. Viennese flute organs, self-acting, 85 guineas; Euterpeons, ditto, from £105 to £1,000; organs, ditto, from £21; portable organs, with trumpets, &c., from £21. Estimates and drawings free per post.—ADDISON and LUCAS, 210, Regent-street, W.

FLUTES.—Boehm's Council and Prize Medal Cylinder Flutes, old Fingering, cocoa wood, in case £8 8 0
Ditto, with sterling silver keys on all the holes 16 16 0
Ditto, entirely of sterling silver, or wood with silver keys and sockets, old or new fingering 26 5 0
Ditto, in gold, with silver keys 84 0 0
Ditto, entirely gold 141 15 0
Concert flutes, eight German silver keys, cocoa wood ... ... 30s. to 4 4 0
Ditto, eight sterling silver keys, cocoa wood ... ... £6. 6s. to 15 15 0
Ditto, octaves cocoa wood, six German silver keys, on pillars ... ...£1. 1s. to 2 2 0
Ditto, six sterling silver keys, in case 4 4 0

All the flutes are tried and proved by Mr. Benjamin Wells, who attends daily to give instruction upon the new and old systems of fingering.—ADDISON and LUCAS, 210, Regent-street, W.

FLAGEOLETS.—Flute Flageolets, cocoa wood and German silver keys, £1. 11s. 6d. to £2. 2s.; ditto, six sterling silver keys, in case, £4. 4s. The Flute Flageolet will be found a charming accompaniment to the pianoforte in dance music, &c., and being remarkably easy to sound, may be put into the hands of very young performers. The fingering is the same as the concert flute, to which instrument it will be found a valuable introduction.—ADDISON and LUCAS, 210, Regent-street, W.

GUITARS, £2. 2s., £3. 3s., £4. 4s., £5. 5s., £6 6s., £8. 8s., to £12. 12s., the finest models. Cases included with the £4. 4s. Instruments and upwards.—ADDISON and LUCAS, 210, Regent-street, W.

HARMONIUMS, IMPROVED PATENT, by Alexandre.—1. In oak case, £6. 6s. 2. In mahogany case, £7. 7s. 3. In oak case, one stop, £10. 10s. 4. In mahogany case, ditto, £13. 13s. 5. In oak case, three stops, £15. 15s. 6. In ditto, five stops, £23. 2s. 7. In ditto, nine stops, £26. 15s. 8. In ditto, 10 stops, tremolo, £27. 6s. 9. In ditto, 13 stops, £37. 5s 10. In ditto, 14 stops, tremolo, £37. 16s. 11. In rosewood case, one stop, £13. 13s. 12 In ditto, three stops, £15. 15s. 13. In ditto, five stops, £25. 4s. 14. In ditto, nine stops, £28. 17s. 6d. 15. In ditto, 10 stops, tremolo, £29. 7s. 6d. 16. In ditto, 13 stops, £39 7s. 6d. 17. In ditto, 14 stops, tremolo, £39. 18s.—ADDISON and LUCAS, 210, Regent-street, W.

KETTLE DRUMS.—Cavalry large Drum, 23 inches, including cover ... ... £21 per pair.
Orchestra, first size ditto, 24 in., including cover ... ... 24 „
„ second ditto, 27 „ „ ... 30 „
„ third ditto, 30 „ „ ... 40 „
„ fourth ditto, 33 „ „ ... 50 „

METRONOMES (musical time indicators).—No studio is complete without this indispensable to interpret the tempi of the great masters' compositions Samson's improved, winding without key, £1. 11s. 6d., with bell, to £2. 12s. 6d.; ditto, military ditto, large size, in case, £4. 4s.; mahogany or rosewood, the best ordinary English make, with bell, £2. 2s.; ditto, without bell, £1. 6s.; tripod stand, with spirit level, £3. 13s. 6d.—ADDISON and LUCAS, No. 210, Regent-street, W.

VOCAL HORN, highly finished, £8. 8s., in case. This is especially recommended to amateurs and professors as a beautiful drawing-room instrument. Being in C, songs with pianoforte accompaniment can be played as published for the voice without transposing or the use of crooks. The tone is a combination of the French and tenor horns, and is produced without effort. Mr. C. Harper, professor at the Royal Academy of Music and the first horn in Mr. Costa's Orchestra, attends to give instructions.

MILITARY and BRASS BAND INSTRUMENTS.—Messrs. ADDISON and LUCAS respectfully direct the attention of commanding officers and presidents of band committees to the reduced rate at which they are now able to furnish the best toned and most durable military band instruments; and they confidently assert that while a great saving to the band fund will be accomplished, the musical effect of the bands using these instruments will in many cases be improved, and in none diminished. Messrs. A. and L. warrant all the instruments supplied by them to be well in tune together. To insure this, every instrument will be tested by eminent professors before being issued. Messrs. A. and L. beg to add, in conclusion, that the brass instruments now supplied by them are, in every part, English manufacture, not foreign bells and pistons put together, and are the same (with every modern improvement) that have been issued to the army for 50 years at nearly double the prices. Every instrument not approved of will be exchanged, free of cost. Estimates for sets of military band instruments furnished, with every particular respecting the most effective formation of bands. Regiments requiring efficient bandmasters will have every assistance from Mr. Lucas, Principal of the Royal Academy of Music.

1. Cornets, any model, three pistons ... £7 7 0
Ditto, four pistons 8 8 0
2. Soprano cornet, in E flat and F 5 5 0
3. Valve trumpet, crooks complete 7 7 0

Summary of News from the Far East.

JAPAN.

A notice of the news from Japan will be found in our leading article.

CHINA.

NEW-CHWANG.

A correspondent writes under date from this port June 21st:—

At a sale of apparel of the American barque *Penguin*, the two ship guns were bought by the Lieutenant of the "Yang-tsze Volunteer Rifle Corps," for the greater efficiency of that body to resist any attempts which might be made upon the foreign settlement during the ensuing winter. Another purchase was made of two lots of suitable sized rope, by the hon. secretary, for the Yang-tsze Jockey Club, to be used in the partitioning off of the race-course. The first meeting of the members of the Jockey Club, for the transacting of business connected therewith, &c., the deciding upon suitable time for the next races, is to be held at the British Consulate to-morrow evening.

A few days ago a subscription was made for the providing of bats, balls, wickets, gloves, leggings, &c., for facilitating the formation of a cricket club by inducing a love of the sport. About $150 was immediately subscribed.

All members of the foreign community have been invited to attend, in a private way, at the British Consulate, from 5 to 7 A.M., to go through the club, dumb bell and parallel bar exercises and boxing. A quoit tournament was proposed, but failed.

FOO-CHOW.

The circular of Messrs. Fussell and Co., dated August 17, says:—The steamer *Undine* arrived here on the 4th, with the English and Australian mails, bringing dates from London to the 26th, Melbourne 26th and Sydney the 23rd June, since when we have received telegraphic advices from London to the 4th July.

IMPORTS.—The following sales are reported:—2,000 pieces 8¼lbs. grey shirting, at $5.50 per piece; 300, 6¼lbs. T-cloth, 3.65; 500, 7lbs., grey shirting, 4.95; 220 piculs lead, 7.00 per picul; 2,900 green peas, 3.00; 2,500 yellow peas, 3.00; 5,000 beancake, 2.40; 120 Shanghai cotton (common) at 20.00; 2,000 Saigon rice, 2.52.

OPIUM.—Sales have been: 75 chests Malwa, 33 chests Patna, and 7 chests Benares. We quote: Malwa, $765; Patna, $585; Benares, $570.

EXPORTS.—TEA.—During the interval (shorter than usual) which has elapsed since the date of our last circular but a very moderate amount of business has been transacted in our tea market, though as yet prices have not given way to any extent. In Congous there have been a few settlements of low common and dusty kinds at late quotations, common flavory kinds being in full supply have been realised at a decline of about one tael, but the arrivals of the better grades have been on a very limited scale and the few sales made have been at full rates. The third crop teas have arrived in quantity, but so far the quality is considered to be very poor, though it is said that those still to come to hand from the Kaisow and Sinchune districts will be fine. A few sales of Souchong are reported at about previous rates. Business in Oolongs has been somewhat checked by the late unfavourable advices received of the state of the American markets. Scented teas remain without alteration, the teamen still holding for extreme rates. Holders have been willing to accept lower rates for Flowery Pekoes which has led to a more extended business.

SHANGHAI.

The dates are down to the 17th of August. The English mail of the 27th of June arrived out on the 10th of August.

The S.S.N. Co.'s steamer *Chekiang* was totally destroyed by fire on the morning of Monday the 8th. The fire was discovered about one in the morning, and so rapidly did the devouring element spread, that the captain, officers, and crew scarcely saved anything. She arrived there on the 7th, that day being Sunday. No goods were discharged, so the whole of the import cargo, and several boxes of treasure were lost. She was cast adrift, and the burning wreck drifted down; she fouled the steamer *Moyune*, and British steamer *Far East*—both vessels had a narrow escape, as well as the *Kiangloong*, and Messrs. Olyphant and Co.'s vessels *Kiukiang* and *Northern*

Digitized by Google

Light, which were moored just ahead of the S.S.N. Co.'s premises. A sharp breeze blowing from the N.E. hastened the work of destruction. The *Moyune* had to slip both her anchors, also the *Tunsin*; she drifted down the Yang-tsze, and her remains were brought up in a bight about twelve miles from here.

Shanghai tea is abundant, prices declining. Rain had been plentiful, and the weather, though hot in the day, was pleasantly cool by night. Freight 2 taels per ton. A good deal of Manchester goods were being sent up country.

The following items are from the *North China Daily News*:—

"We have been informed on reliable authority that in order to mark the Imperial gratification at the fall of Nanking, Tseng Kuo-ian has been made a How, a rank equivalent to 'Marquis,' while Tséng Kin-ta-jen and Li Futai have been made *Pes*, or 'Earls,' and decorated with the two-eyed peacock's feather.

"News has been received from Ningpo, to the effect that the Imperialists and the Franco-Chinese have experienced a defeat at Hoochow, by which five or six officers have been killed, and more than fifty wounded. It is said that M. D'Aiguebelle is likely, in consequence, to come to Shanghai to ask advice from the French military authorities here. We have received no particulars; but believe the above information to be reliable."

A Ningpo correspondent informs us that Colonel Reynolds, who was wounded in the recent attack on the rebels at Hoochow, has since died. Previous to the engagement an artillery reinforcement arrived from this province, commanded by a mandarin, consisting of one 32, two 24, two 12-pounder guns, and two mortars, with 7,000 men. The besieging force was repulsed, and compelled to retire some distance.

We published some days ago a rumour that reached us to the effect that Chung Wang had been executed at Nanking. We have, however, received later information of the most reliable character by which it would appear that not only is the Chung Wang still alive, but that orders have been received for his transmission to Peking, where his fate will be decided.

A Shanghai rebel paper writes:—"We have received intelligence per S.S. *Wokee* regarding Nanking, which may interest many of our readers who are curious as to the number of decapitations which take place annually throughout the Middle Kingdom. On the 3rd the *Wokee* was at anchor at Kiukiang; in the course of the same day the steamer *Elfin* arrived from Nanking, and reported that upwards of 30,000 rebels had been beheaded, and the stench in the streets, arising from the headless trunks left in all directions, was 'quite unbearable.'"

If no slaughter took place at the assault, which we are sure did take place—of Nanking, the Imperialists have made up for lost time, and we hope the arms of the headsmen were not put "out of Joint" in the course of their "shamble" recreation.

We pity the unfortunate victims, as Chinese knives are not always being sharpened, but rather blunted on a *Cote Curenta*.

The action brought by Chinese for 14,000 taels against the British and Foreign Marine Insurance Company (limited) for the loss of the *Melita*, has been given in favour of the Company.

HONG KONG.

The dates are down to the morning of 23rd August. The English mail of 10th July arrived out on the 18th August.

The following items are from the *Evening Mail*:—

"Several inquests have, we understand, been held during the week. In the case of a European sailor found on the Kowloong beach, the verdict returned was 'found drowned;' in that of the midshipman killed on board the *Light of the Age*, 'accidental death' was returned; and a third, of 'found drowned,' was pronounced on a Chinaman found floating in the harbour. The inquest on the body of Captain Allen, of the *James Booth*, terminated to-day; but the evidence being deemed insufficient to prove the cause of death, the formal verdict of 'found dead' was given. We learn that a Hindoo, residing in Gate-street, died this morning from the effects of an overdose of opium. It is not certain, but there may have been some foul play in the administering of the drug, and an inquest is to be held this afternoon, at five P.M. Two restaurant keepers were brought before the magistrate the other day, the one for selling spirits without a licence, and the other for the same offence, coupled with that of keeping a billiard-table on his premises. They were both fined fifty dollars."

"The Hong Kong Volunteers, we are glad to say, are advancing in their drill at the big guns, upwards of forty being likely to be reported as 'passed' by Monday next. Although this number will make up the minimum complement of efficient gunners required before entering upon a competition for the prize to be given by his Excellency the Governor, we should strongly recommend all volunteers to avail themselves of the opportunity of 'passing,' which is at present offered by the circumstance of an officer of the Royal Artillery having kindly placed his services at the disposal of the corps. These may be continued, it is true, and they may not even be voluntary, but in any case the gentlemen volunteers should view them as something to be availed of, and should not expect that an Artillery officer is always to be at their beck and call as if he were a flunkey.

"With regard to the prize given by his Excellency, we hail it as a proof that encouragement is not likely to be wanting on the part of the local government towards the corps, in more ways than one. The recognition has indeed been tardy, the prize being the latest of a long list of prizes given by a private gentleman in the colony; but as there has always been a strong Conservative feeling towards new movements exhibited by the present Governor, or in other words, a slowness to acknowledge or assist public undertakings until they have shown themselves to be perfectly feasible, we may look upon his Excellency's prize as a crowning proof that the Hong Kong Volunteers have fully vindicated their right to recognition in the very highest quarters. Even our contemporary, who in some matters is doggedly Conservative in practice, has acknowledged the movement as a *fait accompli*. In these circumstances, we cannot be wrong in calling upon effective members to continue steady, and also upon those whose membership has practically lapsed through long non-attendance at drill to come forward once more and take up their places in the ranks. The time was when the sight of a Volunteer uniform in the streets was received with a kind of good-humoured sneer; now, no one sees it without a feeling of respect if he thinks anything about it at all. The matter has become as much a local institution as the ice-house, the racket-court, or the gymnasium.

"On Saturday afternoon, the Hong Kong Volunteers (both companies) went to Kowloong in the steamer *Fame* and commenced their long-promised practice with big guns and round shot. As usual, the excursion was rather of the nature of a pic-nic party than otherwise. Everybody seemed satisfied with the trip, and the discipline maintained was, notwithstanding, very fair. There is, we believe, room for improvement in this respect, and we have no doubt that the gentleman who supervises the corps will take the hint. Volunteers when handling large ordnance, cannot be too careful, and if our information be correct, the vent of one the guns was somewhat carelessly served. We are compelled to speak plainly, as the volunteers are no longer a private body, but are, as it were, public property, and have become a matter of general interest and respect. We claim to have some little right to criticise the corps, as we have stuck to them from the beginning through good report and through bad report. In point of fact, it was in our own columns that the movement was first mooted, and all the thanks we have got from them of late is a cessation of the usual advertisement, which we look upon rather as an expression of contempt on the part of a particular individual, whose name it would simply be a waste of type to print, than as a mark of disrespect on the part of the gallant and flourishing corps.

"With regard to the firing, we understand it was remarkably good, but, at the same time, it must be stated that the laying of the guns was superintended by an Artillery officer of great experience at his profession. The target was very nearly hit several times, but was never—as the Yankees would say—blown clean out of the water. The distance was 1,400 yards, and the firing, as we have already said, was remarkably good. Our reporter informs us that he has had considerable experience in the witnessing of artillery practice in different districts of the United Kingdom, but chiefly at Leith; and he adds that he has rarely seen better practice than that of Saturday night. We have already referred to the imperfect manner in which one of the guns was served, and we sincerely trust that, on every future occasion, more attention will be paid to this part of the performance. So far as we can learn, the gallant volunteers in attendance upon the gun in question seemed to view the entire affair as an excellent joke; and we are assured that their bearing when the gun was being served was, 'to say the least of it,' the reverse of soldierly.

"The foregoing fact—if it be a fact—reflects the utmost discredit upon the officers in charge, and we have reason to be-

Digitized by Google

ieve that their attention was drawn to the circumstance by competent spectators on the spot. Of course, as both officers and privates are all excellent fellows, they are sure to take these remarks in good part. We candidly affirm that they are meant for the best, and are based upon the best information at our command. Our reporter's name is at the disposal of anyone belonging to the corps, and we shall be extremely glad should any of his unfavourable hints prove to be incorrect. It is quite clear that, in firing off shotted guns, some little attention must be paid to details, were it for nothing more than the safety of the onlookers, whose lives are frequently of importance."

The Legislative Council met on the 15th August, at noon, for the despatch of business. There were present:—H.E. the Governor, the Hon. Acting Chief Justice, Attorney-General, Colonial Treasurer, Colonial Secretary, Auditor-General, and the Hon. Messrs. Chomley, Murray, and Whittal.

The business was chiefly of a formal nature, the following ordinances having been read a first time:—An Ordinance to authorise the commissioners appointed to compile a new edition of the Ordinances to make certain alterations thereon; An Ordinance to facilitate the remedies of bills of exchange and promisory notes by the prosecution of frivolous or fictitious defences to actions thereon; An Ordinance to amend the laws of trade and commerce; An Ordinance for consolidating and amending the laws for jurors and juries; and an ordinance to apply a sum not exceeding $613,000 to the public service of the year 1865. On the reading of the latter ordinance, the Governor drew attention to the new item of expenditure of £20,000 for military expenses, and stated that a correspondence had taken place with the Secretary of State on the subject, which was put into the hands of the members of Council. He (the Governor) had used every argument which could be brought forward against the payment of the above sum, but the home authorities still held the opinion that the arrangement was only reasonable and just. The safety of life and property afforded to the colony by the military garrison was held to be a very fair return for the payment of one-fifth of the £100,000 spent by the home Government for its maintenance. He recommended the members of Council to read the correspondence, and they would then be in a position to consider it and discuss it at a future meeting; so large a sum, he said, would necessitate a careful consideration on their part of the financial state of the colony. In regard to the 100,000 and odd dollars of a balance now in the treasurer's hands, he warned the Council that such a sum was absolutely necessary to meet the immediate demands which were continually made on the Government, such as monthly expenditure before the quarterly or half-yearly revenue was forthcoming, and the subsidiary coin retained for the public demand. It was agreed to meet on the 5th Sept. to consider the subject.

An Ordinance for preventing fraud upon creditors by secret bills of sale of personal chattels was read and carried.

We give below the financial statement laid upon the table:—

FINANCIAL ESTIMATE FOR 1864.
Corrected to June, 1864.

Excess of Assets over Liabilities on Jan. 1, 1864		$445,000.00
Probable Revenue for 1864		600,000.00
Total		$1,045,000.00
Probable Expenditure for 1864:—		
Ordinary Expenditure	$400,000.00	
Public Works	460,000.00	
		860,000.00
Probable Excess of Assets over Liabilities on Dec. 31, 1864		$185,000.00

FINANCIAL ESTIMATE FOR 1864.

Estimated Excess of Assets over Liabilities on Jan. 1, 1865	$185,000.00
Estimated Revenue for 1865 as per Schedule A of present Estimates	700,535.00
Total	$885,535.00
Estimated Expenditure for 1865, as per Schedule B of present Estimates	$779,426.00
Probable Excess of Assets over Liabilities on Dec. 31, 1865	$106,109.00

In the Vice-Admiralty Court—before the Acting Chief Justice and Mr. Thomsett, Assessor—the case of collision between the Bremen schooner *Charlotte* and Hamburg ship *Arracan*, was concluded, having occupied the Court nearly three days. It was decided in favour of the *Charlotte*, with costs, it having been proved to the satisfaction of the Court that the collision took place in consequence of the *Arracan* failing to keep a good look out. The damages of the *Charlotte* are laid at about $6,000, whilst the *Arracan's* damage was very trifling. Mr. Pollard represented the owners of the *Charlotte*, and Mr. Kingsmill those of the *Arracan*.

The British steamer *Chanticleer* left Yokohama on the 4th August, experiencing very boisterous weather most of the way. On the morning of the 14th she saw the British steamer *Soochow* ashore in Owick Bay, when she proceeded to her assistance, and managed to save her crew and a large portion of her cargo. The *Soochow* had anchored for shelter on the night of the 13th, and her cables parting, she was driven bodily ashore, and has become a total wreck. The *Chanticleer* must be a fortune to her owners. It was only a month before she made a handsome salvage, which she took into Hong Kong. The Government charter to Japan with troops, on which trip she had just returned, must have netted several thousand dollars. When she left England we stated that she would prove a useful and profitable craft.

CANTON.

A correspondent dating 16th August writes:—

"The heavy rains of the past few days have caused the river to rise to an unusual height. Yesterday, nearly all Honam was under water, and I hear from a native resident at Cumchok that that place and Fatshan are inundated.

The ebb tides too are strong, the water running down like a sluice the greater portion of the four-and-twenty hours. Two boats were capsized by a squall in the Macao passage yesterday, and it is feared several lives lost.

The barometer keeps steady at 29.60 to 29.70, while the thermometer is down to 80 and during the night to 75, the air being quite cool. The heavy rains and flooded streets put business quite in the background.

AMOY.

A correspondent at Amoy, under date of August 8, writes:—"The British ship *Morning Star*, Captain Johntston, from Liverpool to Shanghai, with coals for the P. and O. Company, put into this port on the 16th inst. in a disabled state, having met with, a typhoon on the 12th, and lost topmasts, sails, bowsprit, &c. She will discharge her coals and go into dock, and will probably be five weeks here. She was 120 days out to this port. We have had two severe tyhoons very recently, and a great many vessels are supposed to have foundered.

MALACCA STRAITS.

SINGAPORE.

Dates hence are to the 1st September. The P. and O. Company's steamer *Aden* arrived on the 26th August, with the English mails of the 26th July.

On the evening of the 16th August, a public entertainment, consisting of a ball and supper, was given in the Town Hall by the bachelor residents to Mr. and Mrs. James Davidson. Mr. Davidson is the late manager of the Chartered Mercantile Bank of India and China, and the entertainment was generally understood as a demonstration of the high esteem and respect in which he is held by the residents; no such display has taken place since the ball and supper at Singapore, given to Sir James Brooke in November, 1861. Mr. Davidson has done a great deal by his individual influence to place the bank of which he was the manager in its present high position; and the merchants here take it little complimentary to themselves that the losses incurred in an exceptionally bad year should be grounds with the proprietors at home for superseding a gentleman with whom they have done business agreeably for now nearly five years. Among those present were Sir Richard Bolton McCausland, Recorder, Commodore Montrésor, the Hon. Resident Councillor, besides all the principal residents.

At a sitting of the Municipal Council on the 10th August, it was resolved, as the Loan of 1860 will be due next year, that a new loan of $70,000, bearing interest at the rate of 7 per cent. per annum for eight years, be raised to pay it off. Preference to be given to holders of bonds of 1860 who may wish to let their funds remain. The president was requested to solicit the sanction of the Governor, and on receipt of his Honour's approval, the secretary is to advertise the loan.

A Chinese clerk, named Lee Cho Guan, was apprehended on the 24th August, at 1 A.M., on Beach Road, whilst endeavouring to get on board a Malay boat bound to Malacca. The man is charged with larceny of a cheque for $352.70 whilst in the employment of the Oriental Bank. On being examined before

Digitized by Google

the sitting magistrate on the 31st he readily acknowledged having committed the alleged fraud. A letter was also produced addressed to the manager of the bank, in which the prisoner stated his having committed a grievous fault. After a lengthened investigation, the magistrate ordered the defendant to take his trial at the next ensuing criminal session.

This is the first day (remarks the *Straits Times* of the 1st September), on which the toll of one quarter cent is to be collected at the foot bridge across the river. We have seen the turnstiles, and anything more inconvenient it is difficult to imagine; a portly person will find some difficulty in passing through; a Chinaman's basket, even of small dimensions, will have to be lifted over, and it is a fortunate circumstance that we have few pedestrian ladies in the settlement; for crinolines the turnstiles are simply impassable. We would recommend our stout friends to commence at once with Mr. Banting's regimen.

Captain Reid, of the British barque *Henry Darling*, arrived on the 23rd August, reports that on the 14th, when off Pulo Laut in Gaspar Straits, saw a vessel which proved to be the British ship *Eastern Light*, Captain Cruikshank, ashore on a reef off the north end of the above island. The *Henry Darling* anchored, as well as the *Heroes of Alma*, and *Langdale*, which vessels were in company. They found the vessel's fore part on the reef, but during Sunday night she slipped off and the anchor was let go in deep water. All hands, as well as men from the three ships, turned to the pumps and continued pumping twenty-four hours, during which time they had only gained one foot. On Tuesday morning the Dutch Resident from Billiton went on board, and having sent divers under the vessel, who reported a large hole in the bows, it was determined to strip the vessel and save what they could. The vessel, a large one, was coal loaded in the lower hold, and had deal planks in the 'tween decks, which probably assisted to keep her afloat. On Wednesday morning, the 17th, the *Henry Darling* left, bringing five of the crew. The vessel then had twenty-one feet of water in the hold. Capt. Cruikshank and his wife went on shore with the Dutch Resident and the remainder of the crew were distributed between the other vessels. It was intended to attempt hauling the vessel on to the reel again, but there was every chance of her sinking.

Captain Napier, of the *William Simpson*, from London, arrived on the 20th of August, reports having passed the meridian of the Cape of Good Hope on July 4th, meeting there with a quantity of boards or deals painted white, as if belonging to some vessel's deck.

The bark *Conference*, Captain Reid, arrived on the 29th of August from Birkenhead, made the passage from the meridian of the Cape in the remarkably short period of thirty-three days, although deeply laden.

From the Macassar paper we learn that the Portuguese garrison at Timor-Delhi revolted on the night of the 30th May, having had no pay for three months, and being badly fed and clad. The majority of the Council fled on foot to the interior leaving everything to its fate. A new Government was elected the next afternoon, and order is again restored.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BIRD—On the 17th Aug., at 18, Wyndham-street, Hong Kong, the wife of Shearman G. Bird, of a daughter.

FEARON—On the 29th Sept., at 4, Palace-road, Streatham-hill, the wife of Charles A. Fearon, Esq., of a daughter.

HARRIS—On the 17th Aug., at Shanghai, the wife of Capt. Harris, of the steamer Waratah, of a son.

STANFORD—On the 29th Sept., at Lowestoft, the wife of Mr. George Stanford, of Shanghai, of a daughter.

TENNENT—On the 11th Aug., at Shanghai, the wife of C. Emersen Tennent, M.D., of a daughter.

MARRIAGES.

DICKINSON—NEALE.—On the 5th Oct., at West Wickham, Kent, by the Rev. M. S. Farrer, uncle of the bride, Henry, youngest son of William Dickinson, Esq., of Wickham Hall, to Henrietta Vansittart, eldest daughter of Edward Vansittart Neale, Esq., of West Wickham.

LIFE—SULLIVAN.—On the 24th Sept., at St. George's, Hanover-square, by the Rev. William Cardall, M.A., William, eldest son of Thomas Life, Esq., of Peterborough, J.P., to Fanny Rosina, daughter of the late George Grey Sullivan, Esq., R.N., H.M.'s Consul for the Port of Amoy, in China.

ODELL—ROE.—On the 27th Sept., at the parish church, Clara, by the Rev. H. J. Flynn, M.A., assisted by the Rev. E. Newland, B.A., Thos. S. Odell, of Canton, China, eldest son of T. A. Odell, of Peckham-rye, Surrey, to Madeleine, second daughter of Thomas Roe, Esq., of Coulfinn, Queen's County, Ireland. No cards.

TIDMAN—KERSHAW.—On the 28th Sept., at the parish church of St. Leonard's, Streatham, by the Rev. Joseph Wallis, M.A., Paul Frederick Tidman, of Singapore, to Frances Amelia, daughter of the late Jas. Kershaw, Esq., M.P., of Uplands, Streatham. No cards.

DEATHS.

ADAM—On the 6th Aug., at Shanghai, Alexander, youngest son of Robert Adam, Paisley, Scotland, aged 32 years.

GIBBS—On the 7th Oct., suddenly, at his residence, Elmwood, Upper Tooting, Richard Gibbs, Esq., in the 75th year of his age.

GILLON—On the 25th July, at Shanghai, China, of Asiatic cholera, Mr. John Gillon, eldest son of the late Mr. John Gillon, jun., Leith, aged 21.

HARTWELL—On the 7th Aug., at Fuhchau, eldest daughter of Rev. C. and Mrs. L. E. Hartwell, of the American Board Mission, in the 12th year of her age.

KRAEMER—On the 5th Aug., at Shanghai, Mr. Carl Kraemer, of Wiesbaden, Grand Duchy Nassau, Germany, aged 30 years.

LEIGH—On the 21st July last, washed overboard in the China Seas, James O. Leigh, aged 26 (second son of the late Robert Leigh, of Bardon, Somerset, solicitor), chief officer of the ship Childers, from China to London.

LIMEBER—On the 22nd July, at Shanghai, of cholera, Christopher Baynes Limeber, Esq.

LORING—On the 15th Aug., at Hong Kong, William J. Loring, of Boston, U.S.A., of the firm of Messrs. A. Heard and Co., aged 38 years.

NEEDHAM—On the 5th Aug, at Hong Kong, on board the Light of the Age, from a fall, which he survived only one hour and a-half, Robert Charles Needham, cadet, aged 19, second son of the Hon. F. H. Needham.

NOKES—On the 3rd Oct., at 9, The Terrace, Kensington, Ellen Catherine, wife of George Nokes, Esq., and eldest daughter of Edward Hogg, Esq., of Norland-square, Notting-hill.

SHAW—On the 24th July, at Hankow, Frederick Shaw, aged 26.

SMITH—On the 15th Aug., at Shanghai, Mr. Henry T. Smith.

TERRY—On the 17th July, at Hankow, of dysentery, Richard Terry, in the employ of Morrison and Watt.

VALBERG—On the 30th Aug., at Singapore, William Henry Valberg, aged 67 years and 2 months.

WHEELER—On the 16th July, at Hankow, very suddenly, John Wheeler, Sergeant of Police.

WHISTLER—At Shanghai, of cholera, R. Whistler, Esq., tea inspector, Messrs. Jardine, Matheson, and Co.

EXCHANGES ON LONDON.

[For dates, see first page.]

SHIPPING INTELLIGENCE.

ARRIVALS.

At AMOY.—From London: Aug. 18, Morning Star.

At HONG KONG.—From Cardiff: Aug. 14, British Crown. From Southampton: 15, Corea (str.).

At SHANGHAI.—From Newcastle: Aug. 5, Orion. From New York: 4, Clara Babuyan. From Liverpool: 4, Truro. From Sunderland: 6, Palawan. From Shields: 13, Cleveland. From Cardiff: 15, Pembrokeshire. Fram Bordeaux: 9, Siam.

At NAGASAKI.—From England: Aug. 3, Alice.

DEPARTURES.

From FOO-CHOW.—For London: Aug. 11, Philomela.

From SHANGHAI.—For London: Aug. 5, Essex; 13, Zodiac. For Liverpool: 8, Brockham. For New York: 13, Mary.

FREIGHTS.

FOO-CHOW.—To London: £3. 10s.

SHANGHAI.—To London: Tea, £4. 10s. to £5. London and Liverpool: Cotton, £3 per ton of 50 cubic feet.

THE TRADE OF SHANGHAI.

In our issue of the 15th Sept., we noticed the statistics of the trade of the port of Shanghai for 1863, as published by the Foreign Customs Commissioners. We have now a copy of the document (borrowed by the way, and we may take this opportunity of reminding the Commissioners that we will be obliged if they will in future forward us a copy of any returns *via* Marseilles).

The returns reflect great credit on the compilers and printers, and appear to shadow forth the truth *pur et simple*. The imports for 1863 are given as imported in 2,870 vessels, square rigged and local craft, of the aggregate tonnage of 884,755.

	Value.—Taels.
Camlets	1,318,944
„ Dutch	8,190
„ Imitation	15,015

The exports are as follow :—

	Taels.
Copper Cash	.. 1,796,355
Cotton	..11,081,181
Nankeens	.. 1,618,970
Silk Piece Goods	.. 861,746
„ Raw..	.. 7,632,341
Tea, Black	.. 8,008,627
„ Green	.. 4,801,066
Sundries	.. 2,685,179
	38,485,465
At 6s. 4½d.	.. £12,227,153

The amount of revenue derivable from this trade, and collected by the Customs, was 2,526,621 taels, of which 717,104 taels was collected on 36,851 chests opium, which is not included in the above list of imports. The equivalent, at 6s. 4½d, is £894,239, which we may assume is quite double what it would be if left entirely in the hands of the Chinese.

The grand total of the trade is :—

Imports, General	£19,603,906
„ Opium	6,434,040
„ Treasure	3,671,628
	£29,709,574
General Exports	12,227,153
	£41,936,797

Of this sum the re-exports from Shanghai to other ports of imported goods was £18,578,997.

Hankow.

We have not the particulars before us, but the figures are as follow :—

	Taels.

The returns from some of the new ports, and of Canton, we have not yet seen.

CONSULAR REPORTS FROM CHINA.

(TO BE NOTICED IN OUR NEXT.)

FOREIGN OFFICE, Oct. 5.

Reports have been received from Her Majesty's Chargé d'Affaires at Peking.—1. On the trade of Canton, by Mr. D. B. Robertson, Her Majesty's Consul; 2. On the trade of Kewkiang, by Mr. Vice-Consul Hughes; and, 3. On the trade of Tamsuy Formosa, by Mr. Vice-Consul S. P. Blanne l all for the year 1863.

THE REBELLION IN CHINA.

(SATURDAY REVIEW.)

The fall of Nanking has for some time been looked forward to, alike by Imperialists and rebels, as the last act in the insurrection which has so long devastated the most fertile provinces of China; and the suicide of the Tien Wang, two days before the taking of his capital, has removed the only bond which gave even an apparent unity to the movements of the insurgents. It is curious to remember that, only a few years since, the ultimate success of the rebellion was regarded by many persons both as extremely probable in itself, and as equivalent to the establishment of Christianity throughout the Chinese empire. For this latter belief the early history of the Taipings had afforded some little excuse. Their creed was so far Christian that the first notion of it was derived from the Christian Scriptures. But it was not derived directly from this source, and the intervening medium was no better than the diseased imagination of a clever but disappointed enthusiast. Hung-siu-tsuen, the "First" (and last) "Emperor of the Taiping dynasty," seems to have been a boy of an ambitious and studious temper, prevented by the poverty of his parents from obtaining the education he desired, consequently unable, after repeated trials, to obtain the literary degree which forms the indispensable preliminary to a public career in China. On one of his numerous visits to Canton, the capital of his native province, to undergo the prescribed examination, he fell in with a native catechist who gave him some tracts containing portions of the Chinese Bible published by the Protestant missionaries. Hung-siu-tsuen is said to have just looked at these tracts and then thrown them aside; but they must have made a deeper impression upon his mind than he was conscious of at the time, or than he afterwards thought fit to acknowledge, for, in the course of a long illness two or three years later, he described a series of visions which, whether seen or invented, were evidently suggested by isolated texts of Scripture. He is led before a venerable old man, who weeps over the ingratitude of his children on the earth; he feels himself defiled, and is washed from his sins in a river; he has his side opened, and a new heart put into it; he is given a sword, a seal, and a fruit sweet to the taste: he is commissioned to turn men from the worship of false gods; he fights with devils for forty days, and is assisted in the struggle by a man of middle age, whom he calls his Elder Brother. This was in 1837, but it was not, it seems, until 1843 that his visions exercised any direct influence upon his actions. In that year he found among his books the tracts which he had brought from Canton. Their contents seemed to interpret the visions of his illness, and, accepting this discovery as a miraculous confirmation of the reality of what he had seen, he at once set about making converts. In his native province of Kwang-tung he only gained two; but on reading, in his tracts, that a prophet is not without honour save in his own country, he moved in the following year into the adjoining province of Kwan-si, where he shortly gathered round him a little religious congregation which, as it increased in numbers, became known as the God-worshippers.

The supposed holder of a Divine commission to "destroy demons," and to put down the worship of false gods, must have been early familiarised with the idea of a possible revolution in the Empire; but the actual transformation of the God-worshippers from a purely religious to a mixed religious and political organisation did not take place till some time later. The year 1850 was one of more than common political confusion in the south of China. The country was infested with disbanded troops, demoralised by their recent defeat in the war with England, with bodies of opium-smugglers, who set the revenue authorities at open defiance, and with secret societies leagued together to overthrow the reigning dynasty. To all these elements of disorder was added, in Kwan-si, a feud between two neighbouring clans—the Paulis and the Hakkas. In this the Hakkas were defeated, and in order to obtain shelter and support they joined the God-worshippers, and adopted their religious creed. This accession of numerical strength probably hastened the development of Hung-siu-tsuen's plans, while it naturally made him more formidable in the eyes of the authorities, who already viewed his followers with dislike, on account of their iconoclastic propensities. An unsuccessful attempt to arrest their leader drove the God-worshippers to take up arms. They seized and fortified a village, and presented so formidable a front to the troops sent to disperse them that the latter thought it wisest to leave them unmolested. Thus committed to open rebellion, they naturally gathered round them all the elements of disaffection in the province. During the first half of 1851 they had several skirmishes with the Imperial troops, in all of which they were victorious, and in the month of August they took the city of Yung-nan. Here the insurrection first received its permanent external form. Hung-siu-tsuen assumed the title of Tien Wang, or Heavenly King, was proclaimed Emperor of China, and nominated four of his followers as subordinate "kings," one for each quarter of the Empire. Throughout the winter Yung-nan was closely invested by the Imperialists, but on the 7th of April, 1852, the Taipings forced a passage through the besiegers, and marched northwards. City after city fell before them, and in December they captured Yoh-chow on the Yang-sze. Once launched on the great central river of China, their progress down its course was easy. The fleets of merchantmen which then crowded its waters furnished them with vessels, the great cities on its banks supplied them with money and provisions, and on the 8th of March, 1853, they sat down before Nanking. The ancient capital of the Empire held out only eleven days. It was taken on the 19th of March and the whole Tartar garrison, with their wives and children, 20,000 in number, put to the sword.

From the time of the taking of Nanking the tactics of the rebels underwent great changes. During their march from the south they had made no attempt to hold permanently any portion of the country. They had occupied the cities, provided themselves with all they stood in need of, enlisted the able-bodied male population as forced recruits, and then left each place in turn to be re-occupied by the Imperial troops, who followed at a safe distance in the rear. Now they decided upon concentrating their power upon the lower waters of the Yang-sze. They declared Nanking the Heavenly capital, and occupied with a strong force the neighbouring cities of Yang-chow and Chin-keang. It certainly seems that they committed a great blunder. If they had continued their march northwards from the Yang-sze, they might have overrun the northern half of the country as easily as they had already overrun the southern; they might have taken Peking; seized the control of the whole executive power of the Empire, and thus constituted themselves the *de facto* government of China. How easily all this might have been accomplished may be judged from the fact that a small body of 6,000 or 7,000 men which the Taiping leaders did despatch to the north was able to make its way, without any serious opposition, for 1,300 miles through the very heart of the country, and winter at Tsing-hae, less than

Digitized by Google

a hundred miles south of Peking. With the exception of this episode, the military history of the rebellion from 1853 to 1856 wears a very uniform aspect. The cities on the Yang-sze as far up as Hankow were regularly occupied for a longer or shorter period, and then pillaged and evacuated, to be again occupied in the following year. Within the walls of the Heavenly capital, however, there were formidable dissensions. As far back as 1848, Yang-sin-tshin, one of the first converts, had claimed to be specially inspired by the "Heavenly Father." His pretensions had been acknowledged with some reserve by Hung-siu-tsuen, and in the first organisation of the rebellion he had been created Eastern King. Whether Yang-sin-tshin really entertained any design of overthrowing the Tien Wang, and putting himself at the head of the Taipings, we have no means of knowing, but he certainly turned his supposed powers to a use which could hardly have been agreeable to his superior. In an ordinary way he treated him with all proper respect, but in the trances in which he assumed to be actually possessed by the "Heavenly Father" he freely reproved the Tien Wang for his errors, public and private. On some occasions, the Eastern King paid a visit to his leader during these trances, in which case he was received with all the respect due to a present divinity. On others, the inspired utterances were taken down by an attendant, and then, on recovering his senses, the Eastern King communicated to the Tien Wang what he, as the mouthpiece of the Heavenly Father, had been compelled to say of him. For some time the Heavenly King submitted patiently to this correction, and even conferred on his subordinate the honorary title of "Comforter;" but at length either the discipline became too severe, or Yang-sin-tshin's designs too apparent, and in 1856 the Eastern King was put to death, together with a large number of his immediate adherents. During the two following years the prospects of the Taipings considerably declined. In 1857 the country actually in their hands was reduced to a narrow strip of land on the southern bank of the Yang-sze, from Ngan-kin to Chin-Keang, and in 1858 they were compelled by want of supplies to abandon the latter city, which they had held since 1853.

Throughout the period between 1853 and 1859 the Imperial troops had been besieging Nanking; but, as the city was only invested on three sides, and the Taipings retained the command of the river, the latter had no difficulty in obtaining supplies, in sending out troops, or in receiving reinforcements. Towards the end of 1859, however, the Imperialists began to press forward the siege with greatly-increased vigour. They stationed their fleet above the town, and thereby cut off the rebels from Hankow and those other cities on the Yang-sze from which their supplies had been principally drawn. The Taipings at first endeavoured to draw off the besieging force by ravaging the maritime province of Che-kiang, and on the 19th of March, 1860, they took the outer city of Hang-chow. But the Tartar garrison, warned by the fate of their brethren in other cities, held out in the citadel until the 24th, when they were reinforced, and the rebels defeated with tremendous slaughter. The defenders of Nanking were by this time reduced to great extremities, and the Taipings, finding that these indirect attempts to raise the siege were of no avail, at length united their forces, and on the 3rd of May attacked, and, with the aid of a vigorous sortie from the garrison, completely routed the Imperialists. The whole besieging army was scattered, and so great was the terror inspired by the news of the defeat that three weeks later Soochow, the last stronghold of the Government in that district, and one of the most important cities of Central China, opened its gates to the rebels. During the remainder of 1860 both parties remained inactive, and in 1861 the balance between them was pretty evenly preserved. To the west of Nanking, the rebels were defeated with great loss near Hankow, and the town of Ngankin surrendered to the Imperialists; while, to the eastward, Hang-chow and Ningpo fell into the hands of the Taipings. How long affairs would have continued in this condition if the combatants had been left to themselves, it is impossible to say. Neither of the opposing armies had any important superiority over the other, many of the soldiers fought indifferently in the ranks of either, according as the immediate prospect of plunder was greatest, and on the fall of a city it was a common thing for the besiegers and garrison to make common cause in pillaging the inhabitants. Meanwhile, the bulk of the population in the disturbed districts sided with neither party, but waited in hopeless apathy till it should please Heaven to remove the scourge. But the utterly destructive and anarchical character of the rebellion had become so apparent that the English Government at length felt itself justified in departing from its neutral policy. Unless order could be restored, the ruin of the whole trade of China seemed inevitable, and, as the Taipings were wholly destitute of any capacity for social or political organisation, such a restoration could only be effected by strengthening the hands of the Imperialists. With the course of events, from the time this determination was arrived at, we are all of us familiar. English officers were allowed to take the command of Chinese troops, and the introduction of this new element completely changed the military aspect of affairs. The history of the last two years of the rebellion is little more than the record of the unvarying success of that disciplined force which, first under Ward and subsequently under Colonel Gordon, has gradually re-established the Imperial authority over the whole of those vast provinces which at one time seemed to be for ever estranged from it.

CAPTURE OF NANKING.

(Standard.)

Nanking has been taken at last by the forces of the Emperor of China. Aided by the English, the Mandarins have made an end of the Coolie Kings. We are not at all sure that we ought to congratulate ourselves on the news. With an enemy in the field against him, occupying a portion of his empire, threatening new conquests, a standing menace to his throne, the Emperor of China was wonderfully complaisant to the English, upon whom he relied for something more than sympathy in his troubles. The "foreign devils," as both factions in China politely term us, have guns, and steam ships, and money, and a knowledge of the art of war, which render them most dangerous as enemies, most valuable as allies. So long as anything was to be got from us the Mantchoo dynasty was willing to be on friendly terms with us. It was anxious to oblige us in all matters of trade, it relaxed in our favour the old exclusive laws, permitting English subjects to penetrate into the interior of China, to navigate the great rivers, to approach Peking from the Gulf of Pecheli or from the steppes of Siberia. But all this time the terrible Taipings were in arms in the southern provinces, in actual occupation of a territory as large as the British islands, with a much larger population. The Taipings were opposed to foreign trade; they were audacious and foolish enough to attack British settlements on the coast; they did their best to cement an unnatural alliance between the Tartar dynasty and its late enemies. That alliance has done all that could be expected of it. General Brown, the commander of Shanghai, has actually despatched British troops against the Taipings. Gordon and other Englishmen have been permitted to take command in the Chinese armies. To the skilful operations of this brave leader, at the head of his disciplined Chinese and his European contingent, the overthrow of the Taipings is mainly owing. In the campaign of last year Colonel Gordon reconquered one by one all the great cities and towns on the Grand Canal. His two campaigns led to the capture of Soo-chow, but the atrocities perpetrated by the Imperialists on that unfortunate city led to his abrupt retirement from the Chinese service. But the military instinct within him was strong enough, apparently, to get the better of his humane scruples. By permission of General Brown he visited the camp of the indolent Chinamen who were dawdling at the siege of Nanking. Though in an unofficial capacity, he reconnoitered the place, and gave his advice on the assault. The very terror of his name seems to have led to the suicide of the chief of the Kings and the abandonment of the last stronghold of the Taiping insurgents. For having saved an empire Colonel Gordon is rewarded, we believe, with a yellow button. The reward of the English Government may, and doubtless will be, as unsubstantial and as paltry. If it be true that they have no more to fear from these truculent insurgents and no more to expect at our hands in the shape of military assistance, we may expect a change in the attitude of this perfidious Government. The murderers of Bowlby and Brabazon can no more change their nature than an Ethiopian can change his skin. With all his shrewdness, his mechanical and philosophical acumen, it will take some millions of years of Mr. Darwin's process to develop a Chinaman up to the moral standard of Europe. It is a thousand pities that we ever interfered in the wars of this miserable people, who give way to the most brutal passions whenever an opportunity is afforded them of glutting their revenge on unarmed men and defenceless woman and children. We have too much reason to fear that the Imperialists, in taking possession of Nanking, have perpetrated the most frightful cruelties on the remnant of the population which has been left alive by the Taipings. It is true that the Taipings themselves are cruel and remorseless. Murder, and robbery, and lust, run riot where their armies have trodden. They are the locusts of China, they make a desert where they penetrate, they lay waste fenced cities into ruinous heaps. But because the Taipings have slain one-half of the population there is the less reason why we should help the Imperialists to a position which will enable them to slay the half that remains. The Taiping movement began in 1850. From the southern province of Kwangsi these hordes of robbers spread over the province of Hoonan. Passing the great central city Hankow, they launched their boats on the Yang-tze-Kiang. Five hundred miles below it they paused, and established their head-quarters in the ancient Chinese capital of Nanking. For two years they were besieged, then the siege was raised. During the war between England and the empire they were left alone. Then came the expedition on the Yang-tze where the Wangs, or Kings of Nanking, received the English graciously. Then came their attempts on Ningpo and Shanghai, which made them our enemies. They were expelled from Ningpo; they were driven to a distance from Shanghai. Then came the campaign of Gordon, the fall of Sowchow-foo. Now, after some months' respite, the capture of Nanking.

In 1860 the Taipings held undisturbed possession of half of the province of Kiang-su, to the north of the Great River, and of Che-kiang, to the south of the Yang-tze. Their territory surrounded Shanghai. They held the shores of the river, which it was so desirable to open to trade. They held the Grand Canal, the highway between the North and South. Their position was a commanding one. They have now no position at all. They are wanderers, like Cain, upon the face of the earth. The long-haired men must shave their heads and wear tails, the fanatics who believed that their chief was a person of Trinity must make-believe to be orthodox Buddhists, if they would escape decapitation. There is an end of the poor Wangs. When he heard that Gordon was coming, the "Heavenly King," the Tien-Wang, without waiting for the explosion of the mine which made a breach in his walls, took poisoned gold-leaf, gave up his boasted immortality, and resigned himself to his fate. His wives are said to have hung themselves decorously round him. As there are said to have been about 1,000 of them, the luckless harem must have wanted a great many gibbets. Wretched impostor as he may have been—and we cannot well forgive him his blasphemous parody on our religion, in which he seemed to have aimed at being a sort of Chinese Joe Smith—This Taiping King was not without his admirable qualities. His courage was extraordinary. When the Imperialist leader, Ho-chen, occupied a hill just opposite his palace at Nanking, from which, had he chosen, he might have shelled it and destroyed it, the Tien-Wang hung out the sacred banner over the walls, and sat calmly composing doxologies for the use of his followers. The Wangs between them made the beautiful old city a heap of ruins, The tombs of the Ming dynasty are a haunt of owls. A great part of the area of the city is now a desert. Its population has been decimated, and those who remain are starving. The Porcelain Tower, one of the wonders of the world, is now a mound of rubbish. Being jealous of two other Wangs, with their followers, the King first set the Northern Wang upon the Eastern Wang till he extirpated him, and then quietly made an end of the survivor and his 10,000 men. As the Porcelain Tower was supposed to have been his vantage ground, it was blown up by the Tien-Wang. The Ching-Wang, or Fighting King, has been taken prisoner. So has the Kan-Wang, a sort of Minister of the Interior, who is described by Mr. Forrest, an English visitor, as a charming entertainer, and "the most intelligent Chinaman he had ever met." We trust that the influence of the English authorities

in China may be exerted in time to save these unfortunate captives from the terrible doom with which they are threatened at the hands of the cruel Tartar Government at Peking.

CHINA AT THE BRITISH SCIENTIFIC ASSOCIATION.

At Bath the meeting of the British Association for the advancement of science terminated its proceedings with great *eclat*, and was considered the most successful congress of this gathering of *savans*, not omitting the large proportion of the fair sex present, since its foundation by Professor Phillips, thirty-four years ago. That eminent geologist described, at the sumptuous banquet given by the mayor of Bath, the feeble aspect of his bantling with paternal fondness, and declared his astonishment at the vigorous maturity to which it has arrived as something beyond his most sanguine expectations, and those of his coadjutors, Sir Roderick Murchison and others, who assisted at its birth. His election for president at the meeting next year, to be held in Birmingham, is only a just acknowledgment of his talents and eminent services in the cause of the advancement of science.

Excepting the untoward event which has deprived the world of a vigorous explorer in the prime of life, just as he had attained the acme of his career, the proceedings passed off without any *contretemps*. Among the different sections, the only one which produced any subject relating to China was in Section E, Geography and Ethnology, presided over by that veteran geographer Sir Roderick Murchison. This was at all times the most crowded and popular section of the meeting, there being seldom less than 400 and frequently upwards of 1,000 members and associates present. Among the papers read was one from the pen of A. Michie, Esq., of the firm of Lindsay and Co., Shanghai, which was read by the secretary, as that gentleman was not present, describing that part of Mongolia and Siberia through which he travelled during his recent journey from Peking to St. Petersburg. It was listened to with much interest, especially where the writer testified to the high moral and physical condition of the political convict colonies of Poles in Siberia. Murmurs were vented against the Russian Government at their tyranny over these people, and a feeling of incredulity was evinced by a portion of the audience at the favorable condition of the exiles given by Mr. Michie. When the reading of the paper was over, Sir Roderick Murchison not only vouched for the accuracy of the account, as coming from a gentleman of the highest integrity in China, but, from his own experience when travelling in Siberia some years ago, corroborated the general tenor of Mr. Michie's remarks.
